SECURITIES AND EXCHANGE COMMISSION

Washington, DC 20549

Form 19b-4

Proposed Rules

By

Public Company Accounting Oversight Board

In accordance with Rule 19b-4 under the
Securities Exchange Act of 1934

1. Text of the Proposed Rules

(a) Pursuant to the provisions of Section 107(b) of the Sarbanes-Oxley Act of 2002 (the "Act"), the Public Company Accounting Oversight Board (the "Board" or the "PCAOB") is filing with the Securities and Exchange Commission ("SEC" or "Commission") a proposed new standard, AS 3101, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*, and related amendments to PCAOB standards (collectively, the "proposed rules"). The proposed rules are attached as Exhibit A to this filing. In addition, the Board is also requesting the SEC's approval, pursuant to Section 103(a)(3)(c) of the Act, of the application of these proposed rules, other than the requirements related to critical audit matters, to audits of emerging growth companies ("EGCs"), as that term is defined in Section 3(a)(80) of the Securities Exchange Act of 1934. Section 104 of the Jumpstart Our Business Startups Act provides that any additional rules adopted by the Board subsequent to April 5, 2012, do not apply to the audits of EGSs unless the SEC "determines that the application of such additional requirements is necessary or appropriate in the public interest, after considering the protection of investors, and whether the action will promote efficiency, competition, and capital formation." *See* Exhibit 3.

(b) Not applicable.

(c) Not applicable.

2. Procedures of the Board

a) The Board approved the proposed rules, and authorized them for filing with the SEC, at its open meeting on June 1, 2017. The Board also adopted related amendments to several of its other auditing standards, including technical amendments to reflect, among other things, standards in effect as of June 30, 2017. No other action by the Board is necessary for the filing of the proposed rules.

(b) Questions regarding this rule filing may be directed *to* Martin F. Baumann, Chief Auditor (202/207-9192, baumannm@pcaobus.org); Jennifer Rand, Deputy Chief Auditor (202/207-9206, randj@pcaobus.org); Jessica Watts, Associate Chief Auditor (202/207-9376, wattsj@pcaobus.org); Karen Wiedemann, Associate Counsel (202/591-4411, wiedemannk@pcaobus.org); Elena Bozhkova, Assistant Chief Auditor (202/207-9298, bozhkovae@pcaobus.org); and Ekaterina Dizna, Assistant Chief Auditor (202/591-4125, diznae@pcaobus.org), or Jennifer G. Williams, Associate General Counsel (202/591-4173).

3. Board's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rules Change

(a) Purpose

The Board has adopted a new auditor reporting standard, AS 3101, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*, and related amendments to its auditing standards that will require the auditor to provide new information about the audit and make the auditor's report more informative and relevant to investors and other financial statement users. The final standard retains the pass/fail opinion of the existing auditor's report but makes significant changes to the existing auditor's report, including the following:

- Communication of critical audit matters—matters communicated or required to be communicated to the audit committee and that: (1) relate to accounts or disclosures that are material to the financial statements; and

(2) involved especially challenging, subjective, or complex auditor judgment;

- Disclosure of auditor tenure—the year in which the auditor began serving consecutively as the company's auditor; and
- Other improvements to the auditor's report—a number of other improvements to the auditor's report to clarify the auditor's role and responsibilities, and make the auditor's report easier to read.

The Board believes that adopting these requirements responds to the strong interest of investors for enhanced communication about the audit and is consistent with its mandate to "protect the interests of investors and further the public interest in the preparation of informative, accurate and independent audit reports."[1] *See* Exhibit 3 for additional discussion of the purpose of the project.

(b) Statutory Basis

The statutory basis for the proposed rules is Title I of the Act.

4. <u>Board's Statement on Burden on Competition</u>

Not applicable. The Board's consideration of the economic impacts of the standard and amendments are discussed in Exhibit 1.

5. <u>Board's Statement on Comments on the Proposed Rules Change Received from Members, Participants or Others</u>

The Board initially released the proposed rules for public comment on June 21, 2011, August 13, 2013 and May 11, 2016. *See* Exhibit 2(a)(A). The Board received 491

---

[1] Section 101(a) of the Sarbanes-Oxley Act of 2002 ("Sarbanes-Oxley"), 15 U.S.C. 7211(a).

written comment letters relating to its initial proposed rules. *See* Exhibits 2(a)(B) and 2(a)(C). The Board's Standing Advisory Group and Investor Advisory Group also discussed the proposed rules at meetings on November 10, 2011, November 15-16, 2012, October 16, 2013, November 13-14, 2013, June 24-25, 2014, October 20, 2014, May 18, 2016, October 27, 2016. The Board also held public roundtables on its proposed rules on September 15, 2011 and April 2-3, 2014. *See* Exhibit 2(a)(D)

6. Extension of Time Period for Commission Action

The Board does not consent to an extension of the time period specified in Section 19(b)(2) of the Securities Exchange Act of 1934.

7. Basis for Summary Effectiveness Pursuant to Section 19(b)(3) or for Accelerated Effectiveness Pursuant to Section 19(b)(2)

Not applicable.

8. Proposed Rules Based on Rules of Another Board or of the Commission

Not applicable.

July 19, 2017

**EXHIBIT A – TEXT OF THE PROPOSED RULES**

The Board adopted a new standard, The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion, to replace portions of AS 3101, Reports on Audited Financial Statements. The remaining portions of AS 3101 are redesignated as AS 3105, Departures from Unqualified Opinions and Other Reporting Circumstances. The Board also adopted related amendments to several of its other auditing standards, including technical amendments to reflect, among other things, standards in effect as of June 30, 2017.

Proposed new language is underlined. Proposed language that is deleted by the amendments is struck through. Proposed language that is being moved without being modified, such as changes to the illustrative auditor's report to conform to the required order in the new standard, is double underlined. The text of these proposed rule changes is set forth below.

* * * * *

**AS 3101, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion***

***Introduction***

.01 The auditor's report contains either an expression of opinion on the financial statements,[1] taken as a whole,[2] or an assertion that an opinion cannot be expressed. This standard establishes requirements regarding the content of the auditor's written report when the auditor expresses an unqualified opinion on the financial statements (the

[1] This standard uses the term "financial statements" as used by the U.S. Securities and Exchange Commission ("SEC") to include all notes to the statements and all related schedules. *See* Regulation S-X Rule 1-01(b), 17 CFR 210.1-01(b). This and other PCAOB standards often refer to the notes as disclosures; *see*, *e.g.*, AS 2110, *Identifying and Assessing Risks of Material Misstatement*.

[2] "Taken as a whole" applies equally to a complete set of financial statements and to an individual financial statement with appropriate disclosures.

"auditor's unqualified report").[3]

.02 The auditor is in a position to express an unqualified opinion on the financial statements when the auditor conducted an audit in accordance with the standards of the Public Company Accounting Oversight Board ("PCAOB") and concludes that the financial statements, taken as a whole, are presented fairly, in all material respects,[4] in conformity with the applicable financial reporting framework.[5]

.03 When the auditor conducts an audit of financial statements in accordance with the standards of the PCAOB, some circumstances require that the auditor express a qualified opinion, adverse opinion, or disclaimer of opinion on the financial statements and state the reasons for the departure from the unqualified opinion. AS 3105, *Departures from Unqualified Opinions and Other Reporting Circumstances*, describes reporting requirements related to departures from unqualified opinions and other reporting circumstances.

***Objectives***

.04 The objectives of the auditor when the auditor concludes that an unqualified opinion is appropriate are to:

---

[3] Paragraphs .85-.98 and Appendix C, *Special Reporting Situations*, of AS 2201, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, address the form and content of the auditor's report when the auditor performs an audit of internal control over financial reporting.

[4] AS 2815, *The Meaning of "Present Fairly in Conformity with Generally Accepted Accounting Principles,"* describes the basis for an auditor's responsibility for forming an opinion on whether the company's financial statements are presented fairly in conformity with the applicable financial reporting framework.

[5] The auditor should look to the requirements of the SEC for the company under audit with respect to the accounting principles applicable to that company.

a. Issue a written report that expresses an unqualified opinion on the financial statements and describes the basis for that opinion; and

b. Communicate in the auditor's unqualified report **critical audit matters,**[6] when required, relating to the audit of the financial statements or state that the auditor determined that there are no critical audit matters.

***The Auditor's Unqualified Report***

.05 The auditor's unqualified report includes:[7]

a. The basic elements,[8] as described in paragraphs .06-.10;

b. Communication regarding critical audit matters relating to the audit of the current period's financial statements, as described in paragraphs .11-.17, unless such requirements do not apply;

Note: Communication of critical audit matters is not required for audits of (1) brokers[9] and dealers[10] reporting under Exchange Act Rule 17a-5; (2) investment companies registered under the

---

[6] This term is defined in Appendix A, *Definitions*, and is set in **boldface type** the first time it appears.

[7] Appendix B provides an illustrative auditor's unqualified report.

[8] Laws, rules, and forms may contain requirements for auditor's reports of different types of companies. *See*, *e.g.*, Sections 30(g) and 32(a)(4) of the Investment Company Act; Regulation S-X Rule 2-02, 17 CFR 210.2-02; and Securities Exchange Act of 1934 ("Exchange Act") Rule 17a-5, 17 CFR 240.17a-5. Auditor's reports on financial statements filed with the SEC are subject to all such applicable requirements.

[9] *See* PCAOB Rule 1001(b)(iii).

[10] *See* PCAOB Rule 1001(d)(iii).

Investment Company Act of 1940 ("Investment Company Act"),[11] other than companies that have elected to be regulated as business development companies;[12] (3) employee stock purchase, savings, and similar plans;[13] and (4) emerging growth companies.[14] Auditors of these entities may consider voluntarily including communication of critical audit matters as described in this standard.

c. Other explanatory language (or an explanatory paragraph), as appropriate in the circumstances, as described in paragraphs .18-.19; and

d. Information about certain audit participants, if the auditor decides to provide this information in the auditor's report, as described in paragraph .20.

**Basic Elements**

*Title*

.06 The auditor's report must include the title, "Report of Independent Registered Public Accounting Firm."

*Addressee*

---

[11] *See* Section 8 of the Investment Company Act.

[12] *See* Section 54 of the Investment Company Act.

[13] *See* Exchange Act Rule 15d-21, 17 CFR 240.15d-21.

[14] *See* Section 3(a)(80) of the Exchange Act.

.07 The auditor's report must be addressed to the shareholders and the board of directors, or equivalents for companies not organized as corporations. The auditor's report may include additional addressees.

*Opinion on the Financial Statements*

.08 The first section of the auditor's report must include the section title "Opinion on the Financial Statements" and the following elements:

a. The name of the company whose financial statements were audited;

b. A statement identifying each financial statement and any related schedule(s) that has been audited;[15]

c. The date of, or period covered by, each financial statement and related schedule, if applicable, identified in the report;

d. A statement indicating that the financial statements, including the related notes and any related schedule(s), identified and collectively referred to in the report as the financial statements, were audited; and

e. An opinion that the financial statements present fairly, in all material respects, the financial position of the company as of the balance sheet date and the results of its operations and its cash flows for the period then

---

[15] Various SEC rules and forms require that companies file schedules of information and that those schedules be audited if the company's financial statements are audited. *See*, *e.g.*, Regulation S-X Rules 5-04, 6-10, 6A-05, and 7-05, 17 CFR 210.5-04, 210.6-10, 210.6A-05, 210.7-05. *See generally*, Regulation S-X Rule 12-01, 17 CFR 210.12-01, et seq., which address the form and content of certain SEC-required schedules.

ended in conformity with the applicable financial reporting framework.[16] The opinion should also include an identification of the applicable financial reporting framework.

*Basis for Opinion*

.09 The second section of the auditor's report must include the section title "Basis for Opinion" and the following elements:

a. A statement that the financial statements are the responsibility of the company's management;

b. A statement that the auditor's responsibility is to express an opinion on the financial statements based on the audit;

c. A statement that the audit was conducted in accordance with the standards of the PCAOB;

d. A statement that PCAOB standards require that the auditor plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud;

e. A statement that the audit included:

[16] The terms used in the Opinion on the Financial Statements section, such as financial position, results of operations and cash flows, should be modified, as appropriate, depending on the type of company and financial statements being audited.

(1) Performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks;

(2) Examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements;

(3) Evaluating the accounting principles used and significant estimates made by management; and

(4) Evaluating the overall presentation of the financial statements;

f. A statement that the auditor believes that the audit provides a reasonable basis for the auditor's opinion; and

g. A statement that the auditor is a public accounting firm registered with the PCAOB (United States) and is required to be independent with respect to the company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the SEC and the PCAOB.

*Signature, Tenure, Location, and Date*

.10 The auditor's report must include the following elements:

a. The signature of the auditor's firm;[17]

b. A statement containing the year the auditor began serving consecutively as the company's auditor;[18]

---

[17] *See* Regulation S-X Rule 2-02(a), 17 CFR 210.2-02(a).

[18] For an investment company that is part of a group of investment companies, the statement contains the year the auditor began serving consecutively as the

Note: For purposes of this subparagraph, references to the auditor include other firms that the auditor's firm has acquired or that have merged with the auditor's firm. If there is uncertainty as to the year the auditor began serving consecutively as the company's auditor, such as due to firm or company mergers, acquisitions, or changes in ownership structure, the auditor should state that the auditor is uncertain as to the year the auditor became the company's auditor and provide the earliest year of which the auditor has knowledge.

c. The city and state (or city and country, in the case of non-U.S. auditors) from which the auditor's report has been issued;[19] and

d. The date of the auditor's report.[20]

## Critical Audit Matters

*Determination of Critical Audit Matters*

.11 The auditor must determine whether there are any critical audit matters in the audit of the current period's financial statements. A critical audit matter is any matter arising from the audit of the financial statements that was communicated or required to be communicated to the audit committee and that: (1) relates to accounts or disclosures that are material to the financial statements and (2) involved especially challenging, subjective, or complex auditor judgment. Critical audit matters are not a substitute for the

auditor of any investment company in the group of investment companies. *See* Section 12(d)(1)(G)(ii) of the Investment Company Act.

[19] *See* Regulation S-X Rule 2-02(a).

[20] *See* AS 3110, *Dating of the Independent Auditor's Report.*

auditor's departure from an unqualified opinion (i.e., a qualified opinion, adverse opinion, or disclaimer of opinion on the financial statements as described in AS 3105).

.12 In determining whether a matter involved especially challenging, subjective, or complex auditor judgment, the auditor should take into account, alone or in combination, the following factors, as well as other factors specific to the audit:

a. The auditor's assessment of the risks of material misstatement, including significant risks;

b. The degree of auditor judgment related to areas in the financial statements that involved the application of significant judgment or estimation by management, including estimates with significant measurement uncertainty;

c. The nature and timing of significant unusual transactions and the extent of audit effort and judgment related to these transactions;

d. The degree of auditor subjectivity in applying audit procedures to address the matter or in evaluating the results of those procedures;

e. The nature and extent of audit effort required to address the matter, including the extent of specialized skill or knowledge needed or the nature of consultations outside the engagement team regarding the matter; and

f. The nature of audit evidence obtained regarding the matter.

Note: It is expected that, in most audits, the auditor would determine that at least one matter involved especially challenging, subjective, or complex auditor judgment.

*Communication of Critical Audit Matters*

.13 The auditor must communicate in the auditor's report critical audit matters[21] relating to the audit of the current period's financial statements or state that the auditor determined that there are no critical audit matters.

Note: When the current period's financial statements are presented on a comparative basis with those of one or more prior periods, the auditor may communicate critical audit matters relating to a prior period. This may be appropriate, for example, when (1) the prior period's financial statements are made public for the first time, such as in an initial public offering, or (2) issuing an auditor's report on the prior period's financial statements because the previously issued auditor's report could no longer be relied upon.

.14 For each critical audit matter communicated in the auditor's report the auditor must:

a. Identify the critical audit matter;

b. Describe the principal considerations that led the auditor to determine that the matter is a critical audit matter;

c. Describe how the critical audit matter was addressed in the audit; and

[21] Critical audit matters are not a substitute for required explanatory language (paragraphs) described in paragraph .18. If a matter that meets the definition of a critical audit matter also requires an explanatory paragraph, such as a matter related to going concern, the auditor may include the information required under paragraph .14 in the explanatory paragraph with a cross-reference in the critical audit matters section of the auditor's report to the explanatory paragraph. Alternatively, the auditor may include the explanatory paragraph and critical audit matter communication separately in the auditor's report and add a cross-reference between the two sections.

Note: In describing how the critical audit matter was addressed in the audit, the auditor may describe: (1) the auditor's response or approach that was most relevant to the matter; (2) a brief overview of the audit procedures performed; (3) an indication of the outcome of the audit procedures; and (4) key observations with respect to the matter, or some combination of these elements.

d. Refer to the relevant financial statement accounts or disclosures that relate to the critical audit matter.

Note 1: Language that could be viewed as disclaiming, qualifying, restricting, or minimizing the auditor's responsibility for the critical audit matters or the auditor's opinion on the financial statements is not appropriate and may not be used. The language used to communicate a critical audit matter should not imply that the auditor is providing a separate opinion on the critical audit matter or on the accounts or disclosures to which they relate.

Note 2: When describing critical audit matters in the auditor's report, the auditor is not expected to provide information about the company that has not been made publicly available by the company unless such information is necessary to describe the principal considerations that led the auditor to determine that a matter is a critical audit matter or how the matter was addressed in the audit.

*Language Preceding Critical Audit Matters in the Auditor's Report*

.15 The following language, including the section title "Critical Audit Matters," should precede critical audit matters communicated in the auditor's report:

Critical Audit Matters

The critical audit matters communicated below are matters arising from the current period audit of the financial statements that were communicated or required to be communicated to the audit committee and that: (1) relate to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

Note: If the auditor communicates critical audit matters for prior periods, the language preceding the critical audit matters should be modified to indicate the periods to which the critical audit matters relate.

.16 In situations in which the auditor determines that there are no critical audit matters, the auditor should include the following language, including the section title "Critical Audit Matters," in the auditor's report:

Critical Audit Matters

Critical audit matters are matters arising from the current period audit of the financial statements that were communicated or required to be communicated to the audit committee and that: (1) relate to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. We determined that there are no critical audit matters.

*Documentation of Critical Audit Matters*

.17 For each matter arising from the audit of the financial statements that:

a. Was communicated or required to be communicated to the audit committee; and

b. Relates to accounts or disclosures that are material to the financial statements;

the auditor must document whether or not the matter was determined to be a critical audit matter (i.e., involved especially challenging, subjective, or complex auditor judgment) and the basis for such determination.[22]

**Explanatory Language Added to the Auditor's Report**

.18 Other standards of the PCAOB require that, in certain circumstances, the auditor include explanatory language (or an explanatory paragraph) in the auditor's report, while not affecting the auditor's opinion on the financial statements. These circumstances include when:

a. There is substantial doubt about the company's ability to continue as a going concern;[23]

---

[22] Consistent with the requirements of AS 1215, *Audit Documentation*, the audit documentation should be in sufficient detail to enable an experienced auditor, having no previous connection with the engagement, to understand the determinations made to comply with the provisions of this standard.

[23] *See* AS 2415, *Consideration of an Entity's Ability to Continue as a Going Concern.*

b. The auditor decides to refer to the report of other auditors as the basis, in part, for the auditor's own report;[24]

c. There has been a change between periods in accounting principles or in the method of their application that has a material effect on the financial statements;[25]

d. There has been a change in a reporting entity, unless the change in the reporting entity results from a transaction or event, such as the creation, cessation, or complete or partial purchase or disposition of a subsidiary or other business unit;[26]

e. A material misstatement in previously issued financial statements has been corrected;[27]

f. The auditor performs an integrated audit and issues separate reports on the company's financial statements and internal control over financial reporting;[28]

---

[24] *See* paragraphs .06-.09 of AS 1205, *Part of the Audit Performed by Other Independent Auditors.*

[25] *See* paragraphs .08 and .12-.15 of AS 2820, *Evaluating Consistency of Financial Statements*.

[26] *See* AS 2820.06.

[27] *See* AS 2820.09 and .16-.17.

[28] *See* AS 2201.88. AS 2201 provides additional circumstances in which the auditor includes an explanatory paragraph. If the combined report is issued, AS 2201 notes that the auditor should consider those circumstances as well.

g. Management is required to report on the company's internal controls over financial reporting but such report is not required to be audited,[29] and the auditor has not been engaged to perform an audit of management's assessment of the effectiveness of the company's internal control over financial reporting;[30]

h. Certain circumstances relating to reports on comparative financial statements exist;[31]

i. Selected quarterly financial data required by Item 302(a) of Regulation S-K is not appropriately presented, has been omitted, or has not been reviewed;[32]

j. Supplementary information required by the applicable financial reporting framework has been omitted, the presentation of such information departs materially from the requirements of the applicable financial reporting framework, the auditor is unable to complete prescribed procedures with respect to such information, or the auditor is unable to remove substantial

---

29 *See* Item 308 of Regulation S-K.

30 *See* AS 3105.59-.60.

31 *See* AS 3105.52-.53 and .56-.58.

32 *See* paragraph .50 of AS 4105, *Reviews of Interim Financial Information.*

doubts about whether the supplementary information conforms to the requirements of the applicable financial reporting framework;[33]

k. There has been a change in an investee year end that has a material effect on the company's financial statements;[34] and

l. Other information in a document containing audited financial statements is materially inconsistent with information appearing in the financial statements.[35]

**Emphasis of a Matter**

.19 The auditor may emphasize a matter regarding the financial statements in the auditor's report ("emphasis paragraph").[36] The following are examples of matters, among others, that might be emphasized in the auditor's report:[37]

a. Significant transactions, including significant transactions with related parties;

b. Unusually important subsequent events, such as a catastrophe that has had,

[33] *See* paragraphs .03 and .08 of AS 2705, *Required Supplementary Information*.

[34] *See* paragraph .32 of AS 2503, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities*.

[35] *See* paragraph .04 of AS 2710, *Other Information in Documents Containing Audited Financial Statements*.

[36] Emphasis paragraphs are never required and are not a substitute for required critical audit matters described in paragraphs .11-.17.

[37] It is not appropriate for the auditor to use phrases such as "with the foregoing [following] explanation" in the opinion paragraph when an emphasis paragraph is included in the auditor's report.

or continues to have, a significant effect on the company's financial position;

c. Accounting matters, other than those involving a change or changes in accounting principles, affecting the comparability of the financial statements with those of the preceding period;

d. An uncertainty relating to the future outcome of significant litigation or regulatory actions; and

e. That the entity is a component of a larger business enterprise.

If the auditor adds an emphasis paragraph in the auditor's report, the auditor should use an appropriate section title.

**Information about Certain Audit Participants**

.20 The auditor may include in the auditor's report information regarding the engagement partner and/or other accounting firms participating in the audit that is required to be reported on PCAOB Form AP, *Auditor Reporting of Certain Audit Participants*.[38] If the auditor decides to provide information about the engagement partner, other accounting firms participating in the audit, or both, the auditor must disclose the following:

a. *Engagement partner*—the engagement partner's full name as required on Form AP; or

b. *Other accounting firms participating in the audit*:

---

[38] If the auditor decides to include information regarding certain audit participants in the auditor's report, the auditor should use an appropriate section title.

i. A statement that the auditor is responsible for the audits or audit procedures performed by the other public accounting firms and has supervised or performed procedures to assume responsibility for their work in accordance with PCAOB standards;

ii. *Other accounting firms individually contributing 5% or more of total audit hour*s—for each firm, (1) the firm's legal name, (2) the city and state (or, if outside the United States, city and country) of headquarters' office, and (3) percentage of total audit hours as a single number or within an appropriate range, as is required to be reported on Form AP; and

iii. *Other accounting firms individually contributing less than 5% of total audit hours*—(1) the number of other accounting firms individually representing less than 5% of total audit hours and (2) the aggregate percentage of total audit hours of such firms as a single number or within an appropriate range, as is required to be reported on Form AP.

***APPENDIX A – Definition***

A1. For purposes of this standard, the term listed below is defined as follows:

A2. Critical audit matter – Any matter arising from the audit of the financial statements that was communicated or required to be communicated to the audit committee and that: (1) relates to accounts or disclosures that are material to the financial statements and (2) involved especially challenging, subjective, or complex auditor judgment.

Note: Required audit committee communications are set forth in PCAOB standards, including AS 1301, *Communications with Audit Committees*, and Appendix B of that standard which refers to other PCAOB rules and standards.

***APPENDIX B – An Illustrative Auditor's Unqualified Report Including Critical Audit Matters***

**Report of Independent Registered Public Accounting Firm**

To the shareholders and the board of directors of X Company

Opinion on the Financial Statements

We have audited the accompanying balance sheets of X Company (the "Company") as of December 31, 20X2 and 20X1, the related statements of [*titles of the financial statements*, *e.g.*, *income*, *comprehensive income*, *stockholders' equity*, *and cash flows*], for each of the three years in the period ended December 31, 20X2, and the related notes [*and schedules*] (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company *as of* [*at*] December 31, 20X2 and 20X1, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 20X2, in conformity with [*the applicable financial reporting framework*].

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the Public Company

Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matters [if applicable]

The critical audit matters communicated below are matters arising from the current period audit of the financial statements that were communicated or required to be communicated to the audit committee and that: (1) relate to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

[*Include critical audit matters*]

[*Signature*]

We have served as the Company's auditor since [*year*].

**~~AS 3101: Reports on Audited Financial Statements~~ AS 3105, *Departures from Unqualified Opinions and Other Reporting Circumstances***

**Introduction**

~~.01 This section applies to auditors' reports issued in connection with audits[1] of historical financial statements that are intended to present financial position, results of operations, and cash flows in conformity with generally accepted accounting principles. It distinguishes the types of reports, describes the circumstances in which each is appropriate, and provides example reports.~~

~~Note: When performing an integrated audit of financial statements and internal control over financial reporting, the auditor may choose to issue a combined report or separate reports on the company's financial statements and on internal control over financial reporting. Refer to paragraphs .85-.98 of AS 2201, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, and Appendix C, *Special Reporting Situations*, of AS 2201, for direction on reporting on internal control over financial reporting. In addition, *see* AS 2201.86-.88, which includes an illustrative combined audit report.~~

~~[1] An audit, for purposes of this section, is defined as an examination of historical financial statements performed in accordance with the standards of the PCAOB in effect at the time the audit is performed. In some cases, regulatory authorities may have additional requirements applicable to entities under their jurisdiction and auditors of such entities should consider those requirements.~~

~~.02 This section does not apply to unaudited financial statements as described in AS 3320, *Association with Financial Statements*, nor does it apply to reports on incomplete financial information or other special presentations as described in AS 3305, *Special Reports*.~~

~~.03 Justification for the expression of the auditor's opinion rests on the conformity of his or her audit with the standards of the PCAOB and on the findings. This section is concerned primarily with the relationship of the requirements in paragraph .04 to the language of the auditor's report.~~

~~.04 The report shall either contain an expression of opinion regarding the financial statements, taken as a whole, or an assertion to the effect that an opinion cannot be expressed. When an overall opinion cannot be expressed, the reasons therefor should be stated. In all cases where an auditor's name is associated with financial statements, the report should contain a clear-cut indication of the character of the auditor's work, if any, and the degree of responsibility the auditor is taking.~~

~~.05 The objective of the requirements in paragraph .04 is to prevent misinterpretation of the degree of responsibility the auditor is assuming when his or her name is associated with financial statements. Reference in paragraph .04 to the financial statements "taken as a whole" applies equally to a complete set of financial statements and to an individual financial statement (for example, to a balance sheet) for one or more periods presented. (Paragraph .65 discusses the requirements in paragraph .04 as it applies to comparative~~

~~financial statements.) The auditor may express an unqualified opinion on one of the financial statements and express a qualified or adverse opinion or disclaim an opinion on another if the circumstances warrant.~~

~~.06 The auditor's report is customarily issued in connection with an entity's basic financial statements—balance sheet, statement of income, statement of retained earnings and statement of cash flows. Each financial statement audited should be specifically identified in the introductory paragraph of the auditor's report. If the basic financial statements include a separate statement of changes in stockholders' equity accounts, it should be identified in the introductory paragraph of the report but need not be reported on separately in the opinion paragraph since such changes are part of the presentation of financial position, results of operations, and cash flows.~~

**~~The Auditor's Standard Report~~**

~~.07 The auditor's standard report states that the financial statements present fairly, in all material respects, an entity's financial position, results of operations, and cash flows in conformity with generally accepted accounting principles. This conclusion may be expressed only when the auditor has formed such an opinion on the basis of an audit performed in accordance with the standards of the PCAOB.~~

~~.08 The auditor's standard report identifies the financial statements audited in an opening (introductory) paragraph, describes the nature of an audit in a scope paragraph, and expresses the auditor's opinion in a separate opinion paragraph. The basic elements of the report are the following:~~

~~*a*. A title that includes the word *independent*~~[3]

~~[3] This section does not require a title for an auditor's report if the auditor is not independent. *See* AS 3320 for guidance on reporting when the auditor is not independent.~~

~~*b*. A statement that the financial statements identified in the report were audited~~

~~*c*. A statement that the financial statements are the responsibility of the Company's management[4] and that the auditor's responsibility is to express an opinion on the financial statements based on his or her audit~~

~~[4] In some instances, a document containing the auditor's report may include a statement by management regarding its responsibility for the presentation of the financial statements. Nevertheless, the auditor's report should state that the financial statements are management's responsibility.~~

~~*d*. A statement that the audit was conducted in accordance with the standards of the PCAOB and an identification of the United States of America as the country of origin of those standards (for example, the standards of the Public Company Accounting Oversight Board (United States))~~

~~*e*. A statement that those standards require that the auditor plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement~~

~~*f*. A statement that an audit includes~~

~~(1) Examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements~~

~~(2) Assessing the accounting principles used and significant estimates made by management~~

~~(3) Evaluating the overall financial statement presentation[5]~~

~~[5] Paragraphs .03 and .04 of AS 2815, *The Meaning of "Present Fairly in Conformity with Generally Accepted Accounting Principles,"* discuss the auditor's evaluation of the overall presentation of the financial statements.~~

~~*g*. A statement that the auditor believes that his or her audit provides a reasonable basis for his or her opinion~~

~~*h*. An opinion as to whether the financial statements present fairly, in all material respects, the financial position of the Company as of the balance sheet date and the results of its operations and its cash flows for the period then ended in conformity with generally accepted accounting principles. The opinion should include an identification of the United States of America as the country of origin of those accounting principles (for example, accounting principles generally accepted in the United States of America or U.S. generally accepted accounting principles)~~

~~*i*. The manual or printed signature of the auditor's firm~~

~~*j*. The city and state (or city and country, in the case of non-U.S. auditors) from which the auditor's report has been issued[6A]~~

~~[6A] *See* SEC Rule 2-02(a) of Regulation S-X, 17 C.F.R. § 210.2-02(a).~~

~~*k*. The date[7] of the audit report~~

~~[7] For guidance on dating the auditor's report, *see* AS 3110, *Dating of the Independent Auditor's Report*.~~

~~The form of the auditor's standard report on financial statements covering a single year is as follows:~~

~~Report of Independent Registered Public Accounting Firm~~

~~We have audited the accompanying balance sheet of X Company as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.~~

~~We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.~~

~~In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 20XX, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.~~

~~[*Signature*]~~

~~[*City and State or Country*]~~

~~[*Date*]~~

~~The form of the auditor's standard report on comparative financial statements~~[8] ~~is as follows:~~

~~Report of Independent Registered Public Accounting Firm~~

~~We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.~~

~~We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.~~

~~In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.~~

~~[*Signature*]~~

~~[*City and State or Country*]~~

~~[*Date*]~~

~~[8] If statements of income, retained earnings, and cash flows are presented on a comparative basis for one or more prior periods, but the balance sheet(s) as of the end of one (or more) of the prior period(s) is not presented, the phrase "for the years then ended" should be changed to indicate that the auditor's opinion applies to each period for which statements of income, retained earnings, and cash flows are presented, such as "for each of the three years in the period ended [date of latest balance sheet]."~~

~~*l.* When performing an integrated audit of financial statements and internal control over financial reporting, if the auditor issues separate reports on the company's financial statements and on internal control over financial reporting, the following paragraph should be added to the auditor's report on the company's financial statements:~~

> ~~We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of X Company's internal control over financial reporting as of December 31, 20X3, based on [identify control criteria] and our report dated [date of report, which should be the same as the date of the report on the financial statements] expressed [include nature of opinions].~~

~~.09 The report may be addressed to the company whose financial statements are being audited or to its board of directors or stockholders. A report on the financial statements of an unincorporated entity should be addressed as circumstances dictate, for example, to the partners, to the general partner, or to the proprietor. Occasionally, an auditor is retained to audit the financial statements of a company that is not a client; in such a case,~~

~~the report is customarily addressed to the client and not to the directors or stockholders of the company whose financial statements are being audited.~~

~~.09A The auditor may include in the auditor's report information regarding the engagement partner and/or other accounting firms participating in the audit that is required to be reported on PCAOB Form AP, *Auditor Reporting of Certain Audit Participants*. If the auditor decides to provide information about the engagement partner, other accounting firms participating in the audit, or both, the auditor must disclose the following:~~

~~a. *Engagement partner* – the engagement partner's full name as required on Form AP; or~~

~~b. *Other accounting firms participating in the audit*:~~

~~i. A statement that the auditor is responsible for the audits or audit procedures performed by the other public accounting firms and has supervised or performed procedures to assume responsibility for their work in accordance with PCAOB standards;~~

~~ii. *Other accounting firms individually contributing 5% or more of total audit hours* – for each firm, (1) the firm's legal name, (2) the city and state (or, if outside the United States, city and country) of headquarters' office, and (3) percentage of total audit hours as a single number or within an appropriate range, as is required to be reported on Form AP; and~~

~~iii. *Other accounting firms individually contributing less than 5% of total audit hours* – (1) the number of other accounting firms~~

~~individually representing less than 5% of total audit hours and (2) the aggregate percentage of total audit hours of such firms as a single number or within an appropriate range, as is required to be reported on Form AP.~~

.01~~0~~ The auditor's report contains either an expression of opinion on the financial statements, taken as a whole,[1] or an assertion that an opinion cannot be expressed. This standard ~~section~~ ~~also~~ discusses the circumstances that may require the auditor to depart from the ~~standard~~ auditor's unqualified report[2] and provides reporting guidance in the following circumstances: ~~This section is organized by type of opinion that the auditor may express in each of the various circumstances presented; this section describes what is meant by the various audit opinions:~~

- ~~*Unqualified opinion*. An unqualified opinion states that the financial statements present fairly, in all material respects, the financial position, results of operations, and cash flows of the entity in conformity with generally accepted accounting principles. This is the opinion expressed in the standard report discussed in paragraph .08.~~
- ~~*Explanatory language added to the auditor's standard report*. Certain circumstances, while not affecting the auditor's unqualified opinion on the financial statements, may require that the auditor add an explanatory paragraph (or other explanatory language) to his or her report.~~
- *Qualified opinion*. A qualified opinion states that, except for the effects of the matter(s) to which the qualification relates, the financial statements

present fairly, in all material respects, the financial position, results of operations, and cash flows of the entity in conformity with generally accepted accounting principles. *See* paragraphs .02 -.39.

- *Adverse opinion.* An adverse opinion states that the financial statements do not present fairly the financial position, results of operations, or cash flows of the entity in conformity with generally accepted accounting principles. *See* paragraphs .40 -.43.
- *Disclaimer of opinion.* A disclaimer of opinion states that the auditor does not express an opinion on the financial statements. *See* paragraphs .44 -.47.

~~These opinions are discussed in greater detail throughout the remainder of this section.~~ This standard also discusses other reporting circumstances, such as reports on comparative financial statements.

[1] "Taken as a whole" applies equally to a complete set of financial statements and to an individual financial statement with appropriate disclosures.

[2] AS 3101, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*, establishes requirements for the auditor regarding the content of the auditor's written report when the auditor expresses an unqualified opinion on the financial statements (the "auditor's unqualified report"), including when explanatory language is added. Paragraphs .85–.98 of AS 2201, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, and Appendix C, *Special Reporting Situations*, of AS 2201 address the form and content of the auditor's report when the auditor performs an audit of internal control over financial reporting. *See also* AS 2201.87, which includes an illustrative combined audit report.

**~~Explanatory Language Added to the Auditor's Standard Report~~**

~~.11 Certain circumstances, while not affecting the auditor's unqualified opinion, may require that the auditor add an explanatory[9] paragraph (or other explanatory language) to the standard report.[10] These circumstances include:~~

~~[9] Unless otherwise required by the provisions of this section, an explanatory paragraph may precede or follow the opinion paragraph in the auditor's report.~~

~~[10] *See* footnote 3.~~

~~*a*. The auditor's opinion is based in part on the report of another auditor (paragraphs .12 and .13).~~

~~*b*. There is substantial doubt about the entity's ability to continue as a going concern.[11]~~

~~[11] AS 2415, *Consideration of an Entity's Ability to Continue as a Going Concern*, describes the auditor's responsibility to evaluate whether there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time and, when applicable, to consider the adequacy of financial statement disclosure and to include an explanatory paragraph in the report to reflect his or her conclusions.~~

~~*c*. There has been a material change between periods in accounting principles or in the method of their application (paragraphs .17A through .17E).~~

~~*d*. A material misstatement in previously issued financial statements has been corrected (paragraphs .18A through .18C).~~

~~*e*. Certain circumstances relating to reports on comparative financial statements exist (paragraphs .68, .69, and .72 through .74).~~

~~*f*. Selected quarterly financial data required by SEC Regulation S-K has been omitted or has not been reviewed. (*See* paragraph .50 of AS 4105, *Reviews of Interim Financial Information*.)~~

~~*g*. Supplementary information required by the Financial Accounting Standards Board (FASB), the Governmental Accounting Standards Board (GASB), or the Federal Accounting Standards Advisory Board (FASAB) has been omitted, the presentation of such information departs materially from FASB, GASB, or FASAB guidelines, the auditor is unable to complete prescribed procedures with respect to such information, or the auditor is unable to remove substantial doubts about whether the supplementary information conforms to FASB, GASB, or FASAB guidelines. (*See* paragraph .02 of AS 2705, *Required Supplementary Information*.)~~

~~*h*. Other information in a document containing audited financial statements is materially inconsistent with information appearing in the financial statements. (*See* paragraph .04 of AS 2710, *Other Information in Documents Containing Audited Financial Statements*.)~~

~~In addition, the auditor may add an explanatory paragraph to emphasize a matter regarding the financial statements (paragraph .19).~~

~~**Opinion Based in Part on Report of Another Auditor**~~

~~.12 When the auditor decides to make reference to the report of another auditor as a basis, in part, for his or her opinion, he or she should disclose this fact in the introductory paragraph of his or her report and should refer to the report of the other auditor in expressing his or her opinion. These references indicate division of responsibility for~~

~~performance of the audit. (*See* AS 1205, *Part of the Audit Performed by Other Independent Auditors*.)~~

~~.13 An example of a report indicating a division of responsibility follows:~~

<u>~~Report of Independent Registered Public Accounting Firm~~</u>

~~We have audited the consolidated balance sheets of ABC Company and subsidiaries as of December 31, 20X2 and 20X1, and the related consolidated statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits. We did not audit the financial statements of B Company, a wholly-owned subsidiary, which statements reflect total assets of $_______ and $________ as of December 31, 20X2 and 20X1, respectively, and total revenues of $_______ and $_______ for the years then ended. Those statements were audited by other auditors whose report has been furnished to us, and our opinion, insofar as it relates to the amounts included for B Company, is based solely on the report of the other auditors.~~

~~We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the~~

> ~~overall financial statement presentation. We believe that our audits and the report of other auditors provide a reasonable basis for our opinion.~~
>
> ~~In our opinion, based on our audits and the report of other auditors, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of ABC Company and subsidiaries as of December 31, 20X2 and 20X1, and the results of their operations and their cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.~~

~~[.14-.15] [Paragraphs deleted.]~~

~~**Lack of Consistency**~~

~~.16 The auditor should recognize the following matters relating to the consistency of the company's financial statements in the auditor's report if those matters have a material effect on the financial statements:~~

- ~~*a*. A change in accounting principle.~~
- ~~*b*. An adjustment to correct a misstatement in previously issued financial statements.~~

~~**Change in Accounting Principle**~~

~~.17A As discussed in AS 2820, *Evaluating Consistency of Financial Statements*, the auditor should evaluate a change in accounting principle to determine whether (1) the newly adopted accounting principle is a generally accepted accounting principle, (2) the method of accounting for the effect of the change is in conformity with generally accepted accounting principles, (3) the disclosures related to the accounting change are adequate, and (4) the company has justified that the alternative accounting principle is~~

~~preferable.~~[~~12~~] ~~A change in accounting principle that has a material effect on the financial statements should be recognized in the auditor's report on the audited financial statements through the addition of an explanatory paragraph following the opinion paragraph. If the auditor concludes that the criteria in this paragraph have been met, the explanatory paragraph in the auditor's report should include identification of the nature of the change and a reference to the note disclosure describing the change.~~

[~~12~~] ~~The issuance of an accounting pronouncement that requires use of a new accounting principle, interprets an existing principle, expresses a preference for an accounting principle, or rejects a specific principle is sufficient justification for a change in accounting principle, as long as the change in accounting principle is made in accordance with the hierarchy of generally accepted accounting principles.~~ ~~*See*~~ ~~FASB Statement 154, paragraph 14.~~

~~.17B Following is an example of an explanatory paragraph for a change in accounting principle resulting from the adoption of a new accounting pronouncement:~~

> ~~As discussed in Note X to the financial statements, the company has changed its method of accounting for [~~~~*describe accounting method change*~~~~] in [~~~~*year(s) of financial statements that reflect the accounting method change*~~~~] due to the adoption of [~~~~*name of accounting pronouncement*~~~~].~~

~~.17C Following is an example of an explanatory paragraph when the company has made a change in accounting principle other than a change due to the adoption of a new accounting pronouncement:~~

> ~~As discussed in Note X to the financial statements, the company has elected to change its method of accounting for [~~~~*describe accounting method change*~~~~] in [~~~~*year(s) of financial statements that reflect the accounting method change*~~~~].~~

~~.17D The explanatory paragraph relating to a change in accounting principle should be included in reports on financial statements in the year of the change and in subsequent years until the new accounting principle is applied in all periods presented. If the accounting change is accounted for by retrospective application to the financial statements of all prior periods presented, the additional paragraph is needed only in the year of the change.~~

~~.17E If the auditor concludes that the criteria in paragraph .17A for a change in accounting principle are not met, the auditor should consider the matter to be a departure from generally accepted accounting principles and, if the effect of the change in accounting principle is material, issue a qualified or adverse opinion.~~

~~**Correction of a Material Misstatement in Previously Issued Financial Statements**~~

~~.18A Correction of a material misstatement in previously issued financial statements should be recognized in the auditor's report through the addition of an explanatory paragraph following the opinion paragraph.[13] The explanatory paragraph should include (1) a statement that the previously issued financial statements have been restated for the correction of a misstatement in the respective period and (2) a reference to the company's disclosure of the correction of the misstatement. Following is an example of an appropriate explanatory paragraph when there has been a correction of a material misstatement in previously issued financial statements.~~

> ~~As discussed in Note X to the financial statements, the 20X2 financial statements have been restated to correct a misstatement.~~

~~[13] The directions in paragraphs .68-.69 apply when comparative financial statements are presented and the opinion on the prior-period financial statements differs from the opinion previously expressed.~~

~~.18B This type of explanatory paragraph in the auditor's report should be included in reports on financial statements when the related financial statements are restated to correct the prior material misstatement. The paragraph need not be repeated in subsequent years.~~

~~.18C The accounting pronouncements generally require certain disclosures relating to restatements to correct a misstatement in previously issued financial statements. If the financial statement disclosures are not adequate, the auditor should address the lack of disclosure as discussed beginning at paragraph .41.~~

**~~Emphasis of a Matter~~**

~~.19 In any report on financial statements, the auditor may emphasize a matter regarding the financial statements. Such explanatory information should be presented in a separate paragraph of the auditor's report. Phrases such as "with the foregoing [following] explanation" should not be used in the opinion paragraph if an emphasis paragraph is included in the auditor's report. Emphasis paragraphs are never required; they may be added solely at the auditor's discretion. Examples of matters the auditor may wish to emphasize are~~

- ~~That the entity is a component of a larger business enterprise.~~
- ~~That the entity has had significant transactions with related parties.~~
- ~~Unusually important subsequent events.~~

~~—Accounting matters, other than those involving a change or changes in accounting principles, affecting the comparability of the financial statements with those of the preceding period.~~

**Departures From Unqualified Opinions**

**Qualified Opinions**

.02~~0~~ Certain circumstances may require a qualified opinion. A qualified opinion states that, *except for* the effects of the matter to which the qualification relates, the financial statements present fairly, in all material respects, financial position, results of operations, and cash flows in conformity with generally accepted accounting principles. Such an opinion is expressed when—

*a.* There is a lack of sufficient appropriate evidential matter or there are restrictions on the scope of the audit that have led the auditor to conclude that he or she cannot express an unqualified opinion and he or she has concluded not to disclaim an opinion (paragraphs .05~~22~~–.17~~34~~).

*b.* The auditor believes, on the basis of his or her audit, that the financial statements contain a departure from generally accepted accounting principles, the effect of which is material, and he or she has concluded not to express an adverse opinion (paragraphs .18~~35~~–.39~~57~~).

.03 When the auditor expresses a qualified opinion, the auditor's report must include the same basic elements and communication of critical audit matters, if requirements of critical audit matters apply, as would be required in an unqualified auditor's report under AS 3101.

.04~~21~~ When the auditor expresses a qualified opinion, he or she should disclose all of the substantive reasons for the qualified opinion in one or more separate ~~explanatory~~ paragraph(s) ~~preceding~~ immediately following the opinion paragraph of the auditor's report. The auditor should also include, in the opinion paragraph, the appropriate qualifying language and a reference to the ~~explanatory~~ paragraph that discloses all of the substantive reasons for the qualified opinion. A qualified opinion should include the word *except* or *exception* in a phrase such as *except for* or *with the exception of*. Phrases such as *subject to* and *with the foregoing explanation* are not clear or forceful enough and should not be used. Since accompanying notes are part of the financial statements, wording such as *fairly presented, in all material respects, when read in conjunction with Note 1* is likely to be misunderstood and should not be used.

Note: The auditor should refer to AS 3101 to determine if the matter for which the auditor qualified the opinion is also a critical audit matter.

**Scope Limitations**

.05~~22~~ The auditor can determine that he or she is able to express an unqualified opinion only if the audit has been conducted in accordance with the standards of the PCAOB and if he or she has therefore been able to apply all the procedures he considers necessary in the circumstances. Restrictions on the scope of the audit, whether imposed by the client or by circumstances, such as the timing of his or her work, the inability to obtain sufficient appropriate evidential matter, or an inadequacy in the accounting records, may require the auditor to qualify his or her opinion or to disclaim an opinion. In such instances, the reasons for the auditor's qualification of opinion or disclaimer of opinion should be described in the report.

.06~~23~~ The auditor's decision to qualify his or her opinion or disclaim an opinion because of a scope limitation depends on his or her assessment of the importance of the omitted procedure(s) to his or her ability to form an opinion on the financial statements being audited. This assessment will be affected by the nature and magnitude of the potential effects of the matters in question and by their significance to the financial statements. If the potential effects relate to many financial statement items, this significance is likely to be greater than if only a limited number of items is involved.

.07~~24~~ Common restrictions on the scope of the audit include those applying to the observation of physical inventories and the confirmation of accounts receivable by direct communication with debtors.[3~~14~~] Another common scope restriction involves accounting for long-term investments when the auditor has not been able to obtain audited financial statements of an investee. Restrictions on the application of these or other audit procedures to important elements of the financial statements require the auditor to decide whether he or she has examined sufficient appropriate evidential matter to permit him or her to express an unqualified or qualified opinion, or whether he or she should disclaim an opinion. When restrictions that significantly limit the scope of the audit are imposed by the client, ordinarily the auditor should disclaim an opinion on the financial statements.

[3~~14~~] Circumstances such as the timing of the work may make it impossible for the auditor to accomplish these procedures. In this case, if the auditor is able to satisfy himself or herself as to inventories or accounts receivable by applying alternative procedures, there is no significant limitation on the scope of the work, and the report need not include a reference to the omission of the procedures or the use of alternative procedures. It is important to understand, however, that AS 2510, *Auditing Inventories*, states that "it will always be necessary for the auditor to make, or observe, some physical counts of the inventory and apply appropriate tests of intervening transactions."

.08~~25~~ When a qualified opinion results from a limitation on the scope of the audit or an insufficiency of evidential matter, the ~~situation~~ auditor's report should ~~be~~ describe~~d~~ the basis for departure from an unqualified opinion in a~~n~~ ~~explanatory~~ separate paragraph ~~preceding~~ immediately following the opinion paragraph and refer~~red~~ to that description in both the ~~scope~~ Basis for Opinion section and opinion paragraph~~s~~ of the auditor's report. It is not appropriate for the scope of the audit to be explained in a note to the financial statements, since the description of the audit scope is the responsibility of the auditor and not that of the client.

.09~~26~~ When an auditor qualifies his or her opinion because of a scope limitation, the wording in the opinion paragraph should indicate that the qualification pertains to the possible effects on the financial statements and not to the scope limitation itself. Wording such as "In our opinion, except for the above-mentioned limitation on the scope of our audit . . ." bases the exception on the restriction itself, rather than on the possible effects on the financial statements and, therefore, is unacceptable. An example of a qualified opinion related to a scope limitation concerning an investment in a foreign affiliate (assuming the effects of the limitation are such that the auditor has concluded that a disclaimer of opinion is not appropriate) follows:

Report of Independent Registered Public Accounting Firm

To the shareholders and the board of directors of X Company

~~[*Same first paragraph as the standard report*]~~

Opinion on the Financial Statements

We have audited the accompanying balance sheets of X Company (the "Company") as of December 31, 20X2 and 20X1, the related statements of [*titles of the financial statements, e.g., income, comprehensive income, stockholders' equity, and cash flows*] for each of the years then ended, and the related notes [*and schedules*] (collectively referred to as the "financial statements"). In our opinion, except for the effects of ~~such~~ the adjustments, if any, as might have been determined to be necessary had we been able to examine evidence regarding the foreign affiliate investment and earnings, as described below, the financial statements ~~referred to in the first paragraph above~~ present fairly, in all material respects, the financial position of ~~X~~ the Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

We were unable to obtain audited financial statements supporting the Company's investment in a foreign affiliate stated at $_______ and $_______ at December 31, 20X2 and 20X1, respectively, or its equity in earnings of that affiliate of $_______ and $_______, which is included in net income for the years then ended as described in Note X to the financial statements; nor were we able to satisfy ourselves as to the carrying value of the investment in the foreign affiliate or the equity in its earnings by other auditing procedures.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

Except as discussed ~~in the following paragraph~~ above, we conducted our audits in accordance with the standards of the PCAOB ~~Public Company Accounting Oversight Board (United States)~~. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. ~~An audit~~ Such procedures included~~s~~ examining, on a test basis, evidence ~~supporting~~ regarding the amounts and disclosures in the financial statements. ~~An~~ Our audits also include~~s~~d ~~assessing~~ evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements ~~presentation~~. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matters [if applicable]

*[Include critical audit matters]*

[*Signature*]

We have served as the Company's auditor since [*year*].

[*City and State or Country*]

[*Date*]

.10~~27~~ ***Other scope limitations.*** Sometimes, notes to financial statements may contain unaudited information, such as pro forma calculations or other similar disclosures. If the unaudited information (for example, an investor's share, material in amount, of an investee's earnings recognized on the equity method) is such that it should be subjected to auditing procedures in order for the auditor to form an opinion with respect to the financial statements taken as a whole, the auditor should apply the procedures he or she deems necessary to the unaudited information. If the auditor has not been able to apply the procedures he or she considers necessary, the auditor should qualify his or her opinion or disclaim an opinion because of a limitation on the scope of the audit.

.11~~28~~ If, however, these disclosures are not necessary to fairly present the financial position, operating results, or cash flows on which the auditor is reporting, such disclosures may be identified as *unaudited* or as *not covered by the auditor's report*. For example, the pro forma effects of a business combination or of a subsequent event may be labelled unaudited. Therefore, while the event or transaction giving rise to the disclosures in these circumstances should be audited, the pro forma disclosures of that event or transaction would not be. The auditor should be aware, however, that AS 3110, *Dating of the Independent Auditor's Report*, states that, if the auditor is aware of a material subsequent event that has occurred after the completion of fieldwork but before issuance of the report that should be disclosed, the auditor's only options are to dual date the report or date the report as of the date of the subsequent event and extend the procedures for review of subsequent events to that date. Labelling the note unaudited is not an acceptable alternative in these circumstances.

.12~~29~~ ***Uncertainties and scope limitations.*** A matter involving an uncertainty is one that is expected to be resolved at a future date, at which time conclusive evidential matter concerning its outcome would be expected to become available. Uncertainties include, but are not limited to, contingencies covered by Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 5, *Accounting for Contingencies*, and matters related to estimates covered by Statement of Position 94-6, *Disclosure of Certain Significant Risks and Uncertainties*.

.13~~30~~ Conclusive evidential matter concerning the ultimate outcome of uncertainties cannot be expected to exist at the time of the audit because the outcome and related evidential matter are prospective. In these circumstances, management is responsible for estimating the effect of future events on the financial statements, or determining that a reasonable estimate cannot be made and making the required disclosures, all in accordance with generally accepted accounting principles, based on management's analysis of existing conditions. An audit includes an assessment of whether the evidential matter is sufficient to support management's analysis. Absence of the existence of information related to the outcome of an uncertainty does not necessarily lead to a conclusion that the evidential matter supporting management's assertion is not sufficient. Rather, the auditor's judgment regarding the sufficiency of the evidential matter is based on the evidential matter that is, or should be, available. If, after considering the existing conditions and available evidence, the auditor concludes that sufficient evidential matter supports management's assertions about the nature of a matter involving an uncertainty and its presentation or disclosure in the financial statements, an unqualified opinion ordinarily is appropriate.

.14~~31~~ If the auditor is unable to obtain sufficient evidential matter to support management's assertions about the nature of a matter involving an uncertainty and its presentation or disclosure in the financial statements, the auditor should consider the need to express a qualified opinion or to disclaim an opinion because of a scope limitation. A qualification or disclaimer of opinion because of a scope limitation is appropriate if sufficient evidential matter related to an uncertainty does or did exist but was not available to the auditor for reasons such as management's record retention policies or a restriction imposed by management.

.15~~32~~ Scope limitations related to uncertainties should be differentiated from situations in which the auditor concludes that the financial statements are materially misstated due to departures from generally accepted accounting principles related to uncertainties. Such departures may be caused by inadequate disclosure concerning the uncertainty, the use of inappropriate accounting principles, or the use of unreasonable accounting estimates. Paragraphs .28~~45~~ to .32~~49~~ provide guidance to the auditor when financial statements contain departures from generally accepted accounting principles related to uncertainties.

.16~~33~~ ***Limited reporting engagements.*** The auditor may be asked to report on one basic financial statement and not on the others. For example, he or she may be asked to report on the balance sheet and not on the statements of income, retained earnings or cash flows.

These engagements do not involve scope limitations if the auditor's access to information underlying the basic financial statements is not limited and if the auditor applies all the procedures he considers necessary in the circumstances; rather, such engagements involve limited reporting objectives.

.17~~34~~ An auditor may be asked to report on the balance sheet only. In this case, the auditor may express an opinion on the balance sheet only. An example of an unqualified opinion on a balance-sheet-only audit follows (the report assumes that the auditor has been able to satisfy himself or herself regarding the consistency of application of accounting principles):

Report of Independent Registered Public Accounting Firm

To the shareholders and the board of directors of X Company

Opinion on the Financial Statement

We have audited the accompanying balance sheet of X Company (the "Company") as of December 31, 20XX, and the related notes [*and schedules*] (collectively referred to as the "financial statement"). In our opinion, ~~the balance sheet referred to above~~ the financial statement presents fairly, in all material respects, the financial position of ~~X~~ the Company as of December 31, 20XX, in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

This financial statement is the responsibility of the Company's management. Our responsibility is to express an opinion on this financial statement based on our audit. We are a public accounting firm registered with the Public Company

Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB ~~Public Company Accounting Oversight Board (United States)~~. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the ~~balance sheet~~ financial statement is free of material misstatement, whether due to error or fraud. Our audit included performing procedures to assess the risks of material misstatement of the financial statement, whether due to error or fraud, and performing procedures that respond to those risks. ~~An audit~~ Such procedures included~~s~~ examining, on a test basis, evidence ~~supporting~~ regarding the amounts and disclosures in the ~~balance sheet~~ financial statement. ~~An~~ Our audit also ~~includes~~ included assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall ~~balance sheet~~ presentation of the financial statement. We believe that our audit of the ~~balance sheet~~ financial statement provides a reasonable basis for our opinion.

Critical Audit Matters [if applicable]

*[Include critical audit matters]*

We have served as the Company's auditor since [*year*].

[*City and State or Country*]

[*Date*]

**Departure From a Generally Accepted Accounting Principle**

.18~~35~~ When financial statements are materially affected by a departure from generally accepted accounting principles and the auditor has audited the statements in accordance with the standards of the PCAOB, he or she should express a qualified (paragraphs .19~~36~~ through .39~~57~~) or an adverse (paragraphs .40~~58~~ through .43~~60~~) opinion. The basis for such opinion should be stated in the report.

.19~~36~~ In deciding whether the effects of a departure from generally accepted accounting principles are sufficiently material to require either a qualified or adverse opinion, one factor to be considered is the dollar magnitude of such effects. However, the concept of materiality does not depend entirely on relative size; it involves qualitative as well as quantitative judgments. The significance of an item to a particular entity (for example, inventories to a manufacturing company), the pervasiveness of the misstatement (such as whether it affects the amounts and presentation of numerous financial statement items), and the effect of the misstatement on the financial statements taken as a whole are all factors to be considered in making a judgment regarding materiality.

.20~~37~~ When the auditor expresses a qualified opinion, he or she should disclose, in a separate ~~explanatory~~ paragraph(s) ~~preceding~~ immediately following the opinion paragraph ~~of the report~~, all of the substantive reasons that have led him or her to conclude that there has been a departure from generally accepted accounting principles. Furthermore, the opinion paragraph ~~of the report~~ should include the appropriate qualifying language and a reference to the ~~explanatory~~ paragraph(s) that describe the substantive reasons for the qualified opinion.

.21~~38~~ The ~~explanatory~~ paragraph(s) immediately following the opinion paragraph that describe the substantive reasons that led the auditor to conclude that there has been a departure from generally accepted accounting principles should also disclose the principal effects of the subject matter of the qualification on financial position, results of operations, and cash flows, if practicable.[4]~~[15]~~ If the effects are not reasonably determinable, the report should so state. If such disclosures are made in a note to the financial statements, the ~~explanatory~~ paragraph(s) that describe the substantive reasons for the qualified opinion may be shortened by referring to it.

[4]~~[15]~~ In this context, practicable means that the information is reasonably obtainable from management's accounts and records and that providing the information in the report does not require the auditor to assume the position of a preparer of financial information. For example, if the information can be obtained from the accounts and records without the auditor substantially increasing the effort that would normally be required to complete the audit, the information should be presented in the report.

.22~~39~~ An example of a report in which the opinion is qualified because of the use of an accounting principle at variance with generally accepted accounting principles follows (assuming the effects are such that the auditor has concluded that an adverse opinion is not appropriate):

Report of Independent Registered Public Accounting Firm

To the shareholders and the board of directors of X Company

Opinion on the Financial Statements

We have audited the accompanying balance sheets of X Company (the "Company") as of December 31, 20X2 and 20X1, the related statements of [*titles of the financial statements, e.g., income, comprehensive income, stockholders' equity, and cash flows*] for each of the years then ended, and the related notes [*and schedules*] (collectively referred to as the "financial statements"). In our opinion, except for the effects of not capitalizing certain lease obligations as discussed in the ~~preceding~~ following paragraph, the financial statements referred to above present fairly, in all material respects, the financial position of ~~X~~ the Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

The Company has excluded, from property and debt in the accompanying balance sheets, certain lease obligations that, in our opinion, should be capitalized in order to conform with accounting principles generally accepted in the United States of America. If these lease obligations were capitalized, property would be increased by $_______ and $_______, long-term debt by $_______ and $_______, and retained earnings by $_______ and $_______ as of December 31, 20X2 and 20X1, respectively. Additionally, net income would be increased (decreased) by $_______ and $_______ and earnings per share would be increased (decreased) by $_______ and $_______, respectively, for the years then ended.

Basis for Opinion

[~~*Same first and second paragraphs as the standard report*~~ *Same basic elements as the Basis for Opinion section of the auditor's unqualified report in AS 3101*]

Critical Audit Matters [if applicable]

*[Include critical audit matters]*

[*Signature*]

We have served as the Company's auditor since [*year*].

[*City and State or Country*]

[*Date*]

.23~~40~~ If the pertinent facts are disclosed in a note to the financial statements, a separate paragraph (~~preceding~~ immediately following the opinion paragraph) of the auditor's report in the circumstances illustrated in paragraph .22~~39~~ might read as follows:

> As more fully described in Note X to the financial statements, the Company has excluded certain lease obligations from property and debt in the accompanying balance sheets. In our opinion, accounting principles generally accepted in the United States of America require that such obligations be included in the balance sheets.

.24~~41~~ ***Inadequate disclosure.*** Information essential for a fair presentation in conformity with generally accepted accounting principles should be set forth in the financial statements (which include the related notes). When such information is set forth elsewhere in a report to shareholders, or in a prospectus, proxy statement, or other similar report, it should be referred to in the financial statements. If the financial statements, including accompanying notes, fail to disclose information that is required by generally accepted accounting principles, the auditor should express a qualified or adverse opinion because of the departure from those principles and should provide the information in the report, if practicable,[5~~16~~] unless its omission from the auditor's report is recognized as appropriate by a specific PCAOB standard.

[5~~16~~] *See* footnote 4~~15~~.

.25~~42~~ Following is an example of a report qualified for inadequate disclosure (assuming the effects are such that the auditor has concluded an adverse opinion is not appropriate):

Report of Independent Registered Public Accounting Firm

To the shareholders and the board of directors of X Company

Opinion on the Financial Statements

We have audited the accompanying balance sheets of X Company (the "Company") as of December 31, 20X2 and 20X1, the related statements of [*titles of the financial statements, e.g., income, comprehensive income, stockholders' equity, and cash flows*] for each of the years then ended, and the related notes [*and schedules*] (collectively referred to as the "financial statements"). In our opinion, except for the omission of the information discussed in the ~~preceding~~ following paragraph, . . .

The Company's financial statements do not disclose [*describe the nature of the omitted disclosures*]. In our opinion, disclosure of this information is required by accounting principles generally accepted in the United States of America.

Basis for Opinion

[~~*Same first and second paragraphs as the standard report*~~ *Same basic elements as the Basis for Opinion section of the auditor's unqualified report in AS 3101*]

Critical Audit Matters [if applicable]

*[Include critical audit matters]*

[*Signature*]

We have served as the Company's auditor since [*year*].

[*City and State or Country*]

[*Date*]

.26~~43~~ If a company issues financial statements that purport to present financial position and results of operations but omits the related statement of cash flows, the auditor will normally conclude that the omission requires qualification of his opinion.

.27~~44~~ ~~The auditor is not required to prepare a basic financial statement (for example, a statement of cash flows for one or more periods) and include it in the report~~ ~~i~~If the company's management declines to present ~~the statement~~ a basic financial statement (for example, a statement of cash flows for one or more periods)~~.~~ ~~Accordingly, in these cases~~, the auditor should ordinarily qualify the report in the following manner:

Report of Independent Registered Public Accounting Firm

To the shareholders and the board of directors of X Company

Opinion on the Financial Statements

We have audited the accompanying balance sheets of X Company (the "Company") as of December 31, 20X2 and 20X1, and the related statements of operations and stockholders' equity for each of the years then ended, and the related notes [*and schedules*] (collectively referred to as the "financial statements").~~income and retained earnings for the years then ended.~~ In our opinion, except that the omission of a statement of cash flows results in an incomplete presentation as explained in the ~~preceding~~ following paragraph, the financial statements ~~referred to above~~ present fairly, in all material respects, the financial position of ~~X~~ the Company as of December 31, 20X2 and 20X1, and the results of its operations for the years then ended in conformity with accounting principles generally accepted in the United States of America.

The Company declined to present a statement of cash flows for the years ended December 31, 20X2 and 20X1. Presentation of such statement summarizing the Company's operating, investing, and financing activities is required by accounting principles generally accepted in the United States of America.

Basis for Opinion

[~~*Same second paragraph as the standard report*~~ *Same basic elements as the Basis for Opinion section of the auditor's unqualified report in AS 3101*]

Critical Audit Matters [if applicable]

*[Include critical audit matters]*

[*Signature*]

We have served as the Company's auditor since [*year*].

[*City and State or Country*]

[*Date*]

.28~~45~~ ***Departures from generally accepted accounting principles involving risks or uncertainties, and materiality considerations.*** Departures from generally accepted accounting principles involving risks or uncertainties generally fall into one of the following categories:

- Inadequate disclosure (paragraphs .29~~46~~ and .30~~47~~)
- Inappropriate accounting principles (paragraph .31~~48~~)
- Unreasonable accounting estimates (paragraph .32~~49~~)

.29~~46~~ If the auditor concludes that a matter involving a risk or an uncertainty is not adequately disclosed in the financial statements in conformity with generally accepted accounting principles, the auditor should express a qualified or an adverse opinion.

.30~~47~~ The auditor should consider materiality in evaluating the adequacy of disclosure of matters involving risks or uncertainties in the financial statements in the context of the financial statements taken as a whole. The auditor's consideration of materiality is a matter of professional judgment and is influenced by his or her perception of the needs of a reasonable person who will rely on the financial statements. Materiality judgments involving risks or uncertainties are made in light of the surrounding circumstances. The auditor evaluates the materiality of reasonably possible losses that may be incurred upon the resolution of uncertainties both individually and in the aggregate. The auditor performs the evaluation of reasonably possible losses without regard to his or her evaluation of the materiality of known and likely misstatements in the financial statements.

.31~~48~~ In preparing financial statements, management estimates the outcome of certain types of future events. For example, estimates ordinarily are made about the useful lives of depreciable assets, the collectibility of accounts receivable, the realizable value of inventory items, and the provision for product warranties. FASB Statement No. 5, *Accounting for Contingencies*, paragraphs 23 and 25, describes situations in which the inability to make a reasonable estimate may raise questions about the appropriateness of the accounting principles used. If, in those or other situations, the auditor concludes that the accounting principles used cause the financial statements to be materially misstated, he or she should express a qualified or an adverse opinion.

.32~~49~~ Usually, the auditor is able to satisfy himself or herself regarding the reasonableness of management's estimate of the effects of future events by considering various types of evidential matter, including the historical experience of the entity. If the auditor concludes that management's estimate is unreasonable (*see* paragraph .13 of AS 2810, *Evaluating Audit Results*) and that its effect is to cause the financial statements to be materially misstated, he or she should express a qualified or an adverse opinion.

~~[.50]~~

.33~~51~~ ***Departures from generally accepted accounting principles related to changes in accounting principle***. Paragraph .07 ~~.17A~~ of AS 2820, *Evaluating Consistency of Financial Statements*, ~~states~~ includes the criteria for evaluating a change in accounting principle. If the auditor concludes that the criteria have not been met, he or she should consider that circumstance to be a departure from generally accepted accounting principles and, if the effect of the accounting change is material, should issue a qualified or adverse opinion.

.34~~52~~ The accounting standards indicate that a company may make a change in accounting principle only if it justifies that the allowable alternative accounting principle is preferable. If the company does not provide reasonable justification that the alternative accounting principle is preferable, the auditor should consider the accounting change to be a departure from generally accepted accounting principles and, if the effect of the change in accounting principle is material, should issue a qualified or adverse opinion. The following is an example of a report qualified because a company did not provide reasonable justification that an alternative accounting principle is preferable:

Report of Independent Registered Public Accounting Firm

To the shareholders and the board of directors of X Company

Opinion on the Financial Statements

We have audited the accompanying balance sheets of X Company (the "Company") as of December 31, 20X2 and 20X1, the related statements of [*titles of the financial statements, e.g., income, comprehensive income, stockholders' equity, and cash flows*] for each of the years then ended, and the related notes [*and schedules*] (collectively referred to as the "financial statements"). In our opinion, except for the change in accounting principle discussed in the ~~preceding~~ following paragraph, the financial statements ~~referred to above~~ present fairly, in all material respects, the financial position of ~~X~~ the Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

As disclosed in Note X to the financial statements, the Company adopted, in 20X2, the first-in, first-out method of accounting for its inventories, whereas it previously used the last-in, first-out method. Although use of the first-in, first-out method is in conformity with accounting principles generally accepted in the United States of America, in our opinion the Company has not provided reasonable justification that this accounting principle is preferable as required by those principles.[6]~~[17]~~

Basis for Opinion

[~~*Same first and second paragraphs as the standard report*~~ *Same basic elements as the Basis for Opinion section of the auditor's unqualified report in AS 3101*]

Critical Audit Matters [if applicable]

*[Include critical audit matters]*

[*Signature*]

We have served as the Company's auditor since [*year*].

[*City and State or Country*]

[*Date*]

6~~17~~ Because this paragraph included in the example presented contains all of the information required in a~~n~~ ~~explanatory~~ separate paragraph on consistency, an ~~separate~~ explanatory paragraph (immediately following the opinion paragraph) as required by ~~paragraphs .17A thorough .17E of this section~~ AS 2820.08 and .12-.15 is not necessary in this instance. A separate paragraph that identifies the change in accounting principle would be required if the substance of the disclosure did not fulfill the requirements outlined in these paragraphs.

.35~~53~~ Whenever an accounting change results in an auditor expressing a qualified or adverse opinion on the conformity of financial statements with generally accepted accounting principles for the year of change, the auditor should consider the possible effects of that change when reporting on the entity's financial statements for subsequent years, as discussed in paragraphs .36~~54~~ through .39~~57~~.

.36~~54~~ If the financial statements for the year of such change are presented and reported on with a subsequent year's financial statements, the auditor's report should disclose his or her reservations with respect to the statements for the year of change.

.37~~55~~ If an entity has adopted an accounting principle that is not a generally accepted accounting principle, its continued use might have a material effect on the statements of a subsequent year on which the auditor is reporting. In this situation, the independent auditor should express either a qualified opinion or an adverse opinion, depending on the materiality of the departure in relation to the statements of the subsequent year.

.38~~56~~ If an entity accounts for the effect of a change prospectively when generally accepted accounting principles require restatement or the inclusion of the cumulative effect of the change in the year of change, a subsequent year's financial statements could improperly include a charge or credit that is material to those statements. This situation also requires that the auditor express a qualified or an adverse opinion.

.39~~57~~ If the auditor issues a qualified or adverse opinion because the company has not justified that an allowable accounting principle adopted in an accounting change is preferable, as described in paragraph .34~~52~~, the auditor should continue to express that opinion on the financial statements for the year of change as long as those financial statements are presented and reported on. However, the auditor's qualified or adverse opinion relates only to the accounting change and does not affect the status of a newly adopted principle as a generally accepted accounting principle. Accordingly, while expressing a qualified or adverse opinion for the year of change, the independent auditor's opinion regarding the subsequent years' statements need not express a qualified or adverse opinion on the use of the newly adopted principle in subsequent periods.

**Adverse Opinions**

.40 When the auditor expresses an adverse opinion, the auditor's report must include the opinion as described in paragraph .41 and the same other basic elements as would be required in an unqualified auditor's report under AS 3101, modified appropriately.

> Note: The requirements as to critical audit matters described in AS 3101 do not apply when the auditor expresses an adverse opinion.

.41~~58~~ An adverse opinion states that the financial statements do not present fairly the financial position or the results of operations or cash flows in conformity with generally accepted accounting principles. Such an opinion is expressed when, in the auditor's judgment, the financial statements taken as a whole are not presented fairly in conformity with generally accepted accounting principles.

.42~~59~~ When the auditor expresses an adverse opinion, he or she should disclose in a separate ~~explanatory~~ paragraph(s) ~~preceding~~ immediately following the opinion paragraph of the report (*a*) all the substantive reasons for his or her adverse opinion, and (*b*) the principal effects of the subject matter of the adverse opinion on financial position, results of operations, and cash flows, if practicable.[7~~18~~] If the effects are not reasonably determinable, the report should so state.[8~~19~~]

[7~~18~~] *See* footnote 4~~15~~.

[8~~19~~] When the auditor expresses an adverse opinion, he or she should also consider the need for an explanatory paragraph under the circumstances identified in ~~paragraph 11, subsection (*b*), (*c*), (*d*), and (*e*) of~~ AS 3101.18 ~~this section~~.

.43~~60~~ When an adverse opinion is expressed, the opinion paragraph should include a direct reference to a separate paragraph that discloses the basis for the adverse opinion.~~,~~ An example of this is ~~as~~ shown below:

Report of Independent Registered Public Accounting Firm

To the shareholders and the board of directors of X Company

Opinion on the Financial Statements

We have audited the accompanying balance sheets of X Company (the "Company") as of December 31, 20X2 and 20X1, the related statements of [*titles of the financial statements, e.g., income, comprehensive income, stockholders' equity, and cash flows*] for each of the years then ended, and the related notes [*and schedules*] (collectively referred to as the "financial statements"). In our opinion, because of the effects of the matters discussed in the ~~preceding~~ following paragraphs, the financial statements ~~referred to above~~ do not present fairly, in conformity with accounting principles generally accepted in the United States of America, the financial position of ~~X~~ the Company as of December 31, 20X2 and 20X1, or the results of its operations or its cash flows for the years then ended. As discussed in Note X to the financial statements, the Company carries its property, plant and equipment accounts at appraisal values, and provides depreciation on the basis of such values. Further, the Company does not provide for income taxes with respect to differences between financial income and taxable income arising because of the use, for income tax purposes, of the installment method of reporting gross profit from certain types of sales. Accounting principles generally accepted in the United States of America require that property, plant and equipment be stated at an amount not in excess of cost, reduced by depreciation based on such amount, and that deferred income taxes be provided. Because of the departures from accounting principles generally accepted in the United States of America identified above, as of December 31, 20X2 and 20X1, inventories have been increased $_______ and $_______ by inclusion in manufacturing overhead of depreciation in excess of that based on cost; property, plant and equipment, less accumulated depreciation, is carried at $_______ and $_______ in excess of an amount based on the cost to the Company; and deferred income taxes of $_______ and $_______ have not been recorded; resulting in an increase of $_______ and $_______ in retained earnings and in appraisal surplus of $_______ and $_______, respectively. For the years ended December 31, 20X2 and 20X1, cost of goods sold has been increased $_______ and $_______, respectively, because of the effects of the depreciation accounting referred to above and deferred income taxes of $_______ and $_______ have not been provided, resulting in an increase in net income of $_______ and $_______, respectively.

Basis for Opinion

[~~*Same first and second paragraphs as the standard report*~~ *Same basic elements as the Basis for Opinion section of the auditor's unqualified report in AS 3101*]

[*Signature*]

We have served as the Company's auditor since [*year*].

[*City and State or Country*]

[*Date*]

**Disclaimer of Opinion**

.44~~61~~ A disclaimer of opinion states that the auditor does not express an opinion on the financial statements. An auditor may decline to express an opinion whenever he or she is unable to form or has not formed an opinion as to the fairness of presentation of the financial statements in conformity with generally accepted accounting principles. If the auditor disclaims an opinion, the auditor's report should give all of the substantive reasons for the disclaimer.

.45~~62~~ A disclaimer is appropriate when the auditor has not performed an audit sufficient in scope to enable him or her to form an opinion on the financial statements.~~[209]~~ A disclaimer of opinion should not be expressed because the auditor believes, on the basis of his or her audit, that there are material departures from generally accepted accounting principles (*see* paragraphs .18~~35~~ through .39~~57~~). When disclaiming an opinion because of a scope limitation, the auditor should state in a separate paragraph or paragraphs all of the substantive reasons for the disclaimer. He or she should state that the scope of the audit was not sufficient to warrant the expression of an opinion. The auditor should not identify the procedures that were performed nor include the paragraph describing the characteristics of an audit (that is, the scope paragraph of the auditor's standard report); to do so may tend to overshadow the disclaimer. In addition, the auditor should also disclose any other reservations he or she has regarding fair presentation in conformity with generally accepted accounting principles.

[~~20~~9] AS 3320.05 provides guidance to an accountant who is associated with the financial statements of a public entity, but has not audited such statements.

.46 When the auditor disclaims an opinion, the auditor's report must include the basic elements as would be required in an unqualified auditor's report under AS 3101, modified as follows:

a. The first section of the auditor's report must include the section title "Disclaimer of Opinion on the Financial Statements" and the following elements:

   (1) The name of the company whose financial statements the auditor was engaged to audit;

   (2) A statement identifying each financial statement and any related schedule(s) that the auditor was engaged to audit;

b. The second section of the auditor's report must include the title "Basis for Disclaimer of Opinion."

c. Elements in paragraphs .09b-f of AS 3101 should be omitted.

Note: The requirements as to critical audit matters described in AS 3101 do not apply when the auditor disclaims an opinion.

.47~~63~~ An example of a report disclaiming an opinion resulting from an inability to obtain sufficient appropriate evidential matter because of the scope limitation follows:

Report of Independent Registered Public Accounting Firm

To the shareholders and the board of directors of X Company

Disclaimer of Opinion on the Financial Statements

We were engaged to audit the accompanying balance sheets of X Company (the "Company") as of December 31, 20X2 and 20X1, and the related statements of [*titles of the financial statements, e.g., income, comprehensive income, stockholders' equity, and cash flows*]~~income, retained earnings, and cash flows for the years then ended~~, and the related notes [*and schedules*] (collectively referred to as the "financial statements").[10]~~[21]~~ ~~Since~~ As described in the following paragraph, because the Company did not take physical inventories and we were not able to apply other auditing procedures to satisfy ourselves as to inventory quantities and the cost of property and equipment, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion on the financial statements ~~the scope of our work was not sufficient to enable us to express~~, and we do not express, an opinion on these financial statements.

The Company did not make a count of its physical inventory in 20X2 or 20X1, stated in the accompanying financial statements at $________ as of December 31, 20X2, and at $_________ as of December 31, 20X1. Further, evidence supporting the cost of property and equipment acquired prior to December 31, 20X1, is no longer available. The Company's records do not permit the application of other auditing procedures to inventories or property and equipment.

Basis for Disclaimer of Opinion

These financial statements are the responsibility of the Company's management. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

[~~*Second paragraph of standard report should be omitted*~~]

[*Signature*]

We have served as the Company's auditor since [*year*].

[*City and State or Country*]

[*Date*]

[10~~21~~] The wording in the ~~first paragraph of the auditor's standard report is changed in a disclaimer of opinion because of a scope limitation. The~~ first sentence now states that "we were engaged to audit" rather than "we have audited" since, because of the scope limitation, the auditor was not able to perform an audit in accordance with the standards of the PCAOB. In addition, the ~~last~~ sentence ~~of the first paragraph is also deleted, because of the scope limitation, to eliminate the~~ that references ~~to~~ the auditor's responsibility to express an opinion is deleted.

**Piecemeal Opinions**

.48~~64~~ Piecemeal opinions (expressions of opinion as to certain identified items in financial statements) should not be expressed when the auditor has disclaimed an opinion or has expressed an adverse opinion on the financial statements *taken as a whole* because piecemeal opinions tend to overshadow or contradict a disclaimer of opinion or an adverse opinion.

**Reports on Comparative Financial Statements**

.49~~65~~ The report shall ~~Paragraph .04 requires that an auditor's report contain~~ either contain an expression of opinion regarding the financial statements *taken as a whole* or an assertion to the effect that an opinion cannot be expressed. Reference ~~in paragraph .04~~ to the financial statements *taken as a whole* applies not only to the financial statements of the current period but also to those of one or more prior periods that are presented on a comparative basis with those of the current period. Therefore, a continuing auditor[11]~~[22]~~ should update[12]~~[23]~~ the report on the individual financial statements of the one or more prior periods presented on a comparative basis with those of the current period.[13]~~[24]~~ Ordinarily, the auditor's report on comparative financial statements should be dated as of the date of completion of fieldwork for the most recent audit. (*See* AS 3110.01.)

[11]~~[22]~~ A *continuing auditor* is one who has audited the financial statements of the current period and of one or more consecutive periods immediately prior to the current period. If one firm of independent auditors merges with another firm and the new firm becomes the auditor of a former client of one of the former firms, the new firm may accept responsibility and express an opinion on the financial statements for the prior period(s), as well as for those of the current period. In such circumstances, the new firm should follow the guidance in paragraphs .49~~65~~ through .53~~69~~ and may indicate in its report or signature that a merger took place and may name the firm of independent auditors that was merged with it. If the new firm decides not to express an opinion on the prior-period financial statements, the guidance in paragraphs .54~~70~~ through .58~~74~~ should be followed.

[12]~~[23]~~ An updated report on prior-period financial statements should be distinguished from a reissuance of a previous report (*see* AS 3110.06 through .08), since in issuing an updated report the continuing auditor considers information that he or she has become aware of during his or her audit of the current-period financial statements (*see* paragraph .52~~68~~) and because an updated report is issued in conjunction with the auditor's report on the current-period financial statements.

[13]~~[24]~~ A continuing auditor need not report on the prior-period financial statements if only summarized comparative information of the prior period(s) is presented. For example, entities such as state and local governmental units frequently present total-all-funds information for the prior period(s) rather than information by individual funds because of space limitations or to avoid cumbersome or confusing formats. Also, not-for-profit organizations frequently present certain information for the prior period(s) in total rather than by net asset class. In some circumstances, the client may request the auditor to express an opinion on the prior period(s) as well as the current period. In those circumstances, the auditor should consider whether the information included for the prior period(s) contains sufficient detail to constitute a fair presentation in conformity with generally accepted accounting principles. In most cases, this will necessitate including additional columns or separate detail by fund or net asset class, or the auditor would need to modify his or her report.

.50~~66~~ During the audit of the current-period financial statements, the auditor should be alert for circumstances or events that affect the prior-period financial statements presented (*see* paragraph .52~~68~~) or the adequacy of informative disclosures concerning those statements. (*See* AS 2810.31.) In updating his or her report on the prior-period financial statements, the auditor should consider the effects of any such circumstances or events coming to his or her attention.

**Different Reports on Comparative Financial Statements Presented**

.51~~67~~ Since the auditor's report on comparative financial statements applies to the individual financial statements presented, an auditor may express a qualified or adverse opinion, disclaim an opinion, or include an explanatory paragraph with respect to one or more financial statements for one or more periods, while issuing a different report on the other financial statements presented. Following are examples of reports on comparative financial statements ~~(excluding the standard introductory and scope paragraphs, where applicable)~~ with different reports on one or more financial statements presented.

**~~Standard~~ The Auditor's Unqualified Report on the Prior-Year Financial Statements and a Qualified Opinion on the Current-Year Financial Statements**

Report of Independent Registered Public Accounting Firm

To the shareholders and the board of directors of ABC Company

Opinion on the Financial Statements

We have audited the accompanying balance sheets of ABC Company (the "Company") as of December 31, 20X2 and 20X1, the related statements of [*titles of the financial statements, e.g., income, comprehensive income, stockholders' equity, and cash flows*] for each of the years then ended, and the related notes [*and schedules*] (collectively referred to as the "financial statements"). In our opinion, except for the effects on the 20X2 financial statements of not capitalizing certain lease obligations as described in the ~~preceding~~ following paragraph, the financial statements ~~referred to above~~ present fairly, in all material respects, the financial position of ~~ABC~~ the Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

The Company has excluded, from property and debt in the accompanying 20X2 balance sheet, certain lease obligations that were entered into in 20X2 which, in our opinion, should be capitalized in order to conform with accounting principles generally accepted in the United States of America. If these lease obligations were capitalized, property would be increased by $_______, long-term debt by $_______, and retained earnings by $_______ as of December 31, 20X2, and net income and earnings per share would be increased (decreased) by $_______ and $_______, respectively, for the year then ended.

Basis for Opinion

[~~*Same first and second paragraphs as the standard report*~~ *Same basic elements as the Basis for Opinion section of the auditor's unqualified report in AS 3101*]

Critical Audit Matters [if applicable]

*[Include critical audit matters]*

[*Signature*]

We have served as the Company's auditor since [*year*].

[*City and State or Country*]

[*Date*]

**~~Standard~~ The Auditor's Unqualified Report on the Current-Year Financial Statements With a Disclaimer of Opinion on the Prior-Year Statements of Income, Retained Earnings, and Cash Flows**

Report of Independent Registered Public Accounting Firm

To the shareholders and the board of directors of ABC Company

Opinion on the Financial Statements

We have audited the accompanying balance sheets of ABC Company (the "Company") as of December 31, 20X2 and 20X1, and the related statements of [*titles of the financial statements, e.g., income, comprehensive income, stockholders' equity, and cash flows*] for the year ended December 31, 20X2, and the related notes [*and schedules*] (collectively referred to as the "financial statements"). In our opinion, the balance sheets of ~~ABC~~ the Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the year ended December 31, 20X2, present fairly, in all material respects, the financial position of ~~ABC~~ the Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the year ended December 31, 20X2, in conformity with accounting principles generally accepted in the United States of America. Because of the matter discussed in the ~~preceding~~ following paragraph, ~~the scope of our work was not sufficient to enable us to express~~ we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion on the results of operations and cash flows, and we do not express, an opinion on the results of operations and cash flows for the year ended December 31, 20X1.

We did not observe the taking of the physical inventory as of December 31, 20X0, since that date was prior to our appointment as auditors for the Company, and we were unable to satisfy ourselves regarding inventory quantities by means of other auditing procedures. Inventory amounts as of December 31, 20X0, enter into the determination of net income and cash flows for the year ended December 31, 20X1.[14]~~[25]~~

Basis for Opinion [~~Same first paragraph as the standard report~~]

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

Except as explained ~~in the following paragraph~~ above, we conducted our audits in accordance with the standards of the PCAOB ~~Public Company Accounting Oversight Board (United States)~~. Those standards require that we plan and perform our audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. ~~An audit~~ Such procedures ~~includes~~ included examining, on a test basis, evidence ~~supporting~~ regarding the amounts and disclosures in the financial statements. ~~An~~ Our audits also ~~includes~~ ~~assessing~~ included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements ~~presentation~~. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matters [if applicable]

*[Include critical audit matters]*

[*Signature*]

We have served as the Company's auditor since [*year*].

[*City and State or Country*]

[*Date*]

[14]~~25~~ It is assumed that the independent auditor has been able to satisfy himself or herself as to the consistency of application of generally accepted accounting principles. *See* AS 2820 for a discussion of consistency.

**Opinion on Prior-Period Financial Statements Different From the Opinion Previously Expressed**

.52~~68~~ If, during the current audit, an auditor becomes aware of circumstances or events that affect the financial statements of a prior period, he or she should consider such matters when updating his or her report on the financial statements of the prior period. For example, if an auditor has previously qualified his or her opinion or expressed an adverse opinion on financial statements of a prior period because of a departure from generally accepted accounting principles, and the prior-period financial statements are restated in the current period to conform with generally accepted accounting principles, the auditor's updated report on the financial statements of the prior period should indicate that the statements have been restated and should express an unqualified opinion with respect to the restated financial statements.

.53~~69~~ If, in an updated report, the opinion is different from the opinion previously expressed on the financial statements of a prior period, the auditor should disclose all the substantive reasons for the different opinion in a separate explanatory paragraph(s) ~~preceding~~ immediately following the opinion paragraph of his or her report. The explanatory paragraph(s) should disclose (*a*) the date of the auditor's previous report, (*b*) the type of opinion previously expressed, (*c*) if applicable, a statement that the previously issued financial statements have been restated for the correction of a misstatement in the respective period, (*d*) the circumstances or events that caused the auditor to express a different opinion, and (*e*) if applicable, a reference to the company's disclosure of the correction of the misstatement, and (*f*) the fact that the auditor's updated opinion on the financial statements of the prior period is different from his or her previous opinion on those statements. The following is an example of ~~an explanatory~~ a report ~~paragraph~~ that may be appropriate when an auditor issues an updated report on the financial statements of a prior period that contains an opinion different from the opinion previously expressed:

Report of Independent Registered Public Accounting Firm

To the shareholders and the board of directors of X Company

Opinion on the Financial Statements

We have audited the accompanying balance sheets of X Company (the "Company") as of December 31, 20X2 and 20X1, the related statements of [*titles of the financial statements, e.g., income, comprehensive income, stockholders' equity, and cash flows*] for each of the years then ended, and the related notes [*and schedules*] (collectively referred to as the "financial statements"). In our opinion, the financial statements ~~referred to above~~ present fairly, in all material respects, the financial position of ~~X~~ the Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

In our report dated March 1, 20X2, we expressed an opinion that the 20X1 financial statements did not fairly present financial position, results of operations, and cash flows in conformity with accounting principles generally accepted in the United States of America because of two departures from such principles: (1) the Company carried its property, plant, and equipment at appraisal values, and provided for depreciation on the basis of such values, and (2) the Company did not provide for deferred income taxes with respect to differences between income for financial reporting purposes and taxable income. As described in Note X, the Company has changed its method of accounting for these items and restated its 20X1 financial statements to conform with accounting principles generally accepted in the United States of America. Accordingly, our present opinion on the 20X1 financial statements, as presented herein, is different from that expressed in our previous report. [15]~~[26]~~

Basis for Opinion

[~~*Same first and second paragraphs as the standard report*~~ *Same basic elements as the Basis for Opinion section of the auditor's unqualified report in AS 3101*]

Critical Audit Matters [if applicable]

[*Include critical audit matters*]

[*Signature*]

We have served as the Company's auditor since [*year*].

[*City and State or Country*]

[*Date*]

[15]~~[26]~~ *See* footnote 6~~17~~.

**Report of Predecessor Auditor**

.54~~70~~ A predecessor auditor ordinarily would be in a position to reissue his or her report on the financial statements of a prior period at the request of a former client if he or she is able to make satisfactory arrangements with the former client to perform this service and if he or she performs the procedures described in paragraph .55~~71~~.[16]~~[27]~~

[16]~~[27]~~ It is recognized that there may be reasons why a predecessor auditor's report may not be reissued and this section does not address the various situations that could arise.

**Predecessor Auditor's Report Reissued**

.55~~71~~ Before reissuing (or consenting to the reuse of) a report previously issued on the financial statements of a prior period, when those financial statements are to be presented on a comparative basis with audited financial statements of a subsequent period, a predecessor auditor should consider whether his or her previous report on those statements is still appropriate. Either the current form or manner of presentation of the financial statements of the prior period or one or more subsequent events might make a predecessor auditor's previous report inappropriate. Consequently, a predecessor auditor should (*a*) read the financial statements of the current period, (*b*) compare the prior-period financial statements that he or she reported on with the financial statements to be presented for comparative purposes, and (*c*) obtain representation letters from management of the former client and from the successor auditor. The representation letter from management of the former client should state (*a*) whether any information has come to management's attention that would cause them to believe that any of the previous representations should be modified, and (*b*) whether any events have occurred subsequent to the balance-sheet date of the latest prior-period financial statements reported on by the predecessor auditor that would require adjustment to or disclosure in those financial statements.[17~~28~~] The representation letter from the successor auditor should state whether the successor's audit revealed any matters that, in the successor's opinion, might have a material effect on, or require disclosure in, the financial statements reported on by the predecessor auditor. Also, the predecessor auditor may wish to consider the matters described in paragraphs ~~AS 1205~~.10 through .12 of AS 1205, *Part of the Audit Performed* *by Other Independent Auditors.* However, the predecessor auditor should not refer in his or her reissued report to the report or work of the successor auditor.

[17] ~~28~~ *See* AS 2805, *Management Representations*, appendix C [paragraph .18], "Illustrative Updating Management Representation Letter."

.56 ~~72~~ A predecessor auditor who has agreed to reissue his or her report may become aware of events or transactions occurring subsequent to the date of his or her previous report on the financial statements of a prior period that may affect his or her previous report (for example, the successor auditor might indicate in the response that certain matters have had a material effect on the prior-period financial statements reported on by the predecessor auditor). In such circumstances, the predecessor auditor should make inquiries and perform other procedures that he or she considers necessary (for example, reviewing the working papers of the successor auditor as they relate to the matters affecting the prior-period financial statements). The auditor should then decide, on the basis of the evidential matter obtained, whether to revise the report. If a predecessor auditor concludes that the report should be revised, he or she should follow the guidance in paragraphs .52~~68~~, .53~~69~~, and .57~~73~~ of this section.

.57~~73~~ A predecessor auditor's knowledge of the current affairs of his former client is obviously limited in the absence of a continuing relationship. Consequently, when reissuing the report on prior-period financial statements, a predecessor auditor should use the date of his or her previous report to avoid any implication that he or she has examined any records, transactions, or events after that date. If the predecessor auditor revises the report or if the financial statements are adjusted, he or she should dual-date the report. (*See* AS 3110.05.)

**Predecessor Auditor's Report Not Presented**

.58~~74~~ If the financial statements of a prior period have been audited by a predecessor auditor whose report is not presented, the successor auditor should indicate in the ~~introductory~~ paragraph immediately following the opinion paragraph of his or her report (a) that the financial statements of the prior period were audited by another auditor,[18]~~[29]~~ (b) the date of his or her report, (c) the type of report issued by the predecessor auditor, and (d) if the report was other than an ~~standard~~ unqualified report, the substantive reasons therefor.[19]~~[30]~~ An example of a successor auditor's report when the predecessor auditor's report is not presented is shown below:

Report of Independent Registered Public Accounting Firm

To the shareholders and the board of directors of ABC Company

Opinion on the Financial Statements

We have audited the accompanying balance sheet of ABC Company (the "Company") as of December 31, 20X2, and the related statements of [*titles of the financial statements, e.g., income, comprehensive income, stockholders' equity, and cash flows*]~~income, retained earnings, and cash flows for the year then ended~~, and the related notes [*and schedules*] (collectively referred to as the "financial statements"). ~~These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.~~ In our opinion, the 20X2 financial statements ~~referred to above~~ present fairly, in all material respects, the financial position of ~~ABC~~ the Company as of December 31, 20X2, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

The financial statements of ~~ABC~~ the Company as of December 31, 20X1, were audited by other auditors whose report dated March 31, 20X2, expressed an unqualified opinion on those statements.

Basis for Opinion

[~~*Same second paragraph as the standard report*~~ *Same basic elements as the Basis for Opinion section of the auditor's unqualified report in AS 3101*]

Critical Audit Matters [if applicable]

*[Include critical audit matters]*

[*Signature*]

We have served as the Company's auditor since [*year*].

[*City and State or Country*]

[*Date*]

If the predecessor auditor's report contained an explanatory paragraph or was other than an ~~standard~~ unqualified report, the successor auditor should describe the nature of and reasons for the explanatory paragraph added to the predecessor's report or the opinion qualification. Following is an illustration of the wording that may be included in the successor auditor's report:

. . . were audited by other auditors whose report dated March 1, 20X2, on those statements included an explanatory paragraph that described the change in the Company's method of computing depreciation discussed in Note X to the financial statements.

If the financial statements have been adjusted, the ~~introductory paragraph~~ Opinion on the Financial Statements section should indicate that a predecessor auditor reported on the financial statements of the prior period before the adjustments. In addition, if the successor auditor is engaged to audit and applies sufficient procedures to satisfy himself or herself as to the appropriateness of the adjustments, he or she may also include the following paragraph in the auditor's report:

> We also audited the adjustments described in Note X that were applied to restate the 20X1 financial statements. In our opinion, such adjustments are appropriate and have been properly applied.

[18] ~~[29]~~ The successor auditor should not name the predecessor auditor in his or her report; however, the successor auditor may name the predecessor auditor if the predecessor auditor's practice was acquired by, or merged with, that of the successor auditor.

[19] ~~[30]~~ If the predecessor's report was issued before the effective date of this section and contained an uncertainties explanatory paragraph, a successor auditor's report issued or reissued after the effective date hereof should not make reference to the predecessor's previously required explanatory paragraph.

**Management Reports on Internal Control Over Financial Reporting**

.59 In situations in which management is required to report on the company's internal control over financial reporting but such report is not required to be audited, and the auditor has not been engaged to perform an audit of management's assessment of the effectiveness of internal control over financial reporting, the auditor should refer to the auditor's responsibilities regarding other information in documents containing audited financial statements and the independent auditor's report under AS 2710, *Other Information in Documents Containing Audited Financial Statements.*

.60 In situations described in paragraph .59, the auditor must include statements in the auditor's report that:

- The company is not required to have, nor was the auditor engaged to perform, an audit of its internal control over financial reporting;
- As part of the audit, the auditor is required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the company's internal control over financial reporting; and
- The auditor expresses no such opinion.

Following is an example of the Basis for Opinion section in the auditor's report that contains such statements:

> [Basis for Opinion]
>
> These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.
>
> We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material

misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

**~~Effective Date and Transition~~**

~~.75 This section is effective for reports issued or reissued on or after February 29, 1996. Earlier application of the provisions of this section is permissible.~~

~~.76 An auditor who previously included an uncertainties explanatory paragraph in a report should not repeat that paragraph and is not required to include an emphasis paragraph related to the uncertainty in a reissuance of that report or in a report on subsequent periods' financial statements, even if the uncertainty has not been resolved. If the auditor decides to include an emphasis paragraph related to the uncertainty, the paragraph may include an explanation of the change in reporting standards.~~

**AS 1205, *Part of the Audit Performed by Other Independent Auditors***

* * *

.07 When the principal auditor decides that he will make reference to the audit of the other auditor, his report should indicate clearly, in ~~both the introductory, scope and opinion paragraphs~~ the Opinion on the Financial Statements and Basis for Opinion sections, the division of responsibility as between that portion of the financial statements covered by his own audit and that covered by the audit of the other auditor. The report should disclose the magnitude of the portion of the financial statements audited by the other auditor. This may be done by stating the dollar amounts or percentages of one or more of the following: total assets, total revenues, or other appropriate criteria, whichever most clearly reveals the portion of the financial statements audited by the other auditor.

* * *

.09 An example of appropriate reporting by the principal auditor indicating the division of responsibility when he makes reference to the audit of the other auditor follows:

Report of Independent Registered Public Accounting Firm

To the shareholders and the board of directors of X Company

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheet of X Company (the "Company") and subsidiaries as of December 31, 20...., and the related consolidated statements of [*titles of the financial statements, e.g., income, comprehensive income, stockholders' equity, and cash flows*]~~income and retained earnings and cash flows~~ for the year then ended, and the related notes [*and schedules*] (collectively referred to as the "consolidated financial statements"). In our opinion, based on our audit and the report of the other auditors, the consolidated financial statements ~~referred to above~~ present fairly, in all material respects, the financial position of ~~X~~ the Company as of [at] December 31, 20...., and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

We did not audit the financial statements of B Company, a wholly-owned subsidiary, which statements reflect total assets and revenues constituting 20 percent and 22 percent, respectively, of the related consolidated totals. Those statements were audited by other auditors whose report has been furnished to us, and our opinion, insofar as it relates to the amounts included for B Company, is based solely on the report of the other auditors.

*Basis for Opinion*

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit~~s~~. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB ~~Public Company Accounting Oversight Board (United States)~~. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audit included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. ~~An audit~~ Such procedures ~~includes~~ included examining, on a test basis, evidence ~~supporting~~ regarding the amounts and disclosures in the financial statements. ~~An~~ Our audit also ~~includes assessing~~ included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements ~~presentation~~. We believe that our audit and the report of the other auditors provide a reasonable basis for our opinion.

Critical Audit Matters [if applicable]

*[Include critical audit matters]*

[*Signature*]

We have served as the Company's auditor since [*year*].

[*City and State or Country*]

[*Date*]

When two or more auditors in addition to the principal auditor participate in the audit, the percentages covered by the other auditors may be stated in the aggregate.

* * *

**Other Auditor's Report Departs From ~~Standard~~ the Auditor's Unqualified Report or Includes an Explanatory Paragraph**

.15 If the report of the other auditor is other than ~~a standard~~ an auditor's unqualified report or includes explanatory language, the principal auditor should decide whether the reason for the departure from the ~~standard~~ auditor's unqualified report or the explanatory language is of such nature and significance in relation to the financial statements on which the principal auditor is reporting that it would require recognition in his own report. If the reason for the departure is not material in relation to such financial statements and the other auditor's report is not presented, the principal auditor need not make reference in his report to such departure. If the other auditor's report is presented, the principal auditor may wish to make reference to such departure and its disposition.

**Restated Financial Statements of Prior Years Following a Pooling of Interests**

.16 Following a pooling-of-interests transaction, an auditor may be asked to report on restated financial statements for one or more prior years when other auditors have audited one or more of the entities included in such financial statements. In some of these situations the auditor may decide that he has not audited a sufficient portion of the financial statements for such prior year or years to enable him to serve as principal auditor (*see* paragraph .02). Also, in such cases, it often is not possible or it may not be appropriate or necessary for the auditor to satisfy himself with respect to the restated financial statements. In these circumstances it may be appropriate for him to express his opinion solely with respect to the combining of such statements; however, no opinion should be expressed unless the auditor has audited the statements of at least one of the entities included in the restatement for at least the latest period presented. The following is an illustration of appropriate reporting on such combination that can be presented in an additional paragraph of the auditor's report following the opinion paragraph ~~standard~~

~~introductory, scope and opinion paragraphs~~ covering the consolidated financial statements for the current year:[*]

* * *

**AS 1210, *Using the Work of a Specialist***

* * *

**Effect of the Specialist's Work on the Auditor's Report**

.13 If the auditor determines that the specialist's findings support the related assertions in the financial statements, he or she reasonably may conclude that sufficient appropriate evidential matter has been obtained. If there is a material difference between the specialist's findings and the assertions in the financial statements, he or she should apply additional procedures. If after applying any additional procedures that might be appropriate the auditor is unable to resolve the matter, the auditor should obtain the opinion of another specialist, unless it appears to the auditor that the matter cannot be resolved. A matter that has not been resolved ordinarily will cause the auditor to conclude that he or she should qualify the opinion or disclaim an opinion because the inability to obtain sufficient appropriate evidential matter as to an assertion of material significance in the financial statements constitutes a scope limitation. (*See* paragraphs .05~~22~~ and .06~~23~~ of AS 3105~~1~~, ~~*Reports on Audited Financial Statements*~~ *Departures from Unqualified Opinions and Other Reporting Circumstances*.)

.14 The auditor may conclude after performing additional procedures, including possibly obtaining the opinion of another specialist, that the assertions in the financial statements are not in conformity with GAAP. In that event, the auditor should express a qualified or adverse opinion. (*See* AS 3105~~1~~.18~~35~~, .19~~36~~, and .24~~41~~.)

**Reference to the Specialist in the Auditor's Report**

.15 ~~Except as discussed in paragraph .16 the auditor should not refer to the work or findings of the specialist. Such a reference might be misunderstood to be a qualification of the auditor's opinion or a division of responsibility, neither of which is intended. Further, there may be an inference that the auditor making such reference performed a more thorough audit than an auditor not making such reference.~~ Reference to the use of a specialist may be made in the auditor's report in the following situations:

a. *Critical Audit Matters*—If such a reference will facilitate an understanding of the matter, the principal considerations that led the auditor to determine that the matter was a critical audit matter, or how the critical audit matter was addressed in the audit;[7] or

b. *Explanatory language or departure from an unqualified opinion*—If such a reference will facilitate an understanding of the reason for the explanatory paragraph or departure from an unqualified opinion.

Otherwise the auditor should not refer to the work or findings of the specialist in the auditor's report.

[7] Critical audit matters are described in AS 3101, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion.*

~~.16 The auditor may, as a result of the report or findings of the specialist, decide to add explanatory language to his or her standard report or depart from an unqualified opinion. Reference to and identification of the specialist may be made in the auditor's report if the auditor believes such reference will facilitate an understanding of the reason for the explanatory paragraph or the departure from the unqualified opinion.~~

* * *

**AS 1220, *Engagement Quality Review***

* * *

.10 In an audit, the engagement quality reviewer should:

* * *

j. Based on the procedures required by this standard, evaluate the engagement team's determination, communication, and documentation of critical audit matters in accordance with AS 3101, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*.

* * *

**AS 1301, *Communications with Audit Committees***

* * *

**~~Departure from the Auditor's Standard Report~~ The Auditor's Report**

.21 The auditor should ~~communicate~~ provide to and discuss with the audit committee ~~the following matters related to~~ a draft of the auditor's report~~:~~.

~~a. When the auditor expects to modify the opinion in the auditor's report, the reasons for the modification, and the wording of the report; and~~

b. ~~When the auditor expects to include explanatory language or an explanatory paragraph in the auditor's report, the reasons for the explanatory language or paragraph, and the wording of the explanatory language or paragraph.~~

* * *

Note: Difficulties encountered by the auditor during the audit could represent a scope limitation,[39] which may result in the auditor modifying the auditor's opinion or withdrawing from the engagement.

[39] *See* paragraphs .05~~22~~-.15~~32~~ of AS 3105~~1~~, ~~*Reports on Audited Financial Statements*~~ *Departures from Unqualified Opinions and Other Reporting Circumstances*, for a discussion of scope limitations.

* * *

**AS 2201, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements***

* * *

**Reporting on Internal Control**

.85 The auditor's report on the audit of internal control over financial reporting ~~must~~ includes the following elements[18] -

*Title*

.85A The auditor's report must include the title, "Report of Independent Registered Public Accounting Firm."

*Addressee*

.85B The auditor's report must be addressed to the shareholders and the board of directors, or equivalents for companies not organized as corporations. The auditor's report may include additional addressees.

*Opinion on the Internal Control over Financial Reporting*

.85C The first section of the auditor's report on the audit of internal control over financial reporting must include the section title "Opinion on Internal Control over Financial Reporting" and the following elements-

~~a. A title that includes the word *independent*;~~

a. The name of the company whose internal control over financial reporting was audited; and

b. ~~k.~~ The auditor's opinion on whether the company maintained, in all material respects, effective internal control over financial reporting as of the specified date, based on the control criteria.

*Basis for Opinion*

.85D The second section of the auditor's report on the audit of internal control over financial reporting must include the section title "Basis for Opinion" and the following elements:

a~~b~~. A statement that management is responsible for maintaining effective internal control over financial reporting and for assessing the effectiveness of internal control over financial reporting;

b~~c~~. An identification of management's report on internal control;

c~~d~~. A statement that the auditor's responsibility is to express an opinion on the company's internal control over financial reporting based on his or her audit;

d. A statement that the auditor is a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and is required to be independent with respect to the company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB;

e~~f~~. A statement that the audit was conducted in accordance with the standards of the PCAOB ~~Public Company Accounting Oversight Board (United States)~~;

f~~g~~. A statement that the standards of the PCAOB ~~Public Company Accounting Oversight Board~~ require that the auditor plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects;

g~~h~~. A statement that an audit included~~s~~ obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as the auditor considered necessary in the circumstances; and

h~~i~~. A statement that the auditor believes the audit provides a reasonable basis for his or her opinion~~;~~.

*Definition and Limitations of Internal Control Over Financial Reporting*

.85E The third section of the auditor's report on the audit of internal control over financial reporting must include the section title "*Definition and Limitations of Internal Control Over Financial Reporting* " and the following elements:

a~~e~~. A definition of internal control over financial reporting as stated in paragraph .A5;

b~~j~~. A paragraph stating that, because of inherent limitations, internal control over financial reporting may not prevent or detect misstatements and that projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate~~;~~.

*Signature, Location, and Date*

.85F The auditor's report must include the following elements:

a~~l~~. The ~~manual or printed~~ signature of the auditor's firm;[18A]

b~~m~~. The city and state (or city and country, in the case of non-U.S. auditors) from which the auditor's report has been issued; and

c~~n~~. The date of the audit report.

[18A] *See* Regulation S-X Rule 2-02(a).

* * *

.87 The following example combined report expressing an unqualified opinion on financial statements and an unqualified opinion on internal control over financial reporting illustrates the report elements described in this section.

Report of Independent Registered Public Accounting Firm

To the shareholders and the board of directors of W Company

[~~*Introductory paragraph*~~] *Opinions on the Financial Statements and Internal Control over Financial Reporting*

We have audited the accompanying balance sheets of W Company (the "Company") as of December 31, 20X8 and 20X7, and the related statements of [*titles of the financial statements, e.g., income, comprehensive income, stockholders' equity, and cash flows*]~~income, stockholders' equity and comprehensive income, and cash flows~~ for each of the years in the three-year period ended December 31, 20X8, and the related notes [*and schedules*] (collectively referred to as the "financial statements"). We also have audited ~~W~~ the Company's internal control over financial reporting as of December 31, 20X8, based on [*Identify control criteria, for example, "criteria established in Internal*

*Control - Integrated Framework: (20XX) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO)."*].

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of ~~W~~ the Company as of December 31, 20X8 and 20X7, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 20X8 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, ~~W~~ the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 20X8, based on [*Identify control criteria, for example, "criteria established in Internal Control - Integrated Framework: (20XX) issued by ~~the Committee of Sponsoring Organizations of the Treadway Commission (~~COSO~~)~~."*].

Basis for Opinion

~~[*Scope paragraph*]~~

~~W~~ The Company's management is responsible for these financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying [*title of management's report*]. Our responsibility is to express an opinion on ~~these~~ the Company's financial statements and an opinion on the ~~c~~Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB ~~Public Company Accounting Oversight Board (United States)~~. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the financial statements included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence ~~supporting~~ regarding the amounts and disclosures in the financial statements.~~,~~ Our audits also included evaluating ~~assessing~~ the accounting principles used and significant estimates made by management, ~~and~~ as well as evaluating the overall ~~financial statement~~ presentation of the financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

~~[~~*Definition* *and Limitations of Internal Control Over Financial Reporting* ~~*paragraph*]~~

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

~~[*Inherent limitations paragraph*]~~

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Critical Audit Matters [if applicable]

*[Include critical audit matters]*

[*Signature*]

We have served as the Company's auditor since [*year*].

[*City and State or Country*]

[*Date*]

.88 If the auditor chooses to issue a separate report on internal control over financial reporting, he or she should add the following paragraph (immediately following the opinion paragraph) to the auditor's report on the financial statements –

> We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB"), ~~W~~ the Company's internal control over financial reporting as of December 31, 20X8, based on [ *identify control criteria* ] and our report dated [ *date of report, which should be the same as the date of the report on the financial statements* ] expressed [ *include nature of opinion* ].

The auditor also should add the following paragraph (immediately following the opinion paragraph) to the report on internal control over financial reporting –

> We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB"), the [ *identify financial statements* ] of ~~W~~ the Company and our report dated [ *date of report, which should be the same as the date of the report on the effectiveness of internal control over financial reporting* ] expressed [ *include nature of opinion* ].

* * *

.B16 In situations in which the SEC allows management to limit its assessment of internal control over financial reporting by excluding certain entities, the auditor may limit the audit in the same manner. In these situations, the auditor's opinion would not be affected by a scope limitation. However, the auditor should include, either in an additional explanatory paragraph or as part of the ~~scope paragraph~~ Basis for Opinion section in his or her report, a disclosure similar to management's regarding the exclusion of an entity from the scope of both management's assessment and the auditor's audit of internal control over financial reporting. Additionally, the auditor should evaluate the reasonableness of management's conclusion that the situation meets the criteria of the SEC's allowed exclusion and the appropriateness of any required disclosure related to such a limitation. If the auditor believes that management's disclosure about the limitation requires modification, the auditor should follow the same communication responsibilities that are described in paragraphs .29 through .32 of AS 4105, *Reviews of Interim Financial Information*. If management and the audit committee do not respond appropriately, in addition to fulfilling those responsibilities, the auditor should modify his or her report on the audit of internal control over financial reporting to include an explanatory paragraph describing the reasons why the auditor believes management's disclosure requires modification.

* * *

.C4 When disclaiming an opinion because of a scope limitation, the auditor should state that the scope of the audit was not sufficient to warrant the expression of an opinion and, in a separate paragraph or paragraphs, the substantive reasons for the disclaimer. The auditor should not identify the procedures that were performed nor include the statements describing the characteristics of an audit of internal control over financial reporting (paragraph .85D f, g, and h~~, and i~~); to do so might overshadow the disclaimer.

* * *

**AS 2405, *Illegal Acts by Clients***

* * *

.21 The auditor may be unable to determine whether an act is illegal because of limitations imposed by the circumstances rather than by the client or because of uncertainty associated with interpretation of applicable laws or regulations or surrounding facts. In these circumstances, the auditor should consider the effect on his report.[2]

[2] *See* AS 3105~~1~~, ~~*Reports on Audited Financial Statements*~~ *Departures from Unqualified Opinions and Other Reporting Circumstances*.

* * *

**AS 2410, *Related Parties***

* * *

***Assertions That Transactions with Related Parties Were Conducted on Terms Equivalent to Those Prevailing in Arm's-Length Transactions***

.18 If the financial statements include a statement by management that transactions with related parties were conducted on terms equivalent to those prevailing in an arm's-length transaction, the auditor should determine whether the evidence obtained supports or contradicts management's assertion. If the auditor is unable to obtain sufficient appropriate audit evidence to substantiate management's assertion, and if management does not agree to modify the disclosure, the auditor should express a qualified or adverse opinion.[20]

[20] *See* AS 2805.06l, which requires the auditor to obtain written representations from management if the financial statements include such an assertion. Representations from management alone are not sufficient appropriate audit evidence. *See also* paragraphs .18~~35~~ .19~~36~~ of AS 3105~~1~~, ~~*Reports on Audited Financial Statements*~~ *Departures from Unqualified Opinions and Other Reporting Circumstances*.

* * *

**AS 2415, *Consideration of an Entity's Ability to Continue as a Going Concern***

* * *

.03 The auditor should evaluate whether there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time in the following manner:

* * *

> *c.* After the auditor has evaluated management's plans, he concludes whether he has substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time. If the auditor concludes there is substantial doubt, he should (1) consider the adequacy of disclosure about the entity's possible inability to continue as a going concern for a reasonable period of time, and (2) include an explanatory paragraph, including an appropriate title (immediately following the opinion paragraph), in his audit report to reflect his conclusion. If the auditor concludes that substantial doubt does not exist, he should consider the need for disclosure.

* * *

.12 If, after considering identified conditions and events and management's plans, the auditor concludes that substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time remains, the audit report should include an explanatory paragraph, including an appropriate title (immediately following the opinion paragraph), to reflect that conclusion.[4] The auditor's conclusion about the entity's ability to continue as a going concern should be expressed through the use of the phrase "substantial doubt about its (the entity's) ability to continue as a going concern" [or similar wording that includes the terms substantial doubt *and* going concern] as illustrated in paragraph .13.

[4] The inclusion of an explanatory paragraph (immediately following the opinion paragraph) in the auditor's report contemplated by this section should serve adequately to inform the users of the financial statements. Nothing in this section, however, is intended to preclude an auditor from declining to express an opinion in cases involving uncertainties. If he disclaims an opinion, the uncertainties and their possible effects on the financial statements should be disclosed in an appropriate manner (*see* paragraph .10), and the auditor's report should give all the substantive reasons for his disclaimer of opinion (*see* paragraphs .44-.47 of AS 3105~~1~~, ~~*Reports on Audited Financial Statements*~~ *Departures from Unqualified Opinions and Other Reporting Circumstances*).

.13 An example follows of an explanatory paragraph (immediately following the opinion paragraph) in the auditor's report describing an uncertainty about the entity's ability to continue as a going concern for a reasonable period of time.[5]

> [*Appropriate Title*]
>
> The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note X to the financial statements, the Company has suffered recurring losses from operations and has a net capital deficiency that raise substantial doubt about its ability to continue as a going concern. Management's plans in regard to these matters are also described in Note X. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

.14 If the auditor concludes that the entity's disclosures with respect to the entity's ability to continue as a going concern for a reasonable period of time are inadequate, a departure from generally accepted accounting principles exists. This may result in either a qualified (except for) or an adverse opinion. Reporting guidance for such situations is provided in AS 3105~~1~~.

.15 Substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time that arose in the current period does not imply that a basis for such doubt existed in the prior period and, therefore, should not affect the auditor's report on the financial statements of the prior period that are presented on a comparative basis. When financial statements of one or more prior periods are presented on a comparative basis with financial statements of the current period, reporting guidance is provided in AS 3105~~1~~.

* * *

**AS 2503, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities***

* * *

.32 There may be a time lag in reporting between the date of the financial statements of the investor and that of the investee. A time lag in reporting should be consistent from period to period. If a time lag between the date of the entity's financial statements and those of the investee has a material effect on the entity's financial statements, the auditor should determine whether the entity's management has properly considered the lack of comparability. The effect may be material, for example, because the time lag is not consistent with the prior period in comparative statements or because a significant transaction occurred during the time lag. If a change in time lag occurs that has a material effect on the investor's financial statements, an explanatory paragraph, including an appropriate title, should be added to the auditor's report because of the change in reporting period.[15]

[15] *See* ~~paragraphs .16-.18 of AS 3101,~~ ~~*Reports on Audited Financial Statements*~~ AS 2820, *Evaluating Consistency of Financial Statements.*

* * *

**AS 2505, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments***

* * *

.13 A lawyer's refusal to furnish the information requested in an inquiry letter either in writing or orally (*see* paragraphs .09 and .10) would be a limitation on the scope of the audit sufficient to preclude an unqualified opinion (*see* paragraphs .05~~22~~ and .06~~23~~ of AS 3105~~1~~, ~~*Reports on Audited Financial Statements*~~ *Departures from Unqualified Opinions and Other Reporting Circumstances*).[7] A lawyer's response to such an inquiry and the procedures set forth in paragraph .05 provide the auditor with sufficient evidential matter to satisfy himself concerning the accounting for and reporting of pending and threatened litigation, claims and assessments. The auditor obtains sufficient evidential matter to satisfy himself concerning reporting for those unasserted claims and assessments required to be disclosed in financial statements from the foregoing procedures and the lawyer's specific acknowledgement of his responsibility to his client in respect of disclosure obligations (*see* paragraph .09*g*). This approach with respect to unasserted claims and assessments is necessitated by the public interest in protecting the confidentiality of lawyer-client communications.

.14 A lawyer may be unable to respond concerning the likelihood of an unfavorable outcome of litigation, claims, and assessments or the amount or range of potential loss, because of inherent uncertainties. Factors influencing the likelihood of an unfavorable outcome may sometimes not be within a lawyer's competence to judge; historical experience of the entity in similar litigation or the experience of other entities may not be relevant or available; and the amount of the possible loss frequently may vary widely at different stages of litigation. Consequently, a lawyer may not be able to form a conclusion with respect to such matters. In such circumstances, the auditor ordinarily will conclude that the financial statements are affected by an uncertainty concerning the outcome of a future event which is not susceptible of reasonable estimation, and should look to the guidance in AS 3105~~1~~.28~~45~~ through .32~~49~~ to determine the effect, if any, of the lawyer's response on the auditor's report.

* * *

**AS 2510, *Auditing Inventories***

* * *

.15 For a discussion of the circumstances relating to receivables and inventories affecting the independent auditor's report, see paragraphs .07~~24~~ and .51~~67~~ of AS 3105~~1~~, ~~*Reports on Audited Financial Statements*~~ *Departures from Unqualified Opinions and Other Reporting Circumstances*.

* * *

**AS 2610, *Initial Audits—Communications Between Predecessor and Successor Auditors***

* * *

[9] *See* paragraphs .54~~70~~ through .58~~74~~ of AS 3105~~1~~, ~~*Reports on Audited Financial Statements*~~ *Departures from Unqualified Opinions and Other Reporting Circumstances*, for reporting guidance.

* * *

**AS 2705, *Required Supplementary Information***

* * *

.03 Some entities may voluntarily include, in documents containing audited financial statements, certain supplementary information that is required of other entities. When an entity voluntarily includes such information as a supplement to the financial statements or in an unaudited note to the financial statements, the provisions of this section are applicable unless either the entity indicates that the auditor has not applied the procedures described in this section or the auditor includes in an explanatory paragraph, including an appropriate title, in his report on the audited financial statements a disclaimer on the information. The following is an example of a disclaimer an auditor might use in these circumstances:

> [*Appropriate Title*]
>
> The [*identify the supplementary information*] on page XX (or in Note XX) is not a required part of the basic financial statements, and we did not audit or apply limited procedures to such information and do not express any assurances on such information.

* * *

.08 Since the supplementary information is not audited and is not a required part of the basic financial statements, the auditor need not add an explanatory paragraph to the report on the audited financial statements to refer to the supplementary information or to his or her limited procedures, except in any of the following circumstances:[7] (*a*) the supplementary information that GAAP requires to be presented in the circumstances is omitted; (*b*) the auditor has concluded that the measurement or presentation of the supplementary information departs materially from prescribed guidelines; (*c*) the auditor is unable to complete the prescribed procedures; (*d*) the auditor is unable to remove substantial doubts about whether the supplementary information conforms to prescribed guidelines. Since the required supplementary information does not change the standards of financial accounting and reporting used for the preparation of the entity's basic financial statements, the circumstances described above do not affect the auditor's opinion on the fairness of presentation of such financial statements in conformity with generally accepted accounting principles. Furthermore, the auditor need not present the supplementary information if it is omitted by the entity. The following are examples of additional explanatory paragraphs, including appropriate titles, an auditor might use in these circumstances.

* * *

**AS 2710, *Other Information in Documents Containing Audited Financial Statements***

* * *

.04 Other information in a document may be relevant to an audit performed by an independent auditor or to the continuing propriety of his report. The auditor's responsibility with respect to information in a document does not extend beyond the financial information identified in his report, and the auditor has no obligation to perform any procedures to corroborate other information contained in a document. However, he should read the other information and consider whether such information, or the manner of its presentation, is materially inconsistent with information, or the manner of its presentation, appearing in the financial statements.[2] If the auditor concludes that there is a material inconsistency, he should determine whether the financial statements, his report, or both require revision. If he concludes that they do not require revision, he should request the client to revise the other information. If the other information is not revised to eliminate the material inconsistency, he should communicate the material inconsistency to the audit committee and consider other actions, such as revising his report to include an explanatory paragraph, including an appropriate title, describing the material inconsistency, withholding the use of his report in the document, and withdrawing from the engagement. The action he takes will depend on the particular circumstances and the significance of the inconsistency in the other information.

* * *

**AS 2801, *Subsequent Events***

* * *

.09 Occasionally, a subsequent event of the second type has such a material impact on the entity that the auditor may wish to include in his report an ~~explanatory~~ emphasis paragraph directing the reader's attention to the event and its effects. (*See* paragraph .19 of AS 3101, ~~*Reports on Audited Financial Statements,*~~ *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*)

* * *

**AS 2805, *Management Representations***

* * *

[15] *See* paragraph .55~~71~~ of AS 3105~~1~~, ~~*Reports on Audited Financial Statements*~~ *Departures from Unqualified Opinions and Other Reporting Circumstances*.

* * *

[18] *See* AS 3105~~1~~.05~~22 –~~.17~~34~~.

* * *

**AS 2810, *Evaluating Audit Results***

* * *

[7] If the financial statements contain material misstatements, AS 3105~~1~~, ~~*Reports on Audited Financial Statements*~~ *Departures from Unqualified Opinions and Other Reporting Circumstances*, indicates that the auditor should issue a qualified or an adverse opinion on the financial statements. AS 3105~~1~~.18~~35~~ discusses situations in which the financial statements are materially affected by a departure from the applicable financial reporting framework.

* * *

.31

* * *

Note: According to AS 3105~~1~~, if the financial statements, including the accompanying notes, fail to disclose information that is required by the applicable financial reporting framework, the auditor should express a qualified or adverse opinion and should provide the information in the report, if practicable, unless its omission from the report is recognized as appropriate by a specific auditing standard.[18]

[18] AS 3105~~1~~.24~~41 –~~.27~~44~~.

* * *

.35 If the auditor has not obtained sufficient appropriate audit evidence about a relevant assertion or has substantial doubt about a relevant assertion, the auditor should perform procedures to obtain further audit evidence to address the matter. If the auditor is unable to obtain sufficient appropriate audit evidence to have a reasonable basis to conclude about whether the financial statements as a whole are free of material misstatement, AS 3105~~1~~ indicates that the auditor should express a qualified opinion or a disclaimer of opinion.[21]

[21] AS 3105~~1~~.05~~22~~ .17~~34~~ contains requirements regarding audit scope limitations.

* * *

**Appendix B**

[1] If the financial statements contain material misstatements, AS 3105~~1~~, ~~*Reports on Audited Financial Statements*~~ *Departures from Unqualified Opinions and Other Reporting Circumstances*, indicates that the auditor should issue a qualified or an adverse opinion on the financial statements. AS 3105~~1~~.18~~35~~ discusses situations in which the financial statements are materially affected by a departure from the applicable financial reporting framework.

* * *

**Appendix C**

[2] Denial of access to information might constitute a limitation on the scope of the audit that requires the auditor to qualify or disclaim an opinion. (*See* AS 2201, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, and AS 3105~~1~~, ~~*Reports on Audited Financial Statements*~~ *Departures from Unqualified Opinions and Other Reporting Circumstances*.)

* * *

**AS 2815, *The Meaning of "Present Fairly in Conformity with Generally Accepted Accounting Principles"***

.01 An independent auditor's report contains an opinion as to whether the financial statements present fairly, in all material respects, an entity's financial position, results of operations, and cash flows in conformity with generally accepted accounting principles. An identification of the applicable financial reporting framework c~~ountry of origin of~~

~~those generally accepted accounting principles also~~ is required (*see* ~~paragraph .08*h* of AS 3101~~paragraph .08e of the AS 3101, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*).

The purpose of this section is to explain the meaning of "present fairly" as used in the phrase "present fairly . . . in conformity with generally accepted accounting principles." In applying this section, the auditor should look to the requirements of the Securities and Exchange Commission for the company under audit with respect to the accounting principles applicable to that company.

* * *

[1] The concept of materiality is inherent in the auditor's judgments. That concept involves qualitative as well as quantitative judgments (*see* AS 2105, *Consideration of Materiality in Planning and Performing an Audit*, and AS 3105~~1~~.19~~36~~).

* * *

**AS 2820, *Evaluating Consistency of Financial Statements***

* * *

.06 The auditor should evaluate and report on a change in accounting estimate effected by a change in accounting principle like other changes in accounting principle.[5] In addition, the auditor should recognize a change in the reporting entity[6] by including an explanatory paragraph, including an appropriate title, in the auditor's report, unless the change in reporting entity results from a transaction or event. A change in reporting entity that results from a transaction or event, such as the creation, cessation, or complete or partial purchase or disposition of a subsidiary or other business unit does not require recognition in the auditor's report.

* * *

.08 A change in accounting principle that has a material effect on the financial statements should be recognized in the auditor's report on the audited financial statements. If the auditor concludes that the criteria in paragraph .07 have been met, the auditor should add an explanatory paragraph, including an appropriate title, to the auditor's report, as described in ~~AS 3101, *Reports on Audited Financial Statements*~~ paragraphs .12-.15 of this standard. If those criteria are not met, the auditor should treat this accounting change as a departure from generally accepted accounting principles and, if the effect of the change in accounting principle is material, issue a qualified or an adverse opinion ~~address the matter as described in AS 3101~~.[8A]

> Note: If a company's financial statements contain an investment accounted for by the equity method, the auditor's evaluation of consistency should include consideration of the investee. If the investee makes a change in accounting principle that is material to the investing company's financial statements, the auditor should add an explanatory paragraph, including an appropriate title (immediately following the opinion paragraph), to the auditor's report, as described in ~~AS 3101~~ paragraphs .12-.15.

[8A] AS 3105, *Departures from Unqualified Opinions and Other Reporting Circumstances*, describes reporting requirements related to a qualified or an adverse opinion.

**Correction of a Material Misstatement in Previously Issued Financial Statements**

.09 The correction of a material misstatement in previously issued financial statements should be recognized in the auditor's report on the audited financial statements through the addition of an explanatory paragraph, including an appropriate title, as described in ~~AS 3101~~ paragraphs .16 and.17 of this standard.

.10 The accounting pronouncements generally require certain disclosures relating to restatements to correct misstatements in previously issued financial statements. If the financial statement disclosures are not adequate, the auditor should address the inadequacy of disclosure as described in paragraph .31 of AS 2810, *Evaluating Audit Results*, and AS 3105~~1~~*, Departures from Unqualified Opinions and Other Reporting Circumstances*.

**Change in Classification**

.11 Changes in classification in previously issued financial statements do not require recognition in the auditor's report, unless the change represents the correction of a material misstatement or a change in accounting principle. Accordingly, the auditor should evaluate a material change in financial statement classification and the related disclosure to determine whether such a change also is a change in accounting principle or a correction of a material misstatement. For example, certain reclassifications in previously issued financial statements, such as reclassifications of debt from long-term to short-term or reclassifications of cash flows from the operating activities category to the financing activities category, might occur because those items were incorrectly classified in the previously issued financial statements. In such situations, the reclassification also is the correction of a misstatement. If the auditor determines that the reclassification is a change in accounting principle, he or she should address the matter as described in paragraphs .07, ~~and~~ .08, and ~~AS 3101~~ .12-.15. If the auditor determines that the reclassification is a correction of a material misstatement in previously issued financial statements, he or she should address the matter as described in paragraphs .09, ~~and~~ .10, ~~and~~ ~~AS 3101~~ .16 and.17.

**Reporting on Consistency of Financial Statements**

**Change in Accounting Principle**

.12 A change in accounting principle that has a material effect on the financial statements should be recognized in the auditor's report on the audited financial statements through the addition of an explanatory paragraph, including an appropriate title (immediately following the opinion paragraph). The explanatory paragraph should include identification of the nature of the change and a reference to the note disclosure describing the change.

.13 The following is an example of an explanatory paragraph for a change in accounting principle resulting from the adoption of a new accounting pronouncement:

> [*Appropriate Title*]
>
> As discussed in Note X to the financial statements, the Company has changed its method of accounting for [*describe accounting method changes*] in [*year(s) of financial statements that reflect the accounting method change*] due to the adoption of [*name of accounting pronouncement*].

.14 The following is an example of an explanatory paragraph for a change in accounting principle other than a change due to the adoption of a new accounting pronouncement:

> [*Appropriate Title*]
>
> As discussed in Note X to the financial statements, the Company has elected to change its method of accounting for [*describe accounting method changes*] in [*year(s) of financial statements that reflect the accounting method change*].

.15 The explanatory paragraph relating to a change in accounting principle should be included in reports on financial statements in the year of the change and in subsequent years until the new accounting principle is applied in all periods presented. If the new accounting change is accounted for by retrospective application to the financial statements of all prior periods presented, the additional paragraph is needed only in the year of the change.

**Correction of a Material Misstatement in Previously Issued Financial Statements**

.16 Correction of a material misstatement in previously issued financial statements should be recognized in the auditor's report through the addition of an explanatory paragraph, including an appropriate title (immediately following the opinion paragraph).[10] The explanatory paragraph should include (1) a statement that the previously issued financial statements have been restated for the correction of a misstatement in the respective period and (2) a reference to the note disclosure describing the correction of the misstatement. The following is an example of an appropriate explanatory paragraph when there has been a correction of a material misstatement in previously issued financial statements:

> [*Appropriate Title*]
>
> As discussed in Note X to the financial statements, the 20X2 financial statements have been restated to correct a misstatement.

[10] AS 3105.52-53 apply when comparative financial statements are presented and the opinion on the prior-period financial statements differs from the opinion previously expressed.

.17 This type of explanatory paragraph in the auditor's report should be included in reports on financial statements when the related financial statements are restated to correct the prior material misstatement. The paragraph need not be repeated in subsequent years.

* * *

**AS 3110, *Dating of the Independent Auditor's Report***

.06 An independent auditor may reissue his report on financial statements contained in annual reports filed with the Securities and Exchange Commission or other regulatory agencies or in a document he submits to his client or to others that contains information in addition to the client's basic financial statements subsequent to the date of his original report on the basic financial statements. An independent auditor may also be requested by his client to furnish additional copies of a previously issued report. Use of the original report date in a reissued report removes any implication that records, transactions, or events after that date have been examined or reviewed. In such cases, the independent auditor has no responsibility to make further investigation or inquiry as to events which may have occurred during the period between the original report date and the date of the release of additional reports. However, *see* AS 4101 as to an auditor's responsibility when his report is included in a registration statement filed under the Securities Act of 1933 and *see* paragraphs .54~~70 -~~.57~~73~~ of AS 3105~~1~~, *~~Reports on Audited Financial Statements~~* *Departures from Unqualified Opinions and Other Reporting Circumstances*, for the predecessor auditor's responsibility when reissuing or consenting to the reuse of a report previously issued on the financial statements of a prior period.

*** * ***

**AS 3305, *Special Reports***

.01 This section applies to auditors' reports issued in connection with the following:

*** * ***

*e.* Financial information presented in prescribed forms or schedules that require a prescribed form of auditor's reports (paragraphs .32 and .33)

Note: In situations in which an auditor's report described in this section is filed with the U.S. Securities and Exchange Commission, the auditor is required to include in the auditor's report the basic elements and, for reports under subparagraph .01a, communication of critical audit matters, as would be required in an unqualified auditor's reporting under AS 3101, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*. For qualified, adverse, and disclaimer of opinion reports, see requirements of AS 3105, *Departures from Unqualified Opinions and Other Reporting Circumstances*.

* * *

[2] In some instances, a document containing the auditor's report may include a statement by management regarding its responsibility for the presentation of the financial statements. Nevertheless, the auditor's report should state that the financial statements are management's responsibility. However, the statement about management's responsibility should not be further elaborated upon in the auditor's ~~standard~~ report or referenced to management's report.

* * *

.06 Unless the financial statements meet the conditions for presentation in conformity with a "comprehensive basis of accounting other than generally accepted accounting principles" as defined in paragraph .04, the auditor should modify his or her report ~~use the standard form of report (*see* paragraph .08 of AS 3101, Reports on Audited Financial Statements) modified as appropriate~~ because of the departures from generally accepted accounting principles (*see* AS 3105).

* * *

.12 When expressing an opinion on one or more specified elements, accounts, or items of a financial statement, the auditor should plan and perform the audit and prepare his or her report with a view to the purpose of the engagement. ~~With the exception of the requirement in AS 3101.08*h*, t~~The standards of the PCAOB are applicable to any engagement to express an opinion on one or more specified elements, accounts, or items of a financial statement. ~~AS 3101.08*h*, which requires that the auditor's report state whether the financial statements are presented in conformity with generally accepted accounting principles, is applicable only when~~ If the specified elements, accounts, or items of a financial statement are intended to be presented in conformity with generally accepted accounting principles, the requirements for the auditor's report, as described in AS 3101 and AS 3105, are applicable.

* * *

.14 The auditor should not express an opinion on specified elements, accounts, or items included in financial statements on which he or she has expressed an adverse opinion or disclaimed an opinion based on an audit, if such reporting would be tantamount to expressing a piecemeal opinion on the financial statements (*see* AS 3105~~1~~.48~~64~~). However, an auditor would be able to express an opinion on one or more specified elements, accounts, or items of a financial statement provided that the matters to be reported on and the related scope of the audit were not intended to and did not encompass so many elements, accounts, or items as to constitute a major portion of the financial statements. For example, it may be appropriate for an auditor to express an opinion on an entity's accounts receivable balance even if the auditor has disclaimed an opinion on the financial statements taken as a whole. However, the report on the specified element, account, or item should be presented separately from the report on the financial statements of the entity.

**Reports on One or More Specified Elements, Accounts, or Items of a Financial Statement**

.15 When an independent auditor is engaged to express an opinion on one or more specified elements, accounts, or items of a financial statement, the report should include—

*** * ***

b. A paragraph that—

(1) States that the specified elements, accounts, or items identified in the report were audited. If the audit was made in conjunction with an audit of the company's financial statements, the paragraph should so state and indicate the date of the auditor's report on those financial statements. Furthermore, any departure from the ~~standard~~ auditor's unqualified report on those statements should also be disclosed if considered relevant to the presentation of the specified element, account or item.

(2) States that the specified elements, accounts, or items are the responsibility of the Company's management and that the auditor is responsible for expressing an opinion on the specified elements, accounts or items based on the audit.

* * *

.17 The auditor should consider the effect that any departure, including additional explanatory language because of the circumstances discussed in AS 3101.18~~1~~, from the ~~standard~~ auditor's unqualified report on the audited financial statements might have on the report on a specified element, account, or item thereof.

* * *

.21 When an auditor's report on compliance with contractual agreements or regulatory provisions is included in the report that expresses the auditor's opinion on the financial statements, the auditor should include a paragraph, ~~after the opinion paragraph~~ in the Opinion on the Financial Statements section, that provides negative assurance relative to compliance with the applicable covenants of the agreement, insofar as they relate to accounting matters, and that specifies the negative assurance is being given in connection with the audit of the financial statements. The auditor should also ordinarily state that the audit was not directed primarily toward obtaining knowledge regarding compliance. In addition, the report should include a paragraph that includes a description and source of any significant interpretations made by the entity's management as discussed in paragraph .20d as well as a paragraph that restricts the use of the report to the specified parties as discussed in paragraph .20e. Following are examples of reports that might be issued:

* * *

.31 Certain circumstances, while not affecting the auditor's unqualified opinion, may require that the auditor add additional explanatory language to the special report. These circumstances include the following:

*a.* *Lack of Consistency in Accounting Principles.* If there has been a change in accounting principles or in the method of their application,[35] the auditor should add an explanatory paragraph, including an appropriate title, to the report (immediately following the opinion paragraph) that describes the change and refers to the note to the financial presentation (or specified elements, accounts, or items thereof) that discusses the change and its effect thereon[36] if the accounting change is considered relevant to the presentation. Guidance on reporting in this situation is contained in ~~AS 3101.16 through .18~~ AS 2820, *Evaluating Consistency of Financial Statements*.

*b.* *Going Concern Uncertainties*. If the auditor has substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time not to exceed one year beyond the date of the financial statement, the auditor should add an explanatory paragraph, including an appropriate title, after the opinion paragraph of the report only if the auditor's substantial doubt is relevant to the presentation.[39]

*c.* *Other Auditors.* When the auditor decides to make reference to the report of another auditor as a basis, in part, for his or her opinion, the auditor should disclose that fact in the introductory paragraph of the report and should refer to the report of the other auditors in expressing his or her opinion. Guidance on reporting in this situation is contained in ~~section AS 3101.12 and .13~~ AS 1205, *Part of the Audit Performed by Other Independent Auditors*.

*d.* *Comparative Financial Statements (or Specified Elements, Accounts, or Items Thereof).* If the auditor expresses an opinion on prior-period financial statements (or specified elements, accounts, or items thereof) that is different from the opinion he or she previously expressed on that same information, the auditor should disclose all of the substantive reasons for the different opinion in a separate explanatory paragraph ~~preceding~~ immediately following the opinion paragraph of the report. Guidance on reporting in this situation is contained in AS 3105~~1~~.52~~68~~ and .53~~69~~.

* * *

**AS 3310, *Special Reports on Regulated Companies***

* * *

.02 The basic postulates and broad principles of accounting comprehended in the term "generally accepted accounting principles" which pertain to business enterprises in general apply also to companies whose accounting practices are prescribed by governmental regulatory authorities or commissions. (For example, public utilities and insurance companies.) Accordingly, the requirement in paragraph .08e~~*h*~~ of AS 3101, ~~*Reports on Audited Financial Statements*~~ *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*, is equally applicable to opinions on financial statements of such regulated companies presented for purposes other than filings with their respective supervisory agencies; and material variances from generally accepted accounting principles, and their effects, should be dealt with in the independent auditor's report in the same manner followed for companies which are not regulated.[1] Ordinarily, this will require either a qualified or an adverse opinion on such statements. An adverse opinion may be accompanied by an opinion on supplementary data which are presented in conformity with generally accepted accounting principles.

* * *

.04 When financial statements of a regulated entity are prepared in accordance with a basis of accounting prescribed by one or more regulatory agencies or the financial reporting provisions of another agency, the independent auditor may also be requested to report on their fair presentation in conformity with such prescribed basis of accounting in presentations for distribution in other than filings with the entity's regulatory agency. In those circumstances, the auditor should ~~use the standard form of report (*see* AS 3101.08), modified~~ modify the auditor's report as appropriate (*see* paragraphs .18-.43 of AS 3105~~1.35-.60~~, *Departures from Unqualified Opinions and Other Reporting Circumstances*) because of the departures from generally accepted accounting principles, and then, in an additional paragraph to the report, express an opinion on whether the financial statements are presented in conformity with the prescribed basis of accounting.

* * *

**AS 3315, *Reporting on Condensed Financial Statement and Selected Financial Data***

* * *

.02 In reporting on condensed financial statements or selected financial data in circumstances other than those described in paragraph .01, the auditor should follow the guidance in paragraphs .24~~41~~ through .27~~44~~ of AS 3105~~1~~, ~~*Reports on Audited Financial Statements*~~ *Departures from Unqualified Opinions and Other Reporting Circumstances*, AS 3305, *Special Reports,* or other applicable PCAOB standards.[2]

* * *

.06 The following is an example of wording that an auditor may use in the circumstances described in paragraph .01(*a*) to report on condensed financial statements that are derived from financial statements that he or she has audited and on which he or she has issued ~~a standard~~ an auditor's unqualified report:

Report of Independent Registered Public Accounting Firm

> We have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB"), the consolidated balance sheet of X Company and subsidiaries as of December 31, 20X0, and the related consolidated statements of [*titles of the financial statements, e.g., income, comprehensive income, stockholders' equity, and cash flows*]~~income, retained earnings, and cash flows~~ for the year then ended (not presented herein); and in our report dated February 15, 20X1, we expressed an unqualified opinion on those consolidated financial statements. ¶ In our opinion, the information set forth in the accompanying condensed consolidated financial statements is fairly stated, in all material respects, in relation to the consolidated financial statements from which it has been derived.

.07 A client might make a statement in a client-prepared document that names the auditor and also states that condensed financial statements have been derived from audited financial statements. Such a statement does not, in itself, require the auditor to report on the condensed financial statements, provided that they are included in a document that contains audited financial statements (or that incorporates such statements by reference to information filed with a regulatory agency). However, if such a statement is made in a client-prepared document of a public entity that is required to file, at least annually, complete audited financial statements with a regulatory agency and that document does not include audited financial statements (or does not incorporate such statements by reference to information filed with a regulatory agency), ~~[6]~~ the auditor should request that the client either (*a*) not include the auditor's name in the document or (*b*), include the auditor's report on the condensed financial statements, as described in paragraph .05. If the client will neither delete the reference to the auditor nor allow the appropriate report to be included, the auditor should advise the client that he does not consent to either the use of his name or the reference to him, and he should consider what other actions might be appropriate.[7]

~~[6] If such a statement is made in a client-prepared document that does not include audited financial statements and the client is not a public entity that is required to file complete audited financial statements with a regulatory agency (at least annually), the auditor would ordinarily express an adverse opinion on the condensed financial statements because of inadequate disclosure. (*See* AS 3101.41 through .44) The auditor would not be expected to provide the disclosure in his report. The following is an example of an auditor's report on condensed financial statements in such circumstances when the auditor had previously audited and reported on the complete financial statements:~~

~~Report of Independent Registered Public Accounting Firm.~~

~~We have audited the consolidated balance sheet of X Company and subsidiaries as of December 31, 20X0, and the related earnings, and cash flows for the year then ended (not presented herein). These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.~~

> ~~We believe that our audit provides a reasonable basis for our opinion. The condensed consolidated balance sheet as of December 31, 20X0, and the related condensed statements of income, retained earnings, and cash flows for the year then ended, presented on pages xx-xx, are presented as a summary and therefore do not include all of the disclosures required by accounting principles generally accepted in the United States of America. In our opinion, because of the significance of the omission of the information referred to in the preceding paragraph, the condensed consolidated financial statements referred to above do not present fairly, in conformity with accounting principles generally accepted in the United States of America, the financial position of X Company and subsidiaries as of December 31, 20X0, or the results of its operations or its cash flows for the year then ended.~~

* * *

.10 The following is an example of an additional paragraph included in the Opinion on the Financial Statements section of the auditor's report ~~that includes an additional paragraph~~ because ~~he~~ the auditor is also engaged to report on selected financial data for a five-year period ended December 31, ~~19~~20X5, in a client-prepared document that includes audited financial statements:

~~Report of Independent Registered Public Accounting Firm~~

> ~~We have audited the consolidated balance sheets of ABC Company and subsidiaries as of December 31, 19X5 and 19X4, and the related consolidated statements of income, retained earnings, and cash flows for each of the three years in the period ended December 31, 19X5. These financial statements are the~~

~~responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.~~

~~We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provided a reasonable basis for our opinion.~~

<u>Opinion on the Financial Statements</u>

<u>*[Same basic elements in the Opinion on the Financial Statements section as the auditor's unqualified report in AS 3101]*</u>

In our opinion, the consolidated financial statements ~~referred to above~~ present fairly, in all material respects, the financial position of the ~~ABC~~ <u>the</u> Company and subsidiaries as of December 31, 20X5 and 20X4, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 20X5, in conformity with accounting principles generally accepted in the United States of America.

We have also previously audited, in accordance with the standards of the Public Company Accounting Oversight Board <u>(United States) ("PCAOB")</u>, the consolidated balance sheets as of December 31, 20X3, 20X2, and 20X1, and the related statements of [*titles of the financial statements, e.g., income, comprehensive income, stockholders' equity, and cash flows*] for the years ended December 31, 20X2, and 20X1, and the related notes [*and schedules*] (collectively referred to as the "20X3, 20X2, and 20X1 consolidated financial statements") (none of which are presented herein); and we expressed unqualified opinions on those 20X3, 20X2, and 20X1 consolidated financial statements. In our opinion, the information set forth in the selected financial data for each of the five years in the period ended December 31, 20X5, appearing on page xx, is fairly stated, in all material respects, in relation to the consolidated financial statements from which it has been derived.

* * *

**AS 3320, *Association with Financial Statements***

* * *

.04 An accountant may be associated with audited or unaudited financial statements. Financial statements are audited if the accountant has applied auditing procedures sufficient to permit him to report on them as described in AS 3101, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*, and AS 3105~~1~~, ~~*Reports on Audited Financial Statements*~~ *Departures from Unqualified Opinions and Other Reporting Circumstances*. The unaudited interim financial statements (or financial information) of a public entity are reviewed when the accountant has applied procedures sufficient to permit him to report on them as described in AS 4105, *Reviews of Interim Financial Information*.

* * *

**AS 4101, *Responsibilities Regarding Filings Under Federal Securities Statutes***

* * *

.11 A registration statement filed with the Securities and Exchange Commission may contain the reports of two or more independent auditors on their audits of the financial statements for different periods. An auditor who has audited the financial statements for prior periods but has not audited the financial statements for the most recent audited period included in the registration statement has a responsibility relating to events subsequent to the date of the prior-period financial statements, and extending to the effective date, that bear materially on the prior-period financial statements on which he reported. Generally, he should

*a.* Read pertinent portions of the prospectus and of the registration statement.

*b.* Obtain a letter of representation from the successor independent auditor regarding whether his audit (including his procedures with respect to subsequent events) revealed any matters that, in his opinion, might have a material effect on the financial statements reported on by the predecessor auditor or would require disclosure in the notes thereto.

The auditor should make inquiries and perform other procedures that he considers necessary to satisfy himself regarding the appropriateness of any adjustment or disclosure affecting the prior-period financial statements covered by his report (*see* AS 3105~~1~~, ~~Reports on Audited Financial Statements~~ *Departures from Unqualified Opinions and Other Reporting Circumstances*).

* * *

**AS 4105, *Reviews of Interim Financial Information***

* * *

**Form of Accountant's Review Report**

* * *

.37 The accountant's review report accompanying interim financial information ~~should consist of~~ must include the title, "Report of Independent Registered Public Accounting Firm."

.37A If the accountant's review report is included in a filing with the SEC or another regulatory agency, the report must be addressed to the shareholders and the board of directors, or equivalents for companies not organized as corporations. The accountant's review report may include additional addressees.

.37B The first section of the accountant's review report must include the section title "Results of Review of Interim Financial Information" and the following elements:

~~a. A title that includes the word independent.~~

a. The name of the company whose interim financial information was reviewed.

b. A statement that the interim financial information identified in the report was reviewed.

c~~g~~. A statement about whether the accountant is aware of any material modifications that should be made to the accompanying interim financial information for it to conform with generally accepted accounting principles. The statement should include an identification of the country of origin of those accounting principles (for example, accounting principles generally accepted in the United States of America or U.S. generally accepted accounting principles).

.37C The second section of the accountant's review report must include the section title "Basis for Review Results" and the following elements:

a~~c~~. A statement that the interim financial information is the responsibility of the entity's management.

b~~d~~. A statement that the review of interim financial information was conducted in accordance with the standards of the PCAOB.

c~~e~~. A description of the procedures for a review of interim financial information.

d~~f~~. A statement that a review of interim financial information is substantially less in scope than an audit conducted in accordance with the standards of the PCAOB, the objective of which is an expression of an opinion regarding the financial statements taken as a whole, and accordingly, no such opinion is expressed.

e. A statement that the auditor is a public accounting firm registered with the PCAOB (United States) and is required to be independent with respect to the company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the SEC and the PCAOB.

.37D The accountant's review report must include the following elements:

a~~h~~. The ~~manual or printed~~ signature of the accountant's firm.[24A]

b~~i~~. The city and state (or city and country, in the case of non-U.S. auditors) from which the accountant's review report has been issued.[24~~A~~B]

c~~j~~. The date of the review report. (Generally, the report should be dated as of the date of completion of the review procedures.[25])

In addition, each page of the interim financial information should be clearly marked as unaudited.

[24A] *See* SEC Rule 2-02(a) of Regulation S-X, 17 C.F.R. § 210.2-02(a).

[24~~A~~B] *Id.*~~*See* SEC Rule 2-02(a) of Regulation S-X, 17 C.F.R. § 210.2-02(a).~~

.38 The following is an example of a review report:[26]

Report of Independent Registered Public Accounting Firm

To the shareholders and the board of directors of ABC Company

Results of Review of Interim [*Financial Information or Statements*]

We have reviewed the accompanying [*describe the interim financial information or statements reviewed*] of ABC Company (the "Company") and consolidated subsidiaries as of September 30, 20X1, and for the three-month and nine-month periods then ended, and the related notes [*and schedules*] (collectively referred to as the "interim financial information or statements"). Based on our review, we are not aware of any material modifications that should be made to the accompanying interim financial information (statements) for it (them) to be in conformity with accounting principles generally accepted in the United States of America.

Basis for Review Results

This (These) interim financial information (statements) is (are) the responsibility of the Company's management. We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB"). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the PCAOB ~~Public Company Accounting Oversight Board~~, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

[*Signature*]

[*City and State or Country*]

[*Date*]

.39 An accountant may be engaged to report on a review of comparative interim financial information. The following is an example of a review report on a condensed balance sheet as of March 31, 20X1, the related condensed statements of income and cash flows for the three-month periods ended March 31, 20X1 and 20X0, and a condensed balance sheet derived from audited financial statements as of December 31, 20X0, that were included in Form 10-Q. [27]

Report of Independent Registered Public Accounting Firm

To the shareholders and the board of directors of ABC Company

Results of Review of Interim [*Financial Information or Statements*]

We have reviewed the condensed consolidated balance sheet of ABC Company (the "Company") and subsidiaries as of March 31, 20X1, and the related condensed consolidated statements of income and cash flows for the three-month periods ended March 31, 20X1 and 20X0, and the related notes [*and schedules*] (collectively referred to as the "interim financial information or statements"). Based on our reviews, we are not aware of any material modifications that should be made to the condensed financial statements referred to above for them to be in conformity with accounting principles generally accepted in the United States of America.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB"), the consolidated balance sheet of ~~ABC~~ the Company and subsidiaries as of December 31, 20X0, and the related consolidated statements of income, retained earnings, and cash flows for the year then ended (not presented herein); and in our report dated February 15, 20X1, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 20X0, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.[28]

Basis for Review Results

These financial statements are the responsibility of the Company's management. We conducted our review in accordance with the standards of the PCAOB ~~Public Company Accounting Oversight Board (United States)~~. A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the PCAOB ~~Public Company Accounting Oversight Board~~, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

[*Signature*]

[*City and State or Country*]

[*Date*]

[28] If the auditor's report on the preceding year-end financial statements was other than unqualified, referred to other auditors, or included an explanatory paragraph because of a going-concern matter or an inconsistency in the application of accounting principles, the ~~last~~ second paragraph of the illustrative report in paragraph .39 should be appropriately modified.

.40 The accountant may use and make reference to another accountant's review report on the interim financial information of a significant component of a reporting entity. This reference indicates a division of responsibility for performing the review.[29] The following is an example of report including such a reference:

Report of Independent Registered Public Accounting Firm

To the shareholders and the board of directors of ABC Company

Results of Review of Interim [*Financial Information or Statements*]

We have reviewed the accompanying [*describe the interim financial information or statements reviewed*] of ABC Company (the "Company") and consolidated subsidiaries as of September 30, 20X1, and for the three-month and nine-month periods then ended, and the related notes [*and schedules*] (collectively referred to as the "interim financial information or statements"). Based on our review and the report of other accountants, we are not aware of any material modifications that should be made to the accompanying interim financial information (statements) for it (them) to be in conformity with accounting principles generally accepted in the United States of America.

We were furnished with the report of other accountants on their review of the interim financial information of DEF subsidiary, whose total assets as of

September 30, 20X1, and whose revenues for the three-month and nine-month periods then ended, constituted 15 percent, 20 percent, and 22 percent, respectively, of the related consolidated totals.

<u>Basis for Review Results</u>

<u>This (These) interim financial information (statements) is (are) the responsibility of the Company's management.</u> We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States) <u>("PCAOB")</u>. A review of interim financial information (statements) consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the <u>PCAOB</u> ~~Public Company Accounting Oversight Board~~, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

[*Signature*]

[*City and State or Country*]

[*Date*]

.41 The accountant's report on a review of interim financial information should be modified for departures from generally accepted accounting principles,~~[30]~~ which include inadequate disclosure and changes in accounting principle that are not in conformity with generally accepted accounting principles. The existence of substantial doubt about the entity's ability to continue as a going concern or a lack of consistency in the application of accounting principles affecting the interim financial information would not require the accountant to add an additional paragraph to the report, provided that the interim financial information appropriately discloses such matters. Although not required, the accountant may wish to emphasize such matters in a separate explanatory paragraph of the report. *See* paragraphs .44 and .45 of this section for examples of paragraphs that address matters related to an entity's ability to continue as a going concern.

~~[30] If the circumstances contemplated by Rule 203, *Accounting Principles*, are present, the accountant should refer to the guidance in paragraph .15 of AS 3101, Reports on Audited Financial Statements.~~

.42 *Departure from generally accepted accounting principles.* If the accountant becomes aware that the interim financial information is materially affected by a departure from generally accepted accounting principles, he or she should modify the report. The modification should describe the nature of the departure and, if practicable, should state the effects on the interim financial information. Following is an example of such a modification of the accountant's report.

> ~~[*Concluding paragraph*]~~
>
> Based on our review, with the exception of the matter(s) described in the ~~preceding~~ following paragraph(s), we are not aware of any material modifications that should be made to the accompanying interim financial information (statements) for it (them) to be in conformity with accounting principles generally accepted in the United States of America.
>
> ~~[*Explanatory third paragraph*]~~
>
> Based on information furnished to us by management, we believe that the company has excluded from property and debt in the accompanying balance sheet certain lease obligations that we believe should be capitalized to conform with

accounting principles generally accepted in the United States of America. This information indicates that if these lease obligations were capitalized at September 30, 20X1, property would be increased by $______, long-term debt by $______, and net income and earnings per share would be increased (decreased) by $________, $_________, $________, and $________, respectively, for the three-month and nine-month periods then ended.

* * *

.43 *Inadequate disclosure*. The information necessary for adequate disclosure is influenced by the form and context in which the interim financial information is presented. For example, the disclosures considered necessary for interim financial information presented in accordance with the minimum disclosure requirements of APB Opinion No. 28, paragraph 30, which is applicable to summarized financial statements of public companies, are considerably less extensive than those necessary for annual financial statements that present financial position, results of operations, and cash flows in conformity with generally accepted accounting principles.[31] If information that the accountant believes is necessary for adequate disclosure in conformity with generally accepted accounting principles[32] is not included in the interim financial information, the accountant should modify the report and, if practicable, include the necessary information in the report. The following is an example of such a modification of the accountant's report:

~~[*Concluding paragraph*]~~

Based on our review, with the exception of the matter(s) described in the ~~preceding~~ following paragraph(s), we are not aware of any material modifications that should be made to the accompanying interim financial information (statements) for it (them) to be in conformity with accounting principles generally accepted in the United States of America.

~~[*Explanatory third paragraph*]~~

Management has informed us that the company is presently contesting deficiencies in federal income taxes proposed by the Internal Revenue Service for the years 20X1 through 20X3 in the aggregate amount of approximately $_____, and that the extent of the company's liability, if any, and the effect on the accompanying information (statements) is not determinable at this time. The information (statements) fail(s) to disclose these matters, which we believe are required to be disclosed in conformity with accounting principles generally accepted in the United States of America.

.44 *Going-concern paragraph was included in the prior year's audit report; conditions giving rise to the paragraph continue to exist.* If (*a*) the auditor's report for the prior year end contained an explanatory paragraph indicating the existence of substantial doubt about the entity's ability to continue as a going concern, (*b*) the conditions that raised such doubt continued to exist as of the interim reporting date covered by the review, and (*c*) there is adequate and appropriate disclosure about these conditions in the interim financial information, the accountant is not required to modify his or her report. However, the accountant may add an explanatory paragraph to the review report,~~ after the concluding paragraph,~~ including an appropriate title (immediately following the paragraph describing the results of the review), emphasizing the matter disclosed in the audited financial statements and the interim financial information. The following is an example of such a paragraph.

> [Appropriate Title]
>
> Note 4 of the Company's audited financial statements as of December 31, 20X1, and for the year then ended discloses that the Company was unable to renew its line of credit or obtain alternative financing at December 31, 20X1. Our auditor's report on those financial statements includes an explanatory paragraph referring to the matters in Note 4 of those financial statements and indicating that these matters raised substantial doubt about the Company's ability to continue as a going concern. As indicated in Note 3 of the Company's unaudited interim financial statements as of March 31, 20X2, and for the three months then ended, the Company was still unable to renew its line of credit or obtain alternative financing as of March 31, 20X2. The accompanying interim financial information does not include any adjustments that might result from the outcome of this uncertainty.

.45 *Going-concern paragraph was not included in the prior year's audit report; conditions or events exist as of the interim reporting date covered by the review that might be indicative of the entity's possible inability to continue as a going concern.* If (*a*) conditions or events exist as of the interim reporting date covered by the review that might be indicative of the entity's possible inability to continue as a going concern, and (*b*) there is adequate and appropriate disclosure about these conditions or events in the interim financial information, the accountant is not required to modify his or her report. However, the accountant may add an explanatory paragraph to the review report~~, after the~~

~~concluding paragraph~~, including an appropriate title (immediately following the paragraph describing the results of the review), emphasizing the matter disclosed in the interim financial information. The following is an example of such a paragraph.

> [Appropriate Title]
>
> As indicated in Note 3, certain conditions indicate that the Company may be unable to continue as a going concern. The accompanying interim financial information does not include any adjustments that might result from the outcome of this uncertainty.

* * *

.50 The auditor ordinarily need not modify his or her report on the audited financial statements to refer to his or her having performed a review in accordance with this section or to refer to the interim financial information accompanying the audited financial statements because the interim financial information has not been audited and is not required for the audited financial statements to be fairly stated in conformity with generally accepted accounting principles. The auditor's report on the audited financial statements should, however, be modified in the following circumstances:

* * *

c. The selected quarterly financial data required by item 302(a) of Regulation S-K is omitted. The auditor should add an explanatory paragraph, including an appropriate title, to the report, ~~The following is an example of a paragraph that should be added to the auditor's report~~ if the selected quarterly financial data required by item 302(a) is omitted. The following is an example of such a paragraph.

> [Appropriate Title]

The company has not presented the selected quarterly financial data specified in item 302(a) of Regulation S-K that the Securities and Exchange Commission requires as supplementary information to the basic financial statements.

d. The selected quarterly financial data required by item 302(a) of Regulation S-K has not been reviewed. The auditor should add an explanatory paragraph, including an appropriate title, to the report, ~~The following is an example of a paragraph that should be added to the auditor's report~~ if the selected quarterly financial data required by item 302(a) has not been reviewed. The following is an example of such a paragraph.

[Appropriate Title]

The selected quarterly financial data on page xx contains information that we did not audit, and, accordingly, we do not express an opinion on that data. We attempted but were unable to review the quarterly data in accordance with the standards of the Public Company Accounting Oversight Board because we believe that the company's internal control for the preparation of interim financial information does not provide an adequate basis to enable us to complete such a review.

* * *

**AS 6101, *Letters for Underwriters and Certain Other Requesting Parties***

* * *

.27 When the report on the audited financial statements and financial statement schedules included (incorporated by reference) in the registration statement ~~departs from the standard report~~ includes one or more explanatory paragraphs or a paragraph to emphasize a matter regarding the financial statements, ~~for instance, where one or more explanatory~~

~~paragraphs or a paragraph to emphasize a matter regarding the financial statements have been added to the report,~~ the accountants should refer[18] to that fact in the comfort letter and discuss the subject matter of the paragraph.[19] In those rare instances in which the SEC accepts a qualified opinion on historical financial statements, the accountants should refer to the qualification in the opening paragraph of the comfort letter and discuss the subject matter of the qualification. (*See also* paragraph .35*f*.)

* * *

.30 An underwriter may also request that the accountants comment in their comfort letter on (*a*) unaudited interim financial information required by item 302(a) of Regulation S-K, to which AS 4105 pertains or (*b*) required supplementary information, to which AS 2705 pertains. AS 4105 and AS 2705 provide that the accountants should expand the ~~standard~~ <u>auditor's unqualified</u> report on the audited financial statements to refer to such information when the scope of their procedures with regard to the information was restricted or when the information appears not to be presented in conformity with generally accepted accounting principles or, for required supplementary information, applicable guidelines. Such expansions of the ~~accountants' standard~~ <u>auditor's unqualified</u> report in the registration statement would ordinarily be referred to in the opening paragraph of the comfort letter (*see also* paragraph .35*f*). Additional comments on such unaudited information are therefore unnecessary. However, if the underwriter requests that the accountants perform procedures with regard to such information in addition to those performed in connection with their review or audit as prescribed by AS 4105 and AS 2705, the accountants may do so and report their findings.

* * *

.35

* * *

*f.* When the report on the audited financial statements and financial statement schedules in the registration statement departs from the auditor's ~~standard~~ unqualified report, and the comfort letter includes negative assurance with respect to subsequent unaudited condensed interim financial information included (incorporated by reference) in the registration statement or with respect to an absence of specified subsequent changes, increases, or decreases, the accountant should consider the effect thereon of the subject matter of the qualification, explanatory paragraph(s), or paragraph(s) emphasizing a matter regarding the financial statements. The accountant should also follow the guidance in paragraph .27. An illustration of how this type of situation may be dealt with is shown in example I [paragraph .64].

* * *

**AI 11, *Using the Work of a Specialist: Auditing Interpretations of AS 1210***

* * *

.21 *Interpretation*—When other relevant evidential matter exists, the auditor should consider it before reaching a conclusion about the appropriateness of management's accounting for a transfer.[14] However, since the isolation aspect of surrender of control is assessed primarily from a legal perspective, the auditor usually will not be able to obtain persuasive evidence in a form other than a legal opinion. In the absence of persuasive evidence that a transfer has met the isolation criterion, derecognition of the transferred assets is not in conformity with generally accepted accounting principles and the auditor should consider the need to express a qualified or adverse opinion in accordance with paragraphs .18~~35~~ through .43~~60~~ of AS 3105~~1~~, ~~*Reports on Audited Financial Statements*~~ *Departures from Unqualified Opinions and Other Reporting Circumstances*. However, if permission for the auditor to use a legal opinion that he or she deems otherwise adequate is not granted, this would be a scope limitation and the auditor should consider the need to express a qualified opinion or to disclaim an opinion in accordance with AS 3105~~1~~.05~~22~~–.09~~26~~ and AS 3105~~1~~.44~~61~~–.47~~63~~.

* * *

**AI 16, *Auditing Accounting Estimates: Auditing Interpretations of AS 2501***

* * *

.03 *Required Information Presented*—When an entity discloses in its basic financial statements only information required by FASB Statement No. 107, the auditor may issue an ~~standard~~ unqualified opinion (assuming no other report modifications are necessary). The auditor may add an emphasis-of-matter paragraph describing the nature and possible range of such fair value information especially when management's best estimate of value is used in the absence of quoted market values (FASB Statement No. 107, paragraph 11 [AC section F25.115D]) and the range of possible values is significant (*see* paragraph .19 of AS 3101, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*). If the entity has not disclosed required fair value information, the auditor should evaluate whether the financial statements are materially affected by the departure from generally accepted accounting principles.

* * *

**AI 17, Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments: Auditing Interpretations of AS 2505**

* * *

.23 If the auditor is uncertain as to the meaning of the lawyer's evaluation, he should request clarification either in a follow-up letter or a conference with the lawyer and client, appropriately documented. If the lawyer is still unable to give an unequivocal evaluation of the likelihood of an unfavorable outcome in writing or orally, the auditor should look to the guidance in paragraphs .28~~45~~ through .32~~49~~ of AS 3105~~1~~, ~~*Reports on Audited Financial Statements*~~ *Departures from Unqualified Opinions and Other Reporting Circumstances*, to determine the effect, if any, of the lawyer's response on the auditor's report.

* * *

**AI 20: *Other Information in Documents Containing Audited Financial Statements: Auditing Interpretations of AS 2710***

* * *

.08 *Interpretation*—If the auditor has been engaged to ~~examine and report on management's assertion, the guidance in AT section 501,~~ ~~*Reporting on an Entity's Internal Control Over Financial Reporting*~~~~, should be followed~~ perform an audit of management's assessment of the effectiveness of internal control over financial reporting, the auditor should follow the requirement of AS 2201, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

.09 If the auditor has not been engaged to <u>perform an audit of management's assessment of the effectiveness of internal control over financial reporting</u> ~~examine and report on management's assertion~~, the auditor should follow the <u>requirements in AS 3105.59-60.</u> ~~guidance in AS 2710, which states that "the auditor has no obligation to perform any procedures to corroborate other information contained in [such] a document." Under AS 2710, the auditor is required to read the report by management and consider whether it is materially inconsistent with information appearing in the financial statements and, as a result, he or she may become aware of a material misstatement of fact.[5]~~

~~[5] Unless information on internal control over financial reporting appears in the financial statements, which is not common, a management assertion on the effectiveness of internal control over financial reporting could not be inconsistent with information appearing in financial statements.~~

~~.10 Although not required, the auditor may consider adding the following paragraph to the standard auditor's report: "We were not engaged to examine management's assertion about the effectiveness of [*name of entity's*] internal control over financial reporting as of [*date*] included in the accompanying [*title of management's report*] and, accordingly, we do not express an opinion thereon."~~

* * *

**AI 23, ~~Reports on Audited Financial Statements: Auditing Interpretations of AS 3101~~ <u>Departures from Unqualified Opinions and Other Reporting Circumstances</u>: Auditing Interpretations of AS 310<u>5</u>~~1~~**

* * *

.01 *Question*— Paragraph .07~~24~~ of AS 3105~~1~~, ~~*Reports on Audited Financial Statements*~~ *Departures from Unqualified Opinions and Other Reporting Circumstances*, states that "Common restrictions on the scope of the audit include those applying to the observation of physical inventories and the confirmation of accounts receivable by direct communication with debtors. . . ." A footnote to that paragraph states: "Circumstances such as the timing of the work may make it impossible for the auditor to accomplish these procedures. In this case, if the auditor is able to satisfy himself or herself as to inventories or accounts receivable by applying alternative procedures, there is no significant limitation on the scope of the work, and the report need not include reference to the omission of the procedures or to the use of alternative procedures." Outside firms of nonaccountants specializing in the taking of physical inventories are used at times by some companies, such as retail stores, hospitals, and automobile dealers, to count, list, price and subsequently compute the total dollar amount of inventory on hand at the date of the physical count. Would obtaining the report of an outside inventory-taking firm be an acceptable alternative procedure to the independent auditor's own observation of physical inventories?

* * *

.36 ~~Examples of~~ An example of the Opinion on the Financial Statements and the Basis for Opinion sections of an auditor's report~~s~~ on single year financial statements in the year of adoption of liquidation basis follows:[1A] ~~with such an explanatory paragraph follow.~~

~~*Report on Single Year Financial Statements in Year of Adoption of Liquidation Basis*~~

Opinion on the Financial Statements

~~"~~We have audited the statement of net assets in liquidation of XYZ Company (the "Company") as of December 31, 20X2, and the related statement of changes in net assets in liquidation for the period from April 26, 20X2 to December 31, 20X2~~.~~, ~~In addition, we have~~ and audited the statements of income, retained earnings, and cash flows for the period from January 1, 20X2 to April 25, 20X2, and the related notes [*and schedules*] (collectively referred to as the "financial statements"). ~~"~~In our opinion, the financial statements ~~referred to above~~ present fairly, in all material respects, the net assets in liquidation of ~~XYZ~~ the Company as of December 31, 20X2, the changes in its net assets in liquidation for the period from April 26, 20X2 to December 31, 20X2, and the results of its operations and its cash flows for the period from January 1, 20X2 to April 25, 20X2, in conformity with accounting principles generally accepted in the United States of America applied on the bases described below. ~~in the preceding paragraph."~~

~~"~~As described in Note X to the financial statements, the stockholders of ~~XYZ~~ the Company approved a plan of liquidation on April 25, 20X2, and the Company commenced liquidation shortly thereafter. As a result, the Company has changed its basis of accounting for periods subsequent to April 25, 20X2 from the going-concern basis to a liquidation basis.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.~~-~~We are a public accounting firm registered with the Public Company

Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

"We conducted our audit in accordance with the standards of the PCAOB ~~Public Company Accounting Oversight Board (United States)~~. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our ~~An~~ audit included~~s~~ performing procedures to assess the risk of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence ~~supporting~~ regarding the amounts and disclosures in the financial statements. ~~An~~ Our audit also included~~s~~ ~~assessing~~ evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements ~~presentation~~. We believe that our audit provides a reasonable basis for our opinion.

[1A] The auditor's report must include the same basic elements and communication of critical audit matters as would be required in an unqualified auditor's report under AS 3101, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*.

~~*Report on Comparative Financial Statements in Year of Adoption of Liquidation Basis*~~ An example of the Opinion on the Financial Statements and the Basis for

Opinion sections of an auditor's report on comparative financial statements in the year of adoption of liquidation basis follows:[1B]

Opinion on the Financial Statements

~~"~~We have audited the balance sheet of XYZ Company (the "Company") as of December 31, 20X1, the related statements of income, retained earnings, and cash flows for the year then ended, and the statements of income, retained earnings, and cash flows for the period from January 1, 20X2 to April 25, 20X2, and~~. In addition, we have~~ audited the statement of net assets in liquidation as of December 31, 20X2, and the related statement of changes in net assets in liquidation for the period from April 26, 20X2 to December 31, 20X2, and the related notes [*and schedules*] (collectively referred to as the "financial statements"). ~~"~~In our opinion, the financial statements ~~referred to above~~ present fairly, in all material respects, the financial position of ~~XYZ~~ the Company as of December 31, 20X1, the results of its operations and its cash flows for the year then ended and for the period from January 1, 20X2 to April 25, 20X2, its net assets in liquidation as of December 31, 20X2, and the changes in its net assets in liquidation for the period from April 26, 20X2 to December 31, 20X2, in conformity with accounting principles generally accepted in the United States of America applied on the bases described below. ~~in the preceding paragraph."~~

~~"~~As described in Note X to the financial statements, the stockholders of ~~XYZ~~ the Company approved a plan of liquidation on April 25, 20X2, and the Company commenced liquidation shortly thereafter. As a result, the Company has changed its basis of accounting for periods subsequent to April 25, 20X2 from the going-concern basis to a liquidation basis.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

~~"~~We conducted our audits in accordance with the standards of the PCAOB ~~Public Company Accounting Oversight Board (United States)~~. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our ~~An~~ audits included~~s~~ performing procedures to assess the risk of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence ~~supporting~~ regarding the amounts and disclosures in the financial statements. ~~An~~ Our audits also included~~s~~ ~~assessing~~ evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements ~~presentation~~. We believe that our audits provide a reasonable basis for our opinion.

[1B] *Id.*

* * *

**12. Reference in Auditor's ~~Standard~~ Unqualified Report to Management's Report**

.51 *Question*—One of the basic elements of the auditor's ~~standard~~ unqualified report is a statement that the financial statements are the responsibility of the Company's management. That statement is required in the auditor's report even when a document containing the auditor's report includes a statement by management regarding its responsibility for the presentation of the financial statements. When an annual shareholders' report (or other client-prepared document that includes audited financial statements) contains a management report that states the financial statements are the responsibility of management, is it permissible for the auditor's report to include a reference to the management report?

.52 *Interpretation*—No. The statement about management's responsibilities for the financial statements required by AS 3101, ~~*Reports on Audited Financial Statements*~~ *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*, should not be further elaborated upon in the auditor's ~~standard~~ unqualified report or referenced to management's report. Such modifications to the ~~standard~~ auditor's unqualified report may lead users to erroneously believe that the auditor is providing assurances about representations made by management about their responsibility for financial reporting, internal controls and other matters that might be discussed in the management report.

* * *

**14. Reporting on Audits Conducted in Accordance with the Standards of the**

**PCAOB and in Accordance with International Standards on Auditing**

* * *

.56 *Question*—AS 3101 requires ~~states that a basic element of the auditor's report is~~ a statement that the audit was conducted in accordance with the standards of the PCAOB ~~and an identification of the United States of America as the country of origin of those standards~~. If the auditor conducts the audit in accordance with the standards of the PCAOB and in accordance with the International Standards on Auditing promulgated by the International Auditing and Assurance Standards Board ~~Practices Committee~~ of the International Federation of Accountants, may the auditor so indicate in the auditor's report?

.57 *Interpretation*—Yes. AS 3101 requires that the auditor indicate in the auditor's report that the audit was conducted in accordance with the standards of the PCAOB ~~and an identification of the United States of America as the country of origin of those standards~~; however, AS 3101 does not prohibit the auditor from indicating that the audit also was conducted in accordance with another set of auditing standards. If the audit also was conducted in accordance with the International Standards on Auditing, in their entirety, the auditor may so indicate in the auditor's report. To determine whether an audit was conducted in accordance with the International Standards on Auditing, it is necessary to consider the text of the International Standards on Auditing in their entirety, including the basic principles and essential procedures together with the related guidance included in the International Standards on Auditing.

* * *

.59 An example of reporting on an audit conducted in accordance with the standards of the PCAOB and in accordance with International Standards on Auditing follows:

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audit. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB ~~Public Company Accounting Oversight Board (United States)~~ and in accordance with International Standards on Auditing. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. ~~An~~ Our audit included~~s~~ performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding ~~supporting~~ the amounts and disclosures in the financial statements. ~~An~~ Our audit also included~~s~~ evaluating ~~assessing~~ the accounting principles used and significant estimates made by management, as well as evaluating the overall ~~financial statement~~ presentation of

> the financial statements. We believe that our audit provides a reasonable basis for our opinion.

* * *

.61 *Interpretation*—If the prior-period audited financial statements are *unchanged*, pursuant to AS 3105~~1~~.58~~74~~ the successor auditor should indicate in the ~~introductory paragraph~~ Opinion on the Financial Statements section of his or her report (*a*) that the financial statements of the prior period were audited by another auditor, (*b*) the date of the predecessor auditor's report, (*c*) the type of report issued by the predecessor auditor, and (*d*) if the report was other than ~~a standard~~ an auditor's unqualified report, the substantive reasons therefor. The successor auditor ordinarily also should indicate that the other auditor has ceased operations. Footnote 18~~29~~ of AS 3105~~1~~ indicates that the successor auditor should not name the predecessor auditor in the report. An example of the reference that would be added to the ~~introductory paragraph~~ Opinion on the Financial Statements section of the successor auditor's report is presented as follows:

> The financial statements of ABC Company as of December 31, 20X1, and for the year then ended were audited by other auditors who have ceased operations. Those auditors expressed an unqualified opinion on those financial statements in their report dated March 31, 20X2.

A reference to the predecessor auditor's report should be included even if the predecessor auditor's report on the prior-period financial statements is reprinted and accompanies the successor auditor's report, because reprinting does not constitute reissuance of the predecessor auditor's report.

* * *

.63 When the prior-period financial statements have been restated, the successor auditor may be engaged either to reaudit the prior-period financial statements or to audit only the restatement adjustments. If the successor auditor is engaged to audit only the restatement adjustments and applies sufficient procedures to satisfy himself or herself as to the appropriateness of the restatement adjustments, the successor auditor may report on the restatement adjustments using the guidance in AS 3105~~1~~.58~~74~~. (The auditor also may use the guidance on alternative language contained in paragraph .71, below.) In determining the nature, timing and extent of procedures, the successor auditor should consider that a predecessor auditor who has ceased operations cannot perform the procedures to evaluate the appropriateness of the restatement adjustments as described in AS 2905, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*.

* * *

.71 If the successor auditor is engaged to audit only the restatement adjustments and applies sufficient procedures to satisfy himself or herself as to the appropriateness of the restatement adjustments, the successor auditor may report on the restatement adjustments using the guidance in AS 3105~~1~~.58~~74~~. Alternatively, the successor auditor may wish to make it clear that he or she did not audit, review, or apply other procedures to the prior-period financial statements beyond the procedures applied to the restatement adjustments. Accordingly, he or she may include the following paragraph in his or her report:

* * *

.74 *Question*—If the prior-period financial statements audited by a predecessor auditor who has ceased operations have been subsequently restated, but the successor auditor has not yet completed an audit of current-period financial statements, can the successor auditor report on the restatement adjustments pursuant to 3105~~1~~.58~~74~~?

.75 *Interpretation*—No. AS 3105~~1~~.58~~74~~ is only applicable when the prior-period financial statements are presented for comparative purposes with current-period audited financial statements. If the prior-period financial statements have been restated, and the successor auditor is requested to report on those financial statements without also reporting on current-period audited financial statements, the successor auditor would need to reaudit the prior-period financial statements in order to report on them.

* * *

**AI 24, *Special Reports: Auditing Interpretations of AS 3305***

* * *

[10] Generally accepted accounting principles require the use of current-value accounting for financial statements of certain types of entities (for example, investment companies, employee benefit plans, personal financial statements, and mutual and common trust funds). This interpretation does not apply to reports on current-value financial statements of such entities. The auditor engaged to report on current-value financial statements of such entities should follow the guidance in AS 3105~~1~~, ~~*Reports on Audited Financial Statements*~~ *Departures from Unqualified Opinions and Other Reporting Circumstances*.

* * *

.83 *Interpretation*—No. An offering memorandum generally is a document providing information as the basis for negotiating an offer to sell certain assets or businesses or to raise funds. Normally, parties to an agreement or other specified parties for whom the special-purpose financial presentation is intended have not been identified. Accordingly, the auditor should follow the reporting guidance in AS 3105~~1~~.18~~35 -~~.27~~44~~ and .40~~58 -~~ .43~~60~~.

* * *

.86 If there is no such agreement, the auditor should follow the guidance in AS 3105~~1~~.18~~35 -~~.27~~44~~ and .40~~58 -~~.43~~60~~.

* * *

***AI 25, Association with Financial Statements: Auditing Interpretations of AS 3320***

* * *

.15 *Question*—Paragraph .01~~.04~~ of ~~AS 3101, *Reports on Audited Financial Statements,*~~ AS 3320, *Association with Financial Statements*, states in part: "In all cases where an auditor's name is associated with financial statements, the report should contain a clear-cut indication of the character of the auditor's work, if any, and the degree of responsibility the auditor is taking." ~~Paragraph .03 of~~ AS 3320.03~~, Association with Financial Statements,~~ states that "An accountant is associated with financial statements when he has consented to the use of his name in a report, document, or written communication containing the statements." Is the auditor "associated" with condensed financial data when he is identified by a financial reporting service as being a company's independent auditor or when his report is reproduced and presented with such data?

* * *

**AI 28, *Evidential Matter Relating to Income Tax Accruals: Auditing Interpretations***

* * *

.10 Auditing standards require the auditor to obtain sufficient appropriate evidential matter through, among other things, inspection and inquiries to afford a reasonable basis for an opinion on the financial statements. Paragraph .35 of AS 2810, *Evaluating Audit Results*, requires the auditor to obtain sufficient appropriate evidential matter about assertions in the financial statements of material significance or else to qualify or disclaim his or her opinion on the statements. Paragraph .07~~24~~ of AS 3105~~1~~, ~~*Reports on Audited Financial Statements*~~ *Departures from Unqualified Opinions and Other Reporting Circumstances*, states that, "When restrictions that significantly limit the scope of the audit are imposed by the client, ordinarily the auditor should disclaim an opinion on the financial statements." Also, AS 2805, *Management Representations*, requires the auditor to obtain written representations from management. AS 2805.06 states that specific representations should relate to the following matters, "availability of all financial records and related data," and AS 2805.08 states that a materiality limit does not apply to that representation. AS 2805.13 states that "management's refusal to furnish a written representation" constitutes a limitation on the scope of the audit sufficient to preclude an unqualified opinion.

EXHIBIT 1

SECURITIES AND EXCHANGE COMMISSION

(Release No. 34-XXXXX; File No. PCAOB-2017-01)

[Date]

Public Company Accounting Oversight Board; Notice of Filing of Proposed Rules on The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion, and Departures from Unqualified Opinions and Other Reporting Circumstances, and Related Amendments to Auditing Standards

Pursuant to Section 107(b) of the Sarbanes-Oxley Act of 2002 (the "Act" or "Sarbanes-Oxley Act"), notice is hereby given that on [Date of Form 19b-4 Submission], the Public Company Accounting Oversight Board (the "Board" or "PCAOB") filed with the Securities and Exchange Commission (the "Commission" or "SEC") the proposed rules described in Items I and II below, which items have been prepared by the Board. The Commission is publishing this notice to solicit comments on the proposed rules from interested persons.

I. Board's Statement of the Terms of Substance of the Proposed Rules

On June 1, 2017, the Board adopted new rules and amendments to auditing standards (collectively, the "proposed rules") to make the auditor's report more informative and relevant to investors and other financial statement users. The text of the proposed rules appears in Exhibit A to the SEC Filing Form 19b-4 and is available on the Board’s website at https://pcaobus.org/Rulemaking/Pages/Docket034.aspx and at the Commission’s Public Reference Room.

II. Board's Statement of the Purpose of, and Statutory Basis for, the Proposed Rules

In its filing with the Commission, the Board included statements concerning the purpose of, and basis for, the proposed rules and discussed any comments it received on the proposed rules. The text of these statements may be examined at the places specified in Item IV below. The Board has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements. In addition, the Board is requesting that the Commission approve the proposed rules and related amendments, with the exception of the requirements related to critical audit matters, pursuant to Section 103(a)(3)(C) of the Sarbanes-Oxley Act, for application to audits of emerging growth companies ("EGCs"), as that term is defined in Section 3(a)(80) of the Securities Exchange Act of 1934 ("Exchange Act"). The Board's request is set forth in section D.

A. Board's Statement of the Purpose of, and Statutory Basis for, the Proposed Rules

(a) Purpose

Summary

The Board has adopted a new auditor reporting standard, AS 3101, The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion (the "final standard" or "AS 3101") and related amendments to its auditing standards that will require the auditor to provide new information about the audit and make the auditor's report more informative and relevant to investors and other financial statement users. The final standard retains the pass/fail opinion of the existing auditor's report but makes significant changes to the existing auditor's report, including the following:

- Communication of critical audit matters—matters communicated or required to be communicated to the audit committee and that: (1) relate to accounts or disclosures that are material to the financial statements; and

(2) involved especially challenging, subjective, or complex auditor judgment;

- Disclosure of auditor tenure—the year in which the auditor began serving consecutively as the company's auditor; and
- Other improvements to the auditor's report—a number of other improvements to the auditor's report to clarify the auditor's role and responsibilities, and make the auditor's report easier to read.

The Board believes that adopting these requirements responds to the strong interest of investors for enhanced communication about the audit and is consistent with its mandate to "protect the interests of investors and further the public interest in the preparation of informative, accurate and independent audit reports."[1]

The Board has adopted the final standard after more than six years of outreach and public comment, including comments from members of the Board's Standing Advisory Group ("SAG") and Investor Advisory Group ("IAG"). The Board has taken into consideration all comments and believes its approach responds to investor requests for additional information about the financial statement audit without imposing requirements beyond the auditor's expertise or mandate.

Investors are the beneficiaries of the audit and the auditor's report is the primary means by which the auditor communicates with them. Currently, however, the auditor's report conveys little of the information obtained and evaluated by the auditor as part of the audit. And while the auditor's report has generally remained unchanged since the

---

[1] Section 101(a) of the Sarbanes-Oxley Act of 2002 ("Sarbanes-Oxley"), 15 U.S.C. 7211(a).

1940s, companies' operations have become more complex and global, and the financial reporting frameworks have evolved toward an increasing use of estimates, including fair value measurements. As part of the audit, auditors often perform procedures involving challenging, subjective, or complex judgments, but the auditor's report does not communicate this information to investors. Stated differently, the auditor's report does little to address the information asymmetry between investors and auditors,[2] even though investors have consistently asked to hear more from the auditor, an independent third-party expert whose work is undertaken for their benefit.[3] The Board believes that reducing the information asymmetry between investors and auditors should, in turn, reduce the information asymmetry between investors and management. Outside the United States, other regulators and standard setters have already adopted expanded auditor reporting.

The communication of critical audit matters will inform investors and other financial statement users of matters arising from the audit that involved especially challenging, subjective, or complex auditor judgment, and how the auditor addressed

---

[2] Economists often describe this imbalance, where one party has more or better information than another party, as "information asymmetry." As part of the system of financial reporting, the audit of the financial statements helps reduce the information asymmetry investors face by providing an independent opinion about whether the financial statements are presented fairly in all material respects.

[3] *See* PCAOB IAG survey, *Improving the Auditor's Report* (Mar. 16, 2011) ("IAG 2011 survey"). *See also* CFA Institute's *Usefulness of the Independent Auditor's Report Survey Results* (May 4, 2011), *Independent Auditor's Report Survey Results* (Mar. 31, 2010), and *Independent Auditor's Report Monthly Poll Results* (Mar. 12, 2008) ("CFA survey and poll results"). *See also* Board public meeting transcripts and participant statements (Apr. 2-3, 2014), available on the Board's website in Rulemaking Docket Matter No. 034, *Proposed Auditing Standards on the Auditor's Report and the Auditor's Responsibilities Regarding Other Information and Related Amendments* ("Docket 034").

these matters. The Board believes that these matters will likely be identified in areas that investors have indicated would be of particular interest to them, such as significant management estimates and judgments made in preparing the financial statements; areas of high financial statement and audit risk; significant unusual transactions; and other significant changes in the financial statements. The final standard is designed to elicit more information about the audit directly from the auditor. The Board believes that the critical audit matter requirements will respond to requests from investors for more information from the auditor while appropriately addressing concerns raised by other commenters.

Investors and investor advocates have suggested a variety of ways in which investors can use the information provided in critical audit matters. In the view of some investors, critical audit matters will add to the total mix of information, providing insights relevant in analyzing and pricing risks in capital valuation and allocation, and contributing to their ability to make investment decisions. Investors also stated that critical audit matters will focus their attention on key financial reporting areas and identify areas that deserve more attention, enhancing the efficiency of investors and others in the consumption of financial information. Some investors believe that critical audit matters will highlight areas that they may wish to emphasize in their engagement with the company and provide important information that they can use in making proxy voting decisions, including ratification of the appointment of auditors.

The final standard also includes a new required statement in the auditor's report disclosing the year in which the auditor began serving consecutively as the company's auditor, as well as a number of other improvements to the auditor's report, such as a statement regarding the requirement for the auditor to be independent. Requiring disclosure of auditor tenure in the auditor's report will make this information readily accessible in a timely way for investors who find it useful. The other improvements to the auditor's report are intended to enhance the user's understanding of the auditor's role and responsibilities related to the audit of the financial statements, make the auditor's report easier to read, and provide a consistent format.

The final standard will generally apply to audits conducted under PCAOB standards. However, communication of critical audit matters is not required for audits of brokers and dealers reporting under the Securities Exchange Act of 1934 (the "Exchange Act") Rule 17a-5; investment companies other than business development companies; employee stock purchase, savings, and similar plans ("benefit plans"); and emerging growth companies ("EGCs"), as defined in Section 3(a)(80) of the Exchange Act. Auditors of these entities may choose to include critical audit matters in the auditor's report voluntarily. The other requirements of the final standard will apply to these audits.

Critical audit matters are determined using a principles-based framework and the Board anticipates that the level of auditor effort will depend on the nature and complexity of the audit.

The Board has adopted a phased approach to the effective dates for the new requirements to provide accounting firms, companies, and audit committees more time to prepare for implementation of the critical audit matter requirements, which are expected to require more effort to implement than the additional improvements to the auditor's report. Subject to approval by the Securities and Exchange Commission ("SEC"), the final standard and amendments will take effect as follows:

- All provisions other than those related to critical audit matters will take effect for audits of fiscal years ending on or after December 15, 2017; and

- Provisions related to critical audit matters will take effect for audits of fiscal years ending on or after June 30, 2019, for large accelerated filers; and for fiscal years ending on or after December 15, 2020, for all other companies to which the requirements apply.

Auditors may elect to comply before the effective date, at any point after SEC approval of the final standard.

(b) Statutory Basis

The statutory basis for the proposed rules is Title I of the Act.

B. Board's Statement on Burden on Competition

Not applicable.

C. Board's Statement on Comments on the Proposed Rules Received from Members, Participants or Others

The Board released the proposed rule amendment for public comment in *Concept Release on Possible Revisions to PCAOB Standards Related to Reports on Audited Financial Statements; and Related Amendments to PCAOB Standards*, PCAOB Release No. 2011-003 (June 21, 2011) ("concept release"), *Proposed Auditing Standards—The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion; The Auditor's Responsibilities Regarding Other Information in Certain Documents Containing Audited Financial Statements and the Related Auditor's Report; and Related Amendments to PCAOB Standards*, PCAOB Release No. 2013-005 (Aug. 13, 2013) ("proposal"), *Proposed Auditing Standard—The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion and*

*Related Amendments to PCAOB Standards*, PCAOB Release No. 2016-003 (May 11, 2016) ("reproposal"). See Exhibit 2(a)(A). A copy of Release Nos. 2011-003, 2013-005, 2016-003 and the comment letters received in response to the PCAOB's requests for comment are available on the PCAOB's website at https://pcaobus.org/Rulemaking/Pages/Docket034.aspx. The Board received 491 written comment letters. The Board's response to the comments it received and the changes made to the rules in response to the comments received are discussed below.

Discussion of the Final Standard

*Critical Audit Matters*

Under the final standard, the auditor will be required to communicate critical audit matters in the auditor's report in order to provide more information about the audit and make the auditor's report more informative and relevant to investors and other financial statement users.

Investor, investor advocate, and analyst commenters generally supported the reproposed requirement to communicate critical audit matters. Some of them stated that the communication of critical audit matters would be relevant to investors and other financial statement users by informing them of issues identified in the audit that were significant to the auditor, focusing attention on issues that would be pertinent to understanding the financial statements, and enhancing investor confidence in the financial statements.

The larger and some smaller accounting firms generally supported including critical audit matters in the auditor's report with some modification of the reproposed requirements. Other commenters, including other smaller accounting firms, companies, and audit committee members, did not support the requirements. Some of these commenters asserted that critical audit matters would not provide relevant information to investors, may be duplicative of the company's disclosure, may result in disclosing information not otherwise required to be disclosed, could increase cost, or could delay completion of the audit.

Other commenters suggested that the Board align the definition of critical audit matters with the International Auditing and Assurance Standards Board's ("IAASB") definition of key audit matters to enhance overall consistency.

Consistent with the Board's statutory mandate under Section 101(a) of Sarbanes-Oxley and in response to the 2008 U.S. Department of the Treasury Advisory Committee on the Auditing Profession ("ACAP") recommendation and continued investor support for expanded auditor reporting, the final standard includes the requirement to communicate critical audit matters substantially as reproposed. The Board has taken into consideration all comments, including concerns raised by some commenters, which are described in more detail below, and believes its approach responds to investor requests for additional information about the financial statement audit without imposing requirements beyond the auditor's expertise or mandate. The communication of critical audit matters will inform investors and other financial statement users of matters arising from the audit that involved especially challenging, subjective, or complex auditor judgment, and how the auditor addressed those matters.

Critical audit matters are determined using a principles-based framework and the Board anticipates that the level of auditor effort will depend on the nature and complexity of the audit. This would in turn depend on the complexity of the operations and accounting and control systems of the company.

*Determination of Critical Audit Matters*

Definition of Critical Audit Matter

The reproposed standard defined a critical audit matter as any matter arising from the audit of the financial statements that was *communicated or required to be communicated to the audit committee* and that *relates to accounts or disclosures that are material to the financial statements* and *involved especially challenging, subjective, or complex auditor judgment*. For the reasons explained below, the Board is adopting the definition as reproposed.

Communicated or Required to be Communicated to the Audit Committee

Most commenters agreed that matters communicated or required to be communicated to the audit committee would be the appropriate source for critical audit matters. These commenters stated that matters communicated to the audit committee are the most meaningful to users of the financial statements and using them as the source of critical audit matters would assist the auditor in determining critical audit matters in the most efficient and effective manner.

PCAOB standards require the auditor to communicate to the audit committee, among other things:

- Significant risks identified by the auditor;
- Certain matters regarding the company's accounting policies, practices, and estimates;

- Significant unusual transactions;
- Certain matters regarding the auditor's evaluation of the company's relationships and transactions with related parties; and
- Other matters arising from the audit that are significant to the oversight of the company's financial reporting process.

Several commenters suggested revising the source of critical audit matters. Some suggested narrowing the source of critical audit matters only to matters required to be communicated to the audit committee, on the basis that this would avoid chilling communications regarding non-required matters and reduce the burden of documentation. Other commenters suggested that the Board consider, as an alternative, selecting critical audit matters only from critical accounting policies and estimates disclosed by management, which some said would eliminate the potential for the auditor to become the original source of information, as well as the potential for conflicting disclosures between the auditor and management. Some commenters also recommended not specifying the source for critical audit matters and leaving it up to auditor judgment. Other commenters suggested broadening the source of critical audit matters to include matters documented in the engagement completion document, reviewed by the engagement quality reviewer, or communicated with management and other members of the board of directors, as the Board had originally proposed in 2013.

The final standard retains the source of critical audit matters as reproposed. Critical audit matters will be drawn from matters required to be communicated to the audit committee (even if not actually communicated) and matters actually communicated (even if not required). The source will include auditor communication requirements under

AS 1301, *Communications with Audit Committees*, other PCAOB rules and standards,[4] and applicable law,[5] as well as communications made to the audit committee that were not required. This approach scopes in the broadest population of audit committee communications and will not require the auditor to determine whether matters communicated to the audit committee were required to be communicated. However, it seems likely that matters that meet the definition of a critical audit matter will usually relate to areas that are required to be communicated to the audit committee, either under a specific communication requirement or the broad provisions of paragraph .24 of AS 1301, which requires communication of matters arising from the audit that are significant to audit committee oversight of the financial reporting process.

Required communications to the audit committee generally include the areas in which investors have expressed particular interest in obtaining information in the auditor's report, such as significant management estimates and judgments made in preparing the financial statements; areas of high financial statement and audit risk; significant unusual transactions; and other significant changes in the financial statements.

The final standard does not limit the source of critical audit matters to critical accounting policies and estimates because the Board does not believe this would be an appropriate starting point in light of investor interest in a broader range of topics related to the audit. Additionally, the final standard does not broaden the source, as proposed in

---

[4] *See* Appendix B of AS 1301, which identifies other PCAOB rules and standards that require audit committee communication, such as AS 2410, *Related Parties*, and AS 2502, *Auditing Fair Value Measurements and Disclosures*.

[5] *See*, *e.g.*, Section 10A(k) of the Exchange Act, 15 U.S.C. 78j-1(k); Rule 2-07 of Regulation S-X, 17 CFR 210.2-07; and Exchange Act Rule 10A-3, 17 CFR 240.10A-3.

2013, to also include matters documented in the engagement completion document and reviewed by the engagement quality reviewer because it is unlikely that a matter that is determined to be a critical audit matter would not have already been communicated to the audit committee.

Some commenters suggested that using audit committee communications as the source for critical audit matters could impair the relationship between auditor, management, and the audit committee (e.g., chill communications, give rise to conflict, or cause auditors to communicate more than they otherwise would). However, other commenters argued that critical audit matters would enhance, not impair, communications between auditors, investors, and those charged with governance (including audit committees). For matters required to be communicated to the audit committee, the Board believes there should not be a chilling effect or reduced communications to the audit committee because the requirements for such communications are not changing. It would seem that any chilling effect would more likely relate to matters that are not explicitly required to be communicated to the audit committee, although given the broad requirements of AS 1301 (particularly paragraph .24), the Board believes that there may be few, if any, relevant communications affected by that possibility.

Some commenters suggested excluding certain required audit committee communications from the source of critical audit matters, generally because these communications relate to sensitive areas and may result in the auditor communicating information not disclosed by management. Suggestions included: corrected and uncorrected misstatements, qualitative aspects of significant accounting policies and practices, alternative treatments within generally accepted accounting principles ("GAAP") for policies and practices related to material accounts, violations or possible violations of law or regulation, independence considerations, disagreements with management, other material written communications between the auditor and management, overall planned audit strategy, delays encountered in the audit, and competency issues of management. Other commenters argued that no audit committee communications should be specifically excluded from consideration as a source of potential critical audit matters.

The final standard does not exclude any required audit committee communications from the source of critical audit matters. To the extent that any such communication met the critical audit matter definition (including that it (1) relates to accounts or disclosures that are material to the financial statements and (2) involved especially challenging, subjective, or complex auditor judgment), the Board believes it will be an appropriate subject for an auditor to communicate as a critical audit matter.

Relates to Accounts or Disclosures That Are Material to the Financial Statements

The materiality component of the reproposed definition of critical audit matters—that the matter "relates to accounts or disclosures that are material[6] to the financial

[6] The definition of materiality is established under the U.S. federal securities laws. In interpreting those laws, the U.S. Supreme Court has held that a fact is material if there is "a substantial likelihood that the . . . fact would have been viewed by the reasonable investor as having significantly altered the 'total mix' of information made available." *See TSC Industries v. Northway, Inc.*, 426 U.S. 438, 449 (1976). *See also Basic, Inc. v. Levinson*, 485 U.S. 224, 231-32 (1988). As the Supreme Court has further explained, determinations of materiality require "delicate assessments of the inferences a 'reasonable shareholder' would draw from a given set of facts and the significance of those inferences to him . . ." *TSC Industries*, 426 U.S. at 450.

statements"— was intended to respond to investor requests for informative and relevant auditor's reports while, at the same time, addressing other commenters' concerns regarding auditor communication of immaterial information that management is not required to disclose under the applicable financial reporting framework and SEC reporting requirements.

Some investor commenters suggested removing the materiality component of the reproposed definition of critical audit matters, arguing that it made the definition too narrow and would unnecessarily exclude relevant information. Some of these commenters observed that many cases of material accounting problems or fraud started as 'immaterial' to the financial statements and built over time, and that such matters may not meet the reproposed definition of a critical audit matter because of the materiality component.

Other commenters, primarily companies and accounting firms, argued that the reproposed definition was too broad and suggested modifying the materiality component such that a critical audit matter would itself have to be material to the financial statements as a whole, rather than relating to accounts or disclosures that are material to the financial statements. These commenters expressed concern that the phrase "relates to accounts or disclosures that are material to the financial statements" could apply to too many matters, resulting in the auditor disclosing immaterial matters that would not otherwise be disclosed by management, or give the impression of a piecemeal opinion.

After consideration of comments, the Board has determined to adopt the materiality component in the final definition of critical audit matter as reproposed. In the Board's view, the purpose of the standard—making the auditor's report more useful and informative to investors—is better served by auditor communication of matters related to accounts or disclosures that are material to the financial statements. As one commenter noted, limiting the source of critical audit matters and adding a materiality component that directly relates to accounts and disclosures "would allow the auditor to emphasize the most important matters to users of the financial statements, and limit the inclusion of an overabundance of [critical audit matters] within the auditor's report that could deemphasize their importance."[7]

At the same time, in the Board's view, limiting critical audit matters to those that are, in and of themselves, material to the financial statements as a whole would not serve the intended purpose of the standard. If the auditor were required to determine that a critical audit matter itself is material, rather than related to an account or disclosure that is material, it is likely that fewer matters would meet the definition of a critical audit matter and, thus, investors would likely receive less, and less audit-specific, information than under the standard as adopted.

Accordingly, as in the reproposal, the final standard provides that each critical audit matter relates to accounts or disclosures that are material to the financial statements. Consistent with the reproposal, "relates to" clarifies that the critical audit matter could be a component of a material account or disclosure and does not necessarily need to correspond to the entire account or disclosure in the financial statements. For example, the auditor's evaluation of the company's goodwill impairment assessment could be a critical audit matter if goodwill was material to the financial statements, even if there was

---

[7] *See* letter from Dixon Hughes Goodman, LLP (Aug. 15, 2016) at 2, available on the Board's website in Docket 034 (also noting that there is a continuing risk that the auditor could disclose information about the company that was not previously disclosed by the company).

no impairment; it would relate to goodwill recorded on the balance sheet and the disclosure in the notes to the financial statements about the company's impairment policy and goodwill. In addition, a critical audit matter may not necessarily relate to a single account or disclosure but could have a pervasive effect on the financial statements if it relates to many accounts or disclosures. For example, the auditor's evaluation of the company's ability to continue as a going concern could also represent a critical audit matter depending on the circumstances of a particular audit.

On the other hand, a matter that does not relate to accounts or disclosures that are material to the financial statements cannot be a critical audit matter. For example, a potential loss contingency that was communicated to the audit committee, but that was determined to be remote and was not recorded in the financial statements or otherwise disclosed under the applicable financial reporting framework, would not meet the definition of a critical audit matter; it does not relate to an account or disclosure in the financial statements, even if it involved especially challenging auditor judgment. The same rationale would apply to a potential illegal act if an appropriate determination had been made that no disclosure of it was required in the financial statements; the matter would not relate to an account or disclosure that is material to the financial statements.

For the same reason, the determination that there is a significant deficiency in internal control over financial reporting, in and of itself, cannot be a critical audit matter; such determination, in and of itself, does not relate to an account or disclosure that is material to the financial statements as no disclosure of the determination is required. A significant deficiency could, however, be among the principal considerations that led the auditor to determine that a matter is a critical audit matter.[8]

Involved Especially Challenging, Subjective, or Complex Auditor Judgment

Many commenters supported including "matters that involved especially challenging, subjective, or complex auditor judgment" in the reproposed definition of a critical audit matter. Other commenters argued that the phrase "especially challenging, subjective, or complex auditor judgment" is broad and subjective and would lead to inconsistent application of the reproposed definition. For example, some commenters said that critical audit matters would vary based on the experience and competence of the auditor, even if the underlying facts and circumstances were the same. One commenter urged disclosure of the auditor's perspective on material related party transactions. Another commenter suggested that the standard include a note stating that it is expected that in most audits, financial statement matters involving the application of significant judgment or estimation by management would involve especially challenging, subjective, or complex auditor judgment.

Several commenters suggested using the IAASB's definition of key audit matters, which includes those matters that were of most significance in the audit of the financial statements and that required significant auditor attention. One commenter argued that this would avoid reliance on the auditor's determination of whether a matter involved especially challenging, subjective, or complex auditor judgment, which the commenter said would give auditors too much discretion.

---

[8] *See* below for additional considerations related to auditor disclosure of original information.

After consideration of comments, the Board is adopting this component of the definition of critical audit matter as reproposed, namely "matters that involved especially challenging, subjective, or complex auditor judgment." This grounds the definition in the auditor's expertise and judgment, which is directly responsive to investor requests for information from the auditor's point of view. Thus, the Board believes that this definition will focus critical audit matters in areas where investors will particularly benefit from expanded reporting by the auditor.

The determination of critical audit matters is principles-based and the final standard does not specify any items that would always constitute critical audit matters. For example, the standard does not provide that all matters determined to be "significant risks" under PCAOB standards would be critical audit matters.[9] Some significant risks may be determined to be critical audit matters, but not every significant risk would involve especially challenging, subjective, or complex auditor judgment. To illustrate, improper revenue recognition is a presumed fraud risk and all fraud risks are significant risks;[10] however, if a matter related to revenue recognition does not involve especially challenging, subjective, or complex auditor judgment, it will not be a critical audit matter. Similarly, the final standard does not provide, as some commenters suggested, that material related party transactions or matters involving the application of significant judgment or estimation by management always constitute critical audit matters. The auditor must determine, in the context of the specific audit, that a matter involved

---

[9] A significant risk is a "risk of material misstatement that requires special audit consideration." Paragraph .A5 of AS 2110, *Identifying and Assessing Risks of Material Misstatement*.

[10] *See* AS 2110.71.

especially challenging, subjective, or complex auditor judgment. In addition, focusing on auditor judgment should limit the extent to which expanded auditor reporting could become duplicative of management's reporting. To the extent that critical audit matters reflect differences in auditors' experience and competence, this in itself should also be informative.

Factors

The reproposal included the following nonexclusive list of factors for the auditor to take into account, together with audit-specific factors, when determining whether a matter involved especially challenging, subjective, or complex auditor judgment:

a. The auditor's assessment of the risks of material misstatement, including significant risks;

b. The degree of auditor subjectivity in determining or applying audit procedures to address the matter or in evaluating the results of those procedures;

c. The nature and extent of audit effort required to address the matter, including the extent of specialized skill or knowledge needed or the nature of consultations outside the engagement team regarding the matter;

d. The degree of auditor judgment related to areas in the financial statements that involved the application of significant judgment or estimation by management, including estimates with significant measurement uncertainty;

e. The nature and timing of significant unusual transactions and the extent of audit effort and judgment related to these transactions; and

f. The nature of audit evidence obtained regarding the matter.

Commenters in general agreed that including such factors would assist the auditor in determining critical audit matters.

Some commenters suggested changes to better align the factors with areas of complex management judgment, to reduce the risk that the auditor would be the source of original information, to clarify the linkage of procedures performed by the auditor and sufficient appropriate audit evidence obtained in performing those procedures, and to focus the auditor on the audit procedures executed to obtain sufficient and appropriate audit evidence rather than audit strategy decisions. Some commenters suggested harmonizing the factors with the IAASB's factors for determining key audit matters.

After considering the comments received, the Board has modified the factors by reordering them and revising the factor relating to the degree of auditor subjectivity (factor b above) to refer to the application (rather than determination) of audit procedures, which focuses it more clearly on the performance of the audit rather than audit strategy.

Some commenters suggested that the factor pertaining to the nature and extent of the audit effort (factor c) be revised to relate to the nature and extent of audit effort required to obtain sufficient appropriate audit evidence to address a matter and the factor pertaining to the nature of audit evidence (factor f) be deleted to clarify that obtaining audit evidence is a component of audit effort. The final standard does not change factor c as suggested because it would inappropriately narrow the factor exclusively to considerations related to obtaining audit evidence rather than the nature of the overall audit effort. Additionally, the Board determined to retain factor f as a stand-alone factor because, as stated in the reproposal, in the limited implementation trial conducted by several accounting firms, this factor appeared to be one of the most useful in determining critical audit matters.[11]

A commenter recommended including a factor based on the extent of interaction with the audit committee. The final standard does not include this factor because the extent of interaction might not be a meaningful indicator of the complexity or subjectivity of the matter and it could create incentives to limit communication between the auditor and the audit committee.

One commenter did not agree with elimination of two proposed factors that related to the severity of control deficiencies and corrected and uncorrected misstatements. These factors were eliminated from the reproposal in response to comments that the factors would lead the auditor to determine matters as critical audit matters in areas where the company has no existing reporting obligation, or where the company has determined that the matters are not material and therefore do not require disclosure under the financial reporting framework. For these reasons, the final standard does not include these factors.

Under the final standard, once the auditor identifies a matter communicated or required to be communicated to the audit committee that relates to accounts or disclosures that are material to the company's financial statements, the auditor should take into account the following nonexclusive list of factors, as well as other audit-specific

[11] *See* letter from the Center for Audit Quality (June 19, 2014) at 5, available on the Board's website in Docket 034.

factors, when determining whether a matter involved especially challenging, subjective, or complex auditor judgment:

a. The auditor's assessment of the risks of material misstatement, including significant risks;

b. The degree of auditor judgment related to areas in the financial statements that involved the application of significant judgment or estimation by management, including estimates with significant measurement uncertainty;

c. The nature and timing of significant unusual transactions and the extent of audit effort and judgment related to these transactions;

d. The degree of auditor subjectivity in applying audit procedures to address the matter or in evaluating the results of those procedures;

e. The nature and extent of audit effort required to address the matter, including the extent of specialized skill or knowledge needed or the nature of consultations outside the engagement team regarding the matter; and

f. The nature of audit evidence obtained regarding the matter.

The determination should be made in the context of the particular audit, with the aim of providing audit-specific information rather than a discussion of generic risks. The factors provide a principles-based framework for the auditor to use in assessing whether a matter involved especially challenging, subjective, or complex auditor judgment. Depending on the matter, the auditor's determination that a matter is a critical audit matter might be based on one or more of these factors, other factors specific to the audit, or a combination.

Audit Period Covered by Critical Audit Matters

The reproposal would have required the auditor to communicate critical audit matters for the audit of the current period's financial statements. Because the communication of critical audit matters for prior periods might also be useful to investors and other financial statement users in certain situations, the reproposed standard provided that the auditor may communicate critical audit matters relating to a prior period when: (1) the prior period's financial statements are made public for the first time, such as in an initial public offering, or (2) issuing an auditor's report on the prior period's financial statements because the previously issued auditor's report could no longer be relied upon.

Some commenters generally supported communicating critical audit matters for only the current period's financial statements or for all periods if audited financial statements have not been made public previously. Other commenters supported communication of critical audit matters for all periods presented along with an explanation if prior year critical audit matters are not repeated in the current year. Yet another commenter stated that the auditor should be encouraged to use judgment as to whether to include critical audit matters for prior periods and not limit the consideration only to the circumstances described in the reproposal.

The final standard retains the requirement to communicate critical audit matters only for the current audit period. While most companies' financial statements are presented on a comparative basis, and thus most auditor's reports cover a similar period, requiring auditors to communicate critical audit matters for the current period, rather than for all periods presented, will provide relevant information about the most recent audit and is intended to reflect a cost-sensitive approach to auditor reporting. In addition, investors and other financial statement users will be able to look at prior years' filings to analyze critical audit matters over time. However, the auditor could choose to include critical audit matters for prior periods. The final standard clarifies that the two situations relating to a prior period are examples rather than the only situations in which a critical audit matter for a prior period may be communicated.

As noted in the reproposal, if the auditor's report is dual-dated, the auditor will determine whether the new information for which the auditor's report is dual-dated gives rise to any additional critical audit matters.

In situations in which a predecessor auditor has been asked to reissue its auditor's report, the communication of critical audit matters for the prior period need not be repeated because it is only required for the current year. However, the predecessor auditor could choose to include prior year critical audit matters in the reissued auditor's report.

*Requirements of Other Regulators and Standard Setters*

*IAASB.* Under the IAASB's standard, "key audit matters" are defined as those matters that, in the auditor's professional judgment, were of most significance in the audit of the financial statements of the current period. Key audit matters are determined using a two-step process. First, the auditor identifies the matters communicated with those charged with governance[12] that required significant auditor attention in performing the

[12] *See* paragraph 8 of ISA 701. *See also* ISA 260, *Communication with Those Charged with Governance*, which provides requirements for auditor communications with those charged with governance.

audit, taking into account:

- Areas of higher assessed risks of material misstatement, or significant risks;
- Significant auditor judgments relating to areas in the financial statements that involved significant management judgment, including accounting estimates that have been identified as having high estimation uncertainty; and
- The effect on the audit of significant events or transactions that occurred during the period.[13]

Second, of the matters that required significant auditor attention, the auditor identifies those of most significance in the audit as the key audit matters.[14] The IAASB requires the communication of key audit matters for the current period only.[15]

*European Union ("EU").* The EU requires the auditor to describe the most significant assessed risks of material misstatement, including assessed risks of material misstatement due to fraud.[16] The EU does not specify the period for which these need to be described.

*Financial Reporting Council in the United Kingdom ("FRC").* The FRC requires the auditor to describe the risks of material misstatement that had the greatest effect on:

---

[13] *See* paragraph 9 of ISA 701.

[14] *See* paragraph 10 of ISA 701.

[15] *See* paragraphs 8 and 10 of ISA 701.

[16] *See* requirements in 2(c) of Article 10, *Audit Report*, of Regulation (EU) No 537/2014.

(1) the overall audit strategy; (2) the allocation of resources in the audit; and (3) directing the efforts of the engagement team.[17] The FRC does not specify the period for which these need to be described.

*Communication of Critical Audit Matters*

Under the reproposal, the auditor would have been required to include introductory language in the auditor's report preceding the communication of critical audit matters and to communicate critical audit matters by identifying each matter, describing the auditor's principal considerations for determining that the matter was a critical audit matter, describing how the critical audit matter was addressed in the audit, and referring to the relevant financial statement accounts and disclosures.

Comments varied on the reproposed requirements for communication of critical audit matters and the level of detail the auditor should provide, including whether the auditor should be permitted to provide information about the company that has not been previously disclosed by the company (which commenters referred to as "original information"). Commenters generally agreed with identifying each critical audit matter and referring to the relevant financial statement accounts and disclosures. One commenter suggested removing the requirements to describe the considerations for determining that a matter was a critical audit matter and how the critical audit matter was addressed in the audit. While some commenters stated that the proposed requirements regarding auditor's communication of critical audit matters are sufficiently clear, many suggested improvements to some of the components of the communication requirements.

---

[17] *See* paragraph 19A of UK ISA 700 (2013).

After consideration of comments, the Board has made some enhancements to the communication requirements, as described below.

Introductory Language

The reproposed standard provided introductory language to be included in the "Critical Audit Matters" section of the auditor's report indicating that critical audit matters did not alter the opinion on the financial statements and that the auditor was not providing a separate opinion on the critical audit matters. Some commenters supported the introductory language on the basis that it could minimize users' potential misunderstanding of the critical audit matters.

Some commenters suggested additions to the introductory language to emphasize that critical audit matters are subjective and may not represent the most important aspects of the financial statements, to clarify that the description of procedures should not be taken as indicative of results of any individual procedure, or to limit reliance on critical audit matters by adding language similar to that used in a report on an audit of internal control over financial reporting ("ICFR").[18] The introductory language in the final standard does not include the suggested additions because such language could be interpreted as disclaiming or inappropriately minimizing the communication of critical audit matters.

---

[18] The auditor's report on the audit of internal control over financial reporting requires a paragraph stating that, "because of inherent limitations, internal control over financial reporting may not prevent or detect misstatements and that projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate." *See* paragraph .85j of AS 2201, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

Other commenters suggested minor revisions in the introductory language to refer to the "communication of critical audit matters" rather than the critical audit matters themselves. In response to this comment, the required introductory language in the final standard has been revised as follows (additions are *in italic* and deletions are in {brackets}):

> The critical audit matters communicated below are matters arising from the current period audit *of the financial statements* that were communicated or required to be communicated to the audit committee and that: (1) relate to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. *The communication of* {C}*c*ritical audit matters do*es* not alter in any way our opinion on the financial statements, taken as a whole, and we {do} *are* not, *by communicating the critical audit matters below*, {provide} *providing* separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

Communication Requirements

The reproposal required that, for each critical audit matter, the auditor would:

- Identify the critical audit matter;
- Describe the principal considerations that led the auditor to determine that the matter is a critical audit matter;
- Describe how the critical audit matter was addressed in the audit; and

- Refer to the relevant financial statement accounts and disclosures that relate to the critical audit matter.

As discussed in more detail below, these requirements have been adopted substantially as reproposed.[19]

*Identify the Critical Audit Matter and Describe the Principal Considerations that Led the Auditor to Determine that the Matter is a Critical Audit Matter*

Many commenters who addressed this topic supported the identification of the critical audit matter and limiting the description to "the principal considerations" that led the auditor to determine that the matter is a critical audit matter, and those aspects of the communication requirements are adopted as reproposed. The auditor's description of the principal considerations should be specific to the circumstances and provide a clear, concise, and understandable discussion of why the matter involved especially challenging, subjective, or complex auditor judgment. It is expected that the communication will be tailored to the audit to avoid standardized language and to reflect the specific circumstances of the matter.

*Describe How the Critical Audit Matter was Addressed in the Audit*

The reproposed standard included a new requirement for the auditor to describe how the critical audit matter was addressed in the audit. While the standard did not

---

[19] The reproposing release included two illustrative examples of the communication of critical audit matters. *See* PCAOB Release No. 2016-003, Section IV.A.2.b. Given the principles-based nature of the requirements for critical audit matters and the objective of providing tailored, audit-specific information, the examples were intended to function as illustrations of how critical audit matters could be communicated, and not as templates for how critical audit matters should be communicated. Comments received on these examples were taken into account in the Board’s consideration of the final standard. Illustrative examples do not appear in the adopting release because the Board believes auditors should provide tailored, audit-specific information when communicating critical audit matters in the auditor’s report.

specify how this should be done, the reproposing release provided four examples of potential approaches to such descriptions: (1) the auditor's response or approach that was most relevant to the matter; (2) a brief overview of the procedures performed; (3) an indication of the outcome of the auditor's procedures; and (4) key observations with respect to the matter, or some combination of these elements.[20]

Many commenters were supportive of a requirement to describe how each critical audit matter was addressed in the audit. Some commenters asserted that a description of how a critical audit matter was addressed would benefit investors by providing insights on how and on what basis the auditor developed the opinion or the rigor that underlies the audit procedures performed. For example, one investor commenter stated that including audit procedures in the description of a critical audit matter would make the auditor's report more informative and useful. Several investors suggested that the auditor should be required or encouraged to provide informative, company-specific findings when describing how the critical audit matter was addressed in the audit, such as whether management's significant accounting estimates and judgments were balanced, mildly optimistic, or mildly pessimistic.

One commenter suggested that the description of how the critical audit matter was addressed in the audit should be optional. Several commenters objected to the auditor including audit procedures in the description of critical audit matters because it would not provide any incremental value or actionable information to investors, investors may not have the expertise or context to understand audit procedures, or the description of audit

[20] These elements are similar to the IAASB's elements described in paragraph A46 of ISA 701. The EU also requires that the auditor describe key observations with respect to the most significant assessed risks of material misstatement.

procedures would become boilerplate. One commenter suggested adding a note to clarify that the purpose of describing audit procedures is to provide information about the audit but not specific details that would compromise the effectiveness of audit procedures. Other commenters suggested that only the principal audit procedures should be provided.

The final standard includes the requirement for the auditor to describe how the critical audit matter was addressed in the audit because it is consistent with the Board's objective of providing more information about the audit and, if developed with an appropriate focus on the intended audience, should be of interest to users. Similar to the reproposal, the final standard does not prescribe a specific way to meet this requirement. Several commenters suggested that the four examples provided in the reproposing release be included in the standard because they provide helpful guidance on how the requirement could be met. The final standard includes a note incorporating these examples, which should clarify the Board's expectations while providing flexibility in describing how a critical audit matter was addressed in the audit.

While the description of how the critical audit matter was addressed in the audit will require judgment, the auditor should bear in mind that the intent of communicating critical audit matters is to provide information about the audit of the company's financial statements that will be useful to investors. A brief overview of the audit procedures performed is one of the alternatives for describing how the critical audit matter was addressed. If the auditor chooses to describe audit procedures, the descriptions are expected to be at a level that investors and other financial statement users would understand. In addition, as the four examples should make clear, the objective is to provide a useful summary, not to detail every aspect of how the matter was addressed in the audit. Limiting the use of highly technical accounting and auditing terms in the description of critical audit matters, particularly if the auditor chooses to describe audit procedures, may help financial statement users better understand these matters in relation to the audit of the financial statements.

In its comment letter, a working group of the IAG stressed the importance to investors of auditor findings, which they described as "the one item that [they] believe would provide the greatest value to investors."[21] Acknowledging the difficulty of mandating reporting of findings, the working group recommended that the Board encourage auditors to include them voluntarily. Under the final standard, communication of the auditor's findings is not required; however, in describing the audit response, the auditor may choose to include findings as an indication of the outcome of audit procedures or key observations about a matter. The Board shares the working group's view that the inclusion of informative, company-specific audit findings related to critical audit matters may, in appropriate circumstances, be valuable to investors and encourages auditors to consider including such findings in their auditor's reports. However, in describing findings, the language used should not imply that the auditor is providing a separate opinion on the critical audit matter or on the accounts or disclosures to which they relate.

*Refer to the Relevant Financial Statement Accounts or Disclosures that Relate to the Critical Audit Matter*

---

[21] Letter from the IAG's auditor's report working group (Aug. 15, 2016) at 1, available on the Board's website in Docket 034. The working group made a presentation regarding its comment letter at the IAG meeting in October 2016, available on the Board's website.

The reproposed standard would have required the auditor to refer to the relevant financial statement accounts and disclosures that relate to the critical audit matter. There were few comments on this requirement. One commenter suggested that, to avoid duplication, reference should be made only to the disclosures and not the financial statement accounts. In response to this suggestion, the final standard clarifies that the auditor could refer to either the relevant account or disclosure, rather than both, to avoid potential duplication.

The reproposal also solicited comment on whether, in addition to referring to the relevant financial statement accounts and disclosures, the auditor should refer to relevant disclosures outside the financial statements. Commenters that addressed this question generally opposed the auditor referencing disclosures outside the financial statements when describing a critical audit matter because it may incorrectly suggest that such information is audited or cause readers to misinterpret the auditor's role in relation to such information. The final standard only requires the auditor to refer to the relevant financial statement accounts or disclosures.

### Additional Considerations Related to the Communication Requirements

#### Auditor Disclosure of "Original Information" about the Company

The reproposed standard included a note to indicate that, when describing critical audit matters in the auditor's report, the auditor is not expected to provide original information unless it is necessary to describe the principal considerations that led the auditor to determine that a matter is a critical audit matter or how the matter was addressed in the audit.

Investor commenters, including the auditor's report working group of the IAG, argued that there should not be any limitation on the auditor providing original information and that the reproposal went too far in constraining the auditor from providing original information in response to concerns expressed by other commenters (which were primarily companies and accounting firms).

Other commenters expressed the view that auditors should not provide original information about the company or should be limited to providing information about the audit and not the company. These commenters stated that the auditor providing original information about the company would be inconsistent with the traditional U.S. regulatory framework, whereby management provides information about the company and the auditor attests to compliance with the applicable financial reporting framework. However, one investor commenter noted that auditor reporting should not be limited by "original information," a term that is undefined in auditing literature.

No PCAOB standard, SEC rule, or other financial reporting requirement prohibits auditor reporting of information that management has not previously disclosed. Rather, there are areas under current law and auditing standards that require auditor reporting that goes beyond attesting to the compliance of management disclosures (e.g., substantial doubt about a company's ability to continue as a going concern[22] or illegal acts[23]). As

---

[22] *See* AS 2415, *Consideration of an Entity's Ability to Continue as a Going Concern.* The auditor is required to include a going concern explanatory paragraph if the auditor concludes that substantial doubt exists about the entity's ability to continue as a going concern for a reasonable period of time (*see* AS 2415.12). If management's disclosure with respect to the company's ability to continue as a going concern is inadequate, the auditor's reporting responsibility regarding going concern remains and the report includes either a qualified or an adverse opinion (*see* AS 2415.14).

[23] Auditors may be required, under certain circumstances, pursuant to the

discussed in more detail below, auditors may have professional or state law obligations to maintain client confidentiality, but these obligations should not apply to, or should be preempted by, reporting obligations arising under federal law and regulations, including under PCAOB standards. Accordingly, the requirement to communicate critical audit matters is not, as some commenters have suggested, inconsistent with the existing U.S. financial reporting framework and auditors' other obligations.

Commenters also said that the role of the audit committee or management would be undermined by requiring the auditor to disclose information about the company's financial statements, since in their view it is solely management's responsibility to determine what disclosure is appropriate. Several commenters stated that the communication of critical audit matters would give auditors leverage to encourage disclosure of information by management, and that management would likely modify its disclosure in response to the communication of critical audit matters in the auditor's report so the auditor would not be a source of original information. While some commenters said that this would improve management disclosures, others said it would be an inappropriate expansion of the auditor's role or would add significant costs. Other commenters stated that companies could be harmed by the disclosure of confidential or competitively sensitive information. Another commenter expressed concern that investors could be confused or misled if auditor reporting lacked context or appeared to conflict with management disclosures. One commenter suggested that the auditor should disclose

---

Private Securities Litigation Reform Act of 1995 (codified in Section 10A(b)1 of the Exchange Act), to make a report to the SEC relating to an illegal act that has a material effect on the financial statements.

original information only if a disclosure matter continues to be unresolved after discussion with management and the audit committee.

The Board acknowledges these concerns and, in developing the auditor's communication requirements, has sought to strike an appropriate balance between investor demands for expanded auditor reporting and the costs and potential unintended consequences associated with providing it. While auditor reporting of original information is not prohibited, it is limited to areas uniquely within the perspective of the auditor: describing the principal considerations that led the auditor to determine that the matter is a critical audit matter and how the matter was addressed in the audit. The objective of critical audit matters—helping investors to focus on identified areas of the audit and understand how the auditor addressed them—may not be accomplished if the auditor is prohibited from providing such information. Moreover, prohibiting the auditor from providing such information could make critical audit matter communications incomplete in a way that could be confusing to or misunderstood by investors.

It seems likely, as one commenter observed, that auditors will generally not have incentives to provide information about the company that the company has not already made public. Another commenter noted that, in current practice, disclosure is already guided by an iterative process between management and the auditor, and expected that a similar process would occur for critical audit matters, reducing the likelihood that the auditor would be a source of original information since critical audit matters would likely overlap with increased management disclosure.[24] To the extent that an auditor's decision

[24] It should be noted, however, that critical audit matters are not a substitute for disclosures required of the company under the applicable financial reporting framework.

to communicate a critical audit matter incents the company to expand or supplement its own disclosure, the Board believes this may improve the quality of public disclosures, which would be an indirect benefit of the standard. However, if the company does not provide additional disclosure, and the information is necessary to describe the principal considerations that led the auditor to determine that the matter is a critical audit matter or how it was addressed in the audit, the Board believes it is in the public interest for the auditor to include that information in the auditor's report. The final standard therefore retains the note from the reproposal explaining that the auditor is not expected to provide information about the company that has not been made publicly available by the company unless such information is necessary to describe the principal considerations that led the auditor to determine that a matter is a critical audit matter or how the matter was addressed in the audit.

Of course, any matter that will be communicated as a critical audit matter will already have been discussed with the audit committee, and the auditor will be required to provide a draft of the auditor's report to the audit committee and discuss the draft with them.[25] In addition, as the auditor determines how best to comply with the communication requirements, the auditor could discuss with management and the audit committee the treatment of any sensitive information.

Some commenters also stated that, in areas where there are specific reporting obligations under the applicable financial reporting framework or SEC reporting requirements but the matter falls below the disclosure threshold (for example, a significant deficiency), auditor communication could, in effect, impose a lower disclosure

---

[25] *See* AS 1301.21, as amended.

threshold. With regard to such areas, it is likely that the nature of a critical audit matter and its description would be broader than, for instance, focusing on a significant deficiency. In addition, while the auditor is required to describe the principal considerations that led the auditor to determine that the matter is a critical audit matter, (which may include, if relevant, information about the company's processes and controls) and how the overall matter was addressed, it is not necessary for the auditor's description to use the terminology of the other auditing standard, such as "significant deficiency" within the broader context of a critical audit matter. For example, if a significant deficiency was among the principal considerations in determining that revenue recognition was a critical audit matter, the auditor would describe the relevant control-related issues over revenue recognition in the broader context of the critical audit matter without using the term "significant deficiency."[26]

Some commenters suggested that any expanded disclosure requirements should come from the SEC and the Financial Accounting Standards Board ("FASB"), in the form of additional management disclosures, rather than from the Board expanding requirements for auditor reporting. However, investors have consistently asked to hear more from the auditor, an independent third-party expert whose work is undertaken for the investor's benefit. As one commenter noted, the auditor is best suited to provide insights on how and on what basis the auditor developed its opinion. The final standard is designed to elicit information about the audit directly from the auditor's perspective.

---

[26] It should be noted that the determination that a matter was a significant deficiency in internal control over financial reporting, on its own, could not be a critical audit matter.

If auditors can adequately convey to investors the principal considerations and how the auditor addressed the matter without including previously undisclosed information, it is expected that they will. However, the standard provides that even when management has not disclosed information, the auditor is not constrained from providing such information if it is necessary to describe the principal considerations that led the auditor to determine that a matter is a critical audit matter or how the matter was addressed in the audit.

The Board intends to monitor implementation of the critical audit matter requirements to determine if additional guidance is needed in this area.

Potential Compliance Issues Related to Critical Audit Matters

Some commenters suggested that the reporting of critical audit matters could create compliance challenges for companies.

Two commenters expressed concern that companies' SEC filings may have to be amended because of changes in the description or reporting of critical audit matters. In principle, auditors should approach errors and misstatements in the communication of critical audit matters in the same way they would approach any other error or misstatement in the auditor's report that does not affect the auditor's opinion or the ability of market participants to rely on the opinion.[27] It appears that under current practice, SEC filings have been amended solely to correct errors in auditor's reports, such as incorrect auditor's report dates or missing explanatory paragraphs.

---

[27] The final standard indicates that the auditor's communication of critical audit matters does not alter in any way the auditor's opinion on the financial statements, taken as a whole.

Another commenter expressed concern that management may be asked to respond to investor questions regarding issues described in critical audit matters and may not be in a position to do so, particularly in light of their responsibilities under Regulation FD. Given the auditor's responsibility to communicate with the audit committee, and the likelihood of extensive discussions between auditors and management regarding critical audit matters, it seems likely that management will be prepared to respond appropriately and in compliance with their legal obligations (including Regulation FD), as they would with regard to any other question about information included in an SEC filing.

Ability to Communicate No Critical Audit Matters

The reproposal provided that the auditor could determine there were no critical audit matters and provide a statement to that effect in the auditor's report. Commenters generally supported the auditor's ability to determine that there are no critical audit matters. Two commenters suggested that the auditor should not have to make a statement in the auditor's report that there were no critical audit matters because the absence of a critical audit matter should be sufficient without the definitive statement, similar to an emphasis paragraph. The final standard includes the possibility that the auditor could determine, and state in the auditor's report, that there are no critical audit matters.[28] The statement that there are no critical audit matters is required because unlike an emphasis paragraph, critical audit matters are a required element of the auditor's report.

---

[28] Since communication of critical audit matters will not be required for the audits of EGCs, brokers and dealers reporting under Exchange Act Rule 17a-5, 17 CFR 240.17a-5, investment companies other than business development companies, and benefit plans, the auditor's report for the audits of these entities will not be required to include the statement that there are no critical audit matters.

The determination of critical audit matters is based on the facts and circumstances of each audit. The Board expects that, in most audits to which the requirement to communicate critical audit matters applies, the auditor will determine that at least one matter involved especially challenging, subjective, or complex auditor judgment. There may be critical audit matters even in an audit of a company with limited operations or activities. However, there may be circumstances in which the auditor determines there are no matters that meet the definition of a critical audit matter and, in those circumstances, the auditor will communicate that there were no critical audit matters.

*Requirements of Other Regulators and Standard Setters*

*IAASB.* For each key audit matter, the IAASB requires the auditor to reference the related disclosures, if any, in the financial statements and address: (1) why the matter was considered to be one of most significance in the audit and therefore determined to be a key audit matter and (2) how the matter was addressed in the audit.[29] The IAASB allows the auditor to determine that there are no key audit matters to communicate in the auditor's report and, if so, requires a statement to this effect.[30]

*EU.* The EU requires the auditor to include in the auditor's report: (1) a description of the most significant assessed risks of material misstatement, including assessed risks of material misstatement due to fraud; (2) a summary of the auditor's response to the risks; and (3) where relevant, key observations arising with respect to the risks.[31]

[30] *See* paragraphs 14 and 16 of ISA 701.

[31] *See* requirements in 2(c) of Article 10, Audit Report, of Regulation (EU)

*FRC.* The FRC requires the auditor, among other things, to: (1) describe those assessed risks of material misstatement that were identified by the auditor and (2) provide an overview of the scope of the audit, including an explanation of how the scope addressed the assessed risks of material misstatement.[32] The explanations of the matters set out in the auditor's report should be described in a way that: (1) enables a user to understand their significance in the context of the audit of the financial statements as a whole and not as discrete opinions on separate elements of the financial statements; (2) enables the matters to be related directly to the specific circumstances of the audited entity and are not therefore generic or abstract matters expressed in standardized language; and (3) complements the description of significant issues required to be made by the audit committee.[33]

*Documentation of Critical Audit Matters*

The reproposed standard required documentation of the basis for the auditor's determination whether each matter that both: (1) was communicated or required to be communicated to the audit committee and (2) relates to accounts or disclosures that are material to the financial statements, involved or did not involve especially challenging, subjective, or complex auditor judgment. Some commenters supported a documentation requirement only for matters that were determined to be critical audit matters. Some of these commenters asserted that documentation about matters determined not to be critical audit matters would add costs and primarily benefit PCAOB inspections rather than audit

---

No 537/2014.

[32] *See* paragraph 19A of UK ISA 700 (2013).

[33] *See* paragraph 19B of UK ISA 700 (2013).

quality. Others stated that the requirement is not aligned with the IAASB's documentation requirement, which, in their view, focuses on rationale for inclusion as a key audit matter rather than exclusion. However, another commenter argued that the determination that a matter was not a critical audit matter would seem to be an important audit judgment that ought to be documented for review by the engagement quality reviewer. This commenter suggested that documentation be required only for matters required to be communicated to the audit committee (which would already have been documented) and not for those that are communicated otherwise. One auditor argued that the reproposed requirement would lead auditors to document all audit committee communications even if not required, and that this would disproportionately affect smaller companies whose audit committees more commonly request information not required to be communicated under PCAOB standards.

The final standard substantially retains the approach from the reproposal of requiring the auditor to document the basis for determining critical audit matters.[34] The objective of the requirement is to document how the determination of critical audit matters (or the determination that there are no critical audit matters) was made from among the matters communicated or required to be communicated to the audit committee that relate to accounts or disclosures that are material to the financial statements. The documentation requirement will also facilitate review by the engagement quality reviewer.[35]

---

[34] The language of the documentation requirements has been redrafted to improve clarity, based on a commenter's suggestion.

[35] Under the existing audit documentation requirements, audit documentation facilitates the planning, performance, and supervision of the engagement, and is the basis

The amount of documentation required could vary with the circumstances. For example, the auditor's basis for the determination may be so clear for some matters that a single sentence will be sufficient. This situation may arise, for instance, when the auditor's documentation prepared in the course of the audit includes sufficient detail about whether or not the matter involved especially challenging, subjective, or complex auditor judgment. Other matters may require more extensive documentation.

As noted in the reproposing release, for matters determined to be critical audit matters, the description in the auditor's report (which, among other things, must describe the principal considerations that led the auditor to determine that it was a critical audit matter) will generally suffice as documentation.

The auditor could comply with the documentation requirement in a variety of different ways. For example, the auditor could start with the communications to the audit committee, which are already documented, identify which of those matters relate to accounts or disclosures that are material to the financial statements, and then document the basis for the auditor's determination of whether or not each matter involved especially challenging, subjective, or complex auditor judgment. In documenting the basis for the determination, the auditor may include the factors the auditor took into account. This documentation may be prepared as an extension to the audit committee documentation or the auditor may prepare separate documentation.

*Requirements of Other Regulators and Standard Setters*

---

for the review of the quality of the work because it provides the reviewer with written documentation of the evidence supporting the auditor's significant conclusions. *See* paragraph .02 of AS 1215, *Audit Documentation*.

The IAASB requires the auditor to document the matters that required significant auditor attention and the rationale for the auditor's determination as to whether or not each of these matters is a key audit matter.[36] The EU does not include documentation requirements for expanded auditor reporting. The FRC does not include specific documentation requirements related to expanded auditor reporting.[37]

*Liability Considerations Related to Critical Audit Matters*

In both the proposal and the reproposal, the Board acknowledged that including critical audit matters would change the auditor's report in ways that could affect auditors' potential liability. As discussed in those releases, liability may be imposed on auditors under a number of different legal theories depending on the specific facts and circumstances of a particular case, including pursuant to Section 11 of the Securities Act of 1933, Section 10(b) of the Exchange Act, and various state law causes of action. The critical audit matters would themselves be new statements that could be the basis for asserted claims. In addition, information provided regarding critical audit matters could affect other aspects of securities fraud claims against either the issuer, the auditor, or both (for example, by being described in pleadings in an effort to plead fraud with particularity or as a basis to seek to undercut a claim of reliance). The Board specifically sought comment on what effect the communication of critical audit matters would have on private liability and whether there were any steps the Board could or should take to address any likelihood of an increase in potential liability in private litigation.

---

[36] *See* paragraph 18(a) of ISA 701.

[37] General documentation requirements appear in ISA (UK and Ireland) 230, *Audit Documentation*.

A number of companies and accountants responded to this request for comment. While several of these commenters noted that changes from the proposal had addressed certain of their liability concerns, most continued to express varying degrees of concern about the potential for increased liability, either for auditors or for both auditors and companies.

In particular, commenters expressed concern that investors who suffer a financial loss could assert legal claims against the auditor based on statements made in identifying and describing critical audit matters. As with the proposal, commenters expressed general concerns that communication of critical audit matters would encourage baseless litigation, would likely lead to increased audit fees, raise the settlement value of spurious claims, or potentially undermine the stringent pleading standards of the Private Securities Litigation Reform Act of 1995, which were intended to curtail non-meritorious claims against auditors and avoid the costs and burdens associated with them. Some commenters argued that auditors, to avoid being second-guessed, would have the incentive to communicate matters to the audit committee that were not otherwise required or to identify too many critical audit matters in an effort to protect themselves from liability. Several commenters expressed concern that communicating critical audit matters might compromise their ability to argue that the statements in the audit report are opinions which, one commenter argued, were "less vulnerable to challenges that they are false or misleading."[38] However, at least one of these commenters noted that the revised definition of a critical audit matter in the reproposal mitigated their concern on that point. Other commenters argued that the information communicated in describing critical audit

[38] Letter from PricewaterhouseCoopers LLP (Aug. 15, 2016) at 7, available on the Board's website in Docket 034.

matters could potentially be used to attack the audit by challenging the procedures performed or the adequacy of audit evidence obtained by the auditor. On the other hand, one commenter noted that the communication of critical audit matters is about disclosure of risks and challenges and expressed the belief that non-communication of such matters would be more problematic from a litigation point of view.

Some commenters argued that the risk of liability would be heightened if the auditor were providing original information about the company. In particular, several commenters contended that doing so would conflict with accountants' professional obligation to maintain client information in confidence, which could give rise to claims by the company against the auditor under state law.

Some commenters argued that critical audit matters could increase litigation risk for companies as well as the auditor because the new statements required of the auditor could form a basis for new legal claims, could be misinterpreted as acts of negligence on the part of the company, or could be used by plaintiffs as a "road map" for litigation against the company. One commenter argued that, because the underlying work papers are subject to discovery, critical audit matters would be used as a source for potential litigation against both auditors and companies.

Some of the commenters that expressed concerns about the potential for increased auditor liability also suggested changes to the reproposal that they maintained would reduce the liability impact of determining and communicating critical audit matters. For example, as previously discussed, several commenters suggested substantially similar changes to modify the materiality component of the definition of critical audit matters and to prohibit or discourage auditor communication of original information.

The Board has carefully considered commenters' concerns about potential liability throughout this standard-setting process, including the comments received on the reproposal. While mandating disclosure of critical audit matters will, by design, entail new statements in the auditor's report, the Board notes that any claim based on these new statements would have to establish all of the elements of the relevant cause of action (for example, when applicable, loss causation and reliance). Critical audit matters will not replace or alter the fundamental requirement that the auditor's report include the auditor's opinion that the financial statements are fairly presented in accordance with the applicable financial reporting framework, which has been, and the Board expects will continue to be, the primary statement at issue in most private securities litigation under federal law involving auditors.

Throughout this standard-setting process, the Board has carefully considered commenters' suggestions to alter the terms of its proposal to mitigate their concerns about potential liability for omitting a critical audit matter. As discussed in the reproposal, the Board limited and clarified the process for determining critical audit matters, including by narrowing the source of critical audit matters to matters communicated or required to be communicated to the audit committee, adding a materiality component to the critical audit matter definition, and refining the factors used to determine critical audit matters. Those changes, as well as the critical audit matter definition's focus on the auditor's judgment, should mitigate concerns about potential liability for omitting a critical audit matter. With respect to suggestions to further narrow the definition of critical audit matters and the related communication requirements, it is not clear, and commenters did not explain, how those changes would mitigate liability concerns other than by reducing the number and content of required communications of critical audit matters. As described above, the Board has determined not to incorporate those suggested changes because they appear likely to significantly reduce the number of potential critical audit matters and the informativeness of auditor communication of critical audit matters.

With respect to potential state law claims by companies against their auditors for disclosing original information, the Board notes that, as discussed above, it does not expect that, in general, critical audit matters will provide sensitive information that has not been disclosed by the company. With respect to the potential for a claim based on a situation in which the auditor found such disclosure necessary, the Board notes that auditors already have preexisting duties to disclose original information in certain circumstances.[39] Commenters did not cite any specific examples in which these requirements have resulted in unwarranted claims against auditors for disclosing client confidences. Because the auditor's obligations under PCAOB standards arise under federal law and regulations, professional or state law duties of client confidentiality

[39] For example, for at least the last 20 years, auditors have had duties to disclose in their auditor's reports when they have substantial doubt about the company's ability to continue as a going concern. *See* Section 10A of the Exchange Act and AS 2415. In addition, when in an audit of internal control over financial reporting, the auditor identifies a material weakness that has not been included in management's assessment, the auditor must modify its report to, among other things, "include a description of the material weakness, which should provide the users of the audit report with specific information about the nature of the material weakness and its actual and potential effect on the presentation of the company's financial statements . . .". *See* Note to paragraph .91 of AS 2201; *cf*. Statement of Gaylen R. Hansen, CPA, at the PCAOB public meeting (Apr. 2, 2014) ("Client confidentiality has a long-standing and important place in the accountancy profession. However, it doesn't serve investors well when it is parlayed to obfuscate the important obligation to call things as they are seen.").

should not apply to,[40] or should be preempted by,[41] the obligation to communicate critical audit matters.[42]

While the Board takes seriously the prospect of potential increases in auditors' or companies' liability, the Board believes it has appropriately addressed commenters' concerns regarding liability in a manner compatible with the objectives of this rulemaking, and in view of the rulemaking's anticipated benefits. Indeed, the Board notes that at least one of the commenters that expressed concern about potential liability, noted that those concerns "should not stand in the way of moving forward" on the reproposed standard.[43] At the same time, the Board acknowledges that a variety of claims can be raised related to the statements in the audit report and that litigation is inherently uncertain. If the final standard is approved by the SEC, the Board will monitor the standard after implementation for any unintended consequences.

*Additional Improvements to the Auditor's Report*

---

[40] For example, the relevant AICPA rule provides that auditors "shall not disclose any confidential client information without the specific consent of the client," but further provides that the confidentiality obligation shall not be construed "to prohibit … compliance with applicable laws and government regulations." *See* paragraphs .01 and .02 of 1.700.001 *Confidential Client Information Rule* of the AICPA Code of Professional Conduct (as of Dec. 15, 2014).

[41] *See Crosby v. Nat'l Foreign Trade Council*, 530 U.S. 363, 372-73 (2000); *New York v. FCC*, 486 U.S. 57, 64 (1988).

[42] Some commenters suggested that safe harbor rules be created to protect auditors and companies from liability for statements about critical audit matters. While, as noted above, the Board will monitor the effects of critical audit matters should the requirements be approved by the SEC, the Board is not convinced at this time that any such safe harbor is necessary and, in any event, such a safe harbor is beyond the Board's authority.

[43] *See* letter from Deloitte & Touche LLP (Aug. 12, 2016) at 5, available on the Board's website in Docket 034.

The reproposal provided a list of basic elements to be included in every auditor's report. Some of these basic elements, such as auditor tenure, would be new elements in the auditor's report. Other basic elements, such as the auditor's opinion, identification of the financial statements audited, and management's and auditor's responsibilities, were drawn from the existing auditor reporting standard.[44] Yet other basic elements, such as the name of the company under audit and the date of the financial statements, were incorporated from existing illustrative auditor's reports.

*Auditor Tenure*

The reproposal included a required statement in the auditor's report of the year the auditor began serving consecutively as the company's auditor. The Board also sought comment on whether auditor tenure should be disclosed in Form AP, *Auditor Reporting of Certain Audit Participants* ("Form AP"), rather than in the auditor's report.[45]

Disclosure of Tenure

Investor commenters stated that information regarding auditor tenure would be useful to financial statement users, for example, in deciding whether to vote to ratify the appointment of the auditor. Investors that expressed a preference supported tenure disclosure in the auditor's report, some on the basis of reducing investor search costs by ensuring a consistent location for the disclosure. One commenter representing a group of investors asserted that since the auditor's report is the primary means by which the

---

[44] *See* existing AS 3101.06–.08.

[45] In December 2015, the Board adopted Form AP, which provides investors and other financial statement users with information about engagement partners and other accounting firms that participate in audits of issuers. *See Improving the Transparency of Audits: Rules to Require Disclosure of Certain Audit Participants on a New PCAOB Form and Related Amendments to Auditing Standards*, PCAOB Release No. 2015-008 (Dec. 15, 2015).

auditor communicates with investors, it is appropriate for auditor tenure to be included in the auditor's report. This commenter further stated that disclosure of auditor tenure on Form AP would be an acceptable alternative to disclosure in the auditor's report only if the timeliness, accessibility, searchability, and overall functionality of the information disclosed on Form AP were at least equivalent to having the information disclosed in the auditor's report. Another commenter suggested that, if disclosure were required in the auditor's report, a specific location should be designated.

Currently, information about auditor tenure is not required to be communicated to investors by the auditor, management, or the audit committee.[46] However, there is a growing trend toward voluntary disclosure of auditor tenure. Recent analysis of corporate proxy statements for annual meetings of shareholders has found that a growing number of companies are disclosing auditor tenure,[47] presumably due to interest from investors.

---

[46] In certain instances, investors may be able to manually calculate tenure by reviewing company filings on the SEC's Electronic Data Gathering, Analysis and Retrieval system ("EDGAR") to determine when a company changed auditors. However, the information is not available prior to 1994 and may not be available for certain entities, such as investment companies and brokers and dealers, that are not required to file Form 8-K. *See* 17 CFR 249.308, Item 4.01 *Changes in Registrant's Certifying Accountant*. Accordingly, currently available information is neither complete nor a readily accessible alternative to auditor tenure disclosure.

[47] The Center for Audit Quality, together with Audit Analytics, reviewed corporate proxies filed through the end of June 2016, 2015, and 2014 of 1,500 Standard and Poor's ("S&P") Composite companies. Their analysis identified that in 2016, 2015, and 2014 auditor tenure was disclosed in the annual proxy statements of 59, 54, and 47 percent of the S&P 500 large-cap companies, respectively, 45, 44, and 42 percent of the S&P MidCap 400 companies, respectively, and 48, 46, and 50 percent of the S&P SmallCap 600 companies, respectively. *See* Center for Audit Quality and Audit Analytics, *2016 Audit Committee Transparency Barometer* (Nov. 2016). Separately, during their review of proxy statements of Fortune 100 companies, Ernst & Young identified that 63 percent of the companies reviewed voluntarily disclosed auditor tenure in 2016 compared to 62 percent in 2015, 51 percent in 2014, 29 percent in 2013, and 24 percent in 2012. *See* Ernst & Young, *Audit Committee Reporting to Shareholders in 2016*

However, voluntary disclosure is not provided for a significant number of audits subject to the Board's jurisdiction. Additionally, if disclosed, such information may not be provided in the same location in the proxy statement; for instance, some disclosures are in the audit committee report while others are in another section of the proxy.[48] Further, the proxy rules do not apply to all companies required to be audited under PCAOB standards; for example, foreign private issuers, many companies whose securities are not listed on a national securities exchange, and most investment companies are not required to prepare proxy statements.

Some commenters, primarily companies, did not support disclosure of auditor tenure in the auditor's report on the basis that such disclosure would not provide value to investors. Other companies and accounting firms raised a concern that tenure disclosure could result in inferences that, in their view, would be inappropriate about correlations between auditor tenure and audit quality, or between auditor tenure and auditor independence. Some commenters also suggested that auditor tenure is a corporate governance matter and that disclosure should be provided by management or the audit committee rather than the auditor. A few commenters suggested that tenure disclosure should be addressed by SEC rulemaking or provided only voluntarily. Some commenters, many of whom generally opposed auditor tenure disclosure, suggested that Form AP would be a preferable location for disclosing tenure if the Board proceeded with requiring the disclosure.

---

(Sept. 2016).

[48] *See* Center for Audit Quality and Audit Analytics, *2016 Audit Committee Transparency Barometer* (Nov. 2016).

The SEC's Investor Advocate stated that he "strongly support[s] requirements for public disclosure of auditor tenure," recognizing that there were different opinions about the best party and location to make that disclosure.[49] Noting that the SEC had issued a concept release asking whether auditor tenure should be disclosed in the audit committee report,[50] the SEC's Investor Advocate stated that he believed the SEC should ultimately decide these questions. In light of these considerations, the SEC's Investor Advocate recommended that the PCAOB act to require disclosure of auditor tenure (either in the auditor's report or in Form AP), but also consider including a contingent sunset clause such that the auditor disclosure requirement would expire if and when the SEC imposed any form of a company disclosure requirement.

The Board believes that public disclosure of auditor tenure is important and in the public interest, and that it is appropriate to require disclosure in the auditor's report because it is the primary means by which auditors communicate with investors. This will ensure that the disclosure is in a readily accessible and consistent location—the auditor's report—for all companies. It will make auditor tenure information immediately available to investors upon filing with the SEC of a document containing the auditor's report. Disclosure of auditor tenure in the auditor's report will also reduce search costs for investors who are interested in auditor tenure, relative to the current environment of

---

[49] *See* letter from Rick A. Fleming, Investor Advocate, SEC (Aug. 15, 2016) at 4, available on the Board's website in Docket 034. The letter noted that the views of the Investor Advocate do not necessarily reflect the views of the SEC, the Commissioners, or staff of the SEC, and the SEC disclaims responsibility for the letter and all analyses, findings, and conclusions contained therein. Additional information about the Office of the Investor Advocate is available on the SEC's website.

[50] *See* SEC, *Possible Revisions to Audit Committee Disclosures*, Exchange Act Release No. 75344 (July 1, 2015), 80 FR 38995 (July 8, 2015).

voluntary reporting. Disclosure of auditor tenure in the auditor's report may also be more likely to encourage further discussion of auditor tenure by management and the audit committee and potential disclosure in company filings.

The Board is not persuaded by commenters' concerns that disclosure of auditor tenure in the auditor's report necessarily suggests a specific correlation between auditor tenure and audit quality, or between auditor tenure and auditor independence. In the Board's view, auditor tenure is another data point about the auditor, in addition to the firm name and the office issuing the auditor's report, for which there is demonstrable investor demand.

The standard does not specify a required location within the auditor's report for the statement on auditor tenure; auditors that are concerned about the inferences readers may draw based on the placement of the disclosure in the auditor's report have discretion to present auditor tenure in the part of the auditor's report they consider appropriate. Consistent with the reproposal, the illustrative auditor's report in the final standard includes the statement on auditor tenure at the end of the report.

The Board considered disclosure of auditor tenure in Form AP, which requires disclosure of the name of the engagement partner and of the names and percentage of participation of other accounting firms in the audit for all issuer audits. Form AP was developed primarily to respond to commenter concerns about the potential liability consequences of naming persons in the auditor's report, the potential need to obtain consents from those named persons in connection with registered securities offerings, and the additional time needed to compile information about the other accounting firms. The Board's determination to require disclosure in Form AP, rather than in the auditor's report, was a means to address these concerns. Disclosure of auditor tenure does not have the same potential liability or other consequences as disclosure of the name of the engagement partner or other accounting firms, so such an approach is unnecessary in this case.

The Board acknowledges that the SEC, given its broader authority and responsibility for the financial reporting process, could in the future determine that auditor tenure should be disclosed by some other party or in some other location, in addition to or instead of in the auditor's report. Accordingly, the Board is adopting its requirement for tenure disclosure in the auditor's report today. The Board anticipates that, if the SEC undertook rulemaking for disclosure of auditor tenure, the Board would work with the SEC to ensure that PCAOB standards coordinate appropriately with any new SEC requirements.[51]

Determination of Tenure

The reproposal contemplated that tenure would be calculated taking into account firm or company mergers, acquisitions, or changes in ownership structure, and it included a note providing that if the auditor is uncertain as to the year the auditor became the company's auditor, the auditor should so state and provide the earliest year of which the auditor has knowledge. Some commenters objected to this approach, saying that it could confuse investors and its relevance is unclear. The Board believes that the disclosure of tenure should reflect the entire relationship between the company and the auditor,

[51] Of course, the SEC also has authority to abrogate or modify PCAOB rules at any time, to, among other things, further the purposes of the securities laws. Section 107(b)(5) of Sarbanes-Oxley, 15 U.S.C. 7217(b)(5).

including the tenure of predecessor accounting firms and engagement by predecessors of the company under audit. No changes have been made to the note in the final standard.

Additionally, if a company went public and maintained the same auditor, auditor tenure will include the years the auditor served as the company's auditor both before and after the company became subject to SEC reporting requirements.

Because of the unique structure of investment companies, which typically includes common accounting, internal control, and oversight functions at the group level, the reproposed standard required that, for an investment company that is part of a group of investment companies,[52] the auditor's statement regarding tenure will contain the year the auditor began serving consecutively as the auditor of any investment company in the group of investment companies.[53] For example, if Firm A has been auditing investment companies in XYZ group of investment companies since 1980, the current auditor's report for XYZ fixed income fund, whose inception date was in 2010, will state that Firm A has served as the auditor of one or more XYZ investment companies since 1980.

A commenter asserted that measuring auditor tenure from the first year of service to the group of investment companies might confuse or even mislead the reader of the auditor's report for a new fund, especially if the auditor has served the group for several years. Another commenter supported the reproposed methodology for measuring tenure

---

[52] A group of investment companies, as defined by Section 12(d)(1)(G)(ii) of the Investment Company Act of 1940 ("Investment Company Act"), means any two or more registered investment companies that hold themselves out to investors as related companies for purposes of investment and investor services. For purposes of determining auditor tenure, any tenure with other entities that may be part of an investment company complex, such as investment advisers or private investment companies, is not included.

[53] The following is an example of such statement: "We have served as the auditor of one or more [Group Name] investment companies since [year]."

for investment companies stating that it is appropriate given the common accounting system, system of internal control over financial reporting, and board oversight for a group of investment companies.

After considering the comments received, the Board is adopting the requirement regarding auditor tenure for an investment company that is part of a group of investment companies as reproposed. The Board believes that the length of an auditor's relationship with the group is more relevant than the relationship with an individual fund, since funds can be started and merged over time but the auditor's relationship with the group continues.

*Requirements of Other Regulators and Standard Setters*

The EU requires a statement in the auditor's report that indicates the total uninterrupted engagement period, including previous renewals and reappointments of the statutory auditors or the audit firms.[54] The IAASB and the FRC do not include a similar requirement.

*Clarification of Existing Auditor's Responsibilities*

The reproposed standard included requirements that would enhance standardized language of the auditor's report by clarifying the nature and scope of the auditor's existing responsibilities, such as a new statement regarding auditor independence and the addition of the phrase "whether due to error or fraud," when describing the auditor's responsibility under PCAOB standards to obtain reasonable assurance about whether the financial statements are free of material misstatements. In addition, the reproposed standard

---

54 *See* requirements in 2(b) of Article 10, Audit Report, of Regulation (EU) No 537/2014.

included a requirement intended to promote uniformity with respect to the addressee of the report.

Auditor Independence

The reproposed standard included a required statement in the auditor's report that the auditor is a public accounting firm registered with the PCAOB and is required to be independent with respect to the company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the SEC[55] and the PCAOB.[56]

Commenters generally supported the required statement regarding auditor independence. Some said that the statement would reinforce financial statement users' understanding of the auditor's existing obligations to be independent and serve as a reminder to auditors of these obligations. Some commenters preferred a more definitive statement, such as stating that the auditor is in fact independent and in compliance with applicable independence rules. A few commenters questioned whether the statement will improve an investors' understanding of the auditor's independence responsibilities, yield any incremental benefits or insight to investors, or have any impact on auditor behavior. Some of these commenters pointed out that independence is already included in the title of the auditor's report and including an additional statement in the auditor's report is redundant and unnecessary.

After consideration of comments, the statement regarding auditor independence is adopted as reproposed. The Board believes that the independence statement in the auditor's report will both enhance investors' and other financial statement users'

---

[55] *See* Regulation S-X Rule 2-01, 17 CFR 210.2-01.

[56] *See* PCAOB Rule 3520, *et seq*.

understanding of the auditor's existing obligations to be independent, and serve as a reminder to auditors of these obligations. The statement regarding auditor independence is not intended to, and will not, affect auditor independence requirements under the securities laws, SEC rules, or PCAOB rules.

*Requirements of Other Regulators and Standard Setters*

The IAASB requires that the auditor's report include a statement that the auditor is independent of the entity in accordance with the relevant ethical requirements relating to the audit and has fulfilled the auditor's other ethical responsibilities in accordance with these requirements.[57] The EU requires a statement in the auditor's report that the auditor remained independent of the audited entity in conducting the audit.[58] The FRC requires the auditor to state that the auditor is required to comply with the United Kingdom's ethical standards for auditors, which include requirements regarding auditor independence.[59]

Addressee

Under the existing standard, the auditor's report may be addressed to the company whose financial statements are being audited, its board of directors, or stockholders.[60] Under current practice, the auditor's report is generally addressed to one or more of the following: (1) the board of directors and stockholders/shareholders, or their equivalent for

---

[57] *See* paragraph 28(c) of ISA 700.

[58] *See* requirements in 2(f) of Article 10, *Audit Report*, of Regulation (EU) No 537/2014.

[59] *See* paragraph 15 of UK ISA 700 (2013).

[60] *See* existing AS 3101.09.

issuers that are not organized as corporations; (2) the plan administrator or plan participants for benefit plans; and (3) the directors or equity owners for brokers or dealers.[61]

To promote consistency in addressing the auditor's report to the company's investors, the reproposed standard included a requirement for the auditor's report to be addressed to the shareholders and the board of directors, or equivalents for companies not organized as corporations. The reproposed standard stated that the auditor's report may include additional addressees.

Commenters generally supported the addressee requirement as reproposed stating that it is appropriate and will create consistency in practice. A commenter suggested limiting the required addressees to the shareowners of corporations or equivalents for companies not organized as corporations because investors are the key customers of the auditor's report. A few commenters stated that the auditor's report is intended for general use and the requirement for the auditor's report to be addressed to a specific party is not necessary. A commenter expressed concern that retaining the option for the auditor's report to be addressed to third parties could inadvertently result in increased auditor liability and cost.

In response to comments, and to promote greater uniformity in the addressees of the auditor's report, the Board is adopting the addressee requirement as reproposed. Since inclusion of additional addressees is voluntary, auditors could assess, based on the individual circumstances, whether or not to include additional addressees in the auditor's report. In addition, the Board believes that it is appropriate for the auditor's report to be

---

[61] This information is based on a review by PCAOB staff of a random sample of 2014 fiscal year-end auditor's reports for issuers and brokers and dealers.

addressed to the board of directors and not just to the shareholders, because of the role of the board of directors in the governance of the company.

*Requirements of Other Regulators and Standard Setters*

The IAASB requires that the auditor's report be addressed as appropriate, based on the circumstances of the engagement.[62] The EU does not specify the addressee of the auditor's report. The FRC requires that the auditor's report be addressed as required by the circumstances of the engagement.[63] UK auditor's reports are typically addressed to either the members or the shareholders of the company.[64]

Other Enhancements to the Basic Elements

The reproposal would have changed the language for certain elements in the existing auditor's report. These elements included:

- *Financial statement notes*—The identification of the financial statements, including the related notes and, if applicable, schedules, as part of the financial statements that were audited.[65] Under the existing standard, the

---

[62] *See* paragraph 22 of ISA 700.

[63] *See* paragraph 13 of UK ISA 700 (2013).

[64] *See* paragraph A5 of UK ISA 700 (2013).

[65] The final standard uses the term "financial statements" to include all notes to the statements and all related schedules, as used under SEC rules that apply to issuers. *See* Regulation S-X Section 1-01(b), 17 CFR 210.1-01(b), which states in part, "the term financial statements . . . shall be deemed to include all notes to the statements and all related schedules." The final standard will not apply to schedules included as supplemental information, as defined in AS 2701, *Auditing Supplemental Information Accompanying Audited Financial Statements*, because those schedules are not considered part of the financial statements. The auditor should continue to look to the requirements of AS 2701 for the auditor's reporting responsibilities regarding supplemental information accompanying audited financial statements.

notes to the financial statements and the related schedules are not identified as part of the financial statements.

- *Error or fraud*—A description of the auditor's responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatements, whether caused by error or fraud.[66] The existing standard does not require the auditor's report to contain the phrase *whether due to error or fraud*.
- *Nature of the audit*—The description of the nature of the audit reflected the auditor's responsibilities in a risk-based audit and aligned the description with the language in the Board's risk assessment standards, including:
    - Performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks;
    - Examining, on a test basis, appropriate evidence regarding the amounts and disclosures in the financial statements;
    - Evaluating the accounting principles used and significant estimates made by management; and
    - Evaluating the overall presentation of the financial statements.

---

[66] *See* paragraph .02 of AS 1001, *Responsibilities and Functions of the Independent Auditor*.

Commenters generally supported the reproposed language for these basic elements of the auditor's report. These elements are adopted as reproposed.

*Additional Basic Elements Suggested by Commenters*

In addition to the changes proposed by the Board, commenters on the reproposal suggested additional elements to be included in the auditor's report.

Several commenters suggested that the PCAOB consider additional standardized language in the auditor's report to describe the responsibilities of the auditor, management, and the audit committee. In doing so, some of these commenters suggested that the PCAOB consider additional language adopted by the IAASB, in order to promote consistency in reporting and to help users understand more fully the separate responsibilities of each of the parties with respect to the audited financial statements. In contrast, another commenter cautioned that a thorough description of everyone's roles and responsibilities would further add to repetitive boilerplate language. This commenter suggested instead that the auditor's report provide a cross reference to a more complete description of the roles and responsibilities of the auditor, management, and the audit committee. This commenter did not indicate where such cross-referenced material would appear. Given little interest from investors in such additional language during the Board's initial outreach and the risk that it would be boilerplate, the final standard does not include these additional elements.

Two accounting firms suggested describing the meaning of reasonable assurance. The final standard requires a statement in the "Basis for Opinion" section of the auditor's report that the auditor "plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement." The auditing standards describe reasonable assurance as a high level of assurance, although not absolute assurance.[67] During the Board's initial outreach such additional language was considered, but there was no investor demand for it. As a result, the final standard does not expand the description of reasonable assurance in the auditor's report.

Some commenters also suggested that the auditor's report should include disclosure of the materiality measures used by auditors in planning the audit. These commenters asserted that it could help inform investors' proxy voting process for auditor ratification, as such disclosure could be a valuable supplement to an audit fee analysis and used to compare materiality over time to trends in restatements and adjustments. These commenters also observed that materiality disclosures are provided in the auditor's reports in the U.K. Other commenters from the Board's initial outreach stated that disclosing materiality levels in the auditor's report could have negative implications on audit quality by reducing the element of surprise necessary in an audit.[68] One commenter opposed a disclosure of materiality on the basis that it may encourage disclosure of quantitative materiality levels and ignore qualitative aspects of materiality, which cannot be described in a meaningful way in the auditor's report. The Board has decided not to include this additional element in the auditor's report at this time because disclosure may reduce the element of surprise in the audit and overstate the importance of quantitative rather than qualitative factors in the auditor's overall consideration of materiality. However, the Board will monitor the implementation of the final standard, as well as the

---

[67] Paragraph .10 of AS 1015, *Due Professional Care in the Performance of Work.*

[68] *See* PCAOB Release No. 2011-003, Appendix C, for a detailed discussion of the staff's outreach regarding reporting materiality levels.

developments of expanded auditor reporting in other jurisdictions, to determine if future enhancements to the auditor's report may be warranted in this area.

Additionally, some commenters suggested that the auditor's report should define the auditor's responsibility for other information in documents containing audited financial statements so that financial statement users have a clear understanding. The Board's proposal included another new auditing standard, *The Auditor's Responsibilities Regarding Other Information in Certain Documents Containing Audited Financial Statements and the Related Auditor's Report*, regarding the auditor's responsibilities for other information outside the financial statements. The Board has not taken any further action since the proposal.

A few commenters suggested including other elements, such as the date when the auditor completed fieldwork, a statement that the auditor looked for material fraud, disclosure when alternative dispute resolution clauses are included in engagement letters, and disclosure of reasons for change in the engagement partner prior to mandatory rotation. The final standard does not include these elements because the Board believes they would not add meaningfully to the information already provided in the final standard or the elements go beyond what was considered in this standard-setting project and, thus, the Board is not including these elements at this time.

*Explanatory Language and Emphasis of a Matter*

*Explanatory Language Required by Other PCAOB Standards*

The reproposed standard, similar to the existing standard,[69] provided a list of circumstances in which the auditor is required to add explanatory language to the

[69] *See* existing AS 3101.11.

auditor's report and included references to other PCAOB standards in which these circumstances and related reporting requirements are described. These circumstances included when there is substantial doubt about the company's ability to continue as a going concern and a restatement of previously issued financial statements, among others.

The list of circumstances from the Board's reproposal did not attract much comment, although one commenter affirmed support for including the list. Commenters on the Board's proposal supported providing a list in the standard of the circumstances that require explanatory language in the auditor's report on the basis that keeping this information in a single place would facilitate consistency in execution. The final standard includes the list of explanatory paragraphs and related references as reproposed.

The reproposed standard included a requirement for the auditor to add explanatory language in cases where the company is required to report on ICFR but has determined that it is not required to obtain, and did not request the auditor to perform, an audit of ICFR.[70] The reproposed standard included a reference to a new proposed requirement in AS 3105, *Departures from Unqualified Opinions and Other Reporting Circumstances*, for the auditor to add such explanatory language. Some commenters were supportive of the reproposed requirement, while one commenter did not believe such a requirement was necessary but did not object to its inclusion.

---

[70] This may be the case for companies that are subject to Section 404(a) of Sarbanes-Oxley, which mandates management ICFR reporting, but not Section 404(b), which mandates auditor ICFR reporting. Section 404(a) generally applies to companies that are subject to the reporting requirements of the Exchange Act, other than registered investment companies. Certain categories of companies that are subject to Section 404(a), such as nonaccelerated filers and emerging growth companies, are not subject to Section 404(b).

The Board also sought comment on whether the requirement to include an explanatory paragraph in the auditor's report when the auditor did not perform an audit of ICFR should apply not only if company's management is required to report on ICFR, but also if management is not required to report, such as for investment companies. Several commenters supported expanding the requirement to all instances in which the auditor is not engaged to opine on ICFR, and not limit it to only when management is required to report on ICFR.

In the Board's view, it is appropriate to add explanatory language to the auditor's report when management has a reporting responsibility on ICFR but the auditor is not engaged to opine on ICFR, in order to clarify the auditor's responsibilities in this situation. For companies for which management is not required to report on ICFR, the Board does not believe that the auditor should have a separate reporting responsibility. Accordingly, the final standard retains the requirement as reproposed.[71] The auditor may, however, choose to include such a paragraph in the auditor's report voluntarily.

*Interaction between critical audit matters and explanatory paragraphs*. The reproposed standard clarified that critical audit matters are not a substitute for required explanatory paragraphs. However, there could be situations in which a matter meets the definition of a critical audit matter and also requires an explanatory paragraph, such as going concern. For these situations, the reproposal contemplated that both the explanatory paragraph and the required communication regarding the critical audit matter would be provided. The auditor could include the communication required for a critical audit matter in the explanatory paragraph, with a cross-reference in the critical audit

---

[71] *See* amendments to AS 3105.59–.60.

matter section to the explanatory paragraph. Alternatively, the auditor could choose to provide both an explanatory paragraph and the critical audit matter communication separately in the auditor's report, with a cross-reference between the two sections.[72] While the information reported in a critical audit matter may overlap with some of the information already provided in the explanatory paragraph, the critical audit matter would provide incremental information, such as how the matter was addressed in the audit.

Commenters were generally supportive of the interaction between the communication of critical audit matters and required explanatory paragraphs as described in the reproposed standard. Some alternative views, however, were expressed. One commenter thought that if a required explanatory paragraph is also a critical audit matter, disclosure in the auditor's report should be limited to one place in the auditor' report. The commenter suggested that the communication requirements for both a critical audit matter and an explanatory paragraph be reported in the critical audit matter section of the auditor's report with a cross reference in the explanatory paragraph section. Another commenter suggested that the PCAOB harmonize its approach with that of the IAASB, which requires a reference in the key audit matter section but waives the requirements to describe the key audit matter and how it was addressed during the audit. Finally, another commenter thought that critical audit matter communications should not be permitted to be integrated with explanatory paragraphs, on the basis that explanatory paragraphs are about matters in the financial statements to which the auditor wants to draw the reader's attention and are not necessarily critical audit matters.

---

[72] When both an explanatory paragraph and a critical audit matter communication are provided, the critical audit matter description should not include conditional language that would not be permissible in the explanatory paragraph. *See* footnote 5 of AS 2415.

The final standard retains the interaction between critical audit matters and explanatory paragraphs as reproposed. The approach provides flexibility on auditor disclosure, yet also ensures that the communication requirements are met.

*Emphasis of a Matter*

The reproposed standard, similar to the existing standard, provided the ability for the auditor to add a paragraph to the auditor's report to emphasize a matter regarding the financial statements ("emphasis paragraph").[73] Emphasis paragraphs are not required, but may be used by auditors to draw the reader's attention to matters such as significant transactions with related parties and unusually important subsequent events.

The reproposed standard provided a list of potential matters that the auditor may emphasize in the auditor's report, although the auditor may also decide to emphasize other matters.

Commenters were supportive of emphasis paragraphs as described in the reproposed standard and did not suggest any additional matters to be included in the list of potential emphasis paragraphs. The final standard includes emphasis paragraphs as reproposed.

*Interaction between critical audit matters and emphasis paragraphs*. The reproposed standard stated that emphasis paragraphs are not a substitute for required critical audit matters. If a matter that the auditor considers emphasizing meets the definition of a critical audit matter, the auditor would provide the information required for critical audit matters, and would not be expected to include an emphasis paragraph in the auditor's report. Although this did not generate much comment, one commenter

---

[73] *See* existing AS 3101.19.

affirmed support for the interaction between critical audit matters and emphasis paragraphs. The final standard retains the interaction between critical audit matters and emphasis paragraphs as reproposed.

*Requirements of Other Regulators and Standard Setters*

Under the requirements of other regulators and standard setters, there are no analogous explanatory paragraphs, except for reporting on going concern. The Board's reproposed approach is similar to the IAASB's approach to the interaction between a paragraph regarding the company's ability to continue as a going concern and key audit matters, although the underlying requirements for auditor reporting on going concern vary.[74] Under the IAASB's approach, an emphasis of matter paragraph is not required for a matter that was determined to be a key audit matter.[75] The EU and the FRC have separate requirements related to going concern reporting that do not specifically address the interaction with their expanded auditor reporting.[76] The IAASB, FRC, and EU do not have requirements for reporting on ICFR.

*Information about Certain Audit Participants*

On May 9, 2016, the SEC approved new rules and related amendments to the Board's auditing standards, including amendments to AS 3101, that will provide investors and other financial statement users with information about engagement partners and other

---

[74] *See* paragraph A1 of ISA 570, *Going Concern*, and paragraph 15 of ISA 701.

[75] *See* paragraph 8 of ISA 706, *Emphasis of Matter Paragraphs and Other Matter Paragraphs in the Independent Auditor's Report*.

[76] *See* ISA (UK and Ireland) 570, *Going Concern*, and *see* Article 28, *Audit Reporting*, of Directive 2014/56/EU of the European Parliament and of the Council (Apr. 16, 2014).

accounting firms that participate in audits of issuers.[77] Firms will be required to file Form AP with the PCAOB for each issuer audit, disclosing this information. In addition to filing Form AP, firms will also have the choice to include this information in the auditor's report.[78] The final standard incorporates the adopted amendments to AS 3101 for situations in which the auditor decides to include information about certain audit participants in the auditor's report. The final standard requires the auditor to use an appropriate section title when providing this information in the auditor's report, but does not require a specific location in the auditor's report.

*Requirements of Other Regulators and Standard Setters*

The IAASB requires the auditor to include the name of the engagement partner in the auditor's report for audits of listed entities.[79] Under EU law, the engagement partner is required to sign the audit report in all EU countries, including the United Kingdom.[80] Unlike disclosure of the engagement partner's name, disclosure of other accounting firms that participated in the audit is not required by the IAASB, FRC, or the EU.

*Form of the Auditor's Report*

The reproposed standard required the "Opinion on the Financial Statements" section to be the first section of the auditor's report, immediately followed by the "Basis for Opinion" section. The reproposed standard did not specify an order for the remaining

---

77 *See* PCAOB Release No. 2015-008.

78 When the auditor divides responsibility for the audit under AS 1205, *Part of the Audit Performed by Other Independent Auditors*, the auditor's report must acknowledge the involvement of the other auditor.

79 *See* paragraph 45 of ISA 700.

80 Directive 2006/43/EC of the European Parliament and of the Council, Article 28, *Audit Reporting* (May 17, 2006).

sections of the auditor's report, which would include explanatory paragraphs and critical audit matters. This approach allowed for consistency in the location of the opinion and basis for opinion sections, with flexibility for the other elements of the auditor's report. The reproposed standard also required titles for all sections of the auditor's report to provide consistency and assist users in identifying the individual sections of the auditor's report.

Commenters were generally supportive of the proposed changes to the form of the auditor's report, because the changes will:

- Enhance the clarity and comparability of disclosures;
- Make it easier for investors to find the opinion since it will be listed first;
- Help facilitate a comparison between auditor's reports; and
- Allow for an appropriate level of flexibility and ease of use without being overly prescriptive.

Some commenters suggested the PCAOB should be consistent with other standard setters in the ordering of section titles in the auditor's report. One commenter expressed concern that the ordering of the components of the opinion and the heading of the critical audit matter section of the report may be misunderstood to imply that critical audit matter communications are separate and distinct from the auditor's opinion, which could be misinterpreted as a piecemeal opinion. In light of the commenter support described above, the Board is adopting the form of the auditor's report as reproposed. As previously discussed, the final standard includes revised introductory language in the auditor's report to avoid the potential misperception that the communication of critical audit matters provides piecemeal opinions.

*Requirements of Other Regulators and Standard Setters*

The reproposed approach with respect to the order of the sections of the auditor's report is generally consistent with that of the IAASB.[81] The EU and FRC do not specify an order to the auditor's report.

*Application to Other Audits Performed Under PCAOB Standards*

There are situations in which an auditor may be required by law or regulation, or voluntarily agrees, to perform an audit engagement in accordance with PCAOB standards for a company whose audit is not subject to PCAOB oversight.[82] For example, SEC rules permit audits under PCAOB standards in connection with offerings under Regulation A and Regulation Crowdfunding.[83] In these situations, certain elements of the auditor's report required under the final standard, such as the use of "registered public accounting firm" in the title or the statement regarding independence requirements, may not apply. Additional guidance for these situations will be provided.

Amendments to Other PCAOB Standards

The Board has adopted amendments to several of its existing auditing standards solely to conform to the final standard. The Board is not adopting any further changes to

---

81 *See* paragraphs 23–28 of ISA 700.

82 Under the Sarbanes-Oxley Act, as amended by the Dodd-Frank Wall Street Reform and Consumer Protection Act, the PCAOB oversees the audits of "issuers" and brokers and dealers reporting under Exchange Act Rule 17a-5. *See* Sarbanes-Oxley Act Section 101. An "issuer" under the Sarbanes-Oxley Act is an entity whose securities are registered under Section 12 of the Exchange Act, or that is required to file reports under Section 15(d) of the Exchange Act, or that files or has filed a Securities Act registration statement that has not yet become effective and that it has not withdrawn. *See* Sarbanes-Oxley Section 2(a).

83 *See* Securities Act Form 1-A, Part F/S (b)(2) and (c)(1)(iii); Regulation Crowdfunding Rule 201(t) instruction 9, 17 CFR 227.201(t).

these existing auditing standards at this time, although the Board recognizes that some of the existing auditing standards, such as the redesignated standard AS 3105, may need further updating. The Board may consider proposing further changes to these standards under separate standard-setting projects.

*AS 3105, Departures from Unqualified Opinions and Other Reporting Circumstances*

Existing AS 3101.10 and .20-.76 address departures from the auditor's unqualified opinion, such as a qualified opinion, an adverse opinion, or a disclaimer of opinion, and other reporting circumstances, such as reporting on comparative financial statements. These paragraphs are redesignated as AS 3105.[84] Commenters who addressed this topic generally supported the reproposed amendments to AS 3105, including amending the example auditor's reports to conform with the example auditor's report in the final standard. The Board also received some comments suggesting further changes to AS 3105, such as updating descriptions of and references to accounting requirements that are no longer current[85] and updating certain terminology (e.g., changing references from "entity" to "company"). The Board may consider such updates as part of a separate standard-setting project.

---

[84] AS 3101.01-.09 and .11-.19 are amended and restated as AS 3101, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*.

[85] The Board has issued guidance regarding the status of outdated descriptions of and references to U.S. GAAP in PCAOB standards. *See* PCAOB, *Staff Questions and Answers, References to Authoritative Accounting Guidance in PCAOB Standards* (Sept. 2, 2009). Among other things, this guidance provides that auditors should disregard descriptions of and references to accounting requirements in PCAOB standards that are inconsistent with the FASB Accounting Standards Codification ("ASC").

The Board has adopted final amendments to AS 3105 that are substantially similar to the reproposal. The amendments to AS 3105 are not intended to change the circumstances in which the auditor would depart from an unqualified opinion. The changes from the current standard will primarily: (1) require the communication of critical audit matters in certain circumstances; (2) revise certain terminology to align with the final standard; and (3) amend the illustrative reports for the basic elements of the final standard and the required order of certain sections of the auditor's report.

AS 3105 includes:

*Communication of Critical Audit Matters in Reports Containing Other than Unqualified Opinions*

a. *Qualified opinion*—Amendments to AS 3105 will require that when the auditor expresses a qualified opinion, the auditor's report also include communication of critical audit matters, if critical audit matter requirements apply.

b. *Adverse opinion*—The existing requirements related to an adverse opinion are not amended to require the auditor to communicate critical audit matters. In the Board's view, the most important matter to investors and other financial statement users in such circumstances would be the reason for the adverse opinion.

c. *Disclaimer of opinion*—The existing requirements related to a disclaimer of an opinion are not amended to require the auditor to communicate critical audit matters. In the Board's view, the most important matter to investors and other financial statement users in such circumstances would be the reason for the disclaimer of opinion.

*Requirements of Other Regulators and Standard Setters*

Under the IAASB's approach, a matter giving rise to a qualified, adverse, or disclaimer of opinion is by nature a key audit matter.[86] However, in such circumstances: (1) the matter should not be described in the key audit matter section of the auditor's report, (2) the auditor should report on the matter in accordance with applicable standards, and (3) the auditor should include a reference in the key audit matter section to the basis for modified opinion section where the matter is reported.[87] The requirements to determine and communicate key audit matters, other than the matters giving rise to the modified opinion, would still apply when the auditor expresses a qualified or adverse opinion, but not when the auditor disclaims an opinion on the financial statements.[88] The FRC and the EU do not include specific requirements for expanded auditor reporting when the auditor's report contains other than an unqualified opinion.

*Other Amendments to PCAOB Standards*

The amendments to other PCAOB standards are substantially as reproposed. These include:

- AS 1220, *Engagement Quality Review*—amending to require the engagement quality reviewer to evaluate the engagement team's

---

[86] *See* paragraph 15 of ISA 701.

[87] *Id*.

[88] *See* paragraph A7 of ISA 701 and paragraph 29 of ISA 705, *Modifications to the Opinion in the Independent Auditor's Report*.

determination, communication, and documentation of critical audit matters;

- AS 1301, *Communications with Audit Committees*—amending to require the auditor to provide to and discuss with the audit committee a draft of the auditor's report;
- AS 2201, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*—amending the example auditor's report to conform with the example auditor's report on the financial statements in the final standard;
- AS 2820, *Evaluating Consistency of Financial Statements*—amending to include the existing reporting requirements and illustrative explanatory language related to a change in accounting principle or a restatement that is currently in AS 3105; and
- AS 4105, *Reviews of Interim Financial Information*—amending to include the basic elements of the final standard, where applicable.

Conforming amendments were also made to every PCAOB standard that refers to the auditor's report. Commenters generally supported the amendments as reproposed.

A commenter suggested revising AS 3305, *Special Reports*, to conform to the example auditor's report in the final standard. Since reports pursuant to AS 3305 are rarely filed with the SEC, as noted by this commenter, the Board does not believe these reports should be updated at this time. As described above, the Board may consider updating this standard as part of a separate standard-setting project.

## D. Economic Considerations and Application to Audits of Emerging Growth Companies

The Board is committed to analyzing the economic impacts of its standard setting. The following discussion addresses the potential economic impacts, including potential benefits and costs, considered by the Board. The Board has sought information relevant to economic consequences several times over the course of the rulemaking. Commenters provided views on a wide range of issues pertinent to economic considerations, including potential benefits and costs, but did not provide empirical data or quantified estimates of the costs or other potential impacts of the standard. The potential benefits and costs considered by the Board are inherently difficult to quantify, therefore the Board's economic discussion is primarily qualitative in nature.

Commenters who discussed the economic analysis in the Board's reproposal provided a wide range of views. Some commenters pointed to academic research for the Board to consider in support of their views. One commenter asserted that the Board's release did not provide a true economic analysis of the pros and cons of mandating the reporting of critical audit matters, but only referenced academic studies on the purported benefits of such reporting. Another argued that the changes described in the reproposal would lead to a significant increase in costs, and that no compelling case had been made that the benefits would exceed the costs. The SEC's Investor Advocate said that the Board's economic analysis made a compelling case as to why the required reporting of critical audit matters would reduce informational asymmetries and add to the total mix of information available to investors.[89] The Board has considered all comments received and

---

[89] *See* letter from Rick A. Fleming, Investor Advocate, SEC (Aug. 15, 2016)

has sought to develop an economic analysis that evaluates the potential benefits and costs of the final standard, as well as facilitates comparisons to alternative Board actions.

Need for the Rulemaking

*Critical Audit Matters*

Generally, investors and other financial statement users know less about a company's financial performance than do others closer to the financial reporting process, particularly management. This information asymmetry[90] can result in situations where capital is allocated suboptimally. The system of financial reporting in the United States, which requires periodic reporting of information, including annual financial statements, helps address the information asymmetry between investors and management. Board of directors and audit committee oversight of the financial reporting process can further reduce this information asymmetry by enhancing the quality of the information disclosed to the public. As part of this system, the audit of the financial statements also helps reduce the information asymmetry investors face by providing an independent opinion about whether the financial statements are presented fairly in all material respects.

Companies' operations continue to become more complex and global. In addition, over the last decade, there have been changes in the financial reporting frameworks relating to accounting estimates and an increasing use of fair value as a measurement attribute, together with new related disclosure requirements.[91] These estimates and fair

---

at 3, available on the Board's website in Docket 034.

[90] Economists often describe "information asymmetry" as an imbalance, where one party has more or better information than another party.

[91] *See* PCAOB Staff Consultation Paper, *Auditing Accounting Estimates and Fair Value Measurements* (Aug. 19, 2014).

value measurements, which are important to a financial statement user's understanding of the company's financial position and results of operations, can be highly subjective, require significant judgment, and can result in increased measurement uncertainty in financial statements.[92] The increased complexity of financial reporting, including the growing use of complex accounting estimates and fair value measurements, may contribute to the information asymmetry between investors and management, despite the fact that management is required to provide significant disclosures to investors and other financial statement users. Some commenters on the reproposal have stated that investors would find information provided by the auditor, an independent third party, particularly relevant in this setting.

As part of the audit, auditors often perform procedures involving challenging, subjective, or complex judgments, such as evaluating calculations or models, the impact of unusual transactions, and areas of significant risk. Although the auditor is required to communicate with the audit committee regarding such matters, the auditor's report has not been expanded to provide this information to investors and generally provides only a standardized pass/fail opinion. Because the auditor's report generally does not contain audit-specific information, it provides very little of the information the auditor knows about the company, its financial reporting, and the challenges of the audit. Given the increased complexity of financial reporting, which requires the auditor to evaluate complex calculations or models and make challenging or subjective judgments, the

[92] *See* IAASB Project Proposal, Revision of ISA 540, *Auditing Accounting Estimates, Including Fair Value Accounting Estimates, and Related Disclosures* (Mar. 2016).

current form of the auditor's report does little to address the information asymmetry between investors and auditors.

The Board believes that expanding the auditor's report to provide information about especially challenging, subjective, or complex auditor judgments will help investors and other financial statement users "consume" the information presented in management's financial statements more effectively. Stated in economic terms, in the Board's view, an expanded auditor's report will reduce the information asymmetry between investors and auditors, which should in turn reduce the information asymmetry between investors and management about the company's financial performance. Reducing information asymmetry about the company's financial reporting should lead to a more efficient allocation of capital.

Some commenters supported the reporting of critical audit matters as a means of reducing the information asymmetry between investors and auditors. Other commenters disagreed with the Board's approach and questioned whether the Board could or should attempt to reduce information asymmetry by requiring expanded auditor reporting. The Board believes that requiring expanded auditor reporting as a means of reducing the information asymmetry between investors and auditors is consistent with its statutory mandate to "protect the interests of investors and further the public interest in the preparation of informative, accurate and independent audit reports."[93] Investors are the intended beneficiaries of the audit, but investors do not receive information about specific work performed during the audit. The final standard seeks to enhance the form and

---

93 Section 101(a) of Sarbanes-Oxley.

content of the auditor's report to make it more relevant and informative to investors and other financial statement users.

Increasing the Informativeness of the Auditor's Report to Address Information Asymmetry

The communication of critical audit matters will reduce the information asymmetry between investors and auditors by informing investors and other financial statement users about areas of the audit that required especially challenging, subjective, or complex auditor judgment, including the principal considerations for determining the matters and how the matters were addressed in the audit. The Board believes that auditor reporting of critical audit matters will provide investors with audit-specific information that should facilitate their analysis of the financial statements and other related disclosures. The communication of critical audit matters in the auditor's report should also help investors and analysts who are interested in doing so to engage management and the audit committee with targeted questions about these issues.[94] Ultimately, while not every critical audit matter will be useful for every investor, broadly, the Board believes that having the auditor provide investors and other financial statements users with additional information about especially challenging, subjective, or complex auditor judgments should help reduce the information asymmetry that exists between investors and management by providing additional insights on the financial statements.

---

[94] The FRC observes that, in some instances, investors have begun to use the information provided in the expanded auditor's reports in the U.K. to engage with audit committees. *See* FRC, *Extended Auditor's Reports, A Further Review of Experience* (Jan. 2016) ("FRC 2016 Report").

The communication of critical audit matters should also assist investors in assessing the credibility of the financial statements and, in at least some instances, audit quality.[95] For example, the description of how the auditor addressed the critical audit matter will help investors understand the types of issues that the auditor grappled with in addressing these challenging, subjective, or complex areas of the audit, which should allow a deeper and more nuanced understanding of the related financial statement accounts and disclosures. Furthermore, investors have consistently stated that having the auditor rather than the company, provide this type of information would be of added value to investment decision making.[96] Commenting on the reproposal, the SEC's Investor Advocate noted that investors want to hear directly from the auditor and that this point is confirmed by surveys of professional investors, as well as by certain academic research.[97] This commenter agreed with the premise in the reproposal that, because the auditor is required to be independent, information provided by the auditor may be viewed

---

[95] It is often not possible to observe the difference between financial reporting quality and audit quality. An academic study conceptually models the path through which the financial reporting and audit processes result in audited financial reporting outcomes. The authors postulate that although audit quality and pre-audit financial reporting quality are distinct constructs, the two processes are often inseparable in terms of observable financial reporting outcomes in archival research. *See* Lisa Milici Gaynor, Andrea Seaton Kelton, Molly Mercer, and Teri Lombardi Yohn, *Understanding the Relation between Financial Reporting Quality and Audit Quality*, 35 Auditing: A Journal of Practice & Theory 1, 1-22 (2016).

[96] *See* IAG 2011 survey and CFA survey and poll results.

[97] *See* letter from Rick A. Fleming, Investor Advocate, SEC (Aug. 15, 2016) at 3, available on the Board's website in Docket 034 (citing Brant E. Christensen, Steven M. Glover, and Christopher J. Wolfe, *Do Critical Audit Matter Paragraphs in the Audit Report Change Nonprofessional Investors' Decision to Invest?* 33 Auditing: A Journal of Practice & Theory 71, 71–93 (2014)).

by investors as having greater credibility than information provided by management alone.

Reporting of critical audit matters should provide insights that will add to the mix of information that could be used in investors' capital allocation decisions, for example, by:

- Highlighting the aspects of the financial statement audit that the auditor found to be especially challenging, subjective, or complex;
- Enabling comparison of these aspects of the audit across companies, for example audits of companies within the same industry; and
- Enabling comparison of these aspects of the audit for the same company over time.

Many companies commenting on the reproposal argued that the reporting of critical audit matters would not increase the informativeness of the auditor's report. For example, several of these commenters claimed that the reporting of critical audit matters would simply duplicate management disclosure without adding additional information, or that critical audit matters would not provide value-relevant information. Other commenters asserted that the reporting of critical audit matters would result in the auditor's report becoming a lengthy list of boilerplate disclosures, which would contribute to disclosure overload or run contrary to the SEC's disclosure effectiveness initiative. Several commenters said that critical audit matters could confuse investors if the information in the auditor's report was duplicative of management's disclosures but was presented in a different manner, or if the critical audit matter presented information without appropriate context.

By contrast, investor commenters overwhelmingly agreed that the communication of critical audit matters would make the auditor's report more informative. One commenter said that, although critical audit matters in themselves would not provide investors with all the information needed in the face of growing financial complexity, critical audit matters would add to the total mix of information available to investors, and would contribute to their ability to analyze companies, form a multifaceted understanding of them, and make informed investment decisions. Another commenter noted that, in jurisdictions where the expanded auditor's report is available, it is one of the earliest elements of the company's annual report that they read because it typically highlights the more judgmental elements of the company's accounting, which often provides insights that form a basis for discussions with management.

Mandated Rather than Voluntary Reporting

Auditors have not developed a practice of providing information in the auditor's report beyond what is required, even though investors have consistently requested that the auditor's report become more informative. Current standards provide a framework for auditors to provide limited additional information through emphasis paragraphs,[98] but in general these only point to a disclosure in the company's financial statements without providing any additional description of the matter and, as noted below, emphasis paragraphs are infrequent in practice. Auditor reporting about matters significant to the audit is not prohibited in an emphasis paragraph, but current standards do not encourage auditors to include such information in their report and do not provide a framework for doing so.

---

[98] *See* existing AS 3101.19.

There are many other potential reasons why auditors are not providing information voluntarily in the auditor's report, whether about the financial statements or the audit. For example, the historical model of management disclosing information and the auditor attesting to the information may lead companies to resist voluntary additional reporting by the auditor, either through emphasis paragraphs or with respect to information about the audit, which the auditor would be better positioned to communicate than management. Further, auditors may believe that providing additional information could potentially expose them to liability or that doing so could be interpreted as a disclaimer of opinion or a partial opinion as to the identified matters. Finally, in general, there may be disincentives to voluntary reporting if the disclosing party is not able to fully capture the benefits of the disclosures,[99] and parties may also exhibit a bias toward the *status quo.*[100] All of these factors disincentivize auditors from voluntarily providing further information about the audit, even if investors and other financial statement users would respond favorably to receiving additional information.

---

[99] Academic research finds that there are certain situations in which disclosure may be socially optimal but not privately optimal. Auditors and companies may resist voluntary expanded auditor reporting because of concerns that certain types of spillover effects (or externalities) may create a competitive disadvantage. For a summary of this line of research, *see* Luigi Zingales, *The Future of Securities Regulation*, 47 Journal of Accounting Research 391, 394-395 (2009). Professor Zingales is the founding director of the PCAOB's Center for Economic Analysis, now known as the Office of Economic and Risk Analysis. The research cited above was published before he joined the PCAOB.

[100] Research in behavioral economics suggests that when facing a set of decisions, individuals are more likely to stick to the known outcome (*status quo*) than would be expected based on the theory of rational decision making under uncertainty. There are a variety of reasons why individuals may choose the status quo outcome in lieu of an unknown outcome, including aversion to the uncertainty inherent in moving from the status quo to another option. *See* William Samuelson and Richard Zeckhauser, *Status Quo Bias in Decision Making*, 1 Journal of Risk and Uncertainty 7, 7-59 (1988).

The Board believes that the required reporting of critical audit matters will promote more complete and consistent disclosure of audit-specific information to financial statement users who may be interested in it.[101] Mandatory disclosure can also improve the allocative efficiency of capital markets by decreasing the costs associated with gathering information, or by providing market participants with information that otherwise would have been difficult or impossible for them to gather.[102]

*Additional Improvements to the Auditor's Report*

The final standard requires auditors to disclose in the auditor's report the number of years they have served consecutively as the auditor for the company. Although some commenters dispute the value of this information, investor commenters have indicated that the length of the relationship between the auditor and the company would be a useful data point. The growing trend toward voluntary disclosure of this information by companies suggests that increasing numbers of companies believe that the market finds the disclosure useful.[103] Further, there is a line of academic research suggesting that there is an association between auditor tenure and increases or decreases in audit quality.[104]

---

[101] Academic research on disclosure explores these types of positive externalities, as well as certain negative externalities. *See, e.g.*, Ronald A. Dye, *Mandatory versus Voluntary Disclosures: The Cases of Financial and Real Externalities*, 65 The Accounting Review 1, 1-24 (1990); or Anat R. Admati and Paul Pfleiderer, *Forcing Firms to Talk: Financial Disclosure Regulation and Externalities*, 13 The Review of Financial Studies 479, 479-519 (2000).

[102] *See, e.g.*, John C. Coffee, Jr., *Market Failure and the Economic Case for a Mandatory Disclosure System*, 70 Virginia Law Review 717, 717–753 (1984).

[103] *See* Center for Audit Quality and Audit Analytics, 2016 Audit Committee Transparency Barometer (Nov. 2016). See also Ernst & Young, Audit Committee Reporting to Shareholders 2016 (Sept. 2016).

[104] *See* below for a discussion of academic research regarding auditor tenure.

Although investors may be able to determine auditor tenure by, for example, reviewing past auditor's reports, for many companies the information is not readily available even through a manual search process. Furthermore, while some companies voluntarily provide information about auditor tenure in the proxy statement, many do not. Many companies are also not subject to the proxy rules (for example, most investment companies, foreign private issuers, and many companies whose securities are not listed on a national securities exchange). In cases where the information is provided voluntarily, it is not provided in a consistent location. The Board believes that these issues create unnecessary search costs for investors who wish to evaluate information about auditor tenure. Mandatory disclosure of auditor tenure in the auditor's report will provide a consistent location for this information and will reduce search costs relative to the current baseline for investors who are interested in auditor tenure, especially in the case of companies that do not voluntarily provide such information or for which the information is not available through the EDGAR system. Mandatory disclosure of auditor tenure in the auditor's report may also be more likely to encourage further discussion of auditor tenure by management and the audit committee and potential disclosure in company filings.

The existing auditor's report also does not describe important aspects of the auditor's responsibilities under existing auditing standards, such as the auditor's responsibility to detect material misstatements, whether due to error or fraud; the auditor's responsibility for the notes to the financial statements; and the auditor independence requirement. This may contribute to misperceptions by investors and other financial statement users about the auditor's role and responsibilities, including with respect to these matters. Academic research suggests that there are a number of ways in which investor perceptions of the role and responsibilities of the auditor may diverge from what current professional standards require.[105] In addition, the existing standards do not require a uniform approach to basic content, such as the addressee of the report and the form of the auditor's report, which may increase the time and costs of processing the information in the auditor's report. The final standard contains provisions requiring the basic elements in the auditor's report to be presented more uniformly.

Commenters generally supported the reproposed changes to these basic elements of the auditor's report. Some commenters noted that the enhanced descriptions of the auditor's responsibility to detect material misstatements would clarify the auditor's responsibilities for financial statement users, other commenters offered suggestions for refinement, such as aligning the requirements to the IAASB model or amending the description to more clearly define the auditor's role within the context of the financial reporting regulatory framework.

Commenters also generally supported including a statement on the auditor's independence requirement. For example, some commenters stated that adding a statement by the auditor on their independence would reinforce investors' understanding of the auditor's requirement to remain independent and objective in expressing the audit

McCracken, *The Auditor's Reporting Model: A Literature Overview and Research Synthesis*, 22 Accounting Horizons 69, 69-90 (2008); Glen L. Gray, Jerry L. Turner, Paul J. Coram, and Theodore J. Mock, *Perceptions and Misperceptions Regarding the Unqualified Auditor's Report by Financial Statement Preparers, Users, and Auditors*, 25 Accounting Horizons 659, 675-676 (2011); or Theodore J. Mock, Jean Bédard, Paul J. Coram, Shawn M. Davis, Reza Espahbodi, and Rick C. Warne, *The Audit Reporting Model: Current Research Synthesis and Implications*, 32 Auditing: A Journal of Practice & Theory 323, 323-351 (2013).

opinion. Other commenters said that the enhanced description of the independence requirement could provide a meaningful reminder of the importance of auditor independence. However, other commenters said that the enhanced description of auditor independence was either unnecessary, or would not have a significant impact on auditor behavior. Based on broad commenter support, the Board is adopting these additional improvements to the auditor's report as reproposed.

*Baseline*

*Critical Audit Matters*

The auditor's report in the United States today generally consists of three paragraphs that include limited audit-specific information. The existing auditor's report identifies the company's financial statements that were audited, provides a standardized description about the nature of an audit, and provides an opinion on whether the company's financial statements are fairly presented, in all material respects, in conformity with the applicable financial reporting framework. The auditor's report is often described as a pass/fail model because the report only conveys the auditor's opinion on whether the financial statements are fairly presented (pass) or not (fail) and typically provides limited information about the nature of the work on which the opinion is based.

The Board's current standards also require that the auditor add explanatory paragraphs to the auditor's report under specific circumstances, such as when there is substantial doubt about the company's ability to continue as a going concern or a restatement of previously issued financial statements. When included, these paragraphs generally consist of standardized language that provides limited audit-specific information.

The auditor may also, at his or her discretion, include emphasis paragraphs in the auditor's report to emphasize a matter regarding the financial statements. Generally, an emphasis paragraph only points to a disclosure in the company's financial statements without providing any additional description. Under current practice, emphasis paragraphs are infrequent.[106] Auditors may also, at their discretion, include language in the auditor's report indicating that they were not engaged to examine management's assertion about the effectiveness of internal control over financial reporting.[107]

Academic research confirms the view of the Board and many commenters that the current form of the auditor's report conveys little of the audit-specific information obtained and evaluated by the auditor.[108] Academic research also finds that investors and other financial statement users refer to the existing auditor's report only to determine whether the opinion is unqualified because it does not provide much additional informational value about a particular audit.[109] These findings align with the consistent

---

[106] In the audit reports of approximately 6,350 issuers with fiscal year 2014 filings, PCAOB staff identified audit reports containing explanatory paragraphs to emphasize matters in the financial statements in approximately 2 percent of the filings.

[107] *See* paragraph .10 of AI 20, *Other Information in Documents Containing Audited Financial Statements: Auditing Interpretations of AS 2710*.

[108] *See* Church et al., *The Auditor's Reporting Model: A Literature Overview and Research Synthesis* 69-90.

[109] *See* Gray et al., *Perceptions and Misperceptions Regarding the Unqualified Auditor's Report by Financial Statement Preparers, Users, and Auditors* 659–684; Mock et al., *The Audit Reporting Model: Current Research Synthesis and Implications* 323–351.

call from investors, over the course of the Board's rulemaking process, for a more informative auditor's report.[110]

*Additional Improvements to the Auditor's Report*

The existing auditor's report is not required to have a specified addressee but it may be addressed to the company whose financial statements are being audited, its board of directors, or stockholders.[111] Under current practice, the auditor's report is generally addressed to one or more of the following: (1) the board of directors and stockholders/shareholders, or their equivalent for issuers that are not organized as corporations; (2) the plan administrator or plan participants for benefit plans; and (3) the directors or equity owners for brokers or dealers.[112]

The current auditor's report also includes the report title, the date, and the name and location of the accounting firm's office issuing the report. The auditor is not currently required to disclose in the auditor's report the number of years it has served as auditor for the company. However, as noted earlier, many larger companies have begun voluntarily disclosing auditor tenure in the proxy statement.

---

110 Academic research has found that, in some instances, the inclusion of explanatory language in the auditor's report may provide investors with additional value-relevant information. A recent academic study suggests that auditor's reports containing certain types of explanatory paragraphs required under existing standards may provide information about the likelihood that financial statements will be subsequently restated. The authors argue that the inclusion of such an explanatory paragraph in the auditor's report can provide a signal to investors about the risk of misstatement of the company's financial statements. *See* Keith Czerney, Jaime J. Schmidt, and Anne M. Thompson, *Does Auditor Explanatory Language in Unqualified Audit Reports Indicate Increased Financial Misstatement Risk?* 89 The Accounting Review 2115, 2115–2149 (2014).

111 *See* existing AS 3101.09.

112 This information is based on a review by PCAOB staff of a random sample of 2014 fiscal year-end auditor's reports for issuers, benefit plans, and brokers and dealers.

Currently, the title of the auditor's report, "Report of Independent Registered Public Accounting Firm," provides the only indication of the auditor's independence.

*Benefits*

*Critical Audit Matters*

Economic theory commonly attributes two benefits to mandatory disclosure. First, the disclosure of previously unknown, value-relevant information directly benefits the market because it allows market participants to make better-informed decisions. Second, the disclosure of such information may indirectly benefit the market because some parties may change their behavior in positive ways after information is disclosed.

Direct Benefit: More Informative and Useful Auditor's Report

The Board believes that auditor communication of critical audit matters will reduce the information asymmetry between investors and auditors, which should in turn reduce the information asymmetry between investors and management about the company's financial performance. Some commenters on the reproposal agreed that the information provided in critical audit matters would be used by various types of investors in a number of different ways that are consistent with the framework outlined in the reproposal:

- *Informing*—Identification of the matters arising from the audit that the auditor considered especially challenging, subjective, or complex, together with a description of how the auditor addressed those matters, which should provide valuable information. For example, some commenters said that:

    - Critical audit matters would add to the total mix of information available to investors, and would contribute to their ability to analyze companies and make investment decisions;
    - Investors would use critical audit matters in the same way that they use any other financial disclosure; critical audit matters would add an additional perspective to management's disclosures;
    - Insights on critical audit matters may be relevant in analyzing and pricing risks in capital valuation and allocation;
    - Critical audit matters would inform investor models of company financial performance;
    - Critical audit matters would augment and add more dimension to the information provided by the financial statements and the critical accounting policies and estimates; and
    - The communication of critical audit matters would lower the cost of acquiring information for financial statement users.
- *Framing*—Critical audit matters should provide investors with a new perspective on the financial statements and focus their attention on the related financial statement accounts and disclosures, which should

facilitate their analysis of the financial statements, and help them assess financial performance, for example by highlighting potentially relevant information or by reducing the costs to process or search for the information. For example, some commenters said that:

   - Critical audit matters would focus investors' attention on key financial reporting issues and identify areas that deserve more attention;
   - In jurisdictions where expanded auditor reporting is available, it focuses users' attention on issues that would be pertinent to understanding a company as a long-term investor; and
   - Information in critical audit matters would contribute to investor understanding and consumption of information in the financial statements.

- *Monitoring*—The ability to identify and evaluate the matters identified as critical audit matters should also help investors and analysts engage management with targeted questions about these issues and support investor decisions on ratification of the auditor. For example, some commenters said that:

   - Critical audit matters would facilitate the ability of investors to monitor management's and the board of director's stewardship of the company by highlighting accounting and auditing issues and other matters that investors may wish to emphasize in their engagement with management; and

- Critical audit matters would provide important information on how the auditor has addressed an issue, which investors can use in evaluating the rigor of the audit and making proxy voting decisions, including ratification of the audit committee's choice of external auditor.

Critical audit matters may be used by different types of investors in different ways. For example, retail investors (or others who may act on their behalf, such as analysts, credit rating agencies, or the financial press) may use the additional information to help them identify and analyze important aspects of the financial statements. Larger investors, on the other hand, may also use critical audit matters as a basis for engagement with management.

The communication of critical audit matters aims to provide investors and financial statement users with specific information about the audit of a company's financial statements. Some commenters were concerned, however, that the communication of critical audit matters could lead to a reduction in comparability of auditor's reports. Although differences in critical audit matters from period to period and across companies may make auditor's reports less uniform, to the extent the information provided is useful in evaluating the financial performance, highlighting these differences should contribute to the overall mix of information. Further, some commenters on the proposal said that investors are interested in information that is specific to the audit of a company's financial statements, and therefore, would expect differences in auditor's reports across companies and reporting periods. Investors also have indicated that they are accustomed to analyzing company-specific information, such as information in financial statements or MD&A that is specific to a company or a reporting period.

A body of academic research regarding the possible effects of expanded auditor reporting is emerging.[113] The Board has been monitoring this research with a view towards assessing its potential relevance to this rulemaking. The Board is mindful of several issues that limit the extent to which this research can inform its decision making. Much of this research is unpublished and at a relatively early stage. The current conclusions may be subject to multiple interpretations and it is possible that results from this research may be revised during the peer review process. Moreover, it may be difficult to generalize results outside the context of specific studies. For example, in considering the implications of academic studies based on data from other jurisdictions, differences between the Board's final standard and the requirements in other jurisdictions must be taken into account. In addition, specific characteristics of the U.S.-issuer audit market may make it difficult to generalize observations made in other markets because of differences in baseline conditions (for example, market efficiency, affected parties, policy choices, legal environment, and regulatory oversight). As to experimental research in particular, it should be noted that the experimental setting may not provide study participants with information that is representative of the information environment in which market participants actually operate; for instance, if new information appeared more salient to study participants than it would to a market participant, the impact of

[113] For a review of relevant academic research, *see* Jean Bédard, Paul Coram, Reza Espahbodi, and Theodore J. Mock, *Does Recent Academic Research Support Changes to Audit Reporting Standards?* 30 Accounting Horizons 255, 255-275 (2016).

expanded auditor reporting would be overstated in an experimental setting. In addition, some of these studies were conducted based on earlier versions of rule text that differs from the final standard, which may affect the extent to which the results can inform the Board in evaluating potential effects of the final standard.

As discussed in more detail in the economic analysis contained in the reproposal, the results from early research analyzing the informational value of expanded auditor reporting are inconclusive.[114] Some studies found that expanded auditor reporting could provide investors with new and useful information, while other studies found that the benefits attributable to expanded auditor reporting were not statistically significant, but that it could produce unintended consequences. These limited findings may be due to the fact that the results of the studies represent averages for large samples of companies. On average, investors may already have access to a variety of information sources (such as annual reports, news media, and analyst research reports) which may contain similar information about a company. However, expanded auditor reporting may be relatively more informative for companies where alternative sources of information are less available (e.g., those companies with less analyst coverage).

In response to the reproposal, two commenters submitted studies suggesting that expanded auditor reporting has increased the informative value of the auditor's report. One experimental study tested the communicative value of expanded auditor reporting by analyzing how key audit matters affected investment professionals' assessment of a company's business economics, as well as their confidence in making that assessment.[115]

---

[114] *See* PCAOB Release No. 2016-003, Section VI.C.1.a.

[115] *See* Annette Koehler, Nicole Ratzinger-Sakel, and Jochen Theis, *Does the*

The authors found that specific informational content of the key audit matter affected the study participants' perceived level of trust associated with the auditor's report, which then affected the perceived level of trust associated with the financial statements and their assessment of the company's business economics. Another study analyzed whether the communicative value of auditor's reports changed following the implementation of expanded auditor reporting in the United Kingdom.[116] The author found that the readability of auditor's reports increased in the post-implementation period, and that the use of negative and uncertain words in expanded auditor's reports captured more client-specific audit risk.[117] In addition, the author found limited evidence that the dispersion of analysts' EPS forecasts decreased following the implementation of expanded auditor reporting, suggesting an improved information environment. The author argued that expanded auditor reporting was successful at increasing the communicative value of the auditor's report, and that analyst behavior changed accordingly. In contrast, another recent experimental study found that including critical audit matters reduced the readability of the auditor’s report but did not incrementally inform nonprofessional investors’ valuation judgments. However, the study suggested that the reporting of a critical audit matter lowers nonprofessional investors' perceptions of management's

credibility when earnings just meet analysts' expectations. The study was designed and implemented using the definition of critical audit matters and related reporting requirements from the Board's proposal, which differ from the final standard.[118]

In addition, in reviewing the experience of expanded auditor reporting in the United Kingdom, the FRC observed that investors greatly value the information provided in expanded auditor reporting.[119] This view is confirmed by UK investors that commented on the reproposal. The FRC noted that, in the two years following the implementation of the new requirements, an association of investment managers has recognized in an annual awards ceremony those specific auditor's reports found to be most clear and most innovative in providing insight into the audit of the company's financial statements.[120] In addition, the FRC notes that users of the new auditor's reports identified certain descriptions of risks that they found to be more useful—such as descriptions that are specific to the entity being audited. Further, the FRC report noted that, in the second year of implementation, a much greater proportion of risks were set out in a more meaningful and transparent way.[121] As noted above, the FRC's requirements for expanded auditor reporting are different from the final standard, and the baseline legal and regulatory environment is not the same as in the United States.

[120] *See* FRC, *March 2015—Extended Auditor's Reports, A Review of Experience in the First Year*; and FRC 2016 Report.

[121] *Id*.

Nevertheless, the Board believes that there are sufficient similarities for the UK experience to be generally informative in its decision-making.

While it is too early for the body of academic research on expanded auditor reporting to provide a conclusive answer, investors commenting during the Board's standard-setting process have consistently affirmed the usefulness of expanded auditor reporting and the FRC's observations on the early experience of investors in the United Kingdom are consistent with this view. Accordingly, the Board believes that auditor communication of critical audit matters will add to the mix of information that investors can use.

Indirect Benefit: Improved Audit and Financial Reporting Quality

In general, information asymmetry can lead to situations in which an agent (such as an auditor) takes actions that do not coincide with the best interests of the principal (such as an investor), if the agent's incentives are misaligned.[122] This type of problem is the result of the inability of the principal to observe or monitor the agent's behavior, which also inhibits the principal's ability to identify and reward optimal behavior, or punish sub-optimal behavior. Economic theory posits that the disclosure of information can have indirect effects that lead to changes in behavior.[123] In the context of expanded

[122] Economists use principal-agent theory to analyze situations where one party (the principal) hires another party (the agent) to perform certain tasks and decision-making ability is delegated to the agent. For a general discussion of principal-agent theory, *see, e.g.*, Michael C. Jensen and William H. Meckling, *Theory of the Firm: Managerial Behavior, Agency Costs and Ownership Structure*, 3 Journal of Financial Economics 305, 305-360 (1976), or Bengt Holmstrom, *Moral Hazard and Observability*, 10 The Bell Journal of Economics 74, 74-91 (1979).

[123] *See, e.g.*, George Loewenstein, Cass R. Sunstein, and Russell Golman, *Disclosure: Psychology Changes Everything*, 6 Annual Review of Economics 391, 391-419 (2014).

auditor reporting, the additional information provided in the auditor's report could be beneficial to investors by providing more information about the audit, which could affect their voting decisions. To the extent that this could influence the terms of the auditor's engagement, academic research suggests "any additional information about the agent's action, however imperfect, can be used to improve the welfare of both the principal and the agent."[124]

This suggests that making aspects of the audit more visible to investors through the communication of critical audit matters should provide some auditors, management, and audit committees with additional incentives to change their behavior in ways that may enhance audit quality and ultimately financial reporting quality. For instance, the communication of critical audit matters could lead:

- Auditors to focus more closely on the matters identified as critical audit matters;
- Audit committees to focus more closely on the matters identified as critical audit matters and to engage the auditor and management about the adequacy of the related disclosures; and
- Management to improve the quality of their disclosures because they know that investors and the auditor will be scrutinizing more closely the matters identified as critical audit matters.

The communication of critical audit matters could lead auditors to increase their focus on the matters identified in the auditor's report as critical audit matters. As suggested by commenters, the communication of critical audit matters could further

---

[124] *See* Holmstrom, *Moral Hazard and Observability* at 75.

incentivize auditors to demonstrate the level of professional skepticism necessary for high quality audits in the areas of the critical audit matters. Other commenters stated that the reporting of critical audit matters could result in increased audit quality. For example, auditors could feel that the potentially heightened scrutiny of the matters identified as critical audit matters may warrant additional effort to satisfy themselves that they have obtained an appropriate amount of audit evidence to support their opinion.

The communication of critical audit matters could also heighten management's attention to the relevant areas of financial statements and related disclosures. Several commenters stated that the reporting of critical audit matters would lead management to improve the quality of their disclosures or adopt more widely accepted financial reporting approaches in these areas.[125]

An experimental study analyzed the joint effect of expanded auditor reporting and audit committee oversight on management disclosure choices.[126] The author found that the study participants, who were currently serving as public company financial executives, chose to provide the greatest level of disclosure when they knew that the auditor's report would provide a more detailed description of the accounting estimate, and the audit committee exhibited strong oversight. The author argued that, similar to what

---

[125] To substantiate this point, one commenter cited a memo prepared for the clients of an international law firm that noted management should consider revising or supplementing their own disclosures relating to issues raised in expanded auditor's reports to ensure that the totality of disclosures around the issue are complete and accurate. *See* Sullivan & Cromwell LLP, *Audit Reports, PCAOB Releases Reproposal of Amendments to Its Audit Report Standard* (May 25, 2016).

[126] *See* Stephen H. Fuller, *The Effect of Auditor Reporting Choice and Audit Committee Oversight Strength on Management Financial Disclosure Decisions* (working paper submitted as comment letter No. 49, available on the Board's website in Docket 034).

other academic research has found regarding the resolution of audit adjustments, information presented in critical audit matters would be the outcome of a negotiation process between the auditor and management.

Increased management attention to the related aspects of the financial statement accounts and disclosures described in the critical audit matters should, at least in some cases, lead to an incremental increase in the quality of the information presented. Academic research has shown that increased quality of information could result in a reduction in the average cost of capital.[127]

In addition, the communication of critical audit matters may enhance the audit committee's oversight efforts by providing an additional incentive for the audit committee to engage with the auditor and management about the matters identified as critical audit matters and the adequacy of the company's related disclosures. Although some commenters stated that the required communication of critical audit matters would "chill" communications between the auditor and the audit committee, others said that it would enhance communications between these parties. Further, it should be noted that the final standard does not change the Board's existing requirements on audit committee communications, other than requiring the auditor to provide the audit committee with a draft of the auditor's report.

To the extent changes in the behavior of auditors, audit committees, and management occur, they could lead to an incremental increase in audit quality and financial reporting quality, which should increase investors' confidence in the reliability

---

Professor Leuz is an economic advisor at the PCAOB. The research cited above was published before he joined the PCAOB.

of the financial statements. Some commenters stated that a more transparent and informative auditor's report could heighten user confidence in the audit and the audited financial statements. Academic research suggests that an increase in investor confidence should decrease the average cost of capital.[128] As discussed in the economic analysis of the reproposal, some empirical studies conducted in other jurisdictions provide evidence that expanded auditor reporting increased audit quality, while other studies found that it did not have a measurable effect on audit quality.[129] The Board is not aware of any empirical studies indicating that expanded auditor reporting had a negative effect on audit quality.

Indirect Benefit: Differentiation among Auditor's Reports

If investors and other financial statement users perceive and respond to differences in the quality and usefulness of the information communicated by auditors regarding critical audit matters, expanded auditor reporting should serve as a potential means of greater differentiation among accounting firms and engagement partners.[130] One commenter stated that the reporting of critical audit matters would allow auditors to

[130] On May 9, 2016, the SEC approved new rules and related amendments to the Board's auditing standards, including amendments to AS 3101, that will provide investors and other financial statement users with information about engagement partners and other accounting firms that participate in audits of issuers. *See* PCAOB Release No. 2015-008.

differentiate themselves, and that this differentiation would provide useful information to investors and other financial statement users. If expanded auditor reporting allows investors to differentiate among accounting firms and engagement partners, it should provide a more nuanced signal of audit quality and financial reporting reliability.

The FRC report also noted that there are clear differences among accounting firms in the approaches taken to implement the requirements.[131] For example, one firm went beyond the FRC's requirements by including audit findings for the risks of material misstatement in the majority of its auditor's reports in the second year of implementation, which other firms did far less frequently. The FRC's observations may suggest that accounting firms took different approaches to expanded auditor reporting as a means of distinguishing themselves based on the quality and usefulness of the information provided in their auditor's reports. Furthermore, as discussed in the economic analysis of the reproposal, an academic study argued that investors found the auditor's reports issued by some accounting firms to be more useful than others.[132] One commenter specifically noted that mandatory auditor rotation was introduced in the UK at the same time as expanded auditor reporting, and that this may have provided accounting firms with motivation to differentiate themselves.

In addition to relying on the audit committee (which, at least for exchange-listed companies, is charged with overseeing the external auditor), in the absence of differentiation based on the auditor's report, users of financial statements may rely on proxies such as the reputation of the accounting firm issuing the auditor's report,

---

[131] *See* FRC 2016 report.

[132] *See* PCAOB Release No. 2016-003, Section VI.C.1.b, footnote 161 and accompanying text.

aggregated measures of auditor expertise (for example, dollar value of issuer market capitalization audited or audit fees charged), or information about the geographic location of the office where the auditor's report was signed as signals for audit quality. Academic research finds, however, that these are imperfect signals of audit quality.[133]

The identification and description of critical audit matters should permit differentiation among auditor's reports based on investor perceptions of their informativeness and usefulness. In some instances it may also provide a signal of audit quality. Because the determination and communication of critical audit matters may reflect a variety of considerations, however, critical audit matters may not bear directly on audit quality. For example, the choice of which critical audit matters to communicate or how to describe them may reflect considerations such as the company's business environment and financial reporting choices, accounting firm methodology, engagement partner characteristics, and legal advice. Thus, a more detailed description of critical audit matters may not necessarily reflect a higher quality audit than a less informative description of such matters.

Nevertheless, informative descriptions of how the audit addressed critical audit matters should provide insight into the extent and appropriateness of the auditor's work. Moreover, it is possible that thoughtful, audit-specific, and useful critical audit matters (or, conversely, generic and uninformative critical audit matters) could affect investor perceptions of the auditor's work and willingness to provide useful information. As a result, the communication of critical audit matters, potentially in conjunction with

---

[133] *See, e.g.*, Jere R. Francis, *A Framework for Understanding and Researching Audit Quality*, 30 Auditing: A Journal of Practice & Theory 125, 125–152 (2011) and Mark DeFond and Jieying Zhang, *A Review of Archival Auditing Research*, 58 Journal of Accounting and Economics 275, 275–326 (2014).

disclosures regarding the identity of the engagement partner and other accounting firms that participated in the audit,[134] and other relevant information should enable differentiation among engagement partners and accounting firms on that basis.

*Additional Improvements to the Auditor's Report*

The final standard will introduce new requirements regarding auditor tenure, the addressee of the auditor's report, and statements in the auditor's report related to auditor independence and the auditor's responsibility for reporting on ICFR.[135] In addition, the final standard contains other changes to the form of the auditor's report, which are intended to improve and clarify the language for certain elements, such as statements related to the auditor's responsibilities regarding the notes to the financial statements, and to promote a consistent presentation of this information across auditor's reports.

Investor commenters have consistently supported disclosing tenure in the auditor's report. In the Board's view, which is consistent with the views of some commenters,[136] disclosing information about auditor tenure in the auditor's report will provide a consistent location for this information and decrease the search costs, relative to the current environment of voluntary reporting, for some investors and other financial statement users who are interested in this information.

The statement regarding the auditor's existing obligation to be independent of the company is intended to enhance investors' and other financial statement users'

---

[134] *See* PCAOB Release No. 2015-008.

[135] In circumstances where management is required to report on ICFR but the auditor is not and has not performed an audit of ICFR, the final standard requires a statement to that effect in the auditor's report.

[136] *See* below for a discussion of academic research regarding auditor tenure.

understanding about the auditor's obligations related to independence and to serve as a reminder to auditors of these obligations. By requiring the auditor's report to be addressed to certain parties, the Board will be promoting uniformity in the addressees of the auditor's report.

Commenters were generally supportive of the reproposed changes to the form of the auditor's report. For example, some commenters stated these enhancements would make the auditor's report easier to read and would facilitate comparisons between auditor's reports for different companies by providing a consistent format.

*Costs and Potential Unintended Consequences*

*Costs*

Commenters on the reproposal raised concerns that the rule would impose various types of costs, but generally did not quantify those costs. Even those that, at an earlier stage of the rulemaking, conducted limited implementation testing of the proposal were unable to provide a quantified cost estimate. Given lack of data, the Board is unable to quantify costs, but provides a qualitative cost analysis.

As an additional means of assessing potential cost implications of the final standard, PCAOB staff has reviewed data from the first year of implementation of expanded auditor reporting in the United Kingdom.[137] As discussed below, staff analyzed a variety of data points that may be associated with potential costs, including audit fees, days required to issue the auditor's report, and the content of the expanded auditor's report. It should be noted that it may be difficult to generalize observations from the UK

[137] *See* PCAOB, *White Paper on the Auditor's Reports of Certain UK Companies that Comply with International Auditing Standard* (UK and Ireland) 700 ("PCAOB White Paper") (May 2016), available on the Board's website in Docket 034.

experience. For example, the reporting and documentation requirements relating to expanded auditor's reports in the United Kingdom differ from those in the final standard, the baseline legal environments are different, and the UK requirements apply only to companies with a premium listing on the London Stock Exchange and not, for example, to smaller companies that list on London's AIM market.

*Critical Audit Matters*

The Board anticipates that the final requirements regarding critical audit matters will have potential cost implications for auditors and companies, including their audit committees. Such costs will likely relate to additional time to prepare and review auditor's reports, including discussions with management and audit committees, as well as legal costs for review of the information provided in the critical audit matters. In addition, auditors may choose to perform more audit procedures related to areas reported as critical audit matters (even though performance requirements have not changed in those areas), with cost implications for both auditors and companies.

For auditors, costs might represent both one-time costs and recurring costs. One-time costs could be incurred as a result of: (1) updating accounting firm audit and quality control methodologies to reflect the new reporting requirements; and (2) developing and conducting training of accounting firm personnel on the new reporting requirements. When updating methodologies, some accounting firms will likely also develop new quality control processes related to additional review or consultation on the determination, communication, and documentation of critical audit matters. One commenter suggested that the initial implementation costs could place a significant and possibly disproportionate burden on smaller accounting firms.

Recurring costs will primarily reflect additional effort expended in individual audits. The final standard does not impose new performance requirements other than the determination, communication, and documentation of critical audit matters, which will be based on work the auditor has already performed. However, there will be some additional recurring costs associated with drafting descriptions of critical audit matters and related documentation. It is likely that senior members of the engagement teams, such as partners and senior managers, will be involved in determining the critical audit matters and developing the language to be included in the auditor's report. In addition, reviews by others, such as the engagement quality reviewer and national office, will also result in recurring costs. Additional time might also be incurred by the auditor as a result of discussions with management or the audit committee regarding critical audit matters.

Companies, including audit committees, will likely also incur both one-time and recurring costs as a result of the final standard. One-time costs could be incurred, for example, in educating audit committee members about the requirements of the new standard and in developing management and audit committee processes for the review of draft descriptions of critical audit matters and the related interaction with auditors. Recurring costs will include the costs associated with carrying out those processes, as well as any increase in audit fees associated with the new reporting requirements or legal fees stemming from a review of critical audit matter communications.

If the drafting and review of critical audit matter reporting takes place towards the end of the audit, there will also be an opportunity cost associated with the time constraints on the parties involved (including, for example, management, the engagement partner, the audit committee, and the auditor's and company's respective legal counsel).

The end of the audit is a busy period in which multiple issues may need to be resolved before the auditor's report can be issued. At the same time, companies and management may also be in the process of finalizing the annual report. Time spent drafting and reviewing the communication of critical audit matters could occur at the same time as other important work in the financial reporting and audit process, and would likely involve senior management that command relatively high annual salaries or experienced auditors and lawyers with relatively high hourly billing rates. In addition, the communication of critical audit matters could lead to changes in management's disclosures, which may result in more effort and cost in the financial reporting process.

Several commenters on the reproposal claimed that the required reporting of critical audit matters would lead to increased audit fees, but none provided data or estimates regarding the magnitude of the increases they expected. Commenters on the proposal had differing views about the likely magnitude of direct costs associated with auditor reporting of critical audit matters. Some commenters said that there would not be material additional costs for communication of critical audit matters, as these matters would already have been communicated to the audit committee. This may suggest that a substantial amount of the work required to communicate critical audit matters would already have been completed earlier in the audit.

One commenter argued that the changes described in the reproposal would lead to a significant increase in costs, and that no compelling case had been made that the benefits would exceed the costs. Some commenters noted that investors would be expected to ultimately bear the cost of the audit, and these commenters have voiced strong support for expanded auditor reporting since the project's inception. This suggests that they consider the benefits of expanded auditor reporting to justify the costs, and would support additional fees for additional useful information.

Audit fees do not fully reflect the cost of implementing expanded auditor reporting to the extent that accounting firms choose to absorb those additional costs and because audit fees do not reflect the impact of any additional demand on management's time associated with expanded auditor reporting. Subject to those limitations, in its review of the implementation of expanded auditor reporting in the United Kingdom, the PCAOB staff did not find evidence of statistically significant increases in audit fees following the first year of expanded auditor reporting.[138] For 53 percent of the companies analyzed, audit fees for the year of implementation remained the same or decreased as compared to the prior year's audit fees. Audit fees increased for the remaining companies. The PCAOB staff found that the average change in audit fees was an increase of approximately 5 percent, roughly consistent with the findings of academic research described in the economic analysis in the reproposal. However, the staff found that the median change in audit fees was zero. Collectively, these results seem to suggest that outlier companies with relatively large increases in audit fees drove the result for the average change in audit fees. It should be noted that the PCAOB staff's review did not analyze whether other factors, such as inflation, changes in the economic environment and corporate risk, corporate acquisitions, or the implementation of other regulatory changes, contributed to the documented increase in audit fees.

One commenter on the reproposal noted that the caveats described above are important because the inability to fully gauge the costs of expanded auditor reporting

[138] *Id*.

could lead the Board to underestimate the costs associated with the rule, which may bear disproportionately on smaller companies and their auditors. Another commenter also asserted that the costs of expanded auditor reporting are likely to be disproportionately borne by smaller companies because the reproposed rule had, in their estimation, limited scalability. The Board believes that the complexity and costs associated with determining, documenting, and communicating critical audit matters should generally depend on the nature and complexity of the audit. This would in turn depend on the complexity of the operations and accounting and control systems of the company.

Additional Improvements to the Auditor's Report

The changes adopted to the basic elements of the auditor's report do not represent a significant departure from the reproposal. Some of the enhanced basic elements will have cost implications for auditors, although these costs are not expected to be significant. One-time costs will primarily relate to updating methodology and training and the initial determination of the first year the auditor began serving consecutively as the company's auditor. Based on comments received, it does not appear that the changes adopted to the basic elements will impose significant recurring costs, because the year in which tenure began will not change and the other amendments involve standardized language that, once implemented, will be the same or very similar across different auditor's reports every year.

*Potential Unintended Consequences*

Time Needed to Issue the Auditor's Report

As a result of the additional effort required to determine, communicate, and document critical audit matters, some commenters said that it would take auditors longer to issue their reports. On this point, the PCAOB staff study did not find evidence that compliance with the United Kingdom's expanded auditor reporting requirements delayed the issuance of auditor's reports in the first year of implementation. Based on the study, for companies that had three years of financial statements, a new form auditor's report was issued, on average, in 63 days from the company's fiscal year end date in the year of implementation, as compared to 64 days in the prior year and 65 days two years earlier. Further, academic research cited in the economic analysis of the reproposal similarly did not find that the UK reporting requirements led to delays in financial reporting.[139]

Number and Content of Critical Audit Matters

Some commenters indicated an expectation that the auditor's report would include a long list of critical audit matters or that auditors would have incentives to communicate an overly long list of critical audit matters. For example, some commenters said that this would occur because the auditor would be motivated to communicate as much as possible in an effort to mitigate any future liability for unidentified critical audit matters, or as a means to avoid potential consequences of being second-guessed by regulators or others. Other commenters asserted that such a development could make the auditor's report overly long, contributing to disclosure overload and conflicting with the SEC's disclosure effectiveness project. Other commenters indicated that expanded auditor reporting could lead to boilerplate language that would diminish the expected value of the critical audit matters and obscure the clarity of the auditor's opinion. If auditors fail to provide audit-specific information, the communication of critical audit matters will not decrease

[139] *See* PCAOB Release No. 2016-003, section VI.D.2.a, footnote 169 and accompanying text.

information asymmetry about the audit, and may obscure other important information included in the auditor's report and the audited financial statements.

The final requirements aim to provide investors with the auditor's unique perspective on the areas of the audit that involved the auditor's especially challenging, subjective, or complex judgments. Limiting critical audit matters to these areas should mitigate the extent to which expanded auditor reporting could become standardized. Focusing on auditor judgment should limit the extent to which expanded auditor reporting could become duplicative of management's reporting. Also, while some commenters argued that liability concerns would increase the number of critical audit matters auditors communicate, others suggested that liability concerns would minimize the additional statements auditors make.

The PCAOB staff study did not find evidence that expanded auditor reporting in the United Kingdom resulted in a very large number of risk topics or none at all in the first year of implementation.[140] On average, the auditor's reports in the first year of implementation included descriptions of four risk topics, with total risk topics ranging from one to eight. Additionally, the descriptions of the risks of material misstatement in the auditor's reports in the first year of implementation were not presented in standardized language, but included variations in content length, description, and presentation. The most frequently described risk topics related to revenue recognition, tax, and goodwill and intangible assets. The FRC report on the first two years of expanded auditor reporting in the United Kingdom finds a similar range and average number of risk topics disclosed

---

[140] *See* PCAOB White Paper.

in both the first and second year of implementation.[141] The FRC report also finds disclosure of similar risk topics in the second year of implementation of expanded auditor reporting in the United Kingdom.[142]

Further, the FRC found that, in the second year of expanded auditor reporting in the United Kingdom, the discussion of risks has improved relative to the first year of implementation and that the majority of auditor's reports provided discussion of risks that were more tailored to the company under audit, thus avoiding generic or standardized wording.[143] These findings suggest that, thus far, expanded auditor reporting has not become standardized in the United Kingdom.[144]

Effects of Increased Attention to Critical Audit Matters

The communication of critical audit matters could lead auditors, company management, and the audit committee to spend additional time and resources on reviewing the adequacy of the work performed on the related financial statement accounts and disclosures. While this could lead to an incremental improvement in audit and financial reporting quality for the identified critical audit matters, it is also possible that there may be increased costs for auditors as a result of the requirements. For example, even though the final standard does not mandate the performance of additional audit procedures other than with respect to communication of critical audit matters, it is

141 *See* FRC 2016 Report.

142 *Id*.

143 *Id*.

144 The Board finds the UK experience instructive, although it is, of course, possible that differences between the UK and US litigation and regulatory environments may influence the extent to which these findings would generalize to the US market.

possible that some auditors may perform additional procedures. If that occurs, the associated costs may be passed on—in whole, in part, or not at all—to companies and their investors in the form of higher audit fees. Further, increased procedures may also require additional time from the company's management to deal with such procedures. Some commenters suggested that the increased attention on certain matters could also lead to a related decrease in audit and financial reporting quality if other material aspects of the financial statements and disclosures receive less attention.

Some commenters argued that including critical audit matters in the auditor's report would impair the relationship between auditors and management or auditors and the audit committee. Other commenters suggested that the required reporting of critical audit matters would inhibit communication among the auditor, management, and the audit committee because of concerns about what would be publicly communicated in the auditor's report. One commenter also suggested that auditors may include additional matters in audit committee communications out of concern that an omission could lead to regulatory sanctions or liability. Other commenters have said that it would enhance communication among the participants in the financial reporting process.

An experimental study analyzed how the strength of audit committee oversight of the financial reporting process varied with the presence of sophisticated investors and knowledge of forthcoming expanded auditor reporting.[145] The author found that study participants, most of whom were experienced audit committee members, asked fewer probing questions if they knew that the auditor would be providing a discussion of the

---

[145] Yoon Ju Kang, *Are Audit Committees More Challenging Given a Sophisticated Investor Base? Does the Answer Change Given Anticipation of Additional Mandatory Audit Report Disclosure?* (working paper submitted as comment letter No. 17, available on the Board's website in Docket 034).

significant accounting estimate in the auditor's report. The author argued that by asking fewer probing questions audit committee members subconsciously insulated themselves from potential challenges mounted by investors regarding the appropriateness of the company's financial reporting. The Board is not aware of evidence this has occurred in the jurisdictions that have adopted expanded auditor reporting. Moreover, it may be difficult in an experimental setting to recreate the actual legal responsibility and potential liability that audit committee members face, which may limit the extent to which the experimental results would generalize to actual behavior in real-world settings.

Similarly, as described in the economic analysis of the reproposal and asserted by at least one commenter, management may have an incentive to withhold information from the auditor in order to prevent an issue from being described in the auditor's report. It seems unlikely, however, that management would or could withhold information from the auditor on the most critical issues in the audit because it could result in a scope limitation. On the contrary, it may be just as likely that management would communicate more information to the auditor as a means of demonstrating that an issue is not challenging, subjective, or complex, and, therefore, would not need to be described in the auditor's report.

Under the final standard, critical audit matters are determined from the matters communicated or required to be communicated to the audit committee. As noted earlier, with respect to any matters already required to be communicated to the audit committee, there should not be a chilling effect or reduced communications to the audit committee. Therefore, it would seem that any chilling effect would relate to matters that are not explicitly required to be communicated to the audit committee, although, as previously described, given the breadth of current communication requirements, the Board believes there will likely be few communications affected by that possibility.

Potential Impact on Management Disclosure

Several commenters stated that the communication of critical audit matters would give auditors leverage to encourage disclosure of information by management. While some commenters asserted that this would be beneficial, others claimed it would be an unintended negative consequence of requiring the communication of critical audit matters. Several commenters characterized this as inappropriately expanding the role of the auditor in the financial reporting process, while undermining the role of management and the audit committee. In their view, this would be especially problematic if the final standard permitted the auditor to communicate information that was not otherwise required to be disclosed (for example, because it did not meet a specified threshold for disclosure, such as a significant deficiency in internal control over financial reporting). Commenters claimed that auditor communication of this "original information" would cause a number of unintended consequences, including significant costs, disclosure of confidential or competitively sensitive information, and potentially misleading or incomplete information.

Investors and other commenters pointed out that, although expanded auditor reporting would give the auditor additional leverage over management's disclosure choices, this could result in improvements in the usability of financial statements and increases in financial reporting quality. One of these commenters cited academic research noting that, in current practice, disclosure is already guided by an iterative process between management and the auditor. This commenter reasoned that concerns regarding "original information" were misplaced because the iterative process would reduce the likelihood that the auditor would be a source of original information since critical audit matters would likely overlap with increased management disclosure.

Another commenter pointed out that auditors would not have incentives to interpret the Board's rule to require disclosure of original information in most situations. For example, concerns about the limitations of their knowledge and expertise, potential liability implications, and friction in the relationship with the company are likely to discourage auditors from going beyond management disclosures. Nevertheless, the final standard contemplates that the auditor will do so only when it is necessary to describe the principal considerations that led the auditor to determine that a matter was especially challenging, subjective, or complex and how the matter was addressed in the audit. The Board believes that this provision is needed in order to ensure that the fact that management did not provide a disclosure would not prevent the auditor from communicating a critical audit matter.

Although the communication of critical audit matters may lead to changes in the incentives for the auditor, company management, and the audit committee to communicate with each other, initial anecdotal evidence from the Board's outreach activities suggests that the implementation of expanded auditor reporting in the United Kingdom has not chilled such communications.

<u>Changes in Perceived Assurance on the Auditor's Report, Including Perceptions of Auditor Liability</u>

The communication of critical audit matters could have liability implications for auditors. In addition, because the communication of critical audit matters requires auditors to discuss aspects of the audit that they found to be especially challenging, subjective, or complex, it is possible that some investors and financial statement users may misconstrue the communications to mean that auditors were unable to obtain reasonable assurance about the matters identified as critical audit matters. Some commenters have said that the communication of critical audit matters could lead to changes in the way investors and financial statements users perceive the level of assurance provided by the auditor on matters identified as critical audit matters, including that it could undermine the basic pass/fail opinion. This could lead investors to erroneously conclude that there is a problem with the audit either in the areas identified in critical audit matters or other areas, or that auditors are providing separate assurance about the presentation of the financial statements, which may have implications for perceptions of auditor responsibility in the event of an audit failure.

As discussed in the economic analysis of the reproposal, several academic papers analyze certain risks associated with communicating critical audit matters, including perception of auditor responsibility.[146] If the communication of critical audit matters were to lead to a reduction in perceived auditor responsibility, as is suggested by some academic research, and this in turn reduced auditor liability, it is possible that auditors may feel that less audit work is needed on the matters identified as critical audit matters, which could adversely affect audit quality (although the Board's other auditing standards, reinforced through firm quality control and Board inspections and enforcement activity, should provide a disincentive for auditors to decrease the amount or quality of audit work performed). It is difficult to draw generalizable conclusions based on the findings of these

---

[146] *See* PCAOB Release No. 2016-003, Section VI.D.2.d, footnotes 182-186 and accompanying text.

studies. In part, this is because their results vary and are sometimes contradictory, with some studies finding that expanded auditor reporting increases perceived auditor responsibility and others finding that it decreases perceived auditor responsibility. This may suggest that the results are sensitive to the experimental design and the context in which information is presented to study participants. In addition, it is not clear how the findings would correlate with changes in auditor behavior, because perceptions of auditor responsibility may be a poor proxy for actual auditor responsibility or liability.

To address the risk that the communication of critical audit matters could result in the perception of separate assurance, the final standard requires the following statement in the auditor's report:

> The communication of critical audit matters does not alter in any way [the auditor's] opinion on the financial statements, taken as a whole, and [the auditor is not] by communicating the critical audit matters… providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

The purpose of this statement is to make clear that the communication of critical audit matters in an auditor's report should not be interpreted as altering the level of assurance on any aspect of the audit report, including the identified critical audit matters. In this regard, the Board also notes the view of some commenters that critical audit matters are likely to be used by institutional investors that are unlikely to misinterpret the information.

Auditor Tenure

Many commenters stated that information regarding the auditor's tenure included in the auditor's report could result in inappropriate and inconsistent assumptions about correlations between auditor tenure and/or independence and audit quality. Academic research on the relationship of tenure to audit quality has varied conclusions. For instance, some academic research indicates that engagements with short-term tenure are relatively riskier or that audit quality is improved when auditors have time to gain expertise in the company under audit and in the related industry.[147] Other academic research suggests that, at least prior to 2001, both short tenure (less than five years) and long tenure (greater than fifteen years) can have detrimental effects on audit quality.[148] Still other academic research indicates that investors are more likely to vote against, or abstain from, auditor ratification as auditor tenure increases, which may suggest that investors view long-term auditor-company relationships as adversely affecting audit quality.[149]

The disclosure of auditor tenure is intended to add to the mix of information that investors can use. However, commenters other than investors did not support disclosure of auditor tenure in the auditor's report on the basis that such disclosure would not provide value to investors or could result in false conclusions about correlations between auditor tenure and audit quality or between auditor tenure and auditor independence. Many of these commenters recommended that, if the Board determined to require

disclosure of auditor tenure, it should be disclosed in Form AP rather than in the auditor's report as a means of avoiding these inferences.

*Alternatives Considered, Including Policy Choices under the Final Standard*

After considering the comments received, the Board is adopting a new auditor reporting standard, AS 3101 and related amendments to its standards. The final standard retains the pass/fail model while expanding auditor reporting to include the communication of critical audit matters. Investor commenters have consistently asked for additional information in the auditor's report to make it more informative about the audit of the company's financial statements.

As described below, the Board has considered a number of alternative approaches to achieve the potential benefits of enhanced auditor reporting.

*Alternatives Raised by Commenters*

Only Cross-Reference to Management's Disclosures

Some commenters suggested that, instead of communicating critical audit matters as reproposed, auditors should only identify the critical audit matters and provide a cross-reference to management disclosures (i.e., not describe the principal considerations that led the auditor to determine a matter is a critical audit matter or how it was addressed in the audit), or refer to or list critical accounting policies and estimates as disclosed by management. The Board believes that communicating the principal considerations that led the auditor to determine that a matter is a critical audit matter and how it was addressed in the audit will provide useful information beyond simply referencing existing management disclosure, and is more responsive to investor requests for more information from the auditor's perspective.

Auditor Association with Other Company Disclosures

Other commenters suggested more specific auditor assurance on particular management disclosures, such as inclusion of a statement in the auditor's report that the audit included evaluation of the accounting policies and significant estimates, with a cross-reference to management's disclosures, or a statement of auditor concurrence with the critical accounting policies and estimates of the company. One commenter suggested that audit committees should disclose critical audit matters with a corresponding confirmation from the independent auditor.

Several commenters on the proposal also suggested that the Board should consider auditor association with, or attestation on, portions of MD&A, specifically management's critical accounting policies and estimates, as an alternative to expanded auditor reporting. These commenters have argued that such an association could increase the quality and reliability of the information subject to the procedures.

Some commenters on the concept release, including investors, said that they were not supportive of separate assurance by the auditor on information outside of the financial statements as an alternative to expanded auditor reporting, primarily because the related auditor reporting would have appeared in a standardized form and would not provide audit-specific information. Requiring such reporting might necessitate action by the SEC, as well as the PCAOB, to implement, including new SEC rules regarding management reporting and auditor attestation. In addition to reporting requirements, the PCAOB might have to develop new performance requirements and auditors would be required to undertake additional audit work in order to provide attestation in these areas.

Based on concerns about the complexity of such an approach, as well as the comments received as to its limited benefits, the Board determined not to pursue auditor association with portions of MD&A as an alternative to expanded auditor reporting at this time. The Board believes that this approach would fail to deliver the audit-specific information requested by investors, while also raising potential concerns about separate assurance on the identified matters.

No Change to Auditor Reporting Requirements

The Board considered whether changes to the existing auditor reporting requirements were needed. Auditor reporting under the current model has been criticized by many commenters as providing limited information. Auditors have not voluntarily provided more information in the auditor's report in response to investors' requests. A number of factors described above, such as potential costs and uncertainties related to voluntary auditor reporting and the potential for auditor status quo bias, may explain why voluntary reporting would not be expected to become prevalent. These factors suggest that voluntary reporting, with or without guidance to encourage it, could also create uncertainty about the content of auditor's reports because auditors would be able to choose whether to provide information about the audit, what information to provide, and the form in which to provide it. On that basis, the Board believes that standard setting is appropriate.

Consideration of Analogous Requirements of Other Regulators and Standard Setters

In developing the final standard, the Board took into account the requirements for expanded auditor reporting of other regulators and standard setters, such as the IAASB, the FRC, and the EU. Changes to the auditor's report that other regulators and standard setters have adopted include some commonality, such as communicating information about audit-specific matters in the auditor's report. Several commenters suggested that the Board align its requirements for expanded auditor reporting more closely with the requirements of the IAASB to provide more consistent global auditor reporting requirements.

However, the Board recognizes that the regulatory environments in other jurisdictions are different from the United States, requiring the Board to address unique U.S. requirements and characteristics in its standard-setting projects. Because the Board's standards have the force of law, the Board aims to make them as clear and easy to apply as it can. For example, the factors that the auditor considers in determining whether a matter involved especially challenging, subjective, or complex auditor judgment are included in the standard; by contrast, while the IAASB approach includes similar factors, they appear in the application and other explanatory material.

In addition, there are differences between requirements and terminology of the Board's auditing standards and those of other regulators and standard setters that may cause inconsistent application, even if the Board were to adopt the approach of another standard setter. For example, the Board's requirements for communications to the audit committee are not identical to the analogous requirements of the IAASB. Therefore, although both critical audit matters and the IAASB's key audit matters are derived from such communications, the matters ultimately discussed with the audit committee under each framework would not necessarily be the same, which could result in differences in which matters are reported even if the language in the auditor reporting standards were identical. Also, the component of the definition of critical audit matter in the final standard, namely "matters that involve especially challenging, subjective, or complex auditor judgment" grounds the definition in the auditor's expertise and judgment. Although the processes of identifying these matters vary across jurisdictions, there are commonalities in the underlying criteria regarding matters to be communicated and the communication requirements, such that expanded auditor reporting could result in the communication of many of the same matters under the various approaches.

Auditor Assessment and Descriptions of Certain Financial Statement Areas

Several commenters on the concept release suggested that investors would be most interested in auditor reporting on the categories of information identified by investor respondents to the 2011 survey conducted by a working group of the IAG: (1) significant management estimates and judgments made in preparing the financial statements and the auditor's assessment of them; (2) areas of high financial statement and audit risk; (3) unusual transactions, restatements, and other significant changes in the financial statements; and (4) the quality, not just the acceptability, of the company's accounting practices and policies.[150] This request was reiterated by several commenters on the proposal, who continued to believe that this approach would provide the information investors want most. In a similar vein, other commenters on the reproposal have requested that the auditor provide a "grade" on management's significant accounting estimates and judgments.

The Board believes that the final critical audit matter definition will likely cover many of the topic areas requested by investors. For example, the auditor may

---

150 *See* IAG 2011 survey.

communicate critical audit matters related to significant management estimates and judgments, highlight areas of high financial statement and audit risk, and discuss significant unusual transactions. However, the auditor will not be required to report on its assessment of management's significant estimates and judgments or on the quality (as opposed to merely the acceptability), of the company's accounting practices and policies or of the financial statements as a whole.

The final standard seeks to strike an appropriate balance between the value of the information being provided and the costs of providing it. Requiring auditors to report their qualitative assessments in a manner that appears very precise (for example, describing an estimate as "conservative" or "aggressive" or assigning the financial statements an "A" or a "B") may impose significantly greater costs and unintended consequences than the principles-based reporting of critical audit matters. For example, although the reporting of qualitative assessments would appear to be precise, these qualitative assessments are likely to be applied inconsistently because there is no framework for such assessments and the determinations are inherently subjective. In addition, such assessments may heighten concerns related to the perceived level of assurance provided by the audit or the perception that separate assurance is being provided as to the assessed areas. Also, the reporting of such qualitative assessments may subject auditors and companies to additional litigation risk beyond what may result from the principles-based reporting of critical audit matters because the apparent precision of the reporting may facilitate plaintiffs' claims.

*Policy Choices*

Definition of Critical Audit Matters

The Board considered a variety of possible approaches to the definition of critical audit matters suggested by commenters. *See* above for a discussion of the Board's considerations of the final standard.

Communication of Critical Audit Matters

The Board considered a variety of possible approaches to the communication requirements for critical audit matters. *See* above for a discussion of the Board's considerations of the final standard.

Auditor Tenure

The final standard retains the reproposed requirement to include a statement in the auditor's report about auditor tenure.

In the reproposal, the Board solicited comment on whether disclosure of auditor tenure should be made on Form AP instead of in the auditor's report. Form AP was developed as a means to address commenter concerns about the potential liability implications of naming persons in the auditor's report. Because the disclosure of auditor tenure does not have the same potential liability consequences, such an approach is unnecessary in this case. In addition, some commenters preferred tenure disclosure on Form AP because of a concern that disclosure in the auditor's report could result in inappropriate inferences about correlations between auditor tenure and audit quality, or between auditor tenure and auditor independence. The Board is not persuaded by such concerns. Further, the final standard allows the auditor flexibility in the location of the auditor tenure disclosure in the auditor's report.

The Board determined that disclosure will be better achieved through the auditor's report because the information will be more readily accessible upon the filing with the

SEC of a document containing audited financial statements and poses lower search costs, particularly for those investors who may prefer to have the information provided in the auditor's primary means of communication. In addition, disclosing tenure in the auditor's report will make information available earlier to investors, which may assist in their voting on auditor ratification. However, disclosing auditor tenure in the auditor's report rather than Form AP could result in higher costs to investors that wish to accumulate tenure data for a large number of companies or compare data across companies because these investors will have to acquire tenure data from each company's auditor's report separately or from a data aggregator.

Additional Improvements to the Auditor's Report

The final standard includes a number of requirements that will enhance the standardized content of the auditor's report by clarifying the auditor's role and responsibilities related to the audit of the financial statements. These include, for example, statements regarding auditor independence requirements and the addition of the phrase "whether due to error or fraud," when describing the auditor's responsibility under PCAOB standards to obtain reasonable assurance about whether the financial statements are free of material misstatements. In addition, the final standard includes requirements intended to promote uniformity in the form of the auditor's report. These include requirements as to the addressee, a specific order of certain sections of the auditor's report, and required section headings.

Many commenters generally supported these enhancements and suggested that such enhancements will increase the usability of the auditor's report by improving financial statement users' understanding of the auditor's responsibilities, reducing search costs for information in the auditor's report, and facilitating comparisons across auditor's reports.

Applicability of Critical Audit Matter Requirements

*Brokers and Dealers, Investment Companies, and Benefit Plans*

The reproposed standard did not require communication of critical audit matters for audits of brokers and dealers reporting under Exchange Act Rule 17a-5, investment companies other than business development companies ("BDCs"), and benefit plans. The reproposing release described the Board's rationale, including economic considerations, for such exclusions from the critical audit matter requirements and noted that auditors of these entities would not be precluded from including critical audit matters in the auditor's report voluntarily.

Commenters generally supported these exclusions, pointing to the same or similar reasons to those described by the Board in the reproposing release. Some commenters asserted that the communication of critical audit matters should apply to all companies. One commenter supported voluntary communication of critical audit matters for the exempted entities. Another commenter disagreed with providing auditors the ability to voluntarily communicate critical audit matters for brokers and dealers and investment companies. This commenter also suggested that all broker-dealers, including broker-dealers that are issuers, should be excluded from the requirement.

After considering the comments received and evaluating benefits and costs, the final standard excludes the audits of brokers and dealers that are reporting under Exchange Act Rule 17a-5, investment companies other than BDCs, and benefit plans, from the critical audit matter requirements as reproposed.[151] Auditors of these entities may choose to include critical audit matters in the auditor's report voluntarily.

The Board's rationales for these exclusions are described below.

*Brokers and Dealers Reporting under Exchange Act Rule 17a-5*

Pursuant to Exchange Act Rule 17a-5, the annual reports that brokers and dealers file with the SEC are public, except that if the statement of financial condition in the financial report is bound separately from the balance of the annual report, the balance of the annual report is deemed confidential and nonpublic.[152] In this situation, the auditor would generally issue two separate auditor's reports that would have different content: (1) an auditor's report on the statement of financial condition that would be available to the public and (2) an auditor's report on the complete financial report that, except as provided in paragraph (c)(2)(iv) of Exchange Act Rule 17a-5, would be confidential and not available to the public.[153] Research by the PCAOB's Office of Economic and Risk Analysis ("ERA")[154] indicates that, for approximately half of brokers and dealers, the complete financial report and the related auditor's report are confidential and not available to the public.

---

[151] The other requirements of the final standard will be applicable to audits of these entities.

[152] *See* Exchange Act Rule 17a-5(e), 17 CFR 240.17a-5(e).

[153] *See also* Exchange Act Rule 17a-5(c)(2), 17 CFR 240.17a-5(c)(2), regarding audited statements required to be provided to customers.

[154] ERA's research was conducted on brokers and dealers who filed financial statements through May 15, 2015, for fiscal years ended during 2014 that included audit reports issued by firms registered with the PCAOB.

In 2013, the Board adopted new standards related to brokers and dealers that enhanced the auditor's performance and reporting responsibilities for financial statement audits, as well as engagements on compliance and exemption reports of brokers and dealers.[155]

Some commenters on the proposal asserted that the value of reporting critical audit matters for brokers and dealers would be significantly limited by the closely held nature of brokers and dealers; the limited number of users of their financial statements; and the fact that, in many cases, only the statement of financial condition is available publicly. Some commenters also recognized that both the SEC and PCAOB recently updated their rules to further enhance reporting by brokers and dealers and their auditors.

Research by ERA indicates that currently there are no brokers or dealers that are issuers. Rather, brokers and dealers are often owned by a holding company, an individual, or a group of individuals that holds a controlling interest. The owners of brokers and dealers are generally part of the management of the entity and therefore would have direct access to the auditor. Given that, in many cases, there is much less separation of ownership and control in brokers and dealers than in issuers, the communication of critical audit matters would provide little information about the audit that would otherwise be unobtainable by investors.

Although there may be circumstances in which other financial statement users may benefit from reduced information asymmetry about the audits of brokers and dealers,

---

[155] *See Attestation Standards for Engagements Related to Broker and Dealer Compliance or Exemption Reports Required by the U.S. Securities and Exchange Commission and Related Amendments to PCAOB Standards*, PCAOB Release No. 2013-007 (Oct. 10, 2013) and *Auditing Standard No. 17, Auditing Supplemental Information Accompanying Audited Financial Statements and Related Amendments to PCAOB Standards*, PCAOB Release No. 2013-008 (Oct. 10, 2013).

certain aspects of broker and dealer financial reporting may limit the benefits of requiring the communication of critical audit matters. For example, while other financial statement users, such as customers of brokers and dealers, may benefit from increased information about the audit, the ability for brokers and dealers to file certain financial statements and schedules confidentially would require the auditor to identify and communicate critical audit matters that apply only to the publicly available statement of financial condition. This may reduce the value of communicating critical audit matters for brokers and dealers relative to issuers. Moreover, customers of brokers and dealers may be interested in the overall financial position of the broker or dealer but may not benefit from audit-specific information in the same way as investors in an issuer.

The communication of critical audit matters may also impose additional costs on the auditors of brokers and dealers relative to the auditors of other types of companies, as they would have to identify critical audit matters that apply exclusively to the publicly available financial information, which may be difficult in some situations.

After consideration of the ownership and reporting characteristics of brokers and dealers, the comments received on the proposal and reproposal, and the Board's recent standard-setting activities related to brokers and dealers, the Board does not believe that reporting of critical audit matters for brokers and dealers will provide meaningful information in the same way as for issuers. Therefore, the communication of critical audit matters is not required for audits of brokers and dealers reporting under Exchange Act Rule 17a-5. If a broker or dealer were an issuer required to file audited financial statements under Section 13 or 15(d) of the Exchange Act, the requirements would apply.

*Investment Companies*

The Investment Company Act generally defines an investment company as any issuer that is engaged primarily in the business of investing, reinvesting, or trading in securities.[156] Most investment companies registered under the Investment Company Act are required to file with the SEC annual reports on Form N-CSR containing audited financial statements.[157] The Investment Company Act includes specific requirements for investment companies, intended to reduce investors' risks, in areas such as an investment company's portfolio diversification, liquidity, leverage, and custody of securities.[158]

In an SEC rulemaking, the SEC observed that commenters believed the key information that investors use in deciding to invest in an investment company includes an investment company's investment objectives, strategies, risks, costs, and performance.[159] The disclosure of information about these items appears in the annual prospectus that investment companies provide to current and future investors.[160] Changes to investment objectives and strategies require shareholder approval or disclosure.[161]

Several commenters on the proposal noted that an investor's decision to invest in an investment company is primarily based on the investment objectives, risks,

160 *See* SEC Rules under Section 30(e) of the Investment Company Act.

161 *See* Sections 8(b) and 13(a)(3) of the Investment Company Act and Investment Company Act Rule 8b-16.

performance, and fees, and critical audit matters are not expected to provide information about these items and therefore would not be relevant. These and other commenters generally stated that investment companies are designed for the sole purpose of trading in and holding investments and auditor judgment would arise primarily with respect to valuation of investments, which would tend to be repeated as a critical audit matter. One of these commenters noted that, since the strategies of investment companies do not change significantly over time, the critical audit matters identified could become standardized from one reporting period to the next and also across funds with similar objectives.

Even though the disclosures required under the Investment Company Act and other federal securities laws provide investors with useful information, they may not fully substitute for the communication of critical audit matters. The required communication of critical audit matters contemplates that auditors would provide investors with audit-specific information, which is unlikely to appear in the disclosures provided by management. In addition, some academic research documented a difference in the perceived usefulness and reliability of information depending on the location of the disclosure and whether it was disclosed by management or by the independent auditor.[162] This academic research suggests that the auditor's communication of information similar to critical audit matters may provide value to investors because it comes from the auditor, even if the same information is disclosed by management in the experimental design of the study.

---

[162] *See, e.g.*, Christensen et al., *Do Critical Audit Matter Paragraphs in the Audit Report Change Nonprofessional Investors' Decision to Invest?*

The benefits of providing critical audit matters, however, may be smaller for investment companies, other than BDCs, relative to other types of companies because of their purpose and structure. Unlike companies whose business models can change over time, investment companies have specific investment mandates that are disclosed in the prospectus and rarely change. This creates the potential for critical audit matters of investment companies to become excessively repetitive, making them uninformative.

There may also be additional costs of applying critical audit matter requirements to audits of investment companies, other than BDCs, as compared to audits of other types of companies. For example, in some cases, annual shareholder reports of affiliated investment companies with the same fiscal year-end might be filed with the SEC in one document, which generally contains a single auditor's report that covers multiple audited investment companies. In these situations, communicating critical audit matters specific to each investment company may require the auditor to prepare separate auditor's reports. This could increase costs for these types of investment companies.

After consideration of the purpose and reporting characteristics of investment companies and the comments received on the proposal and reproposal, the Board has determined not to require the communication of critical audit matters for audits of most investment companies, although they will apply to audits of investment companies regulated as BDCs.[163] Unlike the audits of many other investment companies, auditing the valuation of BDCs' investments generally involves complexity and auditor judgments due to the nature of the BDCs' portfolios. Also, because of the more diverse operations of BDCs, such as providing managerial assistance and involvement with more complex debt

---

163 *See* Section 54 of the Investment Company Act.

and equity instruments than other investment companies, communication of critical audit matters in a BDC audit could be more informative to investors. Additionally, BDCs follow a reporting regime under the Exchange Act that is more closely aligned with that of companies to which the Board is applying the requirements for critical audit matters. For these reasons, the Board believes it is appropriate for audits of BDCs to be subject to critical audit matter requirements.

*Benefit plans*

Benefit plans that purchase and hold securities of the plan sponsor using participants' contributions are generally required to file with the SEC an annual report on Form 11-K[164] that includes the benefit plan's audited financial statements and the related auditor's report.[165] The audit of the financial statements included in a filing on Form 11-K is performed in accordance with the standards of the PCAOB. Benefit plans are also generally subject to the financial reporting requirements of the Employee Retirement Income Security Act of 1974 ("ERISA"), including the U.S. Department of Labor's ("DOL") rules and regulations for disclosure under ERISA.[166]

Participation in a benefit plan is limited to eligible employees of the plan sponsor. Each plan participant in a defined contribution benefit plan is responsible for selecting,

---

164 *See* Section 15(d) of the Exchange Act.

165 A benefit plan's audited financial statements may also be included as part of the annual report of the issuer sponsoring the benefit plan. *See* Exchange Act Rule 15d-21, CFR 240.15d-21.

166 ERISA Section 103(a)(3)(A) requires a plan administrator to engage an independent auditor to conduct an examination of the plan's financial statements and required schedules in accordance with generally accepted auditing standards. *See* 29 CFR 2520.103-1. Benefit plans subject to ERISA also file with the DOL an annual report on Form 5500, including audited financial statements and an auditor's report. *See also* FASB ASC 960-10-05-6.

from the investment options made available by the plan sponsor, the specific investments in which the participant's funds are invested.

Employee stock benefit plans are generally less complex than other types of companies because they are designed for the sole purpose of holding the plan's investments for the participants' benefit. A plan's financial statements reflect summary information about the plan's assets and liabilities by aggregating the balances of all plan participants. However, only the individual account statements that plan participants receive periodically provide information specific to each participant's investments.

Several commenters on the proposal suggested excluding audits of benefit plans from the requirement for reporting critical audit matters due to the unique characteristics of these entities and their differences from other types of companies. For example, some commenters indicated that benefit plans are designed for a specific purpose and, as a result, would likely have similar critical audit matters from one reporting period to the next. Other commenters noted that benefit plans are inherently less complex and entail fewer estimates and judgments.

The communication of critical audit matters could provide information about any complex issues that were identified during the audit and how the auditor addressed them. However, since a benefit plan's assets and liabilities aggregate the balances of all plan participants, the financial statements or related critical audit matters would not provide actionable information about a plan participant's specific investment. Further, given the nature of benefit plans, there is a chance that the same critical audit matters would be communicated each year. For example, the valuation of investments is likely to be the most complex area in the audit of a benefit plan and therefore may be a critical audit matter in each reporting period, making the information less useful.

After consideration of the structure and reporting characteristics of benefit plans and the comments received on the proposal and reproposal, the Board has determined not to require the communication of critical audit matters for audits of benefit plans.

*Smaller Companies*

The reproposal sought comment on whether the critical audit matter requirements should not apply to audits of other types of companies, in addition to the exempted entities discussed above. Some commenters asserted that the communication of critical audit matters should apply to all companies. Other commenters recommended that the Board give consideration to not applying the critical audit matter requirements to audits of smaller reporting companies[167] and nonaccelerated filers[168] due to their smaller size and because, in the commenters' view, communication of critical audit mattes would not provide sufficient benefits for these companies to justify the costs.

Academic research suggests that smaller companies have a higher degree of information asymmetry relative to the broader population of companies. Although the

---

[167] In general, a "smaller reporting company" means an issuer with less than $75 million in public float or zero public float and annual revenues of less than $50 million during the most recently completed fiscal year for which audited financial statements are available. *See* Exchange Act Rule 12b-2, 17 CFR 240.12b-2. Smaller reporting companies currently make up approximately 42 percent of Form 10-K filers. The SEC recently proposed changes to the definition of smaller reporting companies, which would increase the percentage of smaller reporting companies to approximately 52 percent of Form 10-K filers. *See* SEC, *Amendments to Smaller Reporting Company Definition*, Release No. 33-10107 (June 27, 2016), 81 FR 43130 (July 1, 2016).

[168] Nonaccelerated filers are not defined in SEC rules but are generally understood to be companies that do not meet the definition of large accelerated filer or accelerated filer.

degree of information asymmetry surrounding a particular issuer is unobservable, researchers have developed a number of proxies that are thought to be correlated with information asymmetry, including small issuer size, lower analyst coverage, larger insider holdings, and higher research and development costs.[169] To the extent that a smaller company can be characterized as exhibiting one or more of these properties, this may suggest that it has a greater degree of information asymmetry relative to the broader population of companies. This would suggest that there is a higher likelihood that critical audit matters could provide new information about a smaller company than a large one for which there already exists a variety of information sources (such as annual reports, news media, and analyst research reports).

After consideration of comments, academic research, and data regarding the number of such companies, the final standard does not exclude smaller companies from the critical audit matter requirements. However, as discussed below, the Board has determined that it is appropriate to give auditors of smaller companies additional time to implement the new requirements. If approved by the SEC, auditors of companies that are not large accelerated filers will have an additional 18 months to implement the requirements for critical audit matters and will be able to benefit from the experiences of auditors of larger companies.

*Requirements of Other Regulators and Standard Setters*

---

169 *See, e.g.*, David Aboody, and Baruch Lev, *Information Asymmetry, R&D, and Insider Gains*, 55 The Journal of Finance 2747, 2747-2766 (2000), Michael J. Brennan and Avanidhar Subrahmanyam, *Investment Analysis and Price Formation in Securities Markets*, 38 Journal of Financial Economics 361, 361-381 (1995), Varadarajan V. Chari, Ravi Jagannathan, and Aharon R. Ofer, *Seasonalities in Security Returns: The Case of Earnings Announcements*, 21 Journal of Financial Economics 101, 101-121 (1988), and Raymond Chiang, and P. Under the IAASB's standard, the communication of key audit matters applies to listed entities.[170] The EU requirements apply to audits of PIEs, including listed companies, credit institutions, and insurance companies.[171] The FRC 2013 requirements apply to auditor's reports for entities that apply the UK Corporate Governance Code.[172]

Considerations for Audits of Emerging Growth Companies

Section 104 of the Jumpstart Our Business Startups ("JOBS") Act imposes certain limitations with respect to application of the Board's standards to audits of EGCs, as defined in Section 3(a)(80) of the Exchange Act. Section 104 provides that "[a]ny rules of the Board requiring . . . a supplement to the auditor's report in which the auditor would be required to provide additional information about the audit and the financial statements of the issuer (auditor discussion and analysis) shall not apply to an audit of an emerging growth company . . ."[173] Auditor discussion and analysis ("AD&A") does not exist in auditing standards. The idea was introduced in the concept release, which described AD&A as one of several conceptual alternatives for changing the auditor's reporting model.[174]

---

[170] *See* paragraph 5 of ISA 701.

[171] *See* requirements in 1 of Article 2, Audit Report of Regulation (EU) No 537/2014.

[172] These include companies with a premium listing of equity shares on the London Stock Exchange regardless of whether they are incorporated in the U.K. or elsewhere.

[173] *See* Pub. L. No. 112-106 (Apr. 5, 2012). *See* Section 103(a)(3)(C) of Sarbanes-Oxley, as added by Section 104 of the JOBS Act.

[174] *See* PCAOB Release No. 2011-003 (June 21, 2011) at 2 (describing one alternative as "a supplement to the auditor's report in which the auditor would be required to provide additional information about the audit and the company's financial statements

Section 104 of the JOBS Act further provides that any additional rules adopted by the Board subsequent to April 5, 2012, do not apply to the audits of EGCs unless the SEC "determines that the application of such additional requirements is necessary or appropriate in the public interest, after considering the protection of investors, and whether the action will promote efficiency, competition, and capital formation."[175] As a result of the JOBS Act, the final standard and amendments are subject to an evaluation as to whether they could, and if so, should be applicable to the audits of EGCs.

*Critical Audit Matters*

The reproposal solicited comment on the application of critical audit matter requirements to the audits of EGCs. Commenters on this issue generally favored applying the standard to audits of EGCs, primarily because investors in these companies would benefit from the additional information communicated in the auditor's report in the same way that investors in larger companies would. Two commenters recommended that the critical audit matter requirements not apply to audits of EGCs because there would not be sufficient benefits to justify the costs.

Three commenters addressed the legal question of whether the JOBS Act provision on AD&A would prohibit the Board from applying critical audit matter requirements to audits of EGCs. Two of these commenters suggested that this would be prohibited, on the basis that critical audit matters "appear substantively similar to"[176] or

---

(an 'Auditor's Discussion and Analysis')"). Section IV.A., *Auditor's Discussion and Analysis*, of the proposal further described AD&A and related comments received on the concept release.

[175] *See* Section 103(a)(3)(C) of Sarbanes-Oxley.

[176] *See* letter from the U.S. Chamber of Commerce, Center for Capital

"closely resemble"[177] AD&A. The SEC's Investor Advocate stated that, from a policy perspective, critical audit matter requirements should apply to audits of EGCs, and recommended that the PCAOB adopt the standard for policy reasons and let the SEC determine the legal question.[178] This commenter also recommended that, "to prepare for any outcome of the SEC's determination," the PCAOB should encourage auditors, on a voluntary basis, to include critical audit matter communications in the auditor's reports on EGCs."[179]

The requirements for critical audit matters share characteristics with two of the alternative approaches described in the concept release: required and expanded explanatory paragraphs and AD&A. Similar to critical audit matters, required and expanded explanatory paragraphs involved additional paragraphs in the auditor's report that would have highlighted areas of critical importance to the financial statements, with auditor comment on key audit procedures and a reference to relevant financial statement accounts and disclosure. AD&A, by contrast, envisioned a supplemental report in addition to the auditor's report that could cover a broad range of issues, including the auditor's views regarding the company's financial statements, material matters as to

Fleming, Investor Advocate, SEC (Aug. 15, 2016) at 5-6, available on the Board's website in Docket 034 (noting that "the SEC will need to make a legal determination on whether such a requirement with respect to the audits of EGCs would accord with certain provisions of" the JOBS Act).

179 *Id.* at 6.

which the auditor believed disclosure could be enhanced, and areas where management could have applied different accounting or disclosure approaches.

However, critical audit matters go beyond the content of a required and expanded explanatory paragraph by including a discussion of the principal reasons the auditor determined that a matter was a critical audit matter. Further, although this is not required, critical audit matters could potentially include a discussion of auditor findings. These additional elements may make critical audit matters resemble AD&A in some respects. This potential similarity, together with the fact that there has been no authoritative interpretation of Section 104 of the JOBS Act, creates some uncertainty as to whether it is legally permissible for critical audit matter requirements to be mandated for EGC audits. In view of this uncertainty, the Board has determined not to apply the requirements regarding critical audit matters to audits of EGCs at this time.

As with other audits where critical audit matter requirements do not apply, voluntary application is permissible. EGCs and their auditors can consider whether investors would benefit from additional information about the audit from the auditor's point of view.

*Additional Improvements to the Auditor's Report*

The additional improvements to the auditor's report contained in the final standard and amendments do not raise concerns under the AD&A provisions of the JOBS Act, but instead fall within the category of "additional rules" that may not be applied to audits of EGCs unless the SEC determines that doing so "is necessary or appropriate in the public interest, after considering the protection of investors, and whether the action will promote efficiency, competition, and capital formation." The Board is providing this analysis to assist the SEC in making this determination.

To inform consideration of the application of auditing standards to audits of EGCs, the staff has also published a white paper that provides general information about characteristics of EGCs.[180] The data on EGCs outlined in the white paper remains generally consistent with the data discussed in the reproposal. A majority of EGCs continue to be smaller public companies that are generally new to the SEC reporting process. This suggests that there is less information available to investors regarding such companies (a higher degree of information asymmetry) relative to the broader population of public companies because, in general, investors are less informed about companies that are smaller and newer. For example, smaller companies have very little, if any, analyst coverage which reduces the amount of information made available to financial statement users and therefore makes markets less efficient.[181]

The reproposal solicited comment on whether the elements of the reproposed standard and amendments other than the requirements for critical audit matters should apply to the audits of EGCs. As noted above, one commenter supported application of the entire standard and amendments to EGCs (without differentiating between critical audit matters and other elements), and one commenter opposed application of the entire standard and amendments. In addition, one commenter supported applying some of the reproposed improvements to the auditor's report to audits of EGCs (the requirement as to

---

[180] *See White Paper on Characteristics of Emerging Growth Companies as of November 15, 2016* (Mar. 28, 2017), available on the Board's website in Docket 034.

[181] *See* SEC, *Final Report of the Advisory Committee on Smaller Public Companies to the U.S. Securities and Exchange Commission* (Apr. 23, 2006) at 73.

addressee and the clarifications of existing auditor responsibilities, as well as a modified version of the statement regarding auditor independence), but generally opposed the other aspects of the reproposal for both EGCs and other companies.

As described above, the additional improvements to the auditor's report are intended to provide a consistent location and decrease search costs with respect to information about auditor tenure, enhance users' understanding of the auditor's role, make the auditor's report easier to read and facilitate comparison across companies by making the format consistent. As described above, the costs associated with these changes are not expected to be significant and are primarily one-time, rather than recurring, costs.

For the reasons explained above, the Board believes that the additional improvements to the auditor's report contained in the final standard and amendments are in the public interest and, after considering the protection of investors and the promotion of efficiency, competition, and capital formation, recommends that the final standard and amendments should apply to audits of EGCs. Accordingly, the Board recommends that the SEC determine that it is necessary or appropriate in the public interest, after considering the protection of investors and whether the action will promote efficiency, competition, and capital formation, to apply the final standard and amendments, other than the provisions relating to critical audit matters, to audits of EGCs. The Board stands ready to assist the SEC in considering any comments the SEC receives on these matters during the SEC's public comment process.

## III. Date of Effectiveness of the Proposed Rules and Timing for Commission Action

Within 45 days of the date of publication of this notice in the Federal Register or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the Board consents, the Commission will:

(A) by order approve or disapprove such proposed rules; or

(B) institute proceedings to determine whether the proposed rules should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rules are consistent with the requirements of Title I of the Act. Comments may be submitted by any of the following methods:

Electronic comments:

- Use the Commission's Internet comment form (http://www.sec.gov/rules/pcaob.shtml); or
- Send an e-mail to rule-comments@sec.gov. Please include File Number PCAOB-2017-01 on the subject line.

Paper comments:

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street, NE, Washington, DC 20549-1090.

All submissions should refer to File Number PCAOB-2017-01. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet website (http://www.sec.gov/rules/pcaob.shtml). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rules that are filed with the Commission, and all written communications relating to the proposed rules between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing will also be available for inspection and copying at the principal office of the PCAOB. All comments received will be posted without charge; we do not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number PCAOB-2017-01 and should be submitted on or before [insert 21 days from publication in the Federal Register].

By the Commission.

Brent J. Fields

| CONCEPT RELEASE ON POSSIBLE REVISIONS TO PCAOB STANDARDS RELATED TO REPORTS ON AUDITED FINANCIAL STATEMENTS<br><br>AND RELATED AMENDMENTS TO PCAOB STANDARDS<br><br>NOTICE OF ROUNDTABLE | PCAOB Release No. 2011-003<br>June 21, 2011<br><br>PCAOB Rulemaking<br>Docket Matter No. 34 |

Summary: The Public Company Accounting Oversight Board ("PCAOB" or "Board") is issuing a concept release to solicit public comment on the potential direction of a proposed standard-setting project on the content and form of reports on audited financial statements. The Board will also convene a public roundtable meeting in the third quarter of 2011, at which interested persons will present their views. Additional details about the roundtable will be announced at a later date.

Public Comment: Interested persons may submit written comments to the Board. Such comments should be sent to the Office of the Secretary, PCAOB, 1666 K Street, N.W., Washington, D.C. 20006-2803. Comments also may be submitted via email to comments@pcaobus.org or through the Board's Web site at www.pcaobus.org. All comments should refer to PCAOB Rulemaking Docket Matter No. 34 in the subject or reference line. Comments should be received by the Board no later than 5:00 PM EDT on September 30, 2011.

Board Contacts: Martin F. Baumann, Chief Auditor (202/207-9192, baumannm@pcaobus.org), Jennifer Rand, Deputy Chief Auditor (202/207-9206, randj@pcaobus.org), and Jessica Watts, Associate Chief Auditor (202/207-9376, wattsj@pcaobus.org).

* * * * * *

## I. Purpose

The Board is issuing this concept release to seek public comment on potential changes to the auditor's reporting model based on concerns of investors and other financial statement users. Auditors, as a result of the performance of required audit procedures, often have significant information regarding a company's financial statements and the audit of such financial statement, that is not today reported in the standard auditor's report to the financial statements users. This information might be useful to investors and other financial statement users and could lead to more efficient markets and improved allocations of capital.

The auditor's report is the primary means by which the auditor communicates to investors and other users of financial statements information regarding his or her audits of financial statements. This concept release seeks direction and comment for a possible standard-setting project that could result in either amendments to AU sec. 508, *Reports on Audited Financial Statements,* and Auditing Standard No. 1, *References in Auditors' Reports to the Standards of the Public Company Accounting Oversight Board*,[1/] or the development of a new auditing standard that would supersede or amend the Board's current standards on auditors' reports.

The objective of this concept release is to discuss several alternatives for changing the auditor's reporting model that could increase its transparency and relevance to financial statement users, while not compromising audit quality. To that end, these alternatives include (1) a supplement to the auditor's report in which the auditor would be required to provide additional information about the audit and the company's financial statements (an "Auditor's Discussion and Analysis"), (2) required and expanded use of emphasis paragraphs in the auditor's report, (3) auditor reporting on information outside the financial statements, and (4) clarification of certain language in the auditor's report. These alternatives are not mutually exclusive. A revised auditor's report could include one or a combination of these alternatives or elements of these alternatives. Additionally, there may be other alternatives to consider that this concept release does not present.

---

1/ Potential changes to the standard auditor's report might result in amendments to the report on internal control included in Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements.* In an integrated audit, information related to the audit of the company's financial statements discussed in this concept release could also include matters related to the audit of internal control over financial reporting.

Many of these alternatives are focused primarily on enhancing communication to investors through improving the content of the auditor's report rather than on changing the fundamental role of the auditor in performing an audit of financial statements in accordance with PCAOB standards as established and interpreted by the Board. However, depending on the nature and extent of additional information to be communicated by the auditor in the auditor's report, new auditing requirements and coordination with the Securities and Exchange Commission ("SEC") would likely be necessary. Further, certain alternatives might result in an increase in the scope of audit procedures beyond those currently required. An increase in the scope of audit procedures would require new auditing standards.

This concept release also describes the history of the auditor's report, as well as the results of outreach conducted by the staff of the Board's Office of the Chief Auditor ("staff") to investors, auditors, financial statement preparers, audit committee members, and others. The outreach was undertaken to obtain insight into possible changes that could be made to the auditor's reporting model. This concept release does not include an exhaustive discussion of all views regarding the auditor's reporting model. Rather, it presents the salient views obtained on possible changes to the auditor's report and other considerations as part of the staff's outreach and which inform this solicitation of comment on possible changes to the auditor's report.

In addition to inviting comments in response to a number of specific questions, the Board invites any interested person to provide comments on any issues related to topics discussed in this concept release or directed at improving the auditor's reporting model. The Board will hold a public roundtable in the third quarter of 2011 to discuss the alternatives addressed herein or other alternatives. Additional details about the roundtable will be announced at a later date.

## II. History and Outreach

For decades, the standard auditor's report has identified the financial statements that were audited, described the nature of the audit, and presented the auditor's opinion as to whether the financial statements present fairly, in all material respects, the financial position, results of operations, and cash flows of the company in conformity with the applicable financial reporting framework. The standard auditor's report has been commonly described as a pass/fail model because the auditor opines on whether the financial statements are fairly presented (pass) or not (fail).

This section of the concept release provides a brief history of the auditor's report and a summary of the outreach recently conducted by the staff.

## A. History

In the 1940s, a standardized form of the auditor's report was adopted to provide uniform report language that would make audit reports more readily comparable and make qualifications in audit reports easily recognizable. For more than half a century, many groups have considered changes to the standard auditor's report to enhance the auditor's overall communication to financial statement users. For example, in 1974, the Commission on Auditors' Responsibilities[2/] ("Cohen Commission"), and in 1985, the National Commission on Fraudulent Financial Reporting[3/] ("Treadway Commission"), reexamined both the auditor's responsibilities and the form of the auditor's report. The Cohen Commission noted that "evidence abounds that communication between the auditor and users of his work – especially through the auditor's standard report – is unsatisfactory." These commissions made many recommendations to change the auditor's report; however, the only change resulting from the recommendations was the addition of a paragraph explaining the scope of the audit.[4/] There have been two changes to the standard auditor's report since the 1980s: the adoption of Auditing Standard No. 1 that requires reference to the standards of the PCAOB, and the

---

2/ In response to congressional and public scrutiny of the accounting profession, the American Institute of Certified Public Accountants ("AICPA") established the Commission on Auditors' Responsibilities (known for its chairman as the "Cohen Commission") to "develop conclusions and recommendations regarding the appropriate responsibilities of independent auditors." The Cohen Commission was directed to "consider whether a gap may exist between what the public expects or needs and what auditors can and should reasonably expect to accomplish." AICPA, *Commission on Auditors' Responsibilities: Report, Conclusions, and Recommendations* (New York: 1978), p. xi.

3/ The Treadway Commission was established in June 1985 during a period of congressional and public scrutiny of the accounting profession after certain significant business failures. See SEC Speech: "The Treadway Commission Report: Two Years Later," by Joseph A. Grundfest and Max Berueffy (January 26, 1989). From October 1985 to September 1987, the Treadway Commission studied the financial reporting system in the United States. The Treadway Commission's mission "was to identify causal factors that can lead to fraudulent financial reporting and steps to reduce its incidence." *Report of the National Commission on Fraudulent Financial Reporting* (October 1987), p. 1 ("Treadway Commission Report").

4/ Marshall A. Geiger, *Setting the Standard for the New Auditor's Report: An Analysis of Attempts to Influence the Auditing Standards Board*, 1 (Greenwich, CT:JAI Press Inc., 1993), p. 38.

establishment of requirements for auditors to report on internal control over financial reporting as directed by Sections 103 and 404 of the Sarbanes-Oxley Act of 2002 (the "Act").[5/]

More recently, members of the Board's Standing Advisory Group ("SAG") and Investor Advisory Group ("IAG") suggested, and the U.S. Department of the Treasury Advisory Committee on the Auditing Profession ("ACAP") recommended, that the Board undertake a standard-setting initiative to consider improvements to the auditor's standard reporting model.[6/] Results of surveys conducted by the Chartered Financial Analysts Institute ("CFA") in 2008, 2010, and 2011, support these suggestions. In particular, the majority of survey respondents noted that the independent auditor's report needed to provide more specific information about how the auditor reaches his or her opinion on whether the company has fairly presented its financial statements in accordance with the required financial reporting standards.[7/]

Additionally, other standard-setters and regulators, such as the International Auditing and Assurance Standards Board ("IAASB"),[8/] the International Organization of Securities Commissions ("IOSCO"),[9/] the United Kingdom's Financial Reporting Council

("FRC"),[10/] and the European Commission have been working on similar projects to consider changes to the auditor's report.[11/]

The Board is evaluating the PCAOB's auditing standards for reporting on audited financial statements in response to investors' and other financial statement users' historical concerns, including recent concerns highlighted by the financial crisis related to preparing and auditing financial statements for complex global businesses, as well as the active international debate in this area. (See Appendix A for a more detailed discussion of the history of the auditor's reporting model; and see Appendix B for an overview of current auditor reporting requirements pursuant to PCAOB standards.)

## B. Overview of the Staff's Outreach

To obtain insight into the changes that investors and others are seeking to the auditor's report and how those changes could be incorporated into the auditor's report or the overall auditor's reporting model, the staff conducted outreach to investors, preparers, auditors, audit committee members, regulators and standard-setters, and representatives of academia from October 2010 through March 2011. The participants in the staff's outreach represented a diverse group of domestic and international organizations and companies, ranging in size from small to large entities. The investors included individuals representing money managers, asset management funds, pension funds, wealth management funds, and organizations that represented institutional investors; investor advocates; buy- and sell-side analysts from some of the largest investment firms; and analysts from the largest credit rating agencies. The dialogue among the outreach participants helped to inform the staff regarding potential changes in the auditor's report, and how those changes could be presented, as well as the benefits and challenges of making such changes. Additionally, the staff read and reviewed publicly available information related to the auditor's reporting model from U.S. and international sources, including academic research, surveys, and other publications, as well as auditors' reports from more than 30 other countries.

11/ European Commission, *Green Paper. Audit Policy: Lessons from the Crisis* (October 2010), available at: http://ec.europa.eu/internal_market/auditing/otherdocs/index_en.htm.

The staff reported its findings to the Board at an open meeting on March 22, 2011.[12/] The Board concluded from this outreach that changing the auditor's report could hold the key to the relevance of the auditor's reporting model. The findings from the outreach are summarized in the following two sections regarding the content and the form of the auditor's report and are discussed in more detail in Appendix C.

1. Content of the Auditor's Report

During the staff's outreach, many investors expressed their belief that the audit is a valuable process. The staff observed that there was consensus among investors that the auditor has significant insight into the company and that the auditor's report should provide additional information based on that insight to make it more relevant and useful. Investors varied in their views on the types of information, as well as the level of detail that should be included in the auditor's report. Investor perspectives often were influenced by their role in the capital markets (i.e., retail investors, institutional investors, issuers making decisions regarding potential acquisitions) and how they intended to use that information for making investment decisions.

During the staff's outreach, many investors indicated that the auditors are in a unique position to provide relevant and useful information, because of the auditors' extensive knowledge of the company and industry obtained through the audit process and the auditors' experiences with other companies in similar industries. Some investors indicated that one of the primary reasons that they are looking to the auditor for more information, rather than management or the audit committee, is that the auditor is an independent third party. The recent financial crisis was cited as an example of a situation in which expanded auditor reporting in advance of the crisis might have been helpful in assessing the quality of the financial statements, and providing early warning signals regarding potential issues by, for example, including a discussion of off-balance sheet contingencies or the sensitivity of loan loss estimates.

During the staff's outreach, some consistent themes emerged. Some investors indicated that if they had a better understanding about the audit and how the audit was conducted relative to a particular company, then they would have a better perspective regarding the risks of material misstatement in a company's financial statements.[13/]

[12/] PCAOB Board Meeting. March 22, 2011, available at: http://pcaobus.org/News/Events/Pages/03222011_OpenBoardMeeting.aspx.

[13/] Auditing Standard No. 8, *Audit Risk*, states that the "risk of material misstatement" refers to the risk that the financial statements are materially misstated and provides further discussion about the term "risk of material misstatement."

Additionally, some investors indicated that the auditor should provide information about the company's financial statements, such as the auditor's views regarding the quality of the company's financial statements. Because accounting frameworks provide for significant management judgments and estimates in the company's application of accounting policies and practices, these judgments and estimates could be susceptible to management bias. Since reasonable estimates might vary significantly, there could be a wide range of acceptable results within a company's applicable financial reporting framework. Further, this range of acceptability is not mentioned in the auditor's report and might not be fully reflected in the financial statements. Some investors believed that more relevant insight into the financial statements, through the eyes of the auditor, might better enable them to assess how changes in the economy might affect a company's future financial performance or condition.

Some participants in the staff's outreach recommended expanding the auditor's reporting model to provide assurance on information outside the financial statements, such as Management's Discussion and Analysis ("MD&A"), earnings releases, or non-GAAP information. The basis of this recommendation is that this type of financial information is often highly relevant to investment decisions, and that auditor association may increase the quality and reliability of such information. Finally, some participants in the staff's outreach suggested that certain language within the standard auditor's report should be further clarified or explained to improve the financial statement user's understanding of what an audit represents and the responsibilities of the auditor and management in the audit and financial reporting process.

Some preparers, auditors, and audit committee members also expressed concern regarding certain changes to the auditor's report. For example, some indicated that an auditor's discussion about matters related to the audit (e.g., significant risks and related audit procedures) might be taken out of context without the benefit of the related dialogue about these matters among management, auditors, and the audit committee.

Most preparers, auditors, and audit committee members indicated in the staff's outreach that management or the audit committee, rather than the auditor, should provide additional information about the company; although, there were some who expressed less concern about the auditor providing this type of information. Additionally, some expressed concern that if the auditor were required to communicate information about the company in the auditor's report, the communication among auditors, preparers, and audit committee members might suffer as a result. They pointed out that as part of the audit, auditors have regular and free-flowing dialogue with management and the audit committee. They also cautioned that if the auditor were to provide additional information, then the nature and candor of that dialogue could be affected, with adverse consequences for the audit. Some preparers and audit committee members also are concerned that auditor discussion about the company's financial statements may blur the lines regarding the roles of the auditor, preparer, and the audit committee as it relates to financial reporting.

Some preparers, auditors, and audit committee members also expressed a concern that auditor discussion about the financial statements could differ from the disclosures that management provides, and therefore might not convey a consistent communication to investors, which could result in confusion. These outreach participants pointed out that when an unqualified opinion is issued, all material matters related to an audit have been resolved; therefore, they stated that additional discussion in the auditor's report is unnecessary, or even potentially misleading.

2. Form of the Auditor's Report

In periodic filings with the SEC, companies are required to include an auditor's report with respect to the company's financial statements.[14/] Many investors indicated that the pass/fail model and standardized language of the auditor's report provides consistency, comparability, and clarity of auditor reporting. However, many of these investors indicated that the standard auditor's report is too "boilerplate," does not convey the significant judgments made by the auditor in forming the audit opinion, and limits the auditor's ability to convey to the investor the subtleties that underlie the opinion in his or her report on the company's financial statements. Accordingly, many of these investors supported a reporting format in which a standard auditor's report is retained, with certain language in the report clarified, but supplemented with discussion by the auditor about the audit and the company's financial statements.

Some investors indicated that the standard auditor's report does not provide the auditor with the necessary leverage to effect appropriate change in the company's financial statements. While the auditing standards allow for circumstances in which the auditor can provide emphasis of certain matters,[15/] explanatory language regarding certain matters,[16/] a qualification, or even a disclaimer of the opinion, these options, when used, are not effective in providing transparency into the financial reporting process. Therefore, when an auditor identifies and communicates to management a significant matter that is not necessarily material to the financial statements, and management does not adequately address that matter in the financial statements, the

---

[14/] Rule 2-02 of Regulation S-X, 17 CFR §210.2-02.

[15/] AU sec. 508.19.

[16/] AU sec. 508.11.

auditor does not have a practical alternative. Accordingly, as previously mentioned, while many investors supported retaining the pass/fail opinion, they recommended supplementing it with additional information about the audit and the company's financial statements to enable the auditor to add commentary on significant matters.

Some preparers, auditors, and audit committee members support retaining the current pass/fail model and also support clarification of certain language in the report. Some of these outreach participants also are supportive of including some additional information in the auditor's report about the audit or auditor reporting on MD&A or portions thereof, such as "Critical Accounting Estimates."

Questions

1. Many have suggested that the auditor's report, and in some cases, the auditor's role, should be expanded so that it is more relevant and useful to investors and other users of financial statements.

   a. Should the Board undertake a standard-setting initiative to consider improvements to the auditor's reporting model? Why or why not?

   b. In what ways, if any, could the standard auditor's report or other auditor reporting be improved to provide more relevant and useful information to investors and other users of financial statements?

   c. Should the Board consider expanding the auditor's role to provide assurance on matters in addition to the financial statements? If so, in what other areas of financial reporting should auditors provide assurance? If not, why not?

2. The standard auditor's report on the financial statements contains an opinion about whether the financial statements present fairly, in all material respects, the financial condition, results of operations, and cash flows in conformity with the applicable financial reporting framework. This type of approach to the opinion is sometimes referred to as a "pass/fail model."

   a. Should the auditor's report retain the pass/fail model? If so, why?

   b. If not, why not, and what changes are needed?

c. If the pass/fail model were retained, are there changes to the report or supplemental reporting that would be beneficial? If so, describe such changes or supplemental reporting.

3. Some preparers and audit committee members have indicated that additional information about the company's financial statements should be provided by them, not the auditor. Who is most appropriate (e.g., management, the audit committee, or the auditor) to provide additional information regarding the company's financial statements to financial statement users? Provide an explanation as to why.

4. Some changes to the standard auditor's report could result in the need for amendments to the report on internal control over financial reporting, as required by Auditing Standard No. 5. If amendments were made to the auditor's report on internal control over financial reporting, what should they be, and why are they necessary?

## III. <u>Potential Alternatives for Changes to the Auditor's Report</u>

Input from the staff's outreach reinforces the view that many investors are supportive of changing the auditor's reporting model. Investor demands for such change are expressed in terms of making the auditor's reporting model, and thus audits, more relevant to investors and other users of financial statements. Though the auditor's reporting model has been studied by many groups that have provided recommendations over time, they were not in a position to effect change as they did not have standard-setting authority. The Board has an opportunity to change the auditor's reporting model under its statutory mandate to protect the interests of investors in the preparation of informative, accurate and independent audit reports. Therefore, the Board is in a position to promote the transparency and continued relevance of the audit and the related auditor's reporting model, in collaboration with the SEC. The Board is soliciting the views of commenters on the concerns that have been expressed about the auditor's reporting model, potential alternatives for change to the auditor's report, the potential direction of a possible standard-setting project, and potential other considerations associated with changes to the auditor's report.

This concept release presents several alternatives and seeks specific comment on these or other alternatives that could provide investors with more transparency into the audit process and more insight into the company's financial statements or other information outside the financial statements. These alternatives are not intended to alter, in any way, the auditor's ultimate responsibility to obtain sufficient appropriate audit evidence to support the audit opinion. Nor are these alternatives intended to qualify or piecemeal the auditor's opinion or to shift the requirement to assess the risk of material misstatement of the financial statements from the auditor to investors or other users of financial statements.

The alternatives presented in this concept release are:

- Auditor's Discussion and Analysis,
- Required and expanded use of emphasis paragraphs,
- Auditor assurance on other information outside the financial statements, and
- Clarification of language in the standard auditor's report.

These alternatives are not mutually exclusive, nor do these alternatives include all the views expressed by the outreach participants.[17/] A revised auditor's report could include one or a combination of these alternatives, elements within the alternatives, or alternatives not currently presented in this concept release.

All of the alternatives presented would retain the pass/fail opinion of the standard auditor's report. Some of the alternatives presented in the concept release (e.g., Auditor's Discussion and Analysis, required and expanded use of emphasis paragraphs, and clarification of language in the standard auditor's report) are designed to improve communication of the auditor's current responsibilities related to a financial statement audit based on existing auditing standards. The alternative for auditor assurance on other information outside the financial statements would require an expansion of the auditor's current responsibilities, which would likely necessitate the development of a management reporting framework and additional auditing standards through collaboration with the SEC. Most of these alternatives would likely require the development of additional suitable and objective criteria for auditors to prepare consistent and comparable auditors' reports.

## A. Auditor's Discussion and Analysis

A revised auditor's reporting model could include a supplemental narrative report, which some have described as an Auditor's Discussion and Analysis ("AD&A"). An

---

17/ Appendix C provides a detailed discussion of the views of the outreach participants.

AD&A could provide investors and other financial statement users with a view of the audit and the financial statements "through the auditor's eyes."

The intent of an AD&A would be to provide the auditor with the ability to discuss in a narrative format his or her views regarding significant matters. The AD&A could include information about the audit, such as audit risk identified in the audit,[18/] audit procedures and results, and auditor independence. It also could include a discussion of the auditor's views regarding the company's financial statements, such as management's judgments and estimates, accounting policies and practices, and difficult or contentious issues, including "close calls." Additionally, an AD&A could provide the auditor with discretion to comment on those material matters that might be in technical compliance with the applicable financial reporting framework, but in the auditor's view, the disclosure of such matters could be enhanced to provide the investor with an improved understanding of the matters and their impact on the financial statements. An AD&A could also highlight those areas where the auditor believes management, in its preparation and presentation of the financial statements, could have applied different accounting or disclosures.

An AD&A, as contemplated herein, is not intended to provide separate assurance on individual balances, disclosures, transactions, or any other matters discussed. Rather, an AD&A is intended to facilitate an understanding of the auditor's opinion on the financial statements taken as a whole.

An AD&A could give the auditor greater leverage to effect change and enhance management disclosure in the financial statements, thus increasing transparency to investors. An AD&A could provide further context to an investor's understanding of a company's financial statements and management's related discussion and analysis, and provide the auditor with the ability to communicate to investors and other users of financial statements the auditor's significant judgments in forming the audit opinion. An

---

[18/] Auditing Standard No. 8, *Audit Risk,* describes audit risk as the risk that the auditor expresses an inappropriate audit opinion when the financial statements are materially misstated. Audit risk is a function of the risk of material misstatement and detection risk. Some investors have defined risk more broadly to include not only audit risk, but also business risks, operating risks, or strategic risks. The discussion of risk addressed in this alternative is limited to audit risk that the auditor is required to identify under current auditing standards (see detailed discussion in Appendix C). Discussion of risk other than audit risk would require an expansion of the auditor's current responsibilities. This would be a major undertaking requiring additional education, training, standard-setting, and collaboration with the SEC.

AD&A also could provide the auditor with an adaptable report that he or she can tailor to a company's specific risks, facts, and circumstances.

Because an AD&A provides the auditor's perspectives about the audit and the company's financial statements, the perspectives in the AD&A on certain matters could differ from those that management has provided in the MD&A. As a result, additional time might be incurred by management, the audit committee, and auditors to seek to resolve such differences before any views are reflected in the AD&A or MD&A. If the AD&A and the MD&A expressed different views on certain matters, the financial statement user might need to reconcile these differing views. Further, there is a risk that the language in an AD&A might become boilerplate in nature over time.

An AD&A would likely be among the most expansive form of reporting of the alternatives presented since it would provide auditor commentary on significant matters to the users of financial statements. An AD&A also could require the auditor to communicate some of the same information that the auditor communicates to the audit committee. Many of the matters that could be discussed in an AD&A are part of the audit performed pursuant to current auditing standards. However, the PCAOB, in collaboration with the SEC, would likely need to develop new auditing standards to provide standard, objective criteria to the auditor regarding the appropriate content and level of detail to be reported in an AD&A. For example, reporting on difficult or contentious issues, including "close calls" would require additional direction to auditors in identifying and reporting on such matters.

The Board is seeking comment on an AD&A as a potential supplemental report to the standard auditor's report. The following illustrates a potential framework for an AD&A report, including the types of potential criteria that might assist the auditor in preparing an AD&A. This illustrative report does not include certain matters raised in the staff's outreach, such as materiality levels, engagement statistics, and information communicated to the audit committee, although such matters, as well as other matters, could be included in an AD&A.[19/]

---

[19/] See Appendix C for a detailed discussion of the staff's outreach regarding materiality levels, engagement statistics and information communicated to the audit committee.

**Illustration of Possible Revised Standard Auditor's Report and Auditor's Discussion and Analysis**

Report of Independent Registered Public Accounting Firm

[Standard Introductory Paragraph]

[Standard Scope Paragraph]

[Standard Opinion Paragraph]

Our audits were conducted for the purpose of forming an opinion on the financial statements, including related disclosures, taken as a whole. The accompanying Auditor's Discussion and Analysis provides additional analysis.

[Signature]
[City and State or Country]
[Date]

**Auditor's Discussion and Analysis**

This discussion should be read in conjunction with the accompanying auditor's report on the financial statements. We considered the matters discussed below in rendering our opinion on the financial statements taken as a whole. This discussion does not represent separate assurance on individual account balances, disclosures, transactions, or any other matters discussed below. It is not a substitute for the user's full reading and review of such financial statements, including related disclosures, and the auditor's report.

[Auditor discussion concerning the audit or the company's financial statements could be included under headings or in sections of an AD&A such as those set out below. Following each heading is the concept for a possible instruction for drafting the discussion. The potential drafting instructions are intended only to illustrate the possible content of each section; if the Board pursues an AD&A approach, complete requirements would be proposed for public comment.]

**Information about the Audit**

**Audit Risk**

[Provide a discussion of significant risks identified by the auditor.[20] This discussion should include the factors the auditor evaluated in determining which risks are significant (see paragraphs 70-71 of Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*). Describe why the risks are considered significant to the company's financial statements.]

**Audit Procedures and Results**

[Provide a discussion of the audit procedures responsive to the significant risks discussed in the audit risk section above, why the procedures are responsive to such significant risks, and the results of those procedures (see Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement)*.]

**Auditor Independence**

[Provide a discussion of matters that were reported and discussed with the audit committee concerning independence under PCAOB Rule 3526, *Communication With Audit Committees Concerning Independence,* and the related resolution of those matters. Provide affirmation of auditor independence.]

**Information about the Company's Financial Statements**

**Management's Judgments and Estimates**

[Provide a discussion of the critical accounting estimates that were communicated to the audit committee and assumptions underlying the critical accounting estimates (see proposed Auditing Standard,

---

[20] Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*, describes significant risk as a risk of material misstatement that requires special audit consideration.

*Communications with Audit Committees*[21/]). The discussion also should address how the critical accounting estimates are susceptible to change.]

**Accounting Policies and Practices**

[Provide a discussion of the company's critical accounting policies and practices, including significant unusual transactions that were communicated to the audit committee. This discussion should include the reasons the auditor considers certain policies and practices to be critical, including those that management does not consider critical. Also, provide a discussion of alternative accounting treatments permissible under the applicable financial reporting framework for policies and practices related to material items that have been discussed with management, including the ramifications of the use of such alternative disclosures and treatments, and the treatment preferred by the auditor.[22/]]

**Difficult or Contentious Issues, Including "Close Calls"**

[Provide a discussion of the difficult or contentious issues or "close calls" that arose during the audit and the final resolution of the issue. These issues might include, among other things, the following –

- Those accounting matters that required significant deliberation by the auditor and management before being deemed acceptable within the applicable financial reporting framework.

- Those matters related to internal control over financial reporting that required significant deliberation by the auditor and management.

- A financial statement issue that had a potential material impact to the financial statements and was corrected prior to the end of the period.]

---

[21/] See proposed auditing standard related to communications with audit committees at: http://pcaobus.org/Rules/Rulemaking/Pages/Docket030.aspx.

[22/] See Rule 2-07(a)(1) of Regulation S-X, 17 CFR §210.2-07(a)(1), which requires the auditor to report the critical accounting policies and practices and alternative accounting treatments to the audit committee.

**Material Matters**

[Describe those material matters that are in technical compliance with the applicable financial reporting framework, but in the auditor's view, the disclosure of such matters could be enhanced to provide the investor with an improved understanding of the matters and their effect on the financial statements, or those areas where the auditor believes management, in its preparation and presentation of the financial statements, could have applied different accounting or disclosures.]

Questions

5. Should the Board consider an AD&A as an alternative for providing additional information in the auditor's report?

   a. If you support an AD&A as an alternative, provide an explanation as to why.

   b. Do you think an AD&A should comment on the audit, the company's financial statements or both? Provide an explanation as to why. Should the AD&A comment about any other information?

   c. Which types of information in an AD&A would be most relevant and useful in making investment decisions? How would such information be used?

   d. If you do not support an AD&A as an alternative, explain why.

   e. Are there alternatives other than an AD&A where the auditor could comment on the audit, the company's financial statements, or both? What are they?

6. What types of information should an AD&A include about the audit? What is the appropriate content and level of detail regarding these matters presented in an AD&A (i.e., audit risk, audit procedures and results, and auditor independence)?

7. What types of information should an AD&A include about the auditor's views on the company's financial statements based on the audit? What is the appropriate content and level of detail regarding these matters presented in an AD&A (i.e., management's judgments and estimates,

accounting policies and practices, and difficult or contentious issues, including "close calls")?

8. Should a standard format be required for an AD&A? Why or why not?

9. Some investors suggested that, in addition to audit risk, an AD&A should include a discussion of other risks, such as business risks, strategic risks, or operational risks. Discussion of risks other than audit risk would require an expansion of the auditor's current responsibilities. What are the potential benefits and shortcomings of including such risks in an AD&A?

10. How can boilerplate language be avoided in an AD&A while providing consistency among such reports?

11. What are the potential benefits and shortcomings of implementing an AD&A?

12. What are your views regarding the potential for an AD&A to present inconsistent or competing information between the auditor and management? What effect will this have on management's financial statement presentation?

## B. Required and Expanded Use of Emphasis Paragraphs

Another alternative to enhance the auditor's report could be to require and expand the use of emphasis paragraphs in all audit reports. Emphasis paragraphs are not currently required under existing PCAOB standards but may be added, solely at the auditor's discretion, to emphasize a matter regarding the financial statements.[23/] Examples of emphasis paragraphs given in the current auditing standards include –

- That the entity is a component of a larger business enterprise.
- That the entity has had significant transactions with related parties.
- Unusually important subsequent events.

---

[23/] AU sec. 508.19. Additionally, AU sec. 508.11 describes certain circumstances that, while not affecting the auditor's unqualified opinion, may require that the auditor add an explanatory paragraph to the standard auditor's report.

- Accounting matters, other than those involving a change or changes in accounting principles, affecting the comparability of the financial statements with those of the preceding period.[24/]

This alternative would mandate the use of emphasis paragraphs in all audit reports and further expand the emphasis paragraph to highlight the most significant matters in the financial statements and to identify where these matters are disclosed in the financial statements. Emphasis paragraphs could be required in areas of critical importance to the financial statements, including significant management judgments and estimates, areas with significant measurement uncertainty, and other areas that the auditor determines are important for a better understanding of the financial statement presentation. With respect to each matter of emphasis under this alternative, the auditor also could be required to comment on key audit procedures performed pertaining to the identified matters.

This alternative is somewhat analogous to the French auditor's report. French law requires the auditor's report to contain a "justification of the auditor's assessments."[25/] The auditor is required, in an explanatory paragraph, to explain the procedures the auditor performed with respect to relevant areas of the audit, such as accounting policies, accounting estimates, and overall presentation of the financial statements.

Required emphasis paragraphs could be beneficial to financial statement users through the auditor's identification of significant matters and referencing where those matters are disclosed in the financial statements. An auditor's emphasis of certain aspects of the financial statements in the auditor's report also could potentially increase the quality of management's disclosures in the financial statements because of specific reference to such disclosures in the auditor's report. However, the content might not provide investors with the full extent of detail that some investors indicated that auditors should provide in the auditor's report, and the language in required emphasis paragraphs might become boilerplate in nature over time.[26/]

---

[24/] Ibid.

[25/] On August 1, 2003, article L823-9 of the French Code of Commerce Financial security laws required that the statutory auditor include in the auditor's report a "justification of the auditor's assessments."

[26/] The IAASB's Consultation Paper, p.19, stated that the disclosures in the justification of the auditor's assessments paragraphs "may become standardized (or boilerplate) over time in relation to an entity, and the way they are presented in the auditor‘s report may detract from the readability of the report."

This alternative primarily communicates those matters that the auditor is required to address as part of an audit pursuant to current auditing standards. However, the Board may need to develop additional auditing standards to direct the auditor in determining which matters are of the most importance to emphasize in an auditor's report.

The following illustrates a potential auditor's report with required emphasis paragraphs, including the types of potential criteria that might assist the auditor in preparing the report.

**Illustration of Possible Revised Standard Auditor's Report with Required Emphasis Paragraphs**

Report of Independent Registered Public Accounting Firm

[Standard Introductory Paragraph]

[Standard Scope Paragraph]

[Standard Opinion Paragraph]

<u>Required Emphasis Paragraph[s]</u>

[Emphasize those matters that are important in understanding the financial statement presentation, including significant management judgments and estimates and areas with significant measurement uncertainty. Discuss the audit procedures performed on these significant matters. This discussion should not include matters that the company has not disclosed in the financial statements and should make reference to the notes in the financial statements that disclose each matter.]

[Signature]
[City and State or Country]
[Date]

Questions

13. Would the types of matters described in the illustrative emphasis paragraphs be relevant and useful in making investment decisions? If so, how would they be used?

14. Should the Board consider a requirement to include areas of emphasis in each audit report, together with related key audit procedures?

    a. If you support required and expanded emphasis paragraphs as an alternative, provide an explanation as to why.

    b. If you do not support required and expanded emphasis paragraphs as an alternative, provide an explanation as to why.

15. What specific information should required and expanded emphasis paragraphs include regarding the audit or the company's financial statements? What other matters should be required to be included in emphasis paragraphs?

16. What is the appropriate content and level of detail regarding the matters presented in required emphasis paragraphs?

17. How can boilerplate language be avoided in required emphasis paragraphs while providing consistency among such audit reports?

18. What are the potential benefits and shortcomings of implementing required and expanded emphasis paragraphs?

## C. Auditor Assurance on Other Information Outside the Financial Statements

Another alternative to enhance the auditor's reporting model could be to require auditors to provide assurance on information outside the financial statements, such as MD&A or other information (for example, non-GAAP information or earnings releases). An auditor providing assurance on information outside of the financial statements could improve the quality, completeness, and reliability of such information, providing investors and other users of financial statements with a higher level of confidence in information about the company that is provided by management. Further, many investors and other financial statement users often comment on the importance to their investing decisions of the information outside the financial statements. Their view is that investors use and rely on MD&A and other financial information (e.g., non-GAAP information and earnings releases) for their investing decisions, in addition to historical audited financial statements. Therefore, this additional reporting could make an audit and auditor reporting more relevant to investors and other users of financial statements.

Providing assurance on information outside the financial statements would increase the scope of the auditor's responsibilities, require the development of new auditing standards, and might result in projects separate from the auditor's reporting model project. Additionally, to provide a basis for auditor assurance on information outside the financial statements, a reporting framework would likely need to be developed for management's presentation of such information in collaboration with the SEC. The SEC maintains disclosure and reporting requirements for MD&A, which may need to be changed, including filing requirements to include the auditor's reporting on MD&A.[27/] Also, if auditors were required to provide assurance on non-GAAP information and non-GAAP information, the SEC would likely need to develop new management reporting requirements.

Currently, there is no requirement for the auditor to provide assurance on earnings releases, non-GAAP information, or MD&A. Although the company has the ability to retain the auditor to provide some level of assurance under PCAOB standards,[28/] the auditor is rarely retained to provide any assurance on such information. Current auditing standards describe the auditor's responsibilities regarding other information outside the financial statements in documents containing audited financial statements (e.g., MD&A). These responsibilities include reading and considering whether such information or the manner of its presentation is materially inconsistent with the financial statements or represents a material misstatement of fact.[29/]

The PCAOB has an attest standard which provides requirements for the auditor concerning the performance of an attest engagement with respect to MD&A, if the auditor is engaged to attest on MD&A.[30/] In an attest engagement under PCAOB

---

27/ In the SEC's 2002 proposal regarding critical accounting estimates, the SEC specifically requested comment on auditor involvement in MD&A. See *Disclosure in Management's Discussion and Analysis about the Application of Critical Accounting Policies,* Securities Act Release No. 8098 (May 10, 2002).

28/ See AT sec. 201, *Agreed-Upon Procedures Engagements* and AT sec. 701, *Management's Discussion and Analysis.*

29/ Paragraph .04 of AU sec. 550, *Other Information in Documents Containing Audited Financial Statements*.

30/ AT sec. 701.

standards, the auditor performs procedures to express an opinion on the MD&A presentation taken as a whole by reporting whether the –

- Presentation includes, in all material respects, the required elements of the rules and regulations adopted by the SEC,
- Historical financial amounts have been accurately derived, in all material respects, from the entity's financial statements, and
- Underlying information, determinations, estimates, and assumptions of the entity provide a reasonable basis for the disclosures contained therein.[31/]

The additional reporting by the auditor on earnings releases, non-GAAP information, the entire MD&A, or portions thereof, could be based on certain aspects of the current attest standard and report, which is illustrated below, or other attest standards. However, the current attest standard and this illustration are not intended to represent the only alternative for reporting on MD&A or portions thereof, earnings releases or non-GAAP information.

**Illustration of Attachment to Possible Revised Standard Auditor's Report − Standard Examination Report on Management's Discussion and Analysis ("MD&A")**[32/]

AT sec. 701, *Management's Discussion and Analysis,* establishes requirements concerning the performance of an attest engagement with respect to MD&A prepared pursuant to the rules and regulations adopted by the Securities and Exchange Commission, which are presented in annual reports to shareholders and in other documents.[33/]

Independent Accountant's Report

[Introductory paragraph]

We have examined XYZ Company's Management's Discussion and Analysis taken as a whole, included [incorporated by reference] in the

---

31/ AT sec. 701.05.

32/ AT sec. 701.114.

33/ AT sec. 701.01.

Company's [insert description of registration statement or document]. Management is responsible for the preparation of the Company's Management's Discussion and Analysis pursuant to the rules and regulations adopted by the Securities and Exchange Commission. Our responsibility is to express an opinion on the presentation based on our examination. We have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the financial statements of XYZ Company as of December 31, 20X5 and 20X4, and for each of the years in the three-year period ended December 31, 20X5, and in our report dated [Month] XX, 20X6, we expressed an unqualified opinion on those financial statements.

[Scope paragraph]

Our examination of Management's Discussion and Analysis was conducted in accordance with attestation standards established by the Public Company Accounting Oversight Board (United States) and, accordingly, included examining, on a test basis, evidence supporting the historical amounts and disclosures in the presentation. An examination also includes assessing the significant determinations made by management as to the relevancy of information to be included and the estimates and assumptions that affect reported information. We believe that our examination provides a reasonable basis for our opinion.

[Explanatory paragraph]

The preparation of Management's Discussion and Analysis requires management to interpret the criteria, make determinations as to the relevancy of information to be included, and make estimates and assumptions that affect reported information. Management's Discussion and Analysis includes information regarding the estimated future impact of transactions and events that have occurred or are expected to occur, expected sources of liquidity and capital resources, operating trends, commitments, and uncertainties. Actual results in the future may differ materially from management's present assessment of this information because events and circumstances frequently do not occur as expected.

[Opinion paragraph]

In our opinion, the Company's presentation of Management's Discussion and Analysis includes, in all material respects, the required elements of the rules and regulations adopted by the Securities and Exchange

Commission; the historical financial amounts included therein have been accurately derived, in all material respects, from the Company's financial statements; and the underlying information, determinations, estimates, and assumptions of the Company provide a reasonable basis for the disclosures contained therein.

Questions

19. Should the Board consider auditor assurance on other information outside the financial statements as an alternative for enhancing the auditor's reporting model?

    a. If you support auditor assurance on other information outside the financial statements as an alternative, provide an explanation as to why.

    b. On what information should the auditor provide assurance (e.g., MD&A, earnings releases, non-GAAP information, or other matters)? Provide an explanation as to why.

    c. What level of assurance would be most appropriate for the auditor to provide on information outside the financial statements?

    d. If the auditor were to provide assurance on a portion or portions of the MD&A, what portion or portions would be most appropriate and why?

    e. Would auditor reporting on a portion or portions of the MD&A affect the nature of MD&A disclosures? If so, how?

    f. Are the requirements in the Board's attestation standard, AT sec. 701, sufficient to provide the appropriate level of auditor assurance on other information outside the financial statements? If not, what other requirements should be considered?

    g. If you do not support auditor assurance on other information outside the financial statements, provide an explanation as to why.

20. What are the potential benefits and shortcomings of implementing auditor assurance on other information outside the financial statements?

## D. Clarification of the Standard Auditor's Report

Another potential enhancement of the auditor's reporting model could involve clarifying language in the existing standard auditor's report. While this alternative would not significantly expand the content of the auditor's report, it could provide additional explanation about what an audit represents and the related auditor responsibilities. Possible language that could be clarified in the auditor's report includes –

- *Reasonable Assurance* – The standard auditor's report explicitly asserts that the audit was conducted in accordance with auditing standards and states that "those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement." The auditing standards describe reasonable assurance as being a "high level of assurance, but not absolute assurance." Such language could be added to the auditor's report or reasonable assurance could be further explained.

- *Auditor's Responsibility for Fraud* – The standard auditor's report does not mention "fraud" and is silent about the auditor's responsibility to detect fraud. The auditing standards require the auditor to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud.[34/] Such language could be added to the auditor's report or the auditor's responsibility could be further explained.

- *Auditor's Responsibility for Financial Statement Disclosures* – The auditor's report identifies the balance sheets, related statements of operations, stockholders' equity and cash flows as the financial statements. As it relates to financial statements under Regulation S-X, the SEC's rules provide that "financial statements" include all notes to the financial statements and all related schedules.[35/] The auditing standards require auditors to perform procedures to test the financial statement disclosures

---

[34/] AU sec. 230, *Due Professional Care in the Performance of Work,* and AU sec. 316, *Consideration of Fraud in a Financial Statement Audit.*

[35/] Rule 1-01(b) of Regulation S-X, 17 CFR §210.1-01.

and to evaluate whether the financial statements contain the information essential for fair presentation of the financial statements in conformity with the applicable financial reporting framework.[36/] Auditing standards also require auditors to perform procedures to assess the risk of omitted, incomplete, or inaccurate disclosures, whether intentional or unintentional;[37/] to identify and test significant disclosures;[38/] and, in integrated audits, to test controls over significant disclosures.[39/] The auditor's report could be revised to provide clarification regarding the auditor's responsibility for financial statement disclosures.

- *Management's Responsibility for the Preparation of the Financial Statements* – The auditor's report includes a statement that the financial statements are the responsibility of the company's management and that the auditor's responsibility is to express an opinion on the financial statements based on his or her audit.[40/] The Act requires corporate officers to certify in periodic filings with the SEC that "based on such officer's knowledge, the financial statements, and other financial information included in the report, fairly present in all material respects the financial condition and results of operations of the issuer, as of, and for, the periods presented in the report."[41/] The auditor's report could be further clarified to state that management prepares the financial statements and has responsibility for the fair presentation of the financial statements.

- *Auditor's Responsibility for Information Outside the Financial Statements* – As described in the section above, the auditor has a responsibility to read

---

[36/] Paragraphs 30-31 of Auditing Standard No. 14, *Evaluating Audit Results*.

[37/] See, for example, paragraphs 49, 52, and 67 of Auditing Standard No. 12.

[38/] See, for example, paragraphs 59-64 of Auditing Standard No. 12 and paragraph 9 and footnote 6 of Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*. A disclosure is a significant disclosure if there is a reasonable possibility that the disclosure could contain a misstatement that, individually or when aggregated with others, has a material effect on the financial statements.

[39/] Paragraph 26 of Auditing Standard No. 5.

[40/] AU sec. 508.08c.

[41/] Section 302(a)(3) of the Act.

the other information in documents containing audited financial statements and consider whether such information, or the manner of its presentation, is materially inconsistent with the financial statements or represents a material misstatement of fact.[42/] Such information might be financial or non-financial information and includes the Chairman's or CEO's letter to shareholders, risk disclosures, MD&A, and the other portions of documents containing audited financial statements. The auditor's report could be clarified to describe the auditor's responsibility with respect to such other information.

- *Auditor Independence* – The title of the standard auditor's report is "Report of Independent Registered Public Accounting Firm." Aside from the title, the auditor provides no further information regarding the auditor's independence or otherwise provides assurance that the auditor has complied with the applicable independence requirements of the PCAOB and SEC. The auditor's report could be clarified to include a statement in the auditor's report, in addition to the title, that the auditor has a responsibility to be independent of the company and has complied with applicable independence requirements of the PCAOB and SEC.

Questions

21. The concept release presents suggestions on how to clarify the auditor's report in the following areas:

    - Reasonable assurance
    - Auditor's responsibility for fraud
    - Auditor's responsibility for financial statement disclosures
    - Management's responsibility for the preparation of the financial statements
    - Auditor's responsibility for information outside the financial statements
    - Auditor independence

---

42/ AU sec. 550.04 - .06.

a. Do you believe some or all of these clarifications are appropriate? If so, explain which of these clarifications is appropriate? How should the auditor's report be clarified?

b. Would these potential clarifications serve to enhance the auditor's report and help readers understand the auditor's report and the auditor's responsibilities? Provide an explanation as to why or why not.

c. What other clarifications or improvements to the auditor's reporting model can be made to better communicate the nature of an audit and the auditor's responsibilities?

d. What are the implications to the scope of the audit, or the auditor's responsibilities, resulting from the foregoing clarifications?

22. What are the potential benefits and shortcomings of providing clarifications of the language in the standard auditor's report?

<u>Questions Related to all Alternatives</u>

23. This concept release presents several alternatives intended to improve auditor communication to the users of financial statements through the auditor's reporting model. Which alternative is most appropriate and why?

24. Would a combination of the alternatives, or certain elements of the alternatives, be more effective in improving auditor communication than any one of the alternatives alone? What are those combinations of alternatives or elements?

25. What alternatives not mentioned in this concept release should the Board consider?

26. Each of the alternatives presented might require the development of an auditor reporting framework and criteria. What recommendations should the Board consider in developing such auditor reporting framework and related criteria for each of the alternatives?

27. Would financial statement users perceive any of these alternatives as providing a qualified or piecemeal opinion? If so, what steps could the Board take to mitigate the risk of this perception?

28. Do any of the alternatives better convey to the users of the financial statements the auditor's role in the performance of an audit? Why or why not? Are there other recommendations that could better convey this role?

29. What effect would the various alternatives have on audit quality? What is the basis for your view?

30. Should changes to the auditor's reporting model considered by the Board apply equally to all audit reports filed with the SEC, including those filed in connection with the financial statements of public companies, investment companies, investment advisers, brokers and dealers, and others? What would be the effects of applying the alternatives discussed in the concept release to the audit reports for such entities? If audit reports related to certain entities should be excluded from one or more of the alternatives, please explain the basis for such an exclusion.

## IV. <u>Considerations Related to Changing the Auditor's Report</u>

During the staff's outreach, various participants suggested that there may be practical challenges and unintended consequences that would result from additional auditor reporting. These challenges and consequences are discussed throughout this concept release and described further below. The Board is interested in comment on these and other issues in connection with its deliberations on potential changes to the auditor's report.

### A. Effects on Audit Effort

Some outreach participants expressed concern regarding the effect of changing the auditor's report on the overall timing and extent of the audit effort. Since many of the alternatives presented in this concept release focus on auditor reporting and do not require additional audit procedures by the auditor in forming the opinion on the financial statements, some expressed a view that the auditor's incremental efforts and cost to report such information should be minimal. However, a movement away from using standardized language in the auditor's report could also require additional audit effort, such as the auditor's time and effort in preparing and reviewing the report, which could result in an increase in cost. If auditors were required to prepare and issue a non-standardized report, each engagement might be required to have a centralized quality control review of all such reports for appropriateness and consistency among the firm's various audit clients. Additionally, audit firms might need to develop training for individual auditors on how to prepare non-standardized reports, particularly since auditors may not have experience writing narrative reports for public use.

Including additional information in an auditor's report could necessitate extensive discussion and potential debate among management, the auditor, and the audit committee regarding the nature and extent of the information. This discussion, combined with drafting narrative-type auditor's reports and enhanced quality control procedures, could increase the time to complete the audit and issue an opinion, and present challenges in terms of the preparer's ability to meet public reporting deadlines.

Some of the alternatives presented in this concept release also could involve an increase in the scope of the auditor's responsibilities, thereby increasing audit requirements and procedures. For instance, if auditors were required to attest on MD&A, or portions thereof, auditors would need to perform additional work, requiring greater time and cost.

## B. Effects on the Auditor's Relationships

Some of the outreach participants expressed a concern that discussing potentially sensitive matters in the auditor's report could impair transparency and openness in discussions among auditors, management, and the audit committee. They are of the view that this, in turn, could create more tension in the overall relationship and could stifle communications. For example, comments or presentations made in private, such as in an audit committee executive session or an audit committee communication, could be tempered if the speakers or recipients have concerns that such comments or presentations could eventually become public. As another example, some indicated that an auditor providing information that conflicts with management-prepared information may result in additional stress on the overall relationships, which could lead to other unintended consequences. Management and the audit committee also might be compelled to change the financial statements, in order to eliminate differences between the company's disclosures and the auditor's discussion in the audit report.

## C. Effects on Audit Committee Governance

Some outreach participants expressed concerns that if the auditor were to provide information directly to investors regarding the company's financial statements, then this could undermine the governance role of the audit committee, since the audit committee's role is to provide oversight of the financial reporting process on behalf of investors. Some questioned the audit committee's relevance in the financial reporting process if auditors were to provide the same information to investors as is provided to audit committees.

## D. Liability Considerations

Some outreach participants expressed concern that changes to the auditor's reporting model could result in increased liability for auditors and issuers. These participants noted that in a new model auditors might provide additional information about the audit or the company's financial statements, make additional public statements, or examine or report on more or different types of information. These outreach participants also were concerned that auditor reporting regarding information about the company's financial statements or about the audit could create confusion about those financial statements or about the meaning of an auditor's unqualified opinion, resulting in negative market reaction that could, in turn, lead to litigation against the issuer or auditor.

Liability may be imposed on auditors, issuers, and other securities market participants under a number of different legal theories, depending on the specific facts and circumstances of a particular case, including pursuant to Section 11 of the Securities Act of 1933, Section 10(b) of the Securities Exchange Act of 1934, as well as various state law causes of action. This concept release is intended to generate a broad-based discussion of ways to make the audit report more relevant to investors. At this stage of the process, the Board is interested in views on how it might do so and has reached no conclusions about whether to propose any particular approach.

## E. Confidentiality

Some outreach participants encouraged the Board, in considering changes to the auditor's report, to consider maintaining the confidentiality of company information if the auditor is required to discuss additional information about the audit or the preparation of the company's financial statements. They stated that there is a possibility that management and others may be concerned about auditors discussing information about the company in the auditor's report that might be deemed proprietary or highly sensitive to the company's competitive industry position.

<u>Questions</u>

31. This concept release describes certain considerations related to changing the auditor's report, such as effects on audit effort, effects on the auditor's relationships, effects on audit committee governance, liability considerations, and confidentiality.

a. Are any of these considerations more important than others? If so, which ones and why?

b. If changes to the auditor's reporting model increased cost, do you believe the benefits of such changes justify the potential cost? Why or why not?

c. Are there any other considerations related to changing the auditor's report that this concept release has not addressed? If so, what are these considerations?

d. What requirements and other measures could the PCAOB or others put into place to address the potential effects of these considerations?

32. The concept release discusses the potential effects that providing additional information in the auditor's report could have on relationships among the auditor, management, and the audit committee. If the auditor were to include in the auditor's report information regarding the company's financial statements, what potential effects could that have on the interaction among the auditor, management, and the audit committee?

## V. Opportunity for Public Comment

The Board is interested in the views of commenters on the potential direction of a proposed standard-setting project and whether the Board should consider any other approaches. While this concept release includes a number of specific questions for which the Board would like to obtain feedback, the Board welcomes all comments related to enhancing the auditor's reporting model.

The Board will seek comment on this concept release for a 101-day period. Interested persons are encouraged to submit their views to the Board. Written comments should be sent to Office of the Secretary, PCAOB, 1666 K Street, N.W., Washington, D.C. 20006-2803. Comments also may be submitted by e-mail to comments@pcaobus.org or through the Board's Web site at www.pcaobus.org. All comments should refer to PCAOB Rulemaking Docket Matter No. 34 in the subject or reference line and should be received by the Board no later than 5:00 PM EDT on September 30, 2011.

On the 21st day of June, in the year 2011, the foregoing was, in accordance with the bylaws of the Public Company Accounting Oversight Board,

ADOPTED BY THE BOARD.

/s/ J. Gordon Seymour

**CONCEPT RELEASE**

**Appendix A – History**

There has been a longstanding discussion and debate among users of financial statements regarding the form and content of the auditor's report dating back to the early 1900s, when there was an initial attempt to define accounting and auditing practices in the United States.[1/] In the early 1900s, no authoritative accounting or auditing standards existed, and auditors wrote narrative audit reports (free-form) for every company.[2/] These narrative audit reports often described the audit procedures performed during the audit.[3/] By the early 1920s, the narrative auditor's report was reduced to one paragraph in length and was referred to as an audit of the "accounts and records" whereby the independent auditor would "certify" the "balance sheet" as being "correct."[4/]

By the early 1930s "the term 'certify' began to disappear from reports in an attempt to clarify that the auditor's report was an opinion and not a guarantee."[5/] The auditor's report of 1934 was "the first report to have *required* as opposed to *suggested* report wording."[6/] A Securities and Exchange Commission ("SEC") investigation of

[6/] Ibid., p. 17. According to a special committee of the American Institute of Accountants ("AIA," now known as the American Institute of Certified Public Accountants ("AICPA")), the accounting profession adopted a standard audit report to accomplish two objectives: (1) to institute uniform report language across firms, thus making reports more readily comparable and consequently reducing deficient report quality and misunderstandings due to ambiguous or vague wordings and (2) to make

McKesson & Robbins resulted in the 1941 issuance of *Accounting Series Release No. 21*.[7/] This release amended Regulation S-X to require changes in the auditor's report to "state whether the audit was made in accordance with generally accepted auditing standards [("GAAS")] applicable in the circumstances."[8/] The AIA formally adopted the GAAS standards in 1948, which resulted in several revisions to the auditor's report.[9/]

In 1979, based on recommendations from the Commission on Auditor's Responsibilities ("Cohen Commission"),[10/] the AICPA's Auditing Standards Board ("ASB") analyzed the standard auditor's report and concluded that "a substantial departure from the existing report, as suggested by [the Cohen Commission] was not needed."[11/] The Cohen Commission had specifically recommended expanding the

9/ D.R. Carmichael and A.J. Winters, "The evolution of audit reporting," pp. 20-21. For example, "[r]eference to review of internal control, lack of 'making a detailed audit of transactions,' and 'other supporting evidence' were all deleted in the new report."

10/ In response to congressional and public scrutiny of the accounting profession, the American Institute of Certified Public Accountants ("AICPA") established the Commission on Auditors' Responsibilities (known for its chairman as the "Cohen Commission") to "develop conclusions and recommendations regarding the appropriate responsibilities of independent auditors." The Cohen Commission was directed to "consider whether a gap may exist between what the public expects or needs and what auditors can and should reasonably expect to accomplish." AICPA, *Commission on Auditors' Responsibilities: Report, Conclusions, and Recommendations* (New York: 1978), p. xi.

11/ Geiger, *The New Auditor's Report*.

auditor's report to include a discussion about four distinct areas: (1) financial statements, (2) other financial information (unaudited), (3) internal control, and (4) other matters (such as the company's policy statement on employee conduct and meetings with the audit committee). The Cohen Commission also recommended the auditor describe those areas using a series of standardized alternative phrases or paragraphs.

As a result of congressional hearings leading up to, and recommendations from, the National Commission on Fraudulent Financial Reporting ("Treadway Commission"), a new paragraph, now commonly referred to as the "scope paragraph" was added to the auditor's report in the 1980s.[12/] The scope paragraph states the respective responsibilities of management and the independent auditor, describes the work performed by the auditor, and indicates that sufficient evidence is gathered to provide a reasonable basis for the auditor's opinion. There have been no substantial changes to the required wording of the standard auditor's report since the addition of the scope paragraph. In April 2003, the PCAOB adopted AU sec. 508, *Reports on Audited Financial Statements,* as part of its interim auditing standards.[13/] Subsequently, the PCAOB also adopted Auditing Standard No. 1, *References in Auditors' Reports to the Standards of the Public Company Accounting Oversight Board*, which requires that auditors refer in the auditor's report to "the standards of the Public Company Accounting

---

[12/] The Treadway Commission was established in response to the congressional and public scrutiny of the accounting profession after significant business failures such as Drysdale Government Securities, Washington Public Power Supply System, Baldwin-United Corp, and E.S.M. Government Securities [SEC, "The Treadway Commission Report: Two Years Later," News Release (January 26, 1989)]. From October 1985 to September 1987, the Treadway Commission studied the financial reporting system in the United States. The Treadway Commission's mission "was to identify causal factors that can lead to fraudulent financial reporting and steps to reduce its incidence." *Report of the National Commission on Fraudulent Financial Reporting* (October 1987), p. 1 ("Treadway Commission Report").

[13/] References to the PCAOB's interim auditing standards consist of generally accepted auditing standards, as described in the American Institute of Certified Public Accountants ("AICPA") Auditing Standards Board's Statement on Auditing Standards No. 95, as in existence on April 16, 2003, to the extent not superseded or amended by the Board. These standards are available on the PCAOB's Web site at www.pcaobus.org.

Oversight Board (United States)"[14/] and adopted Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, that establishes requirements for auditors to report on internal control over financial reporting.

In February 2005, the SAG discussed the standard auditor's report, including the advantages and disadvantages of the auditor's reporting model and whether there was a need for a form of auditor reporting other than the pass/fail model.[15/] Several SAG members expressed support for maintaining the pass/fail element of the standard auditor's report, stating that it is "clear," "simple," "consistent," "comparable," and "easy for the investing public to digest."[16/] They also expressed a need for more information and less boilerplate language in the auditor's report.[17/]

In 2008, the U.S. Department of the Treasury Advisory Committee on the Auditing Profession ("ACAP") issued a report ("ACAP Final Report") urging the Board "to undertake a standard-setting initiative to consider improvements in the auditor's standard reporting model and to clarify in the auditor's report the auditor's role in detecting fraud under current auditing standards."[18/] The ACAP Final Report also noted that the "increasing complexity of global business operations are compelling a growing use of judgments and estimates, including those related to fair value measurements, and also contributing to greater complexity in financial reporting."[19/] In addition, the

**CONCEPT RELEASE**

ACAP Final Report suggested that this complexity supports improving the content of the auditor's report beyond the current pass/fail model to include a "relevant discussion about the audit of the financial statements."[20/]

The ACAP Final Report further recommended that the PCAOB consult with investors, other financial statement users, auditing firms, public companies, academics, other market participants, and other state, federal, and foreign regulators.[21/] Consistent with the ACAP's recommendation, the Board held follow-up discussions with the SAG regarding the auditor's reporting model in April and July 2010.[22/] While there was no consensus on what additional information should be included in the auditor's report, there was general support for improvements to the standard auditor's report.[23/] Similar views were expressed during the PCAOB's Investor Advisory Group ("IAG") meetings in May 2010[24/] and March 2011.[25/] Several SAG members also suggested that the PCAOB perform additional outreach to gain further input from investors and others.

From October 2010 through March 2011, the staff of the Office of the Chief Auditor (the "staff") conducted outreach to investors, auditors, preparers, audit committee members, representatives of academia, and others to further explore

**CONCEPT RELEASE**

**<u>Appendix B</u> − Overview of Current Reporting Requirements in PCAOB Standards**[1/]

The primary PCAOB auditing standard that applies to audit reports issued in connection with audits of financial statements is AU sec. 508, *Reports on Audited Financial Statements*. AU sec. 508 requires that the standard auditor's report identify the financial statements audited in the introductory paragraph, describe the nature of an audit in the scope paragraph, and include the auditor's opinion in the opinion paragraph.

AU sec. 508 also describes the following types of opinions that the auditor may issue in connection with an audit of the financial statements:

- *Unqualified opinion*. An unqualified opinion states that the financial statements present fairly, in all material respects, the financial position, results of operations, and cash flows of the entity in conformity with generally accepted accounting principles ("GAAP"). Certain circumstances, while not affecting the auditor's unqualified opinion on the financial statements, may require that the auditor add an explanatory paragraph (or other explanatory language) to his or her report.

- *Qualified opinion*. A qualified opinion states that, except for the effects of the matter(s) to which the qualification relates, the financial statements present fairly, in all material respects, the financial position, results of operations, and cash flows of the entity in conformity with GAAP.

- *Adverse opinion*. An adverse opinion states that the financial statements do not present fairly the financial position, results of operations, or cash flows of the entity in conformity with GAAP.

---

[1/] Excerpted from AU sec. 508 and Auditing Standard No. 1, *References in Auditors' Reports to the Standards of the Public Company Accounting Oversight Board.* Paragraphs 85-88 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements,* provide additional elements to be included in the auditor's report and related report examples for situations in which the auditor is engaged to perform an audit of the effectiveness of internal control over financial reporting that is integrated with an audit of financial statements.

- *Disclaimer of opinion*. A disclaimer of opinion states that the auditor does not express an opinion on the financial statements.[2/]

Although AU sec. 508 provides for different types of audit reports, the Securities and Exchange Commission ("SEC") does not accept qualified, adverse, or disclaimer opinions.[3/]

In certain circumstances, AU sec. 508 and Auditing Standard No. 6, *Evaluating Consistency of Financial Statements,* permit or require the auditor to add an explanatory paragraph to the standard auditor's report.[4/] Circumstances in which the auditor may be required to use an explanatory paragraph include, among other things, situations in which the auditor believes there is substantial doubt about the company's ability to continue as a going concern, there has been a material change between periods in accounting principles or in the method of their application, and there has been a correction of a material misstatement in previously issued financial statements.[5/] Standard auditors' reports with explanatory paragraphs are accepted by the SEC.

AU sec. 508 also permits the auditor to use an emphasis paragraph.[6/] An emphasis paragraph is never required; however, a paragraph may be added solely at the auditor's discretion.[7/] AU sec. 508 provides examples regarding the potential use of an emphasis paragraph, such as situations in which the entity had significant transactions with related parties, there were unusually important subsequent events, and there were specific accounting matters affecting the comparability of the financial statements.[8/]

**CONCEPT RELEASE**

The following is an illustrative report of an unqualified opinion on an audit of financial statements:[9/]

Report of Independent Registered Public Accounting Firm

We have audited the accompanying balance sheets of X Company as of December 31, 20X3 and 20X2, and the related statements of operations, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 20X3. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Company as of [at] December 31, 20X3 and 20X2, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 20X3, in conformity with U.S. generally accepted accounting principles.

[City and State or Country]
[Date]

---

[9/] Excerpted from Auditing Standard No. 1. Paragraph 87 of Auditing Standard No. 5 provides an example of a combined report (i.e., one report containing both an opinion on the financial statements and an opinion on internal control over financial reporting.)

PCAOB
Public Company Accounting Oversight Board

**CONCEPT RELEASE**

**Appendix C − Overview and Results of the Staff's Outreach Activities**

The staff of the Office of the Chief Auditor (the "staff") conducted a series of discussions with various investors and other users of the auditor's report from October 2010 to March 2011. The objective of the discussions was to assess whether changes to the auditor's reporting model may be necessary and, if so, to identify the changes or additional information that investors recommend including in the auditor's report. Conducting outreach was particularly important to the staff's efforts in formulating the potential alternatives presented.

Some investors who participated in the outreach included individuals representing money managers, asset management funds, pension funds, and wealth management funds, and organizations that represent institutional investors; investor advocates; buy- and sell-side analysts from some of the largest investment firms; and analysts from the largest credit rating agencies. The funds, institutions, and companies represented by investors in the staff's outreach represented trillions of dollars of assets under management.

After meeting with investors, the staff extended the outreach to others, including preparers, audit committee members, auditors, and representatives from academia. Participants in the preparer discussions included representatives from several Fortune 50 companies, Fortune 250 companies, Fortune 500 companies, and some smaller public companies. Participants in the audit committee discussions included audit committee members of companies ranging from small non-accelerated filers to Fortune 50 companies. The staff then conducted several discussions with auditors representing leaders from large and small accounting firms who audit both accelerated and non-accelerated filers. The staff also obtained the perspectives of individuals who previously held leadership roles in the accounting profession, at regulatory organizations, or standard setters. Some of these individuals contributed to discussions and commissions that made recommendations regarding improving the auditor's report, such as the American Assembly, the Commission on Auditors' Responsibilities (the "Cohen Commission"), the National Commission on Fraudulent Financial Reporting, the Panel on Audit Effectiveness, and U.S. Department of the Treasury Advisory Committee on the Auditing Profession ("ACAP").

Additionally, the staff read and reviewed publicly available information related to the auditor's reporting model from U.S. and international sources, including academic research, surveys, and other publications, to compile a list of matters that investors requested the auditor to include in the auditor's report. The staff has considered this information during the staff's outreach to investors and others, and recognizes that broad investor participation in the U.S. securities markets may differentiate the U.S. markets from the capital markets in some other countries.

During the staff's outreach, many investors suggested that the auditor's reporting model should provide greater transparency into the audit process and the auditor's views regarding the company's financial statements. These investors believe that the audit process is robust, but that the standard auditor's report does not adequately communicate the results of such an extensive audit process.[1/]

## A. Value of an Audit and Information to Investors

Many investors generally indicated that the audit is valuable and that auditors have unique and relevant insight into the company, and therefore should provide more information in the auditor's report to make the report more relevant and useful. The staff's outreach to investors indicated that the increase in the complexity and global nature of business and the recent financial crisis have contributed to the demands by some investors for more transparency into the audit process and the company's financial statements. Therefore, during the staff's outreach many investors supported retaining the pass/fail model of the auditor's report due to its clarity, consistency, and comparability. However, many investors also supported supplementing the pass/fail model with additional auditor reporting.

According to the March 2011 investor survey of a working group of the Board's Investor Advisory Group ("IAG"), some investors indicated that transparency can lead to less uncertainty and therefore, potentially more investor confidence in, and more efficient functioning of, the capital markets. Consistent with the staff's outreach, investor respondents to the March 2011 IAG survey agreed that additional information in the auditor's report would enhance the investment process and allow investors to better analyze financial information.[2/]

---

[1/] As the Cohen Commission noted, "for the largest corporations in the country, an audit may involve scores of auditors and tens of thousands of hours of work for which the client may pay millions of dollars. Nevertheless, the auditor's standard report compresses that considerable expenditure of skilled effort into relatively few words and paragraphs."

[2/] IAG meeting, March 16, 2011. Event details and webcast available at: http://pcaobus.org/News/Events/Pages/03162011_IAGMeeting.aspx.

During the staff's outreach, some investors also indicated that additional information from auditors could help investors in their investment analysis process to more accurately –

- Assign and attribute risks to the quality of the financial reporting of the underlying company, the company's projections, and disclosures.

- Develop investment valuation models, including assigning a value to a company and projecting future results of the company. This development process would include selecting a range of discount rates to apply to a company's earnings to derive a current market value and determine whether a stock is potentially under or overvalued in the market.

Additionally, some investors suggested that additional information in the auditor's report could –

- Identify the areas that might warrant more consideration in making investment decisions,

- Serve as a roadmap to other areas of focus in the financial statements,

- Provide early warning signals to investors regarding potential issues with the company,

- Assist in comparison of companies across an industry, and

- Inform corporate governance decisions regarding auditor and board member retention.

## B. Information Related to the Audit

During the staff's outreach, the staff heard from some investors that an auditor's discussion in the auditor's report about the audit and how the audit was conducted could provide financial statement users with a better perspective regarding audit risk.[3/] In

---

[3/] Auditing Standard No. 8, *Audit Risk,* describes audit risk as the risk that the auditor expresses an inappropriate audit opinion when the financial statements are other words, the auditor has relevant insight into the key risks of material misstatement of the company's financial statements, and knowledge of these risks would be useful to investors.

As part of its outreach, the staff explored the information that might be included in the auditor's report regarding how an audit is conducted.

*1. Risks*

Some investors indicated that the audit report should discuss information about risks in the following areas and the related auditor responses to those risks –

- Financial statement areas with an increased level of risk of material misstatement based on the nature of the company, industry, and economic conditions;
- Risks related to management's judgments and estimates and management's application of critical accounting policies and practices and estimates;
- Areas in which the auditor exercises an increased level of judgment and/or spends a significant amount of time, including matters about which the auditor had significant consultation outside the engagement team;
- Risks the auditor communicated to the audit committee;
- Risks regarding the company's financial viability, including the company's ability to continue as a going concern for a reasonable period of time; and
- Business, operational, governance, and enterprise risks.

Many outreach participants noted that this discussion of risks may not align with management's discussion and analysis of business risks in Management's Discussion

---

materially misstated. Audit risk is a function of the risk of material misstatement and detection risk.

and Analysis ("MD&A") and therefore not provide a consistent communication to users of financial statements.

Auditing standards require the auditor to identify and assess the risk of material misstatement, including determining significant risks. The auditing standards also provide factors that assist the auditor in considering which risks represent significant risks, such as –

- The degree of complexity or judgment in the recognition or measurement of financial information related to the risk, especially those measurements involving a wide range of measurement uncertainty; and

- Whether the risk involves significant transactions that are outside the normal course of business for the company or that otherwise appear to be unusual due to their timing, size, or nature.[4/]

As part of determining which risks are significant risks, the auditor is required to obtain an understanding of the company and its environment, which includes the company's objectives, strategies, and related business risks, to understand the events, conditions, and company activities that might reasonably be expected to have a significant effect on the risks of material misstatement of the financial statements.[5/]

In other words, business risks could affect the risk of material misstatement at the financial statement level. For example, a company's loss of financing or declining conditions in a company's industry could affect its abilities to settle its obligations when due. This, in turn, could affect the risks of material misstatement related to items such as the classification of long-term liabilities or the valuation of long-term assets, or it could result in substantial doubt about a company's ability to continue as a going concern. Auditing standards require the auditor to obtain an understanding of the company and its environment to understand the events, conditions, and company activities that might reasonably be expected to have a significant effect on the risks of material misstatement. The requirement for the auditor to obtain an understanding of

---

[4/] See paragraph 71 of Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement,* for a more detailed list of factors relevant to identifying significant risks.

[5/] See paragraphs 7-14 of Auditing Standard No. 12 for the auditor's responsibilities related to understanding business risks.

the company and its environment, including related business risk, is intended to focus the auditor on the degree of the "knowledge of the company" that is necessary for a risk-based audit and to explain how knowledge of the company informs the auditor's identification and assessment of audit risk.

As noted above, while some investors have defined risk more broadly, e.g., business risks, operating risks, or strategic risks, the auditor's responsibilities are limited to considering the company's risks only as they relate to informing their assessment of the risk of material misstatement of the financial statements. For example, an auditor is not required to evaluate whether a new product would be successful or not; rather, the auditor is required to consider how an unsuccessful product might affect the risk of material misstatement of inventory and other related assets. The discussion of risk addressed in this concept release is limited to audit risks that the auditor is required to identify under current auditing standards. The risks of material misstatement of the financial statements are the same for both the audit of financial statements and the audit of internal control over financial reporting.[6/]

In the March 2011 IAG investor survey, "77% of the respondents indicated that the auditor should disclose areas with greatest financial statement and audit risk and the audit work performed in those areas."[7/]

*2. Audit Procedures and Results*

Some outreach participants suggested that the auditor could summarize the procedures that the auditor performed related to audit risks and management's judgments and estimates, including testing of management's key assumptions that form the basis for these estimates. These outreach participants suggested that the auditor's report should include more information about the procedures the auditor performed related to the detection of fraud.

Some outreach participants suggested that providing a more robust discussion of audit procedures (i.e., procedures in a financial statement audit or procedures in an audit of internal control) would better inform investors as to what an audit represents relative to a particular company or industry. Others suggested that they could use this

---

[6/] See footnote 1 to paragraph 1 of Auditing Standard No. 8.

[7/] IAG meeting, March 16, 2011. Event details and webcast available at: http://pcaobus.org/News/Events/Pages/03162011_IAGMeeting.aspx.

information to separately evaluate whether the auditor has adequately identified and responded to the risks of material misstatement.

Some outreach participants also indicated that they are interested in obtaining more information about the results of the audit, including the auditor's findings. Some outreach participants described such audit results or findings to include –

- The results of audit procedures performed on audit risk areas or areas requiring significant auditor judgment,
- Information on misstatements the auditor communicated to the audit committee, either corrected or uncorrected,
- Significant control deficiencies communicated to the audit committee and the audit procedures performed by the auditors to satisfy themselves that the risk of material misstatement to the financial statements has been appropriately mitigated,
- Areas in which there were difficulties encountered in performing the related audit procedures,
- The auditor's findings with respect to fraud as communicated to the audit committee, and
- Qualitative aspects of the company's accounting practices, financial statements, and disclosures discussed with the audit committee.

Some outreach participants suggested that the auditor provide more discussion about the nature of the results and findings from the audit or the resolution of issues that arose during the audit.

Other outreach participants expressed concern that providing a list of the audit procedures performed might not provide investors with information that would be useful in making an investment decision. These outreach participants also pointed out that the reference to PCAOB auditing standards in the scope paragraph signifies that the auditor has applied a comprehensive set of required audit procedures. Some outreach participants expressed concern that without the proper two-way dialogue regarding audit results, information about audit results might be taken out of context. Certain outreach participants indicated that the issuance of an unqualified opinion signifies the final results of an audit (i.e., the financial statements present fairly, in all material respects, in accordance with the applicable financial reporting framework) and that all material issues identified during the audit have been resolved.

*3. Materiality Levels*

During the staff's outreach, some outreach participants expressed an interest in knowing the auditor's quantitative and qualitative materiality levels and the factors the auditor considered in establishing the materiality levels. These outreach participants acknowledged that the auditor makes an assessment of materiality based on the needs of a reasonable investor.[8/] In that regard, some outreach participants suggested the auditor's report should describe the quantitative materiality level established in the audit as well as the basis the auditor used in establishing that materiality level (e.g., net income or percentage of net income). Some outreach participants indicated that the auditor also should discuss the qualitative factors the auditor used in evaluating the materiality of misstatements.

Some outreach participants indicated that trying to select one number to be discussed in the auditor's report could be especially difficult because there are many measurements and assessments of materiality throughout an audit. For example, some outreach participants indicated that the auditor should discuss in the auditor's report materiality considered in planning the audit, while other outreach participants indicated the auditor should discuss in the auditor's report the actual, final materiality level used to evaluate the financial presentation as a whole. Further, others expressed concern that providing materiality levels (qualitative or quantitative) in the auditor's report might result in an inconsistent communication due to a lack of comparability among companies. For example, depending on the company, its industry, and its financial results in a given year, materiality levels might be based on different criteria, such as net income, revenue, or stockholders' equity. Some outreach participants suggested that disclosing materiality levels in the auditor's report could have negative implications on audit quality. For example, they noted that discussing materiality levels in an auditor's report could reduce the element of surprise necessary in an audit.

---

[8/] See Auditing Standard No. 11, *Consideration of Materiality in Planning and Performing an Audit.*

According to the March 2011 IAG investor survey, "56% of respondents believe the auditor should disclose quantitative and qualitative materiality thresholds and considerations, while 17% of respondents disagree with requiring such disclosure."[9/]

*4. Auditor Independence*

Some outreach participants suggested that the auditor should discuss in the auditor's report information regarding the auditor's independence. According to the March 2010 CFA survey, "72% of respondents would like to see information on circumstances or relationships that might bear on the auditor's independence."[10/] The staff's outreach participants indicated that the type of auditor independence matters that could be included in the auditor's report are –

- The nature and extent of non-audit services the auditor provided to the company,
- Information regarding the auditor's independence as provided to the audit committee,
- Information describing the process the auditor used to assess the auditor's independence, and
- Information describing any mutuality of interests or conflicts of interest between the auditor and the company.

Some outreach participants indicated that they could benefit from such information in order to assess the auditor's relationship and independence with respect to the company. Some outreach participants further indicated that an understanding of auditor independence might help inform their voting decisions on the election, approval or ratification of the auditor in the proxy.

---

[9/] IAG meeting, March 16, 2011. Event details and webcast available at: http://pcaobus.org/News/Events/Pages/03162011_IAGMeeting.aspx.

[10/] CFA Institute, *Independent Auditor's Report Survey Results*, (March 2010), available at: www.cfainstitute.org/Survey/independent_auditors_report_survey_results.pdf.

Other outreach participants indicated that audit committees play a critical role in monitoring auditor independence, for example, pre-approving audit and non-audit services. Some outreach participants indicated that the title of the standard auditor's report (i.e., "Report of Independent Registered Public Accounting Firm") conveys compliance with the independence rules and suggested that additional discussion regarding independence could be redundant, and possibly ineffective without the benefit of the dialogue between the auditor and the audit committee about matters affecting the auditor's independence.

*5. Engagement Statistics*

Some outreach participants indicated that an understanding of key engagement statistics would provide useful information in assessing the quality of the audit. The key engagement statistics have been described as follows –

- Information regarding the composition, tenure, and quality of experience of the audit engagement team (particularly the engagement partner and senior manager);

- The number of hours and fees spent on the engagement in aggregate or spent in significant audit risk areas;

- The percentage of the aggregate audit hours spent, or the percentage of the aggregate hours spent by the engagement partner and managers, on significant audit risk areas; and

- The number of hours and changes in hours year-over-year and significant reasons for such changes.

Some outreach participants suggested that information regarding the composition of the engagement team could provide a sense of the level of expertise and the engagement team's institutional knowledge regarding the company. They further indicated that information regarding the number of hours spent by significant audit risk area could be useful in assessing the auditor's effort. Finally, some outreach participants indicated that a more thorough understanding of the hours and fees could be relevant in considering whether the auditor inappropriately reduced its audit scope due to fee pressures. For example, they noted that, in a recessionary economic environment, the risk of material misstatement and fraud risk could increase;

consequently, some expressed an interest in knowing whether auditors spent more time in certain audit risk areas.

Others expressed a view that the level of hours on a particular engagement or audit area within an audit is not necessarily an indicator of audit quality. For example, an audit of a company with primarily manual controls or a decentralized accounting system typically would require more audit hours than an audit of a similar company with primarily automated controls or a centralized accounting system. Further, some outreach participants suggested that the number of audit hours does not necessarily address the quality of a company's audit.

## C. Information Related to the Company's Financial Statements

Although the current auditor's report provides the auditor's opinion on whether the financial statements are fairly presented in conformity with the applicable financial reporting framework, some outreach participants indicated that not all financial statements that are "presented fairly" may be considered equivalents, or of equal quality. In other words, accounting frameworks provide for various management judgments and estimates in the company's application of accounting policies and practices. The increased levels of judgments and estimates are susceptible to management bias and could result in a wide range of acceptability within the company's applicable financial reporting framework. This range of acceptability is not reflected in the auditor's opinion.

Many preparers, audit committee members, and auditors are not supportive of adding company-specific information to the auditor's report. They noted that management should be the primary source of the company's financial information or such information should come from the audit committee, which is responsible for the oversight of the financial reporting process.

### *1. Management's Judgments and Estimates*

Many outreach participants indicated that it would be useful if the auditor were to provide relevant information, including the auditor's views, on management's assumptions, methodologies, and accounting policies related to accounting estimates that involve a high degree of complexity or judgment. They indicated that financial statements include many estimates that are based on management's judgments regarding assumptions, methodologies, and accounting policies. For example, items in the financial statements involve fair value accounting for which there may be a relatively wide range of potential estimation, and some outreach participants would like to know information about the ranges as well as the auditor's views on the appropriateness of the estimate recorded within the range. Some outreach participants further recognize that management's judgments and estimates inherently include management bias. Therefore, more information regarding the reasonableness and consistency of, changes in, and ranges of possible outcomes and management's selection within those ranges could be useful to the users of financial statements. This additional information might include the reasonableness and consistency of, and changes in, assumptions, inputs, methodologies and accounting policies.

This request is consistent with the March 2011 IAG investor survey that indicated that "79% of respondents believe the auditor should discuss significant estimates and judgments made by management, the auditor's assessment of their accuracy, and how the auditor arrived at that assessment (14% disagree with requiring this disclosure)."[11/]

With regard to management's estimation process, some outreach participants said that they would benefit from knowing more about the process that management used to determine an estimate, the key assumptions used, and other factors that management considered in developing an estimate. Because estimates by their nature are not exact, the auditor's description of the process that management used to determine the estimates, as well as other factors management considered, would better inform the investor in evaluating the overall presentation of the financial statements.

Some outreach participants suggested that the auditor's discussion could focus on the most critical accounting estimates with assumptions that have a potential material impact on the financial statement results. They also suggested that the auditor's discussion could focus on the ranges used in the estimates. This discussion could be aligned with management's discussion of critical accounting estimates in the MD&A.

Other outreach participants indicated that it is management's responsibility to discuss the company's financial information, including the judgments and estimates that embody the financial statements. Some outreach participants are concerned that information provided by the auditor regarding his or her views about management's judgments might differ from the disclosures management makes in the MD&A, which includes management's views about the financial statements. These sources of information might suggest inconsistencies to the investor. Therefore, if auditors are

---

[11/] IAG meeting, March 16, 2011. Event details and webcast available at: http://pcaobus.org/News/Events/Pages/03162011_IAGMeeting.aspx.

required to provide their views in the auditor's report about management's judgments and estimates, then management might be compelled to make changes to its judgments and estimates solely based on the auditor's views (i.e., management might be influenced to use judgments or estimates suggested by the auditor). Some outreach participants further indicated that if the auditor were to provide information about the company's financial statements, then this could cause preparers to default to "auditor preference" for judgments and estimates. In other words, it may not always be appropriate for the auditor to provide this information, because management, not the auditor, is in the best position to make assumptions and judgments about its business.

*2. Accounting Policies and Practices*

Some outreach participants recommended that the auditor provide his or her views regarding the appropriateness of the company's application and consistency of the company's critical accounting policies and practices. They suggested that this discussion should align with the critical accounting policies and practices that management disclosed in its MD&A. The Securities and Exchange Commission ("SEC") describes critical accounting policies and practices as a company's accounting policies and practices that are most important to the presentation of the company's financial condition and results, and require management's most difficult, subjective, or complex judgments, often as a result of the need to make estimates about the effects of matters that are inherently uncertain.[12/] Other outreach participants suggested that the auditor discuss which accounting policies management used that are considered acceptable, but not preferable, under the applicable financial reporting framework.[13/]

According to the March 2011 IAG investor survey, "65% of respondents believe the auditor should discuss quality, not just acceptability, of the accounting policies and practices employed as well as the consistency of their application, while 15% disagree with requiring this disclosure."[14/]

---

[12/] See *Cautionary Advice Regarding Disclosure About Critical Accounting Policies,* Securities Act Release No. 8040 (December 12, 2001).

[13/] The SEC currently requires a "preferability letter" from the auditor when a company changes accounting principles or practices. See Item 601(b)(18) of Regulation S-K, 17 CFR § 229.601(b)(18); Rule 10-01(b)(6) of Regulation S-X, 17 CFR § 210.10-01(b)(6).

[14/] IAG meeting, March 16, 2011. Event details and webcast available at: http://pcaobus.org/News/Events/Pages/03162011_IAGMeeting.aspx.

**CONCEPT RELEASE**

Additionally, some outreach participants suggested that the auditor should discuss alternative accounting policies that the auditor discussed with management or policies that are different from other companies in the company's industry. Some outreach participants said that when there are alternative accounting treatments, the auditor should describe the alternative accounting treatment available under the applicable financial reporting framework and could indicate the treatment that the auditor preferred.[15/]

Some outreach participants indicated that when an auditor has agreed that a company's policy is acceptable, then providing additional information on alternative policies may be misleading. This is due to the fact that the full context of the reasons behind the company's accounting policy decisions, and reasons for their acceptability based on the company's facts and circumstances, are not provided. Further, some cautioned that the auditor should not indicate a preference for or against the company's particular policies and providing this information in the auditor's report could result in management adopting policies or practices that reflect the auditor's view rather than management's view.

Some outreach participants indicated that the auditor also should discuss in the auditor's report significant unusual transactions to enhance investors' understanding of how those transactions impact the financial statements. According to the March 2011 IAG investor survey, "67% of respondents believe the auditor should disclose unusual transactions while 14% disagree with requiring this disclosure."[16/]

*3. Difficult or Contentious Issues, Including "Close Calls"*

Some outreach participants recommended that the auditor identify in the auditor's report the most difficult or contentious issues discussed with management. Difficult or contentious issues might arise in various stages of the audit, including in the auditor's evaluation of management's judgments, estimates, and accounting policies. Many

---

15/ The SEC currently requires a "preferability letter" from the auditor when a company changes accounting principles or practices. See Item 601(b)(18) of Regulation S-K, 17 CFR § 229.601(b)(18); Rule 10-01(b)(6) of Regulation S-X, 17 CFR § 210.10-01(b)(6).

16/ IAG meeting, March 16, 2011. Event details and webcast available at: http://pcaobus.org/News/Events/Pages/03162011_IAGMeeting.aspx.

outreach participants described difficult or contentious issues as those critical matters that concerned the auditor when making the auditor's final assessment of whether the financial statements are presented fairly. A difficult issue might not always be synonymous with a contentious issue. Rather, a difficult issue might be a matter that requires significant consideration or consultation; however, the auditor might agree with management's conclusions regarding the issue. A contentious issue might be a matter that not only requires significant consideration or consultation but also leads to significant points of disagreement, debate or deliberation between the auditor and management. Regardless of whether the issue is difficult or contentious, some outreach participants indicated that they would like information concerning how management and the auditor ultimately resolved the issue in order for the auditor to issue an unqualified opinion.

In addition, some outreach participants suggested the auditor should discuss the "close calls" encountered by the auditor in performing the audit. Some investors described close calls to include matters such as –

- Those accounting decisions that required significant deliberation by the auditor and management before being deemed to be acceptable within the applicable financial accounting framework,

- Those matters related to internal control over financial reporting that required significant deliberation by the auditor and management, and

- A financial statement issue that had a potential material impact to the financial statements and was corrected prior to the end of the period.

Some outreach participants indicated that knowing the difficult or contentious issues or the close calls would provide insight into the auditor's significant judgments. Others suggested that the auditor provide a listing of the issues in the auditor's report (e.g., difficult, contentious, or close calls) without the auditor's views. Based on this information, financial statement users could determine if further investigation is warranted as part of their investment analysis.

However, other outreach participants believe that if the difficult or contentious issues, or "close calls" are resolved to the auditor's satisfaction then description of them in the auditor's report would not provide relevant and useful information and could be misleading regarding the meaning of the auditor's opinion (i.e., the issuance of an unqualified opinion demonstrates that the auditor has satisfactorily resolved all material matters).

Some outreach participants indicated that due to the financial complexity of most public companies and their many accounting policies and estimates, there are typically a significant number of difficult or contentious issues or close calls in the normal course of the audit. Therefore, it may be hard for the auditor to determine which particular issues are most important to be discussed in the auditor's report.

*4. Information Communicated to the Audit Committee*

Some outreach participants indicated that the auditor should include in, or attach to, the auditor's report the auditor's communications with the audit committee. Much of the information communicated to the audit committee includes matters previously discussed, such as risks, audit procedures and results, and the quality of the financial statements. Some outreach participants indicated that the audit committee communication could provide key insights into the quality of the financial statements and internal control over financial reporting, and provide the auditor's views regarding significant accounting matters.

Other outreach participants, however, expressed concern that the two-way dialogue that takes place between the auditor and the audit committee cannot be replicated in the auditor's report, and a written report would not provide sufficient context to aid understanding of the matters presented in the audit committee communications by someone outside the company. For example, audit committee members have the opportunity to ask probing questions of the auditor regarding the information provided to enhance their understanding of the communications, when needed. Some outreach participants noted that having an auditor provide all audit committee communications to investors might stifle the communications between the auditor and the audit committee and undermine the governance role of the audit committee.

Other outreach participants said that the nature and extent of the audit committee communications vary considerably. The communications may be oral or written and may vary in length from an executive summary to a 100-page detailed document. These outreach participants indicated that disclosure of these communications may lead to a lack of comparability among companies. Further, audit committee communications often include company- and industry-specific terms that audit committee members understand in their oversight role, but might require greater context or explanation in order for these terms to be understood outside of the company.

**CONCEPT RELEASE**

5. *Other Information Outside the Financial Statements*

Many outreach participants have indicated that the auditor should provide some level of assurance on information outside the financial statements (e.g., MD&A, earnings releases, non-GAAP information). Their view is that investors use and place reliance on other financial information (e.g., earnings releases), in addition to the historical financial statements. Some outreach participants indicated that other information outside the financial statements contains valuable information about the company, and provides additional context for understanding and interpreting the audited financial statements. Some indicated that an auditor providing some level of assurance on this information would improve the quality, completeness, and credibility of such information.

Under auditing standards the auditor has certain responsibilities with respect to other information (i.e., MD&A) in documents containing the audited financial statements (i.e., annual report). In this case, AU sec. 550, *Other Information in Documents Containing Audited Financial Statements,* requires the auditor to read the other information and to consider whether that information is materially inconsistent with the information appearing in the audited financial statements and whether there is a material misstatement of fact.[17/] However, under existing auditing standards the auditor does not have responsibility with respect to certain information not contained in the annual report, such as in a company's earnings releases. Although, the audit committee could retain the auditors to perform agreed-upon procedures on this information.[18/]

The MD&A, earnings releases, and other documents often include non-GAAP information. Some outreach participants suggested that if an auditor were required to provide some level of assurance on such information, then suitable criteria would need to be developed for the preparation and presentation of non-GAAP information to ensure the integrity and consistency of the reporting. These participants are concerned that auditors would constrain management's discussion to only matters that can be objectively verified by the auditor, and therefore limit management in its communication with the investor.

Some outreach participants acknowledged that various recommendations might require collaboration with the SEC, to mandate changes to current financial reporting

17/ AU sec. 550.

18/ See AT sec. 201, *Agreed-Upon Procedures Engagements.*

requirements and development of a management reporting framework. These recommendations include expanding the auditor's responsibility related to other financial information to include an audit or review of MD&A, press releases, and non-GAAP information.

## D. Clarification of the Standard Auditor's Report

Many investors suggested that certain language within the standard auditor's report should be further clarified or explained. These investors suggested that clarifying the language in the standard auditor's report could improve the user's understanding of what an audit represents and the various responsibilities of the auditor and management as part of the audit process.

### *1. Reasonable Assurance*

Some outreach participants indicated that the concept of an auditor's report providing "reasonable assurance" that the financial statements are free of material misstatement is not clearly understood. The auditor's report explicitly asserts that the audit was conducted in accordance with professional standards and states that "those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement."

Some outreach participants suggested that the auditor's report should describe the meaning of reasonable assurance consistent with how it is described in the auditing standards (i.e., clarify the language in the auditor's report that reasonable assurance is a high level of assurance, but not absolute assurance).

The term "reasonable assurance," as used in auditing standards, describes the level of assurance that auditors are required to obtain by performing audit procedures and evaluating the resulting audit evidence when expressing an audit opinion. The auditor has a responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud. Because of the nature of audit evidence and the characteristics of fraud, the auditor is able to obtain reasonable, but not absolute, assurance that material misstatements are detected. Therefore, an audit may not detect a material misstatement.[19/]

[19/] Paragraph 10 of AU sec. 230, *Due Professional Care in the Performance of Work.*

*2. Auditor's Responsibility for Fraud*

Many outreach participants indicated that the auditor's report should provide clarification regarding the auditor's responsibility related to fraud. For example, the current standard auditor's report does not mention "fraud" and is silent about the auditor's responsibility to detect fraud.[20/]

The auditing standards require the auditor to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud.[21/]

*3. Auditor's Responsibility for Disclosures*

Many outreach participants suggested that it would be beneficial to clarify in the auditor's report that audited disclosures are part of the financial statements and therefore are equally subject to the audit. The standard auditor's report identifies the balance sheets, related statements of operations, stockholders' equity and cash flows as the financial statements. Additionally, the SEC rules provide that "financial statements" include all notes to the financial statements and related schedules.[22/]

Some outreach participants indicated that the auditor's evaluation of audit results should include evaluation of the presentation of the financial statements, including disclosures.[23/] Many outreach participants indicated that the increasing level of disclosures required due to the complexity of business transactions, off-balance sheet transactions, non-recognition of assets and liabilities, and the increased use of fair value and other accounting estimates underscore why the auditor's report should explicitly state that the audit opinion also extends to audited disclosures.

---

20/ ACAP Final Report, p. VII.14.

21/ AU sec. 230 and AU sec. 316, *Consideration of Fraud in a Financial Statement Audit.*

22/ Rule 1-01(b) of Regulation S-X, 17 CFR §210.1-01.

23/ Paragraph 4.e. of Auditing Standard No. 14, *Evaluating Audit Results.*

**CONCEPT RELEASE**

Overall there is consensus among outreach participants that the auditor's report should explicitly state that the financial statements, including the related disclosures, are subject to the audit and auditor's opinion.

Under auditing standards, auditors are required to perform procedures to test the financial statement disclosures and to evaluate whether the financial statements contain the information essential for fair presentation of the financial statements in conformity with the applicable financial reporting framework.[24/] Auditing standards also require auditors to perform procedures to assess the risk of omitted, incomplete, or inaccurate disclosures, whether intentional or unintentional[25/] to identify and test significant disclosures;[26/] and, in integrated audits, to test controls over significant disclosures.[27/]

*4. Management's Responsibility for the Preparation of the Financial Statements*

Many outreach participants suggested that the auditor's report should make clear that management prepares the financial statements and has responsibility for the fair presentation of the financial statements.

The Sarbanes-Oxley Act of 2002 (the "Act") requires corporate officers to certify in periodic filings with the SEC that "based on such officer's knowledge, the financial statements, and other financial information included in the report, fairly present in all material respects the financial condition and results of operations of the issuer, as of, and for, the periods presented in the report."[28/] This requirement denotes that management is responsible for the fair presentation of the company's financial statements.

---

[24/] Paragraphs 30-31 of Auditing Standard No. 14.

[25/] See, for example, paragraphs 49, 52, and 67 of Auditing Standard No. 12.

[26/] See, for example, paragraphs 59-64 of Auditing Standard No. 12 and paragraph 9 and footnote 6 of Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*. A disclosure is a significant disclosure if there is a reasonable possibility that the disclosure could contain a misstatement that, individually or when aggregated with others, has a material effect on the financial statements.

[27/] Paragraph 26 of Auditing Standard No. 5.

[28/] Section 302(a)(3) of the Act.

**CONCEPT RELEASE**

*5. Auditor's Responsibility for Information Outside the Financial Statements*

Some outreach participants indicated that users of financial statements misinterpret the auditor's responsibilities regarding information presented outside the financial statements. Such information might be financial or non-financial information included in the MD&A or presented in other portions of documents containing audited financial statements. These outreach participants suggested that the auditor specifically state in the auditor's report the auditor's responsibility and procedures, if any, related to such information.

While the audit does not extend to information outside the financial statements, the auditor has certain responsibilities with respect to such information. Specifically, auditing standards require the auditor to read the information and to consider whether that information is materially inconsistent with the information appearing in the audited financial statements and whether there is a material misstatement of fact.[29/] However, they indicated that the auditor has no obligation to perform any procedures to corroborate the other information contained in the document. If no material inconsistencies or material misstatements of fact are found, the auditor's report would not address this information.

*6. Auditor Independence*

Some outreach participants indicated that it would be useful if the auditor explicitly stated in the auditor's report that he or she is independent with respect to the company. An explicit statement in the auditor's report could clarify for the investor the auditor's responsibility to be independent.

Other outreach participants indicated that the title of the standard auditor's report (Report of Independent Registered Public Accounting Firm) conveys compliance with the independence rules and suggested that additional discussion regarding independence could be redundant.

Summary: The Public Company Accounting Oversight Board ("PCAOB" or the "Board") is proposing two new auditing standards, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*, which would supersede portions of AU sec. 508, *Reports on Audited Financial Statements,* and *The Auditor's Responsibilities Regarding Other Information in Certain Documents Containing Audited Financial Statements and the Related Auditor's Report*, which would supersede AU sec. 550, *Other Information in Documents Containing Audited Financial Statements.* The Board also is proposing related amendments to PCAOB standards.

Public Comment: Interested persons may submit written comments to the Board. Such comments should be sent to the Office of the Secretary, PCAOB, 1666 K Street, N.W., Washington, D.C. 20006-2803. Comments also may be submitted by email to comments@pcaobus.org or through the Board's website at www.pcaobus.org. All comments should refer to PCAOB Rulemaking Docket Matter No. 034 in the subject or reference line and should be received by the Board no later than 5:00 PM (EST) on December 11, 2013.

Board Contacts: Martin F. Baumann, Chief Auditor (202/207-9192, baumannm@pcaobus.org), Jennifer Rand, Deputy Chief Auditor (202/207-9206, randj@pcaobus.org), Jessica Watts, Associate Chief Auditor (202/207-9376, wattsj@pcaobus.org), Lillian Ceynowa, Associate Chief

Auditor (202/591-4236, ceynowal@pcaobus.org), Elena Bozhkova, Assistant Chief Auditor (202/207-9298, bozhkovae@pcaobus.org) and Ekaterina Dizna, Assistant Chief Auditor (202/591-4125, diznae@pcaobus.org).

*****

## I. Introduction

The auditor's report is the primary means by which the auditor communicates with investors and other financial statement users information regarding his or her audit of the financial statements. As it exists today, the auditor's report identifies the financial statements that were audited, describes the nature of an audit, and presents the auditor's opinion as to whether the financial statements present fairly, in all material respects, the financial position, results of operations, and cash flows of the company in conformity with the applicable financial reporting framework. This type of auditor's report has been commonly described as a pass/fail model because the auditor opines on whether the financial statements are fairly presented (pass) or not (fail).[1/]

The auditor's report in the United States has changed very little since the 1940s. The existing pass/fail model is thought by many to be useful because it provides a clear indication of whether the financial statements are presented fairly.[2/] However, while the existing auditor's report provides important information about an audit in general, it does not provide information that is specific to a particular audit.

Academic research suggests that investors and other financial statement users refer to the existing auditor's report only to determine whether the opinion is unqualified

---

[1/] If the financial statements are not fairly presented, the standards of the PCAOB provide that an auditor may issue a qualified opinion, adverse opinion, or disclaimer of opinion.

[2/] See paragraph (c) of U.S. Securities and Exchange Commission ("SEC") Rule 2-02 of Regulation S-X, 17 C.F.R. § 210.2-02. SEC rules require the accountant to clearly express an opinion on the audited financial statements that are required to be filed as part of registration statements under the Securities Act of 1933 ("Securities Act") and Section 12 of the Securities Exchange Act of 1934 ("Exchange Act"), annual or other reports under Sections 13 and 15(d) of the Exchange Act, proxy and information statements under Section 14 of the Exchange Act, and registration statements and shareholder reports under the Investment Company Act of 1940. See also paragraph (a) of SEC Rule 1-01 of Regulation S-X, 17 C.F.R. § 210.1-01.

because it does not provide any other informational value about the particular audit.[3/] During the Board's outreach activities over the last three years, many investors have expressed dissatisfaction that the content of the existing auditor's report provides little, if any, information specific to the audit of the company's financial statements to investors or other financial statement users. During a financial statement audit, auditors obtain and evaluate important information concerning the company, the company's environment, and the preparation of the company's financial statements. Many investors have indicated that they would benefit from additional auditor reporting because they do not have access to, or may not be aware of, much of this information. Additionally, many investors indicated that auditors have unique and relevant insight based on their audits and that auditors should provide information about their insights in the auditor's report to make the reports more relevant and useful.[4/]

Several commissions examined both the auditor's responsibilities and the form of the auditor's report in the 1970s and 1980s.[5/] These commissions made several recommendations to change the auditor's report; however, only a limited number of changes were made in response to these recommendations.[6/] In 2008, the U.S. Department of the Treasury's Advisory Committee on the Auditing Profession ("ACAP") recommended that the PCAOB undertake a standard-setting initiative to consider

Mock, *Perceptions and Misperceptions Regarding the Unqualified Auditor's Report by Financial Statement Preparers, Users, and Auditors*, 25 Accounting Horizons 659, 675-676 (2011); and Theodore J. Mock, Jean Bedard, Paul J. Coram, Shawn M. Davis, Reza Espahbodi, and Rick C. Warne, *The Audit Reporting Model: Current Research Synthesis and Implications*, 32 Auditing 323, 323-351 (2013).

4/ See survey, *Improving the Auditor's Report*, which was presented by the working group of the IAG on Auditor's Report and The Role of the Auditor, (March 16, 2011), available at http://pcaobus.org/News/Events/Pages/03162011_IAGMeeting.aspx.

5/ For example, in 1978, the Commission on the Auditors' Responsibilities (known as the "Cohen Commission") and in 1987, the National Commission on Fraudulent Financial Reporting (known as the "Treadway Commission") recommended changes to the auditor's report.

6/ The changes expanded the discussion of attributes of an audit and management's responsibility. See Marshall A. Geiger, *Setting the Standard for the New Auditor's Report: An Analysis of Attempts to Influence the Auditing Standards Board*, 1 (1993), 38.

improvements to the auditor's standard reporting model.[7/] The ACAP report noted that "some believe…[that the] standardized wording does not adequately reflect the amount of auditor work and judgment."[8/] Similar sentiments were expressed more recently by members of the Board's Standing Advisory Group ("SAG")[9/] and IAG.[10/]

Additionally, ACAP noted that the auditor reporting model developed in the 1940s did not address the increasing complexity of global business operations that are compelling a growing use of judgments and estimates, including those related to fair value measurements, and also contributing to greater complexity in financial reporting.[11/] It was further noted that this complexity supports improving the content of the auditor's report beyond the current pass/fail model to include a more relevant discussion about the audit of the financial statements.[12/] ACAP concluded that an improved auditor's report likely would lead to more relevant information for users of financial statements and would clarify the role of the auditor in the financial statement audit.[13/]

During the Board's outreach activities, some investors noted that auditors gain knowledge about the company's financial statements during the audit that is not known to investors. These investors stated that they believe such knowledge would assist them when making their investment decisions. Academic research finds that the existing

auditor's report has symbolic value in that it represents the auditor's work but that it provides little communicative value.[14/]

Additionally, the auditor's report is undergoing change globally. Several international standard setters and regulators, such as the International Auditing and Assurance Standards Board ("IAASB"), the United Kingdom's Financial Reporting Council ("FRC"), and the European Commission ("EC") have been working on similar projects to change the auditor's report.[15/]

After extensive outreach conducted over the last three years, the Board is proposing two standards under its statutory mandate to "protect the interests of investors and further the public interest in the preparation of *informative*, accurate and independent audit reports"[16/] [emphasis added]. The proposed standards are intended to increase the informational value of the auditor's report to promote the usefulness and relevance of the audit and the related auditor's report. At the same time, the Board sought a balanced approach that would not unduly burden the financial reporting process.

The two proposed standards are: *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion* (the "proposed auditor reporting standard") and *The Auditor's Responsibilities Regarding Other Information in Certain Documents Containing Audited Financial Statements and the Related Auditor's Report* (the "proposed other information standard"). The Board also is proposing related amendments to other PCAOB auditing standards (the "proposed amendments"). This release collectively refers to the proposed auditor reporting standard, proposed other information standard, and proposed amendments as "the proposed standards and amendments."

Briefly, the Board's proposed auditor reporting standard would retain the pass/fail model, including the basic elements of the current auditor's report, and would provide more information to investors and other financial statement users regarding the audit and the auditor. Most significantly, the proposed auditor reporting standard would require the auditor to communicate in the auditor's report "critical audit matters" that

---

[14/] See Bryan K. Church, Shawn M. Davis, and Susan A. McCracken, *The Auditor's Reporting Model: A Literature Overview and Research Synthesis*, 22 Accounting Horizons 69, 70 (2008).

[15/] See further discussion regarding the projects of these standard setters and regulators in Section II., *Board Outreach*.

[16/] Section 101(a) of the Sarbanes-Oxley Act of 2002 (the "Act").

would be specific to each audit. The auditor's required communication would focus on those matters the auditor addressed during the audit of the financial statements that involved the most difficult, subjective, or complex auditor judgments or posed the most difficulty to the auditor in obtaining sufficient appropriate audit evidence or forming an opinion on the financial statements.

The auditor's report as currently designed, and as confirmed by academic research, conveys to investors and other financial statement users little of the information obtained and evaluated by the auditor.[17/] The proposed auditor reporting standard is intended to provide investors and other financial statement users with potentially valuable information that investors have expressed interest in receiving but have not had access to in the past.[18/]

Requiring auditors to communicate critical audit matters could help investors and other financial statement users focus on aspects of the company's financial statements that the auditor also found to be challenging. Communicating critical audit matters would provide investors and other financial statement users with previously unknown information about the audit that could enable them to analyze more closely any related financial statement accounts and disclosures. The communication of critical audit matters could help to alleviate the information asymmetry[19/] that exists between company management and investors. More specifically, company management is typically aware of the auditor's most challenging areas in the audit because of regular interactions with the auditor as part of the audit, but this information is not usually known to investors. Reducing the level of information asymmetry between company management and investors could result in more efficient capital allocation and, as academic research has shown, could lower the average cost of capital.[20/] The Board is

---

[17/] See Bryan K. Church, Shawn M. Davis, and Susan A. McCracken, *The Auditor's Reporting Model: A Literature Overview and Research Synthesis*, 22 Accounting Horizons 69, 70 (2008).

[18/] See CFA Institute's surveys: *Usefulness of the Independent Auditor's Report* (May 4, 2011), *Independent Auditor's Report Survey Results* (February 26, 2010), and *Independent Auditor's Report Monthly Poll Results* (March 12, 2008), available at http://www.cfainstitute.org/about/research/surveys/pages/index.aspx.

[19/] Economists often describe information asymmetry as an imbalance, where one party has more or better information than another party.

[20/] See David Easley and Maureen O'Hara, *Information and the Cost of Capital*, 59 The Journal of Finance 1553, 1553-1583 (2004).

seeking comment on whether the information communicated in critical audit matters would be valuable to investors and could reduce information asymmetry.

The proposed other information standard would respond to investors' interests in obtaining information regarding the auditor's responsibilities for other information outside the financial statements that is contained in documents that include the audited financial statements and the related auditor's report. In considering the nature and form of auditor reporting on other information, the Board evaluated the existing auditing standard related to the auditor's responsibilities with respect to other information and determined it was appropriate to update the other information standard to support a description in the auditor's report. The proposed other information standard is intended to improve the auditor's procedures and enhance the auditor's responsibilities with respect to other information, further protecting the interests of investors. "Other information" in the proposed other information standard refers to information in a company's annual report filed with the SEC under the Exchange Act that also contains that company's audited financial statements and the related auditor's report. The proposed enhancements to the required auditor's procedures in the proposed other information standard are intended to provide a specific basis for the auditor's description in the auditor's report of the auditor's responsibilities for, and the results of, the auditor's evaluation of the other information.

The required procedures under the proposed other information standard would focus the auditor's attention on the identification of material inconsistencies between the other information and the company's audited financial statements and on the identification of material misstatements of fact, based on relevant evidence obtained and conclusions reached during the audit. When evaluating the other information, the auditor would be in a position to identify potential inconsistencies between the other information and the company's financial statements that could be difficult for investors and other financial statement users to identify when analyzing the company's financial performance. Such inconsistencies could occur for a number of reasons, including unintentional error, managerial biases,[21/] or intentional misreporting.[22/] As a result of the

auditor's evaluation of other information and communication of any potential material inconsistencies or material misstatements of fact to the company's management, the proposed other information standard could promote consistency between the other information and the audited financial statements, which in turn could increase the amount and quality of information[23/] available to investors and other financial statement users. In general, increasing the amount or quality of information available to investors also could facilitate more efficient capital allocation decisions.[24/] Academic research has shown that increased quality of information could result in a reduction in the average cost of capital.[25/] The Board is seeking comment on whether the proposed other information standard would increase the quality of information available to investors.

The Board anticipates that the proposed auditor reporting standard and proposed other information standard will have cost implications for both auditors and companies, including audit committees, as further discussed in this release and Appendices 5 and 6.

The remaining sections of this release describe the outreach conducted by the Board in considering possible changes to the auditor's report, the development and overview of the proposed standards and amendments, and alternatives considered. Additionally, this release includes a discussion of the applicability of the proposed standards and amendments to the audits of brokers and dealers and considerations regarding audits of emerging growth companies ("EGCs").

---

[23/] The term "quality of information" is formalized by the concept of precision. Information economics frequently treats information as consisting of two components: a signal that conveys information and noise which inhibits the interpretation of the signal. Precision is the inverse of noise so that decreased noise results in increased precision and a more readily interpretable signal. See Robert E. Verrecchia, *The Use of Mathematical Models in Financial Accounting*, 20 Journal of Accounting Research 1, 1-42 (1982).

[24/] See Richard A. Lambert, Christian Leuz, and Robert E. Verrecchia, *Information Asymmetry, Information Precision, and the Cost of Capital*, 16 Review of Finance 1, 1-29 (2011).

[25/] Empirical research generally finds that increased public disclosure of information is associated with decreased cost of equity capital. For a review of the literature, refer to Christine A. Botosan, Marlene A. Plumlee, and Yuan Xie, *The Role of Information Precision in Determining the Cost of Equity Capital*, 9 Review of Accounting Studies 233, 233-259 (2004).

## II. Board Outreach

Over the last three years, the Board has conducted extensive outreach with investors, auditors, financial statement preparers, and others to better understand the nature of improvements that could be made to make the auditor's report more informative. In developing its proposals, the Board also sought to better understand issues related to implementing improvements, including potential costs and other economic considerations involved.

From October 2010 through March 2011, the staff of the Board's Office of the Chief Auditor ("staff") met and held discussions with investors, financial statement preparers, auditors, audit committee members, other regulators and standard setters, and representatives of academia. During this outreach, some investors indicated that one of the primary reasons that they are looking to the auditor for more information, rather than management or the audit committee, is that the auditor is an independent third party. Some investors indicated that if they had a better understanding about the audit and how the audit was conducted relative to a particular company, then they would have a better perspective regarding the potential risks of material misstatement in a company's financial statements. The staff reported its findings to the Board at an open meeting on March 22, 2011.[26/] The Board concluded from its initial outreach that changing the auditor's report could improve the informational value of the auditor's report and enhance the relevance of the auditor's reporting model. During this same period at an IAG meeting, the recent financial crisis was mentioned as an example of a situation in which expanded auditor reporting in advance of, and during, the crisis might have been helpful in assessing a company's financial statements and providing early warning signals regarding potential issues.[27/]

Subsequently, on June 21, 2011, the Board issued *Concept Release on Possible Revisions to PCAOB Standards Related to Reports on Audited Financial Statements and Related Amendments to PCAOB Standards* (the "concept release")[28/] to seek public

comment on potential changes to the auditor's reporting model. The objective of the concept release was to seek comment on several alternatives for changing the auditor's reporting model in order to make auditor reporting more relevant and useful to investors and other financial statement users. The alternatives presented were:

- A supplemental narrative report, described as an auditor's discussion and analysis ("AD&A");
- Required and expanded use of emphasis paragraphs;
- Auditor assurance on other information outside the financial statements; and
- Clarification of the standard auditor's report.

The concept release indicated that each of the alternatives presented would retain the pass/fail opinion of the existing auditor's report and was not intended to alter the auditor's ultimate responsibility to obtain sufficient appropriate audit evidence to support the audit opinion. The concept release also indicated that the alternatives were not mutually exclusive and that other alternatives could be considered.

The Board received 155 comment letters on the concept release.[29/] Additionally, on September 15, 2011, the Board held a public roundtable ("roundtable") to obtain insight from a diverse group of investors and other financial statement users, preparers of financial statements, audit committee members, and auditors on the alternatives presented in the concept release.[30/] The topic was further discussed at the November 2011 and 2012 SAG meetings.[31/]

Commenters generally supported the Board updating and enhancing the auditor reporting standard and largely agreed that the existing auditor's report provided little informational value about a specific audit to investors and other financial statement

---

[29/] See comment letters on the concept release available at http://pcaobus.org/Rules/Rulemaking/Pages/Docket034Comments.aspx.

[30/] See transcript of the roundtable available at http://pcaobus.org/Rules/Rulemaking/Docket034/09152011_Roundtable_Transcript.pdf.

[31/] See SAG meeting transcripts for November 2011 and 2012 available at http://pcaobus.org/Rules/Rulemaking/Docket034/11102011_SAG_Transcript.pdf, http://pcaobus.org/Rules/Rulemaking/Docket034/11162012_SAG_Transcript.pdf, and http://pcaobus.org/Rules/Rulemaking/Docket034/11152012_SAG_Transcript.pdf.

users beyond the pass/fail opinion. However, there were widely diverse views among different constituencies about the nature and extent of changes that should be made to the existing auditor's report and the potential costs associated with those changes.

Investors strongly supported the Board's initiative to enhance the existing auditor's report to provide more informative reporting about the audit, the financial statements, or both. This group of commenters generally expressed the view that the existing auditor's report was not sufficiently informative to meet the needs of investors who would benefit from further insights obtained by the auditor during the audit of the financial statements. Investors most frequently suggested additional auditor reporting on the following information:

- Areas of high financial statement and audit risk;
- Areas of significant auditor judgment;
- The most significant matters in the financial statements, such as significant management judgments, estimates, and areas with significant measurement uncertainty;
- The quality, not just the acceptability, of accounting policies and practices, for instance, management's application of accounting policies that are acceptable under the applicable financial reporting framework but are not the preferred practice;
- Significant changes in or events affecting the financial statements, including unusual transactions; and
- Identification of where significant matters are disclosed in the financial statements for investors' further information.

Some investors recognized that, if the auditor's report included this information, audit costs could increase due to the time required to draft and review such communications. However, these investors also expressed the belief that these costs, which are ultimately paid for by investors, likely would be modest since the communication would be based on the work already performed by the auditor. These commenters indicated that the benefits in terms of increased confidence in corporate reporting outweighed the costs.

Financial statement preparers, in general, did not object to the clarifications to the auditor's report described in the concept release if such clarifications would be useful to financial statement users and would increase the transparency into the audit process. The majority of these commenters, however, believed that there was little need for changes to the existing auditor's report and believed it was the responsibility of the company, not the auditors, to provide information about the company's financial statements to financial statement users. Audit committee members expressed similar views.

Auditors generally were supportive of changes to the existing auditor's report but believed that any additional auditor reporting should be objective and factual. This group of commenters also believed that certain changes to the auditor's report could provide benefits to users of the financial statements by providing additional clarification about the audit and audit process. Auditors noted that the alternatives presented in the concept release for changing the auditor's report would require additional effort, primarily related to drafting and reviewing the auditor's report, and as a result would increase audit costs and the potential for auditor liability.

Other commenters, including academics, other regulators, and other individuals and organizations, expressed a variety of views about changes to the existing auditor's report. For example, one commenter indicated that the existing auditor's report is not particularly informative and does not provide information regarding the nature and type of procedures, processes, and information used in forming the auditor's opinion. Other commenters indicated that the current pass/fail model is sufficient and that it is the responsibility of the company, and not the auditors, to provide additional disclosures about the company to investors.

One of the alternatives presented in the concept release was to require auditor assurance on other information outside the financial statements. Some commenters noted that they were uncertain as to the level of the auditor's responsibility for other information outside the financial statements. Some of those commenters supported changes to the auditor's report that describe the auditor's existing responsibilities related to information outside the financial statements to inform investors and other financial statement users of the extent of the auditor's responsibility for other information contained in a document that also contains the financial statements and the related auditor's report. A number of commenters suggested that the Board also consider requiring the auditor to include in the auditor's report the auditor's conclusions on the work performed, in addition to the description of the auditor's responsibilities regarding other information outside the financial statements.

In developing the proposed auditor reporting standard, the Board considered recent developments of (1) the IAASB's project on auditor reporting;[32/] (2) the EC's

---

[32/] See IAASB project summary at http://www.ifac.org/auditing-assurance/projects/auditor-reporting. The IAASB issued an exposure draft, *Reporting* legislative proposal and subsequent European Parliamentary report that relate to audits of public interest entities;[33/] and (3) the FRC's recently adopted revision of its auditing standard on the auditor's report.[34/] The IAASB's project, the EC's proposal and subsequent amendments, and the FRC's revised auditing standard would require auditor reporting on certain additional matters.

In developing the proposed other information standard, the Board considered the IAASB's recent proposal, *The Auditor's Responsibilities Relating to Other Information in Documents Containing or Accompanying Audited Financial Statements and the Auditor's Report Thereon*.[35/]

## III. Development and Overview of the Proposals

In developing the proposed standards and amendments, the Board considered (1) the information communicated in the current auditor's report; (2) the potential benefits that may result from auditors providing additional communications; (3) the potential costs related to the approach proposed by the Board; (4) alternative approaches (which are discussed in Section IV., *Alternatives Considered*); (5) current developments in similar projects by other standard setters; (6) relevant academic

research; and (7) significant comments received by the Board from its outreach efforts, including comments received on the concept release. In considering the nature and extent of changes to the existing auditor's report, the Board sought to respond to the needs of investors and other financial statement users by making the auditor's report more informative while not adding undue burden to the financial reporting process.

## A. Proposed Auditor Reporting Standard

The proposed auditor reporting standard, among other things, would make the following significant changes to the existing auditor's report:

- Require the auditor to communicate in the auditor's report critical audit matters that were addressed during the audit of the current period's financial statements. If the auditor determines that there are no critical audit matters, the auditor would state in the auditor's report that the auditor determined that there are no such matters to communicate.

- Add new elements to the auditor's report related to auditor independence, auditor tenure, and the auditor's responsibility for, and evaluation of, other information in annual reports containing the audited financial statements and the related auditor's report.

- Enhance certain standardized language in the auditor's report, including the addition of the phrase "whether due to error or fraud," when describing the auditor's responsibility under PCAOB standards to obtain reasonable assurance about whether the financial statements are free of material misstatements, whether due to error or fraud.

The proposed auditor reporting standard would retain the pass/fail model of the existing auditor's report. The proposed auditor reporting standard would also retain explanatory paragraphs that are required in certain circumstances and the auditor's ability to emphasize a matter in the financial statements.

### *1. Auditor Reporting of Critical Audit Matters*

In developing the proposed requirements for the communication of critical audit matters, the Board considered many investors' requests for information regarding matters related to the audit and the most significant matters in the financial statements, such as significant management judgments, estimates, and areas with significant measurement uncertainty. The concept release described as alternatives for providing additional information to financial statement users about the audit and the financial statements: (1) an AD&A and (2) required and expanded emphasis paragraphs. The

Board, however, is not proposing any of these alternatives, which are described further in Section IV., *Alternatives Considered*.

The Board, instead, is proposing requirements for the auditor to communicate in the auditor's report "critical audit matters." Critical audit matters are those matters addressed during the audit that (1) involved the most difficult, subjective, or complex auditor judgments; (2) posed the most difficulty to the auditor in obtaining sufficient appropriate evidence; or (3) posed the most difficulty to the auditor in forming the opinion on the financial statements. Use of the word most is not intended to imply that only one matter under each criteria would qualify as a critical audit matter.

The Board is proposing communication of critical audit matters in response to the requests of many investors to improve the relevance of the auditor's report by providing more insight about the most significant matters that the auditor addressed in the audit. Communicating critical audit matters likely would provide meaningful information to investors and other financial statement users about the auditor's work in performing the audit and in forming an opinion on the financial statements, taken as a whole.

The auditor would determine which matters to communicate as critical audit matters. The proposed auditor reporting standard indicates that critical audit matters ordinarily are matters of such importance that they are included in the matters required to be (1) documented in the engagement completion document,[36/] which summarizes the significant issues and findings from the audit; (2) reviewed by the engagement quality reviewer;[37/] (3) communicated to the audit committee;[38/] or (4) any combination of the three. The Board would not expect that each matter included in any one or more of these sources would be a critical audit matter. Referring to these sources can provide a cost-effective and efficient means of determining critical audit matters. Additionally, the proposed auditor reporting standard provides a list of factors for the auditor to take into account in determining the critical audit matters. The factors are intended to help the auditor determine, from the results of the audit or evidence obtained, which matters are critical audit matters.

The auditor's communication of critical audit matters would be based on information known to the auditor and procedures that the auditor has already performed as part of the audit. Thus, the proposed auditor reporting standard does not modify the

---

[36/] Auditing Standard No. 3, *Audit Documentation*.

[37/] Auditing Standard No. 7, *Engagement Quality Review*.

[38/] Auditing Standard No. 16, *Communications with Audit Committees*, and other PCAOB standards.

objective of the audit of the financial statements or impose new audit performance requirements, other than the determination, communication, and documentation of critical audit matters.

The proposed auditor reporting standard would require the auditor to determine critical audit matters in the audit of the current period's financial statements, based on the results of the audit or evidence obtained. The proposed auditor reporting standard also provides that in situations in which the auditor determines there are no critical audit matters to communicate, the auditor would state that conclusion in the auditor's report. Critical audit matters would be determined based on the facts and circumstances of each audit. It is expected that in most audits the auditor would determine that there are critical audit matters.

The description of critical audit matters in the auditor's report would:

- Identify the critical audit matter;
- Describe the considerations that led the auditor to determine that the matter is a critical audit matter; and
- Refer to the relevant financial statement accounts and disclosures that relate to the critical audit matter, when applicable.

Communication of critical audit matters in the auditor's report is intended to make the auditor's report more informative, thus increasing its relevance and usefulness to investors and other financial statement users. Academic research suggests that the prominence with which information is disclosed can have implications for investment decision making.[39/] Communication of critical audit matters in the auditor's report could focus investors' and other financial statement users' attention on challenges associated with the audit that may contribute to the information used in investment decision making. A more informative auditor's report could benefit investors and other financial statement users by increasing the prominence of potentially valuable information, thus increasing the value of the auditor's report.

Improving the auditor's report through the communication of critical audit matters also would address some commenters' concerns that it is the company's or the audit committee's responsibility, not the auditor's, to provide information, including any analysis, about the company's financial statements to financial statement users. The

---

[39/] See David Hirshleifer and Siew Hong Teoh, *Limited Attention, Information Disclosure, and Financial Reporting*, 36 Journal of Accounting and Economics 337, 337-386 (2003).

proposed communication of critical audit matters would not fundamentally change the auditor's current role from attesting on information prepared by management. Rather, the auditor would be communicating information about the audit, based on audit procedures the auditor performed.

The Board intends for the proposed communication of critical audit matters to be responsive to cost issues raised by commenters. Because critical audit matters are based on the relative complexity and difficulty of the audit, the Board anticipates that the proposed auditor reporting standard would be scalable based on the size, nature, and complexity of the audit of the company. The Board also anticipates, however, that reporting of critical audit matters in the auditor's report would have cost-related implications for auditors and companies, including audit committees. In addition to the potential cost implications, there could be potential unintended consequences associated with requiring that auditors communicate critical audit matters in the auditor's report. For example, the effort required to determine, prepare language for communication, and document critical audit matters likely would occur during the final stages of the audit which might reduce the time available to the auditor for review and completion of the audit work. The Board seeks comments on the nature and extent of those costs, as well as regarding any potential unintended consequences.

*2. Basic Elements of the Auditor's Report*

The existing auditor's report identifies the financial statements audited, describes the nature of an audit, and expresses the auditor's opinion using standardized language. The existing auditor reporting standard also provides a list of basic elements that are required to be in the auditor's report.[40/]

The concept release sought comment on whether the standardized language in the auditor's report required by the existing auditing standard is useful, whether any of the language could be clarified, and whether the auditor's report should describe the auditor's responsibilities for other information outside the financial statements. Several commenters indicated that clarifying language and certain other matters in the auditor's report could improve financial statement users' understanding of the nature of an audit, the auditor's responsibilities, and the purpose of the auditor's report. Some commenters, however, indicated that additional boilerplate language to clarify language already in the report would not be helpful. After considering the comments, the Board is proposing certain clarifications of the language in the report that the Board believes would enhance users' understanding about the audit and the auditor, including the auditor's responsibilities for other information outside the financial statements.

---

[40/] See AU secs. 508.06-.08.

The proposed auditor reporting standard primarily retains the basic elements of the auditor's report contained in existing auditor reporting standards,[41/] incorporates certain elements from existing illustrative auditor's reports, and further describes some of the auditor's existing responsibilities, such as the auditor's responsibility for the notes to the financial statements and fraud.

Additionally, the proposed auditor reporting standard adds the following new elements to the auditor's report to provide investors and other financial statement users with information about the audit and the auditor:

- Auditor independence − a statement regarding the auditor's existing requirements to be independent of the company, intended to enhance investors' and other financial statement users' understanding about the auditor's obligations related to independence and to serve as a reminder to auditors of these obligations;

- Auditor tenure − the year the auditor began serving as the company's auditor, to provide investors and other financial statement users with information about the length of the relationship between the auditor and the company; and

- Other information – the auditor's responsibilities for, and the results of, the auditor's evaluation of other information in annual reports filed with the SEC containing the financial statements and the related auditor's report, to provide investors and other financial statement users with an understanding of the auditor's responsibilities for, and the results of, the auditor's evaluation of the other information.

The Board anticipates that these proposed changes to the auditor's report likely would have some cost-related implications for auditors and companies, including audit committees. The Board seeks comments on the nature and extent of those costs.

*3. Explanatory Language*

Under existing PCAOB standards, certain circumstances require that the auditor include explanatory language or paragraphs in the auditor's report, such as when there

---

[41/] See AU sec. 508 and Auditing Standard No. 1, *References in Auditor's Reports to the Standards of the Public Company Accounting Oversight Board*.

is substantial doubt about the company's ability to continue as a going concern[42/] or the correction of a material misstatement in previously issued financial statements. These circumstances are described in other PCAOB standards, which generally provide standardized language to be included in the auditor's report. Similar to the existing auditor reporting standard, the proposed auditor reporting standard describes those circumstances and provides references to the relevant PCAOB standards.

Additionally, the proposed auditor reporting standard retains from the existing standard the auditor's ability to include explanatory paragraphs in the auditor's report to emphasize a matter regarding the financial statements. Currently, such explanatory paragraphs are not required and may be added solely at the auditor's discretion.[43/] As described in the proposed auditor reporting standard, these explanatory paragraphs would refer only to information presented or disclosed in the financial statements. The proposed auditor reporting standard provides several examples of when an auditor might include such explanatory paragraphs.

### B. Auditor's Responsibilities Regarding Other Information

Other information outside the financial statements may be relevant to an audit of the financial statements or to the auditor's decision to be associated with the company's annual report. The proposed other information standard describes "other information" as information, other than the audited financial statements and the related auditor's report, included in a company's annual report that is filed with the SEC under the Exchange Act[44/] and contains that company's audited financial statements and the related auditor's report. For example, other information in an annual report filed by a company on Form 10-K would include, among other items, Selected Financial Data, Management's Discussion & Analysis ("MD&A"), exhibits, and certain information incorporated by reference.

---

[42/] The Board is considering a separate standard-setting project to enhance performance requirements and auditor reporting related to a company's ability to continue as a going concern.

[43/] See AU sec. 508.19.

[44/] Consistent with existing AU sec. 550, *Other Information in Documents Containing Audited Financial Statements*, the proposed other information standard would not apply to documents filed with the SEC under the Securities Act that contain audited financial statements and the related auditor's report. See further discussion regarding Securities Act documents in Appendix 6.

Under existing PCAOB standards, the auditor has a responsibility to "read and consider" other information in certain documents that also contain the audited financial statements and the related auditor's report; however, there is no related reporting requirement to describe the auditor's responsibility with respect to other information.

The Board began considering the existing other information standard, AU sec. 550, as part of an effort to better explain to investors and other financial statement users the auditor's responsibilities related to other information outside the financial statements. Through that consideration, the Board determined that changes were appropriate to provide a specific basis for the description in the auditor's report of the auditor's responsibilities for, and the results of, the auditor's evaluation of other information outside the financial statements.

As a result of the link between the proposed auditor reporting standard and the proposed other information standard, the financial statement user would obtain useful information such as: (1) the nature and scope of the auditor's responsibilities with respect to the other information; (2) clarification of what other information was evaluated by the auditor; and (3) a description of the results of the auditor's evaluation of the other information.

Under the existing other information standard, the auditor considers whether the other information is materially inconsistent with information in the financial statements. If the auditor concludes there is a material inconsistency between the other information and the financial statements, the existing standard provides the auditor with certain procedures to respond to the material inconsistency. Additionally, the existing standard provides that, if while reading the other information for a material inconsistency, the auditor becomes aware of a material misstatement of fact in the other information, the auditor would discuss this with management and perform other procedures based on the auditor's judgment.

The proposed other information standard, among other things, would:

- Apply the auditor's responsibility for other information specifically to a company's annual reports filed with the SEC under the Exchange Act that contain that company's audited financial statements and the related auditor's report;

- Enhance the auditor's responsibility with respect to other information by adding procedures for the auditor to perform in evaluating the other information based on relevant audit evidence obtained and conclusions reached during the audit;

- Require the auditor to evaluate the other information for a material misstatement of fact as well as for a material inconsistency with amounts or information, or the manner of their presentation, in the audited financial statements; and

- Require communication in the auditor's report regarding the auditor's responsibilities for, and the results of, the auditor's evaluation of the other information.

The Board's existing standard has no requirements for the auditor beyond "read and consider" with respect to the other information. In contrast, the proposed other information standard includes procedures that auditors consistently would perform in evaluating the other information. The Board believes that, in practice, some auditors currently perform procedures related to other information similar to the procedures in the proposed other information standard.

The Board notes that some of the other information not directly related to the audited financial statements might be non-financial in nature or related to the company's operations and, as a result, the auditor might not have obtained evidence or reached any conclusion regarding such information during the audit. The auditor's evaluation would be based on relevant audit evidence obtained and conclusions reached during the audit. The auditor would not be required to perform procedures to obtain additional evidence regarding other information not directly related to the financial statements that was not required to be obtained during the audit.

In developing the proposed other information standard, the Board considered the additional effort and cost of implementing changes in the auditor's responsibilities regarding other information. The Board believes that the proposed approach represents a cost-sensitive approach that would be scalable to less complex companies based on the nature and extent of the information outside the financial statements for such companies as compared to companies with more extensive operations. The Board, however, anticipates that the proposed other information standard would have cost implications for auditors and companies, including audit committees. The Board requests comments regarding the nature and extent of those costs.

## IV. Alternatives Considered

Before developing the proposed standards and amendments, the Board explored alternatives through extended outreach with investors, companies, auditors, audit committee members, and others. This outreach effort was followed by issuing the concept release in 2011, analyzing comment letters, holding a roundtable, and discussions with the SAG and IAG.

The concept release described alternatives for providing additional information to financial statement users about the audit and the financial statements, specifically: (1) an AD&A; (2) required and expanded emphasis paragraphs; (3) auditor assurance on other information outside the financial statements; and (4) clarification of the standard auditor's report. The following paragraphs explain the alternatives in the concept release. The Board, however, is not proposing any of these alternatives. The Board believes that its proposed approach, which includes communicating critical audit matters, provides many of the benefits described in the concept release while, at the same time, substantially reducing the challenges and costs mentioned by commenters, as explained in Section E., *Approach Proposed by the Board*, below.

The Board also considered retaining existing AU sec. 508 related to the unqualified report and issuing a staff practice alert or other guidance regarding the potential use of existing emphasis paragraphs. The Board believes, however, that proposing a new standard with changes to the auditor's report is appropriate in relation to its mandate under the Act to promote *informative*, accurate, and independent audit reports[45/] [emphasis added]. Additionally, the Board considered retaining AU sec. 550 and describing the auditor's responsibilities under AU sec. 550 in the auditor's report. The Board believes that issuing a new standard regarding the other information is appropriate because the proposed other information standard would provide a consistent basis for the auditor's evaluation of the other information and related auditor reporting.

## A. Auditor's Discussion and Analysis

As described in the concept release, an AD&A could provide investors with a view of the audit and the financial statements "through the auditor's eyes." The intent of the AD&A alternative was to provide the auditor with the ability to write a separate, supplemental narrative report that would follow the auditor's report on the financial statements and contain an open-ended discussion of the auditor's perspectives about the audit and the company's financial statements. The concept release describes the AD&A as being among the most expansive forms of auditor reporting.

According to the concept release, an AD&A could include information about the audit, such as audit risk identified in the audit, audit procedures and results, and auditor independence, and provide the auditor with the ability to communicate to investors and other users of the financial statements the auditor's significant judgments in forming the audit opinion. The AD&A, however, also could include the auditor's perspectives regarding the company's financial statements, such as management's judgments and

---

[45/] See Section 101(a) of the Act.

estimates, accounting policies and practices, and difficult or contentious issues. Also, as described in the concept release, an AD&A could provide further context to an investor's understanding of a company's financial statements and management's related discussion and analysis. In that regard, the concept release noted that the auditor's perspectives in an AD&A on certain matters could differ from those management might provide in its MD&A,[46/] possibly requiring additional time by management, the auditor, and the audit committee to resolve those differences before any views could be reflected in an AD&A or the MD&A.

Many investors indicated that additional information through an AD&A would provide more transparency into the audit and the financial statements. One commenter suggested that factors that would affect the way an auditor assesses risks of material misstatement in the financial statements might also affect how an investor views risks of investing in the company. Some commenters indicated that an AD&A would heighten the perceived value of the audit, increase competition among auditors based on audit quality, particularly with respect to auditor skepticism, and provide the firms more leverage to affect change and enhance management disclosure in the financial statements.

Other commenters, however, expressed reservations about an AD&A, as described in the concept release, primarily because they saw this form of supplemental narrative reporting as fundamentally changing the auditor's current role from attesting on information prepared by management to providing an analysis of financial statement information. These commenters were also concerned about possible undue reliance by financial statement users on an AD&A-type report to make investment decisions and the additional effort by auditors to write and review an AD&A in a compressed reporting timeframe. Some commenters were concerned that this type of auditor reporting could diminish the governance role of the audit committee over the company's disclosure of financial information by allowing auditors to make independent disclosures about the company's financial statements. Some commenters noted that an AD&A-type reporting would require auditors to draft customized language in a supplemental free-form report for public use. Additionally, commenters also noted that absent an extension from the SEC of filing and reporting deadlines, an AD&A would reduce the time available to the most senior members of the audit team for review and completion of audit work in order to identify matters to be included in an AD&A, draft customized language, and work with centralized review personnel to complete the review process.

---

[46/] See SEC Regulation S-K, Item 303; 17 CFR § 229.303.

## B. Required and Expanded Emphasis Paragraphs

Emphasis paragraphs are not currently required under existing PCAOB standards but may be added, solely at the auditor's discretion, to emphasize a matter regarding the financial statements.[47] As described in the concept release, required and expanded emphasis paragraphs could highlight the most significant matters in the financial statements and identify where these matters are disclosed in the financial statements. The concept release indicated that emphasis paragraphs could be required in areas of critical importance to the financial statements, including significant management judgments and estimates, areas with significant measurement uncertainty, and other areas that the auditor determines are important for a better understanding of the financial statement presentation. The alternative in the concept release for required and expanded emphasis paragraphs was intended to provide investors with enhanced auditor reporting on much of the information investors indicated they want about the audit and the financial statements. As also explained in the concept release, for each matter of emphasis the auditor could be required to comment on the key audit procedures performed pertaining to the identified matters. The concept release indicated that this alternative was somewhat analogous to the French requirement that the auditor's report contain a "justification for the auditor's assessments."[48]

Many commenters were supportive of using emphasis paragraphs to highlight significant matters to a reader, such as areas with significant management judgments and estimates or a high level of measurement uncertainty. Some commenters supported an emphasis paragraph approach that would inform financial statement users about important matters on which to focus in the financial statements for purposes of their investment decisions.

Many investors indicated that they did not support an auditor's report that only references the relevant financial statement disclosures because no incremental information would be provided in the emphasis paragraphs regarding the company's financial statements or the audit beyond what is already disclosed by management. Some other commenters noted that emphasis paragraphs raised concerns regarding the auditor's disclosure of original information that is not otherwise publicly known.

---

[47] See AU sec. 508.19.

[48] On August 1, 2003, article L823-9 of the French Code of Commerce Financial security law was enacted, which requires that the statutory auditor include in the auditor's report a "justification of the auditor's assessments."

Additionally, at the November 2012 SAG meeting, SAG members discussed a potential approach to amending the auditor's reporting model that would include required emphasis paragraphs, based on the matters communicated to the audit committee under Auditing Standard No. 16.[49/] Some SAG members were supportive of linking auditor reporting in expanded emphasis paragraphs to matters communicated to the audit committee under Auditing Standard No. 16.[50/] Other SAG members did not support expanded emphasis paragraphs that would be specifically linked to communications with the audit committee because, in their view, it might affect the nature and extent of the communications between the auditor and the audit committee.[51/]

## C. Auditor Assurance on Other Information Outside the Financial Statements

The concept release indicated that an alternative for enhanced auditor reporting could be auditor examination of, and reporting on, information outside the financial statements, such as MD&A or other selected information (for example, non-GAAP information or earnings releases). Some commenters indicated that certain information outside the financial statements, especially the MD&A, is important to investors to provide context within which the financial results and financial position can be interpreted.

However, investors generally were not supportive of auditor assurance on other information outside the financial statements as an alternative for enhancing the auditor's reporting model because it would not be responsive to their information needs, and they saw little benefit with this type of auditor assurance. Several commenters expressed concern that auditor assurance on information outside the financial statements would increase the time needed to perform these procedures and would not provide greater benefit than the auditor's current responsibilities related to other information outside the financial statements.

Several commenters suggested that they would support changes to the auditor's report that described the auditor's existing responsibilities related to other information and the auditor's conclusions related to the other information.

## D. Clarification of Terms and Responsibilities in the Auditor's Report

### *1. Reasonable Assurance*

In the concept release, the Board sought comment on whether the term "reasonable assurance" should be further described in the auditor's report. Under existing AU sec. 508, the auditor's report explicitly asserts that the audit was conducted in accordance with the standards of the PCAOB and that "those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement." An existing auditing standard describes reasonable assurance as being a "high level of assurance, but not absolute assurance."[52/]

Commenters generally did not support adding additional language to the auditor's report that would further explain the term "reasonable assurance." Commenters suggested that adding additional language would not significantly enhance financial statement users' understanding of the meaning of the term "reasonable assurance."

### *2. Management's Responsibility for the Preparation of the Financial Statements*

In the concept release, the Board sought comment on whether the auditor's report should state that management prepares the financial statements and has responsibility for the fair presentation of the financial statements.

Under existing auditing standards, the standard auditor's report includes a statement that the financial statements are the responsibility of the company's management and that the auditor's responsibility is to express an opinion on the financial statements based on his or her audit.[53/]

Some commenters supported clarification in the auditor's report with respect to management's responsibility for the preparation of the financial statements. These commenters indicated that some clarifying language could improve investors' and other financial statement users' understanding of management's responsibilities for the preparation of the financial statements. Conversely, other commenters were against such a clarification, stating that additional language is unnecessary because similar language is already included in the auditor's report and the SEC requires corporate officers' certification of the financial statements.

---

52/ See paragraph .10 of AU sec. 230, *Due Professional Care in the Performance of Work*.

53/ See AU sec. 508.08.c.

Because the existing language in the auditor's report is generally understood to encompass management's responsibility for both the preparation and fair presentation of the financial statements, the Board is not proposing to modify the auditor's report in this regard.

## E. Approach Proposed by the Board

The Board believes the proposed auditor reporting standard and the proposed other information standard provide many of the benefits described in the concept release regarding an AD&A, required and expanded emphasis paragraphs, and auditor assurance on information outside the financial statements. The Board also believes that its proposed approach should eliminate or reduce some of the challenges mentioned by commenters in connection with the alternatives described in the concept release.

Unlike emphasis paragraphs as described in existing AU sec. 508 that generally just point to a disclosure in the company's financial statements, the proposed auditor reporting standard would require the auditor to communicate a wider range of information about the audit. Specifically, the proposed communication of critical audit matters would provide information regarding the reason the matter or matters were considered critical.

The proposed communication of critical audit matters would not fundamentally change the auditor's current role from attesting on information prepared by management to providing an analysis of financial statement information, which was one of the concerns expressed by commenters about an AD&A. Since the auditor would be communicating information regarding the audit, the communication of critical audit matters should not diminish the governance role of the audit committee over the company's disclosure of financial information. In addition, the proposed auditor reporting standard is intended to represent a cost-sensitive approach, because the auditor's determination of critical audit matters is based on the audit already performed.

The description in the auditor's report about the auditor's responsibilities for, and results of, the auditor's evaluation of other information is intended to provide greater clarity regarding the auditor's responsibilities for other information and the results of the auditor's evaluation of other information. Finally, the proposed other information standard would provide a specific basis for the auditor describing in the auditor's report the auditor's responsibilities for, and results of, the auditor's evaluation of other information.

## V. Audits of Brokers and Dealers

Section 982 of the Dodd-Frank Wall Street Reform and Consumer Protection Act ("Dodd-Frank Act")[54] expanded the authority of the Board to oversee the audits of brokers and dealers that are required under SEC rules. On July 30, 2013, the SEC amended SEC Rule 17*a*-5 under the Exchange Act, to require, among other things, that audits of brokers' and dealers' financial statements be performed in accordance with the standards of the PCAOB for fiscal years ending on or after June 1, 2014.[55] At the publication date of this release, the final SEC rules have not been published in the Federal Register.

The Board will consider, and is soliciting comments on, whether the proposed standards and amendments are appropriate for audits of brokers and dealers. Appendices 5 and 6 include specific questions on the applicability of the proposed standards and amendments to the audits of brokers and dealers.

## VI. Economic Considerations

Economic considerations related to the proposed standards are noted in this release with Appendices 5 and 6 providing further discussion regarding the economic considerations related to each proposed standard. Appendix 7 provides further discussion of economic considerations specifically related to the audits of EGCs.

## VII. Audits of Emerging Growth Companies

Pursuant to Section 104 of the Jumpstart Our Business Startups Act ("JOBS Act"), any rules adopted by the Board subsequent to April 5, 2012, do not apply to the audits of EGCs (as defined in Section 3(a)(80) of the Exchange Act) unless the SEC "determines that the application of such additional requirements is necessary or appropriate in the public interest, after considering the protection of investors, and whether the action will promote efficiency, competition, and capital formation."[56]

In connection with its proposals, the Board solicits views of commenters on the application of the proposed standards and amendments to audits of EGCs. As part of

---

54/ Pub. L. No. 111-203, 124 Stat. 1376 (July 21, 2010).

55/ See SEC, *Broker-Dealer Reports*, Exchange Act Release No. 70073 (July 30, 2013), which includes the final rules available at http://www.sec.gov/rules/final/2013/34-70073.pdf.

56/ See Section 103(a)(3)(a) of the Act.

considering the potential application of the proposed standards to the audits of EGCs, the Board specifically requests comments, including information and data, to the extent available, relevant to issues relating to efficiency, competition, and capital formation, as well as the benefits and costs associated with its proposals.

## VIII. Effective Date

The proposed standards and amendments would be effective, subject to approval by the SEC, for audits of financial statements for fiscal years beginning on or after December 15, 2015. The Board seeks comment on the effective date related to each proposed standard in Appendices 5 and 6. The Board's final decision on the effective date would take into account the extent and nature of comments received on the proposals as well as the timing of Board adoption of any final standard and amendments.

## IX. Appendices

The Board's proposal includes this Release ("Release") and the following appendices:

- Appendix 1 contains the text of Proposed Auditing Standard, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*.

- Appendix 2 contains the text of Proposed Auditing Standard, *The Auditor's Responsibilities Regarding Other Information in Certain Documents Containing Audited Financial Statements and the Related Auditor's Report*.

- Appendix 3 contains amendments related to the Proposed Auditing Standard, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*, to other PCAOB standards.

- Appendix 4 contains amendments related to the Proposed Auditing Standard, *The Auditor's Responsibilities Regarding Other Information in Certain Documents Containing Audited Financial Statements and the Related Auditor's Report*, to other PCAOB standards.

- Appendix 5 provides additional discussion of the Proposed Auditing Standard, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*, and the related amendments. Specific questions for commenters are included throughout this Appendix.

- Appendix 6 provides additional discussion of the Proposed Auditing Standard, *The Auditor's Responsibilities Regarding Other Information in Certain Documents Containing Audited Financial Statements and the Related Auditor's Report*, and the related amendments. Specific questions for commenters are included throughout this Appendix.

- Appendix 7 discusses certain other considerations related to audits of EGCs. Specific questions for commenters are included at the end of this Appendix.

Appendices 5 and 6 discuss significant comments received during the Board's outreach, provide additional background information regarding the requirements in the proposed standards and proposed amendments, and contain specific questions for commenters. Appendix 7 contains a discussion of certain considerations regarding the applicability of the proposed standards and the related amendments to the audits of EGCs and also includes specific questions for commenters.

## X. Opportunity for Public Comment

The Board is seeking comment on all aspects of the proposed standards and amendments as well as on the specific questions included in Appendices 5, 6, and 7. Among other things, the Board is seeking comment on economic considerations relating to the proposed standards and amendments, including potential costs. To assist the Board in evaluating such matters, the Board is requesting relevant information and empirical data, to the extent available to commenters, regarding the proposed standards and amendments. Commenters providing cost estimates are requested to provide the basis for any estimate provided. The Board is also requesting that commenters prepare, and forward to the Board for its consideration, examples of critical audit matters that could be communicated in the auditor's report under the proposed auditor reporting standard.[57/]

Written comments should be sent to the Office of the Secretary, PCAOB, 1666 K Street, N.W., Washington DC 20006-2803. Comments also may be submitted by email to comments@pcaobus.org or through the Board's website at: www.pcaobus.org. All comments should refer to the PCAOB Rulemaking Docket Matter No. 034 on the subject or reference line and should be received by the Board no later than 5:00 PM (EST) on December 11, 2013.

---

[57/] Any such examples would be posted to the PCAOB Rulemaking Docket Matter No. 034 without edits or redactions.

The Board will consider all comments received. The Board is considering holding a public roundtable in 2014 to discuss the proposed standards and comments received. If the Board decides to hold a public roundtable, the Board will reopen the comment period related to the proposed standards and amendments.

Following the close of the comment period(s), the Board will determine whether to adopt final rules, with or without amendments. Any final rules adopted will be submitted to the SEC for approval. Pursuant to Section 107 of the Act, proposed rules of the Board do not take effect unless approved by the SEC. Standards are rules of the Board under the Act.

* * *

On the 13th day of August, in the year 2013, the foregoing was, in accordance with the bylaws of the Public Company Accounting Oversight Board,

ADOPTED BY THE BOARD.

/s/ Phoebe W. Brown

Phoebe W. Brown

Secretary

PCAOB
Public Company Accounting Oversight Board

## APPENDIX 1

## Proposed Auditing Standard

## *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*

### *Introduction*

1. This standard establishes requirements regarding the content of the auditor's written report when the auditor expresses an unqualified opinion on the financial statements[1/] (the "auditor's unqualified report").[2/]

2. The auditor is in a position to express an unqualified opinion on the financial statements when the auditor conducted an audit in accordance with the standards of the Public Company Accounting Oversight Board ("PCAOB") and concludes that the financial statements, taken as a whole, are presented fairly, in all material respects,[3/] in conformity with the applicable financial reporting framework.[4/]

---

[1/] This standard uses the term "financial statements" as used by the U.S. Securities and Exchange Commission ("SEC") to include all notes to the statements and all related schedules. See SEC Rule 1-01(b) of Regulation S-X, 17 C.F.R. § 210.1-01(b). This and other PCAOB standards often refer to the notes as disclosures; see, e.g., Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*.

[2/] Paragraphs 85-98 and Appendix C, "Special Reporting Situations," of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, address the form and content of the auditor's report when the auditor performs an audit of internal control over financial reporting.

[3/] AU sec. 411, *The Meaning of Present Fairly in Conformity with Generally Accepted Accounting Principles*, describes the basis for an auditor's responsibility for forming an opinion on whether the company's financial statements are presented fairly in conformity with the applicable financial reporting framework.

[4/] The auditor should look to the requirements of the SEC for the company under audit with respect to the accounting principles applicable to that company.

3. When the auditor conducts an audit of financial statements in accordance with the standards of the PCAOB, some circumstances require that the auditor express a qualified opinion, adverse opinion, or disclaimer of opinion on the financial statements. AU sec. 508, [new proposed title] *Departures from Unqualified Opinions and Other Reporting Circumstances*, describes reporting requirements related to departures from unqualified opinions and other reporting circumstances.

## *Objectives*

4. The objectives of the auditor when the auditor concludes that an auditor's unqualified opinion is appropriate are to:

a. Issue a written report that expresses an unqualified opinion on the financial statements and describes the basis for that opinion; and

b. Communicate in the auditor's unqualified report **critical audit matters**[5/] relating to the audit of the financial statements or state that the auditor determined that there are no critical audit matters.

## *The Auditor's Unqualified Report*

5. The auditor's unqualified report includes:[6/]

a. The basic elements, as described in paragraph 6;

b. Communication of critical audit matters relating to the audit of the current period's financial statements, as described in paragraphs 7-14; and

c. Other explanatory language (or an explanatory paragraph), as appropriate in the circumstances, as described in paragraphs 15-16.

---

5/ This term, as defined in Appendix A, "Definitions," is set in **boldface type** the first time it appears.

6/ Appendix B provides an illustrative auditor's unqualified report.

PCAOB
Public Company Accounting Oversight Board

## Basic Elements

6. The auditor must include the following basic elements in the auditor's report:[7/]

   a. The title, "Report of Independent Registered Public Accounting Firm";

   b. Addressees that include, but are not necessarily limited to, (1) investors in the company, such as shareholders, and (2) the board of directors or equivalent body;[8/]

*Introduction*

   c. The name of the company whose financial statements were audited;

   d. A statement identifying each financial statement and related schedule, if applicable, that has been audited;[9/]

   e. The date of, or period covered by, each financial statement and related schedule, if applicable, identified in the report;

   f. A statement indicating that the financial statements, including the related notes and, if applicable, schedules, identified and collectively referred to in the report as the financial statements, were audited;

---

[7/] Laws, rules, and forms may contain requirements for auditor's reports of different types of companies. See, e.g., Investment Company Act § 30(g) and § 32(a)(4); SEC Rule 2-02 of Regulation S-X, 17 C.F.R. § 210.2-02; and Securities Exchange Act of 1934 ("Exchange Act") Rule 17a-5, 17 C.F.R. § 240.17a-5. Auditor reports on financial statements filed with the SEC are required to comply with all such applicable requirements.

[8/] For example, addressees might include other appropriate parties depending on the legal and governance structure of the company.

[9/] Various SEC rules and forms require that companies file schedules of information and that those schedules be audited if the company's financial statements are audited. See, e.g., SEC Rules 5-04, 6-10, 6A-05, and 7-05 of Regulation S-X, 17 C.F.R. §§ 210.5-04, 210.6-10, 210.6A-05, 210.7-05. See generally, SEC Rule 12-01 of Regulation S-X, 17 C.F.R. § 210.12-01, et seq., which address the form and content of certain SEC-required schedules.

g. A statement that the financial statements are the responsibility of the company's management;

h. A statement that the auditor is a public accounting firm registered with the PCAOB (United States) and is required to be independent with respect to the company in accordance with the United States federal securities laws and the applicable rules and regulations of the SEC and the PCAOB;[10/]

i. A statement containing the year the auditor began serving consecutively as the company's auditor;

> Note: For purposes of this subparagraph, references to the auditor include other firms that the auditor's firm has acquired or that have merged with the auditor's firm. If there is uncertainty as to the year the auditor began serving consecutively as the company's auditor, such as due to firm or company mergers, acquisitions, or changes in ownership structure, the auditor should state that the auditor is uncertain as to the year the auditor became the company's auditor and provide the earliest year of which the auditor has knowledge.

*Basis of Opinion*

j. A statement that the auditor's responsibility is to express an opinion on the financial statements based on the audit;

k. A statement that the audit was conducted in accordance with the standards of the PCAOB;

l. A statement that PCAOB standards require that the auditor plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud;

---

[10/] The term "United States federal securities laws" has the same meaning as "securities laws" as defined in PCAOB Rule 1001(s)(ii).

m. A statement that an audit includes:

(1) Performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks;

(2) Examining, on a test basis, appropriate evidence regarding the amounts and disclosures in the financial statements;

(3) Evaluating the accounting principles used and significant estimates made by management; and

(4) Evaluating the overall presentation of the financial statements;

n. A statement that the auditor believes that the audit provides a reasonable basis for the auditor's opinion;

*Opinion on the Financial Statements*

o. An opinion that the financial statements present fairly, in all material respects, the financial position of the company as of the balance sheet date and the results of its operations and its cash flows for the period then ended in conformity with the applicable financial reporting framework.[11/] The opinion should also include an identification of the applicable financial reporting framework;

*The Auditor's Responsibilities Regarding Other Information*

p. When other information is included in an annual report filed with the SEC under the Exchange Act that contains both the audited financial statements and the related auditor's report, a section titled "The Auditor's Responsibilities Regarding Other Information" that includes the reporting requirements of paragraphs 13 and 14 of Proposed Auditing Standard, *The Auditor's Responsibilities Regarding Other Information in Certain*

---

[11/] The terms used in the Opinion on the Financial Statements section, such as financial position, results of operations and cash flows, should be modified, as appropriate, depending on the type of company and required financial statements. If the financial statements include a separate statement of changes in stockholders' equity accounts, it should be identified in the Introduction section of the auditor's report. It need not be reported on separately in the opinion paragraph.

PCAOB
Public Company Accounting Oversight Board

*Documents Containing Audited Financial Statements and the Related Auditor's Report*;[12/]

*Signature and Date*

q. The signature of the auditor's firm;[13/]

r. The city and state (or city and country, in the case of non-U.S. auditors) from which the auditor's report has been issued;[14/] and

s. The date of the auditor's report.[15/]

## Critical Audit Matters

*Determination of Critical Audit Matters*

7. The auditor must determine whether there are any critical audit matters in the audit of the current period's financial statements based on the results of the audit or evidence obtained.[16/]

Note: It is expected that in most audits, the auditor would determine that there are critical audit matters.

8. Critical audit matters ordinarily are matters of such importance that they are included in the matters required to be (1) documented in the engagement completion

---

12/ The Auditor's Responsibilities Regarding Other Information section follows the Opinion on the Financial Statements section, any explanatory paragraphs, and the Critical Audit Matters section.

13/ See SEC Rule 2-02(a) of Regulation S-X, 17 C.F.R. § 210.2-02(a).

14/ Id.

15/ See AU sec. 530, *Dating of the Independent Auditor's Report*.

16/ Auditing Standard No. 15, *Audit Evidence*, describes what constitutes evidence obtained in the audit and establishes requirements regarding designing and performing audit procedures to obtain sufficient appropriate audit evidence.

document;[17] (2) reviewed by the engagement quality reviewer;[18] (3) communicated to the audit committee;[19] or (4) any combination of the three.

9. Certain factors might affect whether a matter addressed during the audit of the financial statements (1) involved the most difficult, subjective, or complex auditor judgments; (2) posed the most difficulty to the auditor in obtaining sufficient appropriate evidence; or (3) posed the most difficulty to the auditor in forming an opinion on the financial statements. In determining whether a matter is a critical audit matter, the auditor should take into account the following factors, as well as other factors specific to the audit:

a. The degree of subjectivity involved in determining or applying audit procedures to address the matter or in evaluating the results of those procedures;

b. The nature and extent of audit effort required to address the matter;

c. The nature and amount of available relevant and reliable evidence regarding the matter or the degree of difficulty in obtaining such evidence;

d. The severity of control deficiencies identified relevant to the matter, if any;[20]

e. The degree to which the results of audit procedures to address the matter resulted in changes in the auditor's risk assessments, including risks that were not identified previously, or required changes to planned audit procedures, if any;

---

[17] See Auditing Standard No. 3, *Audit Documentation*.

[18] See Auditing Standard No. 7, *Engagement Quality Review*.

[19] See Auditing Standard No. 16, *Communications with Audit Committees,* and other PCAOB standards.

[20] Other PCAOB standards provide auditing and reporting requirements related to the company's internal control over financial reporting. See Auditing Standard No. 5, Auditing Standard No. 12, and AU sec. 325, *Communications About Control Deficiencies in an Audit of Financial Statements.*

f. The nature and significance, quantitatively or qualitatively, of corrected and accumulated uncorrected misstatements related to the matter, if any;

g. The extent of specialized skill or knowledge needed to apply audit procedures to address the matter or evaluate the results of those procedures, if any; and

h. The nature of consultations outside the engagement team regarding the matter, if any.

*Communication of Critical Audit Matters*

10. The auditor must communicate in the auditor's report critical audit matters relating to the audit of the current period's financial statements or state that the auditor determined that there are no critical audit matters.

> Note: When the current period financial statements are presented on a comparative basis with those of one or more prior periods, the auditor should consider communicating critical audit matters relating to the prior periods when (1) the prior period's financial statements are made public for the first time, such as in an initial public offering, or (2) issuing an auditor's report on the prior period's financial statements because the previously issued auditor's report could no longer be relied upon.

11. For each critical audit matter communicated in the auditor's report the auditor must:[21/]

a. Identify the critical audit matter;

b. Describe the considerations that led the auditor to determine that the matter is a critical audit matter; and

> Note: For example, if the auditor identified the valuation of financial instruments with little, if any, market activity at the measurement date as a critical audit matter because the valuation involved the most difficult, subjective, or complex auditor judgments, then communication of that critical audit matter in the auditor's report must describe the considerations that led the auditor to determine that the

---

[21/] The Critical Audit Matters section follows the Opinion on the Financial Statements section and any explanatory paragraphs.

matter is a critical audit matter, which might relate to the high degree of measurement uncertainty or the significant judgments and estimates involved.

c. Refer to the relevant financial statement accounts and disclosures that relate to the critical audit matter, when applicable.

Note: Language that could be viewed as disclaiming, qualifying, restricting, or minimizing the auditor's responsibility for the critical audit matters or the auditor's opinion on the financial statements is not appropriate and may not be used.

*Language Preceding Critical Audit Matters in the Auditor's Report*

12. The following language, including the section title "Critical Audit Matters," should precede critical audit matters communicated in the auditor's report:

*Critical Audit Matters*

The standards of the PCAOB require that we communicate in our report critical audit matters relating to the audit of the current period's financial statements or state that we determined that there are no critical audit matters. Critical audit matters are those matters addressed during the audit that (1) involved our most difficult, subjective, or complex judgments; (2) posed the most difficulty to us in obtaining sufficient appropriate evidence; or (3) posed the most difficulty to us in forming our opinion on the financial statements. The critical audit matters communicated below do not alter in any way our opinion on the financial statements, taken as a whole.

Note: If the auditor communicates critical audit matters for prior periods, the language preceding the critical audit matters should be modified to indicate the periods to which the critical audit matters relate.

13. In situations in which the auditor determines that there are no critical audit matters, the auditor should include the following language, including the section title "Critical Audit Matters," in the auditor's report:

*Critical Audit Matters*

The standards of the PCAOB require that we communicate in our report critical audit matters relating to the audit of the current period's financial statements or state that we determined that there are no critical audit matters. Critical audit matters are those matters addressed during the audit that (1) involved our most difficult, subjective, or complex judgments; (2) posed the most difficulty to us in obtaining sufficient appropriate evidence; or (3) posed the most difficulty to us in forming our opinion on the financial statements. We determined that there are no critical audit matters.

*Documentation of Critical Audit Matters*

14. In accordance with Auditing Standard No. 3, the auditor must document the determination of critical audit matters. Auditing Standard No. 3 requires audit documentation to be prepared in such detail to provide a clear understanding of its purpose, source, and the conclusions reached.[22/] To provide sufficient detail for a clear understanding of the conclusions reached[23/] regarding the determination of critical audit matters, the audit documentation must contain sufficient information to enable an experienced auditor, having no previous connection with the engagement, to understand the basis for the auditor's determination that (1) each reported matter was a critical audit matter and (2) non-reported audit matters addressed in the audit that would appear to meet the definition of a critical audit matter were not critical audit matters.

Note: For example, if an audit matter was included in the engagement completion document, reviewed by the engagement quality reviewer, communicated to the audit committee and, after considering the factors in paragraph 9, otherwise would appear to an experienced auditor having no previous connection to the engagement to meet the definition of a critical audit matter, then the auditor would document the basis for the determination that the matter was not a critical audit matter.

## Explanatory Language Added to the Auditor's Report

15. Other standards of the PCAOB require that, in certain circumstances, the auditor include explanatory language (or an explanatory paragraph) in the auditor's report.[24/] These circumstances include when:

[22/] See paragraph 4 of Auditing Standard No. 3.

[23/] Id.

[24/] An explanatory paragraph follows the Opinion on the Financial Statements section, unless otherwise required by other standards of the PCAOB.

a. There is substantial doubt about the company's ability to continue as a going concern;[25/]

b. The auditor decides to refer to the report of other auditors as the basis, in part, for the auditor's own report;[26/]

c. There has been a change between periods in accounting principles or in the method of their application that has a material effect on the financial statements;[27/]

d. There has been a change in a reporting entity, unless the change in the reporting entity results from a transaction or event, such as the creation, cessation, or complete or partial purchase or disposition of a subsidiary or other business unit;[28/]

e. A material misstatement in previously issued financial statements has been corrected;[29/]

f. Certain circumstances relating to reports on comparative financial statements exist;[30/]

g. Selected quarterly financial data required by Item 302(a) of SEC Regulation S-K is not appropriately presented, has been omitted, or has not been reviewed;[31/]

---

25/ See AU sec. 341, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*.

26/ See paragraphs .06-.09 of AU sec. 543*, Part of Audit Performed by Other Independent Auditors*.

27/ See paragraphs 8 and 12-15 of Auditing Standard No. 6, *Evaluating Consistency of Financial Statements* (as proposed to be amended by this standard).

28/ See paragraph 6 of Auditing Standard No. 6.

29/ See paragraphs 9 and 16-17 of Auditing Standard No. 6 (as proposed to be amended by this standard).

30/ See AU secs. 508.68-.69 and .72-.74.

31/ See paragraph .50 of AU sec. 722, *Interim Financial Information*.

h. Supplementary information required by the applicable financial reporting framework has been omitted, the presentation of such information departs materially from the requirements of the applicable financial reporting framework, the auditor is unable to complete prescribed procedures with respect to such information, or the auditor is unable to remove substantial doubts about whether the supplementary information conforms to the requirements of the applicable financial reporting framework;[32/]

i. The auditor performs an integrated audit and issues separate reports on the company's financial statements and internal control over financial reporting;[33/] and

j. There has been a change in an investee year end that has a material effect on the company's financial statements.[34/]

16. The auditor may add an explanatory paragraph to emphasize a matter regarding the financial statements.[35/] This explanatory paragraph refers only to information presented or disclosed in the financial statements. The following are examples of matters, among others, that might be emphasized in the auditor's report:[36/]

a. Significant transactions with related parties;

---

[32/] See paragraphs .03 and .08 of AU sec. 558, *Required Supplementary Information*.

[33/] See paragraph 88 of Auditing Standard No. 5. Auditing Standard No. 5 provides additional circumstances in which the auditor includes an explanatory paragraph. If the combined report is issued, Auditing Standard No. 5 notes that the auditor should consider those circumstances as well.

[34/] See paragraph .32 of AU sec. 332, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities*.

[35/] These explanatory paragraphs follow the Opinion on the Financial Statements section in the auditor's report.

[36/] It is not appropriate for the auditor to use phrases such as "with the foregoing [following] explanation" when an explanatory paragraph to emphasize a matter regarding the financial statements is included in the auditor's report.

b. Unusually important subsequent events, such as a catastrophe that has had, or continues to have, a significant effect on the company's financial position;

c. Accounting matters, other than those involving a change or changes in accounting principles, affecting the comparability of the financial statements with those of the preceding period;

d. Retroactive application of the prospective change in accounting principle that will result in the restatement of the current year's financial statements in the future, and the effects of the prospective change are expected to be unusually material;

e. An uncertainty relating to the future outcome of significant litigation or regulatory actions; and

f. That the entity is a component of a larger business enterprise.

PCAOB
Public Company Accounting Oversight Board

## *APPENDIX A – Definition*

A1. For purposes of this standard, the term listed below is defined as follows:

A2. Critical audit matters – Those matters the auditor addressed during the audit of the financial statements that (1) involved the most difficult, subjective, or complex auditor judgments; (2) posed the most difficulty to the auditor in obtaining sufficient appropriate evidence; or (3) posed the most difficulty to the auditor in forming an opinion on the financial statements.

> Note: Use of the word "most" is not intended to imply that only one matter under each criteria would qualify as a critical audit matter. Depending on the facts and circumstances of the audit, there could be several critical audit matters. Also, an audit matter could meet one, two, or all three of the criteria in the definition.

PCAOB
Public Company Accounting Oversight Board

## *APPENDIX B – An Illustrative Auditor's Unqualified Report*

**[Changes from the current illustrative report are underlined]**

**Report of Independent Registered Public Accounting Firm**

To the shareholders and board of directors of X Company

[*Introduction*]

We have audited the accompanying balance sheets of X Company (the "Company") as of December 31, 20X2 and 20X1, the related statements of operations, stockholders' equity, and cash flows, for each of the three years in the period ended December 31, 20X2, and the related notes (collectively referred to as the "financial statements"). These financial statements are the responsibility of the Company's management.

We are a public accounting firm registered with the Public Company Accounting Oversight Board ("PCAOB") (United States) and are required to be independent with respect to the Company in accordance with the United States federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission ("SEC") and the PCAOB. We or our predecessor firms have served as the Company's auditor consecutively since [*year*].

[*Basis of Opinion*]

Our responsibility is to express an opinion on the Company's financial statements based on our audits. We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures include examining, on a test basis, appropriate evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

PCAOB
Public Company Accounting Oversight Board

[*Opinion on the Financial Statements*]

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Company as of [*at*] December 31, 20X2 and 20X1, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 20X2, in conformity with [*the applicable financial reporting framework*].

Critical Audit Matters

The standards of the PCAOB require that we communicate in our report critical audit matters relating to the audit of the current period's financial statements or state that we determined that there are no critical audit matters. Critical audit matters are those matters addressed during the audit that (1) involved our most difficult, subjective, or complex judgments; (2) posed the most difficulty to us in obtaining sufficient appropriate evidence; or (3) posed the most difficulty to us in forming our opinion on the financial statements. The critical audit matters communicated below do not alter in any way our opinion on the financial statements, taken as a whole.

[*Include critical audit matters*]

The Auditor's Responsibilities Regarding Other Information

In addition to auditing the Company's financial statements in accordance with the standards of the PCAOB, we evaluated whether the other information, included in the annual report on [*SEC Exchange Act form type*] filed with the SEC that contains both the December 31, 20X2 financial statements and our audit report on those financial statements, contains a material inconsistency with the financial statements, a material misstatement of fact, or both. Our evaluation was based on relevant audit evidence obtained and conclusions reached during the audit. We did not audit the other information and do not express an opinion on the other information. Based on our evaluation, we have not identified a material inconsistency or a material misstatement of fact in the other information.

[*Signature*]

[*City and State or Country*]

[*Date*]

## APPENDIX 2

## Proposed Auditing Standard

## *The Auditor's Responsibilities Regarding Other Information in Certain Documents Containing Audited Financial Statements and the Related Auditor's Report*

### *Introduction*

1. This standard establishes requirements regarding the auditor's responsibilities with respect to information, other than the audited financial statements[1/] and the related auditor's report, in a company's annual report that is filed with the SEC under the Securities Exchange Act of 1934 ("Exchange Act")[2/] and contains that company's audited financial statements and the related auditor's report (hereafter "other information").[3/]

---

[1/] This standard uses the term "financial statements" as used by the U.S. Securities and Exchange Commission ("SEC") to include all notes to the statements and all related schedules. See SEC Rule 1-01(b) of Regulation S-X, 17 C.F.R. § 210.1-01(b).

[2/] This standard does not apply to documents filed under the Securities Act of 1933 ("Securities Act"). When the audited financial statements and the related auditor's report are included in a registration statement under the Securities Act, the auditor has responsibilities under the federal securities laws and under AU sec. 711, *Filings Under Federal Securities Statutes*. This standard also does not modify the auditor's responsibilities under the federal securities laws or AU sec. 711. See, e.g., Section 10A(b) of the Exchange Act, 15 U.S.C. § 78j-1.

[3/] This standard does not apply to supplemental information addressed by Proposed Auditing Standard, *Auditing Supplemental Information Accompanying Audited Financial Statements*; required supplementary information addressed by AU sec. 558, *Required Supplementary Information*; and management's assertion on internal control over financial reporting in an integrated audit addressed by Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

Note: For purposes of this standard, other information in an annual report[4/] that is filed with the SEC under the Exchange Act includes information, other than the audited financial statements and the related auditor's report, contained in the annual report and also includes (1) information incorporated by reference in that annual report that is available to the auditor prior to the issuance of the auditor's report and (2) when the annual report is a Form 10-K, information incorporated by reference from the company's definitive proxy statement filed within 120 days after the end of the fiscal year covered by the Form 10-K.[5/]

## *Objectives*

2. The objectives of the auditor are:

   a. To evaluate whether the other information contains (1) a material inconsistency with amounts or information, or the manner of their presentation, in the audited financial statements ("material inconsistency");[6/] (2) a material misstatement of fact; or (3) both and, if so, to respond appropriately; and

   b. When issuing an auditor's report, to communicate in the auditor's report the auditor's responsibilities for other information and whether, based on relevant audit evidence obtained and conclusions reached during the

---

[4/] With respect to a company's amended annual report that contains the company's previously issued audited financial statements and the related auditor's report, the auditor would apply paragraphs 2-7 and 10-11 of this standard. When the company's amended annual report contains (1) revisions to amounts or disclosures in the previously issued audited financial statements and (2) a related auditor's report, the auditor would apply all paragraphs of this standard.

[5/] With respect to other information that is incorporated by reference into an annual report on Form 10-K from a proxy statement that is filed subsequent to the issuance of the auditor's report, the auditor would apply paragraphs 2-7 and 10-11 of this standard.

[6/] The requirements of this standard related to material inconsistency apply to a predecessor auditor in situations in which the predecessor auditor's report is included in an annual report containing other information.

audit, the other information contains a material inconsistency, a material misstatement of fact, or both.

## *Auditor's Responsibilities*

### Evaluating the Other Information

3. The auditor must evaluate whether the other information contains (1) a material inconsistency; (2) a material misstatement of fact; or (3) both by performing the procedures in paragraph 4.

4. The auditor should read the other information and, based on relevant audit evidence obtained and conclusions reached during the audit, evaluate the:

a. Consistency of amounts in the other information, and the manner of their presentation, that are intended to be the same as, or to provide greater detail about, the amounts in the financial statements, with the amounts in the financial statements and relevant audit evidence;

b. Consistency of any qualitative statement in the other information, and the manner of its presentation, that is intended to represent or provide greater detail about information in the financial statements, with the financial statements and relevant audit evidence;

c. Other information not directly related to the financial statements as compared to relevant audit evidence obtained and conclusions reached during the audit; and

d. Amounts in the other information that are calculated using amounts in (1) the other information; (2) the financial statements; or (3) relevant audit evidence, by recalculating the amounts for mathematical accuracy.

Note: For example, the auditor would recalculate the amounts when the formula is described in the annual report, the formula is generally understood, or the recalculation can be performed without referring to a formula. Amounts, such as totals or percentages, that are calculated using simple mathematical operations, such as addition or division, ordinarily can be recalculated without referring to a formula.

5. If, based on the evaluation in paragraph 4, the auditor identifies a potential material inconsistency, a potential material misstatement of fact, or both, the auditor

should discuss the matter with management. The auditor also should perform additional procedures, as necessary, to determine whether there is a material inconsistency, a material misstatement of fact, or both.

**Responding When the Auditor Determines That the Other Information Contains a Material Inconsistency, a Material Misstatement of Fact, or Both**

6. If the auditor determines that the other information contains a material inconsistency, a material misstatement of fact, or both, the auditor should request management to revise the other information to address the material inconsistency, the material misstatement of fact, or both.

7. If management does not appropriately revise the other information and:

a. The other information is available to the auditor prior to the issuance of the auditor's report, the auditor should perform the applicable procedures in paragraphs 8 and 9.

b. The other information is not available to the auditor prior to the issuance of the auditor's report, the auditor should perform the applicable procedures in paragraphs 10 and 11.[7/]

*Responding When the Other Information Is Available Prior to the Issuance of the Auditor's Report*

8. If management does not appropriately revise the other information, the auditor should communicate the material inconsistency, the material misstatement of fact, or both to the audit committee in a timely manner and prior to the issuance of the auditor's report.

9. If the other information is not appropriately revised after the auditor has communicated the material inconsistency, the material misstatement of fact, or both to the audit committee, the auditor:

---

[7/] Information incorporated by reference into a Form 10-K from the company's definitive proxy statement, filed within 120 days after the end of the fiscal year covered by the Form 10-K, might not be available to the auditor prior to the issuance of the auditor's report. Additionally, other information included in an amended annual report that contains previously issued audited financial statements and the related auditor's report, would not be available to the auditor prior to the issuance of the auditor's report.

a. Must determine the auditor's responsibilities under Section 10A of the Exchange Act, 15 U.S.C. § 78j-1; AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*; and AU sec. 317, *Illegal Acts by Clients*; and

b. Should determine whether to:

(1) Issue an auditor's report that states that the auditor has identified in the other information a material inconsistency, a material misstatement of fact, or both that has not been appropriately revised and describes the material inconsistency, the material misstatement of fact, or both; or

(2) Withdraw from the engagement.

Note: In addition, the auditor may withhold the use of the auditor's report for a prior reporting period.

*Responding When the Other Information Is Not Available Prior to the Issuance of the Auditor's Report*

10. If management does not appropriately revise the other information, the auditor should communicate the material inconsistency, the material misstatement of fact, or both to the audit committee in a timely manner.

11. If the other information is not appropriately revised after the auditor has communicated the material inconsistency, the material misstatement of fact, or both to the audit committee, the auditor:

a. Must determine the auditor's responsibilities under Section 10A of the Exchange Act, 15 U.S.C. § 78j-1; and

b. Should apply the procedures in AU sec. 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report.*

**Responding When the Auditor Determines That There Is a Potential Misstatement in the Audited Financial Statements**

12. If, as a result of procedures performed under this standard, the auditor determines that there is a potential misstatement in the audited financial statements, the auditor should refer to the requirements of:

a. Auditing Standard No. 14, *Evaluating Audit Results,* and AU sec. 508, [new proposed title] *Departures from Unqualified Opinions and Other Reporting Circumstances*, if the auditor's report on the financial statements has not been issued; or

b. AU sec. 561 if the auditor's report on the financial statements has been issued.

## *Reporting in the Auditor's Report*

13. When issuing an auditor's report, the auditor must include, in a separate section of the auditor's report titled "The Auditor's Responsibilities Regarding Other Information,"[8/] the following:

a. A statement that, in addition to auditing the company's financial statements [and the internal control over financial reporting (if applicable)], in accordance with the standards of the Public Company Accounting Oversight Board ("PCAOB"), the auditor evaluated whether the other information contains a material inconsistency with the financial statements, a material misstatement of fact, or both;

b. Identification of the annual report that contains the other information, and the audited financial statements and the auditor's report, by referring to the SEC Exchange Act form type and the period end date of the financial statements;

c. A statement that the auditor's evaluation of the other information was based on relevant audit evidence obtained and conclusions reached during the audit;

---

8/ This reporting requirement applies to an auditor's report other than a report to disclaim an opinion. See AU sec. 508.61.

d. A statement that the auditor did not audit the other information and does not express an opinion on the other information; and

e. A statement that, based on the evaluation, the auditor:

(1) Has not identified a material inconsistency or a material misstatement of fact in the other information;[9/] or

(2) Has identified a material inconsistency, a material misstatement of fact, or both in the other information that has not been appropriately revised and a description of the material inconsistency, the material misstatement of fact, or both.

14. The following is an example of "The Auditor's Responsibilities Regarding Other Information" section of the auditor's report:

a. Illustrative language for paragraphs 13.a.–d.:

*The Auditor's Responsibilities Regarding Other Information*

In addition to auditing the company's financial statements [and internal control over financial reporting (if applicable)], in accordance with the standards of the PCAOB, we evaluated whether the other information, included in the annual report on [*SEC Exchange Act form type*] filed with the SEC that contains both the [*period end date*] financial statements and our audit report on those financial statements, contains a material inconsistency with the financial statements, a material misstatement of fact, or both. Our evaluation was based on relevant audit evidence obtained and conclusions reached during the audit. We did not audit the other information and do not express an opinion on the other information.

b. Illustrative language for paragraph 13.e.(1) when the auditor has not identified a material inconsistency or a material misstatement of fact in the other information:

Based on our evaluation, we have not identified a material inconsistency or a material misstatement of fact in the other information.

---

[9/] This statement is appropriate in situations in which the auditor (1) has not identified a material inconsistency or a material misstatement of fact or (2) has identified a material inconsistency, a material misstatement of fact, or both that management has revised appropriately prior to the issuance of the auditor's report.

c. Illustrative language for paragraph 13.e.(2) when the auditor has identified a material inconsistency, a material misstatement of fact, or both in the other information:

Based on our evaluation, we identified [*a material inconsistency, a material misstatement of fact, or both*] in the other information that has not been appropriately revised. [*Describe the material inconsistency, the material misstatement of fact, or both.*] We have not identified [*a material inconsistency or material misstatement of fact* (this statement would indicate the situation that was not identified in the sentence above)] in the other information.[10/]

[10/] This sentence is appropriate only when the auditor has identified a material inconsistency or a material misstatement of fact, but not both. If the auditor identifies both a material inconsistency and a material misstatement of fact, the auditor's report should describe both the material inconsistency and the material misstatement of fact.

PCAOB
Public Company Accounting Oversight Board

## APPENDIX 3

## *Proposed Amendments to PCAOB Standards Related to the Proposed Auditor Reporting Standard*

In connection with the proposed auditing standard, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion* (the "proposed auditor reporting standard"), the Board is proposing amendments to several of its auditing standards to conform to the requirements of the proposed auditor reporting standard.[1/]

Language that would be deleted by the proposed amendments is ~~struck through~~. Language that would be added is underlined. The presentation of proposed amendments to PCAOB standards by showing deletions and additions to existing sentences and paragraphs is intended to assist readers in easily comprehending the Board's proposed changes to existing auditing standards and interpretations. The Board’s proposed amendments consist of only the deletion or addition of the language that has been struck through or underlined. This presentation does not constitute or represent a reproposal of all or of any other part of a standard or interpretation that may be amended.

The proposed amendments would amend specific auditing standards to reflect changes to the auditor's unqualified report. Some of these auditing standards may need further updating, which the Board may consider under separate standard-setting projects. The proposed amendments in connection with the proposed auditor reporting standard would include:

---

1/ PCAOB Release No. 2013-002, *Proposed Reorganization of PCAOB Auditing Standards* (March 26, 2013), PCAOB Release No. 2013-004, *Related Parties* (May 7, 2013), PCAOB Release No. 2011-005, *Auditing Supplemental Information Accompanying Audited Financial Statements* (July 12, 2011), and PCAOB Release No. 2011-007, *Improving Transparency of Audits: Proposed Amendments to PCAOB Auditing Standards and Form 2* (October 11, 2011), include proposed amendments that would supersede, amend, or delete paragraphs for which amendments are included in this proposed auditor reporting standard. If, prior to the conclusion of this rulemaking, the Board has adopted amendments that affect the amendments proposed in this release, the Board may make conforming changes to this proposed auditor reporting standard.

- Changing the title of AU sec. 508 from "Reports on Audited Financial Statements" to [new proposed title] "Departures from Unqualified Opinions and Other Reporting Circumstances."

- Updating illustrative reports in AU sec. 508, [new proposed title] *Departures from Unqualified Opinions and Other Reporting Circumstances,* for the proposed basic elements of the proposed auditor reporting standard;

- Updating other reporting standards that result in the issuance of the auditor's report on the financial statement filed with the SEC for the proposed basic elements of the proposed auditor reporting standard;

- Updating references to "the auditor's standard report" and "introductory, scope, and opinion paragraphs" to reflect new terms referenced in the proposed auditor reporting standard;

- Updating Auditing Standards Nos. 7 and 16 and AU sec. 336 as a result of the new reporting requirement for critical audit matters in the auditor's report;

- Moving explanatory paragraph reporting examples from existing AU sec. 508 to the respective auditing standards that contain the related performance requirements for those circumstances; and

- Updating references to auditing standards that are being amended or superseded.

The Board is requesting comments on all aspects of the proposed amendments. Significant proposed amendments are described in more detail in Appendix 5 of this release.

## Auditing Standard No. 1, *References in Auditors' Reports to the Standards of the Public Company Accounting Oversight Board*

* * *

**~~APPENDIX~~**

**~~Illustrative Reports~~**

~~The following is an illustrative report on an audit of financial statements:~~

~~Report of Independent Registered Public Accounting Firm~~

~~We have audited the accompanying balance sheets of X Company as of December 31, 20X3 and 20X2, and the related statements of operations, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 20X3. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.~~

~~We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.~~

~~In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Company as of [at] December 31, 20X3 and 20X2, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 20X3, in conformity with U.S. generally accepted accounting principles.~~

~~[ *Signature* ]~~

~~[ City and State or Country]~~

~~[ *Date* ]~~

~~The following is an illustrative report on a review of interim financial information:~~

~~Report of Independent Registered Public Accounting Firm~~

~~We have reviewed the accompanying [ *describe the interim financial information or statements reviewed* ] of X Company as of September 30, 20X3 and 20X2, and for the three-month and nine-month periods then ended. This (these) interim financial information (statements) is (are) the responsibility of the Company's management.~~

~~We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than~~

~~an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.~~

~~Based on our review, we are not aware of any material modifications that should be made to the accompanying interim financial (statements) for it (them) to be in conformity with U.S. generally accepted accounting principles.~~

~~[ *Date* ]~~

## Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*

* * *

85. The auditor's report on the audit of internal control over financial reporting must include the following elements[18/]

a. ~~A~~ The title ~~that includes the word *independent*~~, "Report of Independent Registered Public Accounting Firm";

a-1. Addressees that include, but are not necessarily limited to, (1) investors in the company, such as shareholders, and (2) the board of directors or equivalent body;[18A/]

[18A/] For example, addressees might include other appropriate parties depending on the legal and governance structure of the company.

a-2. The name of the company whose internal control over financial reporting was audited;

a-3. A statement that the auditor is a public accounting firm registered with the Public Company Accounting Oversight Board ("PCAOB") (United States) and is required to be independent with respect to the company in accordance with the United States federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB;

a-4. A statement containing the year the auditor began serving consecutively as the company's auditor;

Note: For purposes of this subparagraph, references to the auditor include other firms that the auditor's firm has acquired or that have merged with the auditor's firm. If there is uncertainty as to the year the auditor began serving consecutively as the company's auditor, such as due to firm or company mergers, acquisitions, or changes in ownership structure, the auditor should state that the auditor is uncertain as to the year the auditor became the company's auditor and provide the earliest year of which the auditor has knowledge.

f. A statement that the audit was conducted in accordance with the standards of the PCAOB ~~Public Company Accounting Oversight Board (United States)~~;

* * *

87. The following example combined report expressing an unqualified opinion on financial statements and an unqualified opinion on internal control over financial reporting illustrates the report elements described in this section.

Report of Independent Registered Public Accounting Firm

To the shareholders and board of directors of W Company

[ ~~*Introductory paragraph*~~ *Introduction* ]

We have audited the accompanying balance sheets of W Company as of December 31, 20X8 and 20X7, and the related statements of income, stockholders' equity and comprehensive income, and cash flows for each of the years in the three-year period ended December 31, 20X8, and the related notes (collectively referred to as the "financial statements"). We also have audited W Company's internal control over financial reporting as of December 31, 20X8, based on [*Identify control criteria, for example, "criteria established in Internal Control - Integrated Framework: 2013 issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO)."*]. W Company's management is responsible for these financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying [title of management's report].

We are a public accounting firm registered with the Public Company Accounting Oversight Board ("PCAOB") (United States) and are required to be independent with respect to the Company in accordance with the United States federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission ("SEC") and the PCAOB. We or our predecessor firms have served as the Company's auditor consecutively since [ *year* ].

~~[ *Scope paragraph* ]~~ [ *Basis of Opinion* ]

Our responsibility is to express an opinion on ~~these~~ the Company's financial statements and an opinion on the company's internal control over financial reporting based on our audits. We conducted our audits in accordance with the standards of the PCAOB ~~Public Company Accounting Oversight Board (United States)~~. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the financial statements included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures include examining, on a test basis, appropriate evidence ~~supporting~~ regarding the amounts and disclosures in the financial statements. ~~,~~ Our audits also included evaluating ~~assessing~~ the accounting principles used and significant estimates made by management, ~~and~~ as well as evaluating the overall ~~financial statement~~ presentation of the financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

[ *Definition* ~~*paragraph*~~ ]

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or

timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

[ *Inherent ~~limitations~~ Limitations ~~paragraph~~* ]

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

[ *Opinions on the Financial Statements and Internal Control Over Financial Reporting ~~paragraph~~* ]

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of W Company as of December 31, 20X8 and 20X7, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 20X8 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, W Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 20X8, based on [ *Identify control criteria, for example, "criteria established in Internal Control - Integrated Framework: 2013 issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO)."* ].

*Critical Audit Matters*

The standards of the PCAOB require that we communicate in our report critical audit matters relating to the audit of the current period's financial statements or state that we determined that there are no critical audit matters. Critical audit matters are those matters addressed during the audit that (1) involved our most difficult, subjective, or complex judgments; (2) posed the most difficulty to us in obtaining sufficient appropriate evidence; or (3) posed the most difficulty to us in forming our opinion on the financial statements. The critical audit matters communicated below do not alter in any way our opinion on the financial statements, taken as a whole.

[*Include critical audit matters*]

*The Auditor's Responsibilities Regarding Other Information*

In addition to auditing the financial statements and the Company's internal control over financial reporting, in accordance with the standards of the PCAOB, we evaluated whether the other information, included in the annual report on [*SEC Exchange Act form type*] filed with the SEC that contains both the December 31, 20X8 financial statements and our audit report on those financial statements, contains a material inconsistency with the financial statements, a material misstatement of fact, or both. Our evaluation was based on relevant audit evidence obtained and conclusions reached during the audit. We did not audit the other information and do not express an opinion on the other information. Based on our evaluation, we have not identified a material inconsistency or a material misstatement of fact in the other information.

[ *Signature* ]

[ *City and State or Country* ]

[ *Date* ]

88. If the auditor chooses to issue a separate report on internal control over financial reporting, he or she should add the following paragraph (following the Opinion on the Financial Statements section) to the auditor's report on the financial statements -

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board ~~(United States)~~, W Company's internal control over financial reporting as of December 31, 20X8, based on [ *identify control criteria* ] and our report dated [ *date of report, which should be the same as the date of the report on the financial statements* ] expressed [ *include nature of opinion* ].

The auditor also should add the following paragraph (following the opinion) to the report on internal control over financial reporting -

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the [ *identify financial statements* ] of W Company and our report dated [ *date of report, which should be the same as the date of the report on the effectiveness of internal control over financial reporting* ] expressed [ *include nature of opinion* ].

* * *

B16. In situations in which the SEC allows management to limit its assessment of internal control over financial reporting by excluding certain entities, the auditor may limit the audit in the same manner. In these situations, the auditor's opinion would not be affected by a scope limitation. However, the auditor should include, either in an additional explanatory paragraph or as part of the ~~scope paragraph~~ Basis of Opinion section in his or her report, a disclosure similar to management's regarding the exclusion of an entity from the scope of both management's assessment and the auditor's audit of internal control over financial reporting. Additionally, the auditor should evaluate the reasonableness of management's conclusion that the situation meets the criteria of the SEC's allowed exclusion and the appropriateness of any required disclosure related to such a limitation. If the auditor believes that management's disclosure about the limitation requires modification, the auditor should follow the same communication responsibilities that are described in paragraphs .29 through .32 of AU sec. 722, *Interim Financial Information*. If management and the audit committee do not respond appropriately, in addition to fulfilling those responsibilities, the auditor should modify his or her report on the audit of internal control over financial reporting to include an explanatory paragraph describing the reasons why the auditor believes management's disclosure requires modification.

* * *

## Auditing Standard No. 6, *Evaluating Consistency of Financial Statements*

* * *

8. A change in accounting principle that has a material effect on the financial statements should be recognized in the auditor's report on the audited financial statements. If the auditor concludes that the criteria in paragraph 7 have been met, the auditor should add an explanatory paragraph to the auditor's report, as described in ~~AU sec. 508, *Reports on Audited Financial Statements*~~ proposed paragraphs 12-15 of this standard. If those criteria are not met, the auditor should treat this accounting change as a departure from generally accepted accounting principles and, if the effect of the change in accounting principle is material, issue a qualified or an adverse opinion ~~address the matter as described in AU sec. 508~~.[8A/]

> Note: If a company's financial statements contain an investment accounted for by the equity method, the auditor's evaluation of consistency should include consideration of the investee. If the investee makes a change in accounting principle that is material to the investing company's financial statements, the auditor should add an explanatory paragraph (following the ~~opinion paragraph~~ Opinion on the Financial Statements section) to the auditor's report, as described in ~~AU sec. 508~~paragraphs 12-15 of this standard.

[8A/] AU sec. 508, [new proposed title] *Departures from Unqualified Opinions and Other Reporting Circumstances*, describes reporting requirements related to a qualified or an adverse opinion.

**Correction of a Material Misstatement in Previously Issued Financial Statements**

9. The correction of a material misstatement in previously issued financial statements should be recognized in the auditor's report on the audited financial statements through the addition of an explanatory paragraph, as described in ~~AU sec. 508~~paragraphs 16-17 of this standard.

10. The accounting pronouncements generally require certain disclosures relating to restatements to correct misstatements in previously issued financial statements. If the financial statement disclosures are not adequate, the auditor should address the inadequacy of disclosure as described in paragraph 31 of Auditing Standard No. 14, *Evaluating Audit Results,* and AU sec. 508, [new proposed title] *Departures from Unqualified Opinions and Other Reporting Circumstances*.

**CHANGE IN CLASSIFICATION**

11. Changes in classification in previously issued financial statements do not require recognition in the auditor's report, unless the change represents the correction of a material misstatement or a change in accounting principle. Accordingly, the auditor should evaluate a material change in financial statement classification and the related disclosure to determine whether such a change also is a change in accounting principle or a correction of a material misstatement. For example, certain reclassifications in previously issued financial statements, such as reclassifications of debt from long-term to short-term or reclassifications of cash flows from the operating activities category to the financing activities category, might occur because those items were incorrectly classified in the previously issued financial statements. In such situations, the reclassification also is the correction of a misstatement. If the auditor determines that the reclassification is a change in accounting principle, he or she should address the matter as described in paragraphs 7,~~ and~~ 8, and ~~AU sec. 508~~12-15 of this standard. If the auditor determines that the reclassification is a correction of a material misstatement in previously issued financial statements, he or she should address the matter as described in paragraphs 9,~~ and~~ 10, and ~~AU sec. 508~~16-17 of this standard.

**REPORTING ON CONSISTENCY OF FINANCIAL STATEMENTS**

***Change in Accounting Principle***

12. A change in accounting principle that has a material effect on the financial statements should be recognized in the auditor's report on the audited financial statements through the addition of an explanatory paragraph following the Opinion on the Financial Statements section. The explanatory paragraph should include identification of the nature of the change and a reference to the note disclosure describing the change.

13. The following is an example of an explanatory paragraph for a change in accounting principle resulting from the adoption of a new accounting pronouncement:

> As discussed in Note X to the financial statements, the company has changed its method of accounting for [*describe accounting method changes*] in [*year(s) of financial statements that reflect the accounting method change*] due to the adoption of [*name of accounting pronouncement*].

14. The following is an example of an explanatory paragraph for a change in accounting principle other than a change due to the adoption of a new accounting pronouncement:

> As discussed in Note X to the financial statements, the company has elected to change its method of accounting for [*describe accounting method changes*] in [*year(s) of financial statements that reflect the accounting method change*].

15. The explanatory paragraph relating to a change in accounting principle should be included in reports on financial statements in the year of the change and in subsequent years until the new accounting principle is applied in all periods presented. If the new accounting change is accounted for by retrospective application to the financial statements of all prior periods presented, the additional paragraph is needed only in the year of the change.

***Correction of a Material Misstatement in Previously Issued Financial Statements***

16. Correction of a material misstatement in previously issued financial statements should be recognized in the auditor's report through the addition of an explanatory paragraph following the Opinion on the Financial Statements section.[10/] The explanatory paragraph should include (1) a statement that the previously issued financial statements have been restated for the correction of a misstatement in the respective period and (2) a reference to the note disclosure describing the correction of the misstatement. Following is an example of an appropriate explanatory paragraph when there has been a correction of a material misstatement in previously issued financial statements.

> As discussed in Note X to the financial statements, the 20X2 financial statements have been restated to correct a misstatement.

[10/] AU secs. 508.68-69 apply when comparative financial statements are presented and the opinion on the prior-period financial statements differs from the opinion previously expressed.

17. This type of explanatory paragraph in the auditor's report should be included in reports on financial statements when the related financial statements are restated to

correct the prior material misstatement. The paragraph need not be repeated in subsequent years.

## Auditing Standard No. 7, *Engagement Quality Review*

* * *

10. In an audit, the engagement quality reviewer should:

* * *

j. Based on the procedures required by this standard, evaluate whether appropriate critical audit matters are communicated in the auditor's report in accordance with Proposed Auditing Standard, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*.

* * *

## Auditing Standard No. 14, *Evaluating Audit Results*

* * *

[7/] If the financial statements contain material misstatements, AU sec. 508, ~~*Reports on Audited Financial Statements*~~ [new proposed title] *Departures from Unqualified Opinions and Other Reporting Circumstances*, indicates that the auditor should issue a qualified or an adverse opinion on the financial statements. AU sec. 508.35 discusses situations in which the financial statements are materially affected by a departure from the applicable financial reporting framework.

* * *

### APPENDIX B

[1/] If the financial statements contain material misstatements, AU sec. 508, ~~*Reports on Audited Financial Statements*~~ [new proposed title] *Departures from Unqualified Opinions and Other Reporting Circumstances*, indicates that the auditor should issue a qualified or an adverse opinion on the financial statements. AU sec. 508.35 discusses situations in which the financial statements are materially affected by a departure from the applicable financial reporting framework.

* * *

**APPENDIX C**

[2/] Denial of access to information might constitute a limitation on the scope of the audit that requires the auditor to qualify or disclaim an opinion. (See Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements,* and AU sec. 508, ~~*Reports on Audited Financial Statements*~~ [new proposed title] *Departures from Unqualified Opinions and Other Reporting Circumstances*.)

## Auditing Standard No. 16, *Communications with Audit Committees*

* * *

**~~Departure from the Auditor's Standard Report~~ The Auditor's Report**

21. The auditor should ~~communicate~~ provide to and discuss with the audit committee ~~the following matters related to~~ a draft of the auditor's report~~:~~.

~~a. When the auditor expects to modify the opinion in the auditor's report, the reasons for the modification, and the wording of the report; and~~

b. ~~When the auditor expects to include explanatory language or an explanatory paragraph in the auditor's report, the reasons for the explanatory language or paragraph, and the wording of the explanatory language or paragraph.~~

* * *

[39/] See paragraphs .22-.32 of AU sec. 508, ~~*Reports on Audited Financial Statements*~~ [new proposed title] *Departures from Unqualified Opinions and Other Reporting Circumstances,* for a discussion of scope limitations.

* * *

## AU sec. 315, *Communications Between Predecessor and Successor Auditors*

* * *

[fn 9] See section 508, ~~*Reports on Audited Financial Statements*~~ [new proposed title] *Departures from Unqualified Opinions and Other Reporting Circumstances*, paragraphs .70 through .74, for reporting guidance.

* * *

## AU sec. 317, *Illegal Acts by Clients*

* * *

**fn 2** See section 508, ~~*Reports on Audited Financial Statements*~~ [new proposed title] *Departures from Unqualified Opinions and Other Reporting Circumstances*.

* * *

## AU sec. 9326, *Evidential Matter: Auditing Interpretations of Section 326*

* * *

**.10** The third standard of field work requires the auditor to obtain sufficient appropriate evidential matter through, among other things, inspection and inquiries to afford a reasonable basis for an opinion on the financial statements. Paragraph 35 of Auditing Standard No. 14, *Evaluating Audit Results*, requires the auditor to obtain sufficient appropriate evidential matter about assertions in the financial statements of material significance or else to qualify or disclaim his or her opinion on the statements. Section 508, ~~*Reports on Audited Financial Statements*~~ [new proposed title] *Departures from Unqualified Opinions and Other Reporting Circumstances*, paragraph .24, states that, "When restrictions that significantly limit the scope of the audit are imposed by the client, ordinarily the auditor should disclaim an opinion on the financial statements." Also, section 333 on *Management Representations* requires the auditor to obtain written representations from management. Section 333.06 states that specific representations should relate to the following matters, "availability of all financial records and related data," and section 333.08 states that a materiality limit does not apply to that representation. Section 333.13 states that "management's refusal to furnish a written representation" constitutes a limitation on the scope of the audit sufficient to preclude an unqualified opinion.

* * *

## AU sec. 332, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities*

* * *

**fn 15** See ~~section 508, *Reports on Audited Financial Statements*, paragraphs .16–.18.~~ Auditing Standard No. 6, *Evaluating Consistency of Financial Statements.*

* * *

## AU sec. 333, *Management Representations*

* * *

fn 15 See section 508, ~~*Reports on Audited Financial Statements*~~ [new proposed title] *Departures from Unqualified Opinions and Other Reporting Circumstances*, paragraph .71. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 89, December 1999.]

* * *

## AU sec. 336, *Using the Work of a Specialist*

* * *

**.13** If the auditor determines that the specialist's findings support the related assertions in the financial statements, he or she reasonably may conclude that sufficient appropriate evidential matter has been obtained. If there is a material difference between the specialist's findings and the assertions in the financial statements, he or she should apply additional procedures. If after applying any additional procedures that might be appropriate the auditor is unable to resolve the matter, the auditor should obtain the opinion of another specialist, unless it appears to the auditor that the matter cannot be resolved. A matter that has not been resolved ordinarily will cause the auditor to conclude that he or she should qualify the opinion or disclaim an opinion because the inability to obtain sufficient appropriate evidential matter as to an assertion of material significance in the financial statements constitutes a scope limitation. (See section 508, ~~*Reports on Audited Financial Statements*~~ [new proposed title] *Departures from Unqualified Opinions and Other Reporting Circumstances*, paragraphs .22 and .23.)

* * *

**.15** Except as discussed in paragraphs .16 and .16A, the auditor should not refer to the work or findings of the specialist. Such a reference might be misunderstood to be a qualification of the auditor's opinion or a division of responsibility, neither of which is intended. Further, there may be an inference that the auditor making such reference performed a more thorough audit than an auditor not making such reference.

**.16** The auditor may, as a result of the report or findings of the specialist, decide to add explanatory language to ~~his or her standard~~ the auditor's unqualified report or depart from an unqualified opinion. Reference to and identification of the specialist may be made in the auditor's report if the auditor believes such reference will facilitate an understanding of the reason for the explanatory paragraph or the departure from the unqualified opinion.

**.16A** Reference to the use of a specialist also may be made in the auditor's report in connection with the auditor's communication of critical audit matters, if the auditor believes such reference will facilitate an understanding of the audit matter or the considerations that led the auditor to determine that the audit matter is a critical audit matter.[fn 7]

[fn 7] Critical audit matters are described in paragraphs 7-13 of the Proposed Auditing Standard, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*.

## AU sec. 9336, *Using the Work of a Specialist: Auditing Interpretations of Section 336*

* * *

**.21** *Interpretation*—When other relevant evidential matter exists, the auditor should consider it before reaching a conclusion about the appropriateness of management's accounting for a transfer. [fn 14] However, since the isolation aspect of surrender of control is assessed primarily from a legal perspective, the auditor usually will not be able to obtain persuasive evidence in a form other than a legal opinion. In the absence of persuasive evidence that a transfer has met the isolation criterion, derecognition of the transferred assets is not in conformity with generally accepted accounting principles and the auditor should consider the need to express a qualified or adverse opinion in accordance with section 508, ~~*Reports on Audited Financial Statements*~~ [new proposed title] *Departures from Unqualified Opinions and Other Reporting Circumstances*, paragraphs .35 through .60. However, if permission for the auditor to use a legal opinion that he or she deems otherwise adequate is not granted, this would be a scope limitation and the auditor should consider the need to express a qualified opinion or to disclaim an opinion in accordance with section 508.22–.26 and 508.61–.63.

* * *

## AU sec. 341, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*

* * *

**.03** The auditor should evaluate whether there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time in the following manner:

* * *

c. After the auditor has evaluated management's plans, he concludes whether he has substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time. If the auditor concludes there is substantial doubt, he should (1) consider the adequacy of disclosure about the entity's possible inability to continue as a going concern for a reasonable period of time, and (2) include an explanatory paragraph (following the ~~opinion paragraph~~ Opinion on the Financial Statements section) in his audit report to reflect his conclusion. If the auditor concludes that substantial doubt does not exist, he should consider the need for disclosure.

* * *

**.12** If, after considering identified conditions and events and management's plans, the auditor concludes that substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time remains, the audit report should include an explanatory paragraph (following the ~~opinion paragraph~~ Opinion on the Financial Statements section) to reflect that conclusion. [fn 4] The auditor's conclusion about the entity's ability to continue as a going concern should be expressed through the use of the phrase "substantial doubt about its (the entity's) ability to continue as a going concern" [or similar wording that includes the terms substantial doubt *and* going concern] as illustrated in paragraph .13. [As amended, effective for reports issued after December 31, 1990, by Statement on Auditing Standards No. 64.]

**fn 4** The inclusion of an explanatory paragraph (following the ~~opinion paragraph~~ Opinion on the Financial Statements section) in the auditor's report contemplated by this section should serve adequately to inform the users of the financial statements. Nothing in this section, however, is intended to preclude an auditor from declining to express an opinion in cases involving uncertainties. If he disclaims an opinion, the uncertainties and their possible effects on the financial statements should be disclosed in an appropriate manner (see paragraph .10), and the auditor's report should give all the substantive reasons for his disclaimer of opinion (see section 508, ~~*Reports on Audited Financial Statements*~~ [new proposed title] *Departures from Unqualified Opinions and Other Reporting Circumstances*, paragraphs .61-.63).

**.13** An example follows of an explanatory paragraph (following the ~~opinion paragraph~~ Opinion on the Financial Statements section) in the auditor's report describing an uncertainty about the entity's ability to continue as a going concern for a reasonable period of time. [fn 5]

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note X to the financial statements, the Company has suffered recurring losses from operations and has a net capital deficiency that raise substantial doubt about its ability to continue as a going concern. Management's plans in regard to these matters are also described in Note X. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

[As amended, effective for reports issued after December 31, 1990, by Statement on Auditing Standards No. 64.]

**.14** If the auditor concludes that the entity's disclosures with respect to the entity's ability to continue as a going concern for a reasonable period of time are inadequate, a departure from generally accepted accounting principles exists. This may result in either a qualified (except for) or an adverse opinion. Reporting guidance for such situations is provided in section 508, ~~*Reports on Audited Financial Statements*~~ [new proposed title] *Departures from Unqualified Opinions and Other Reporting Circumstances*.

* * *

**.16** If substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time existed at the date of prior period financial statements that are presented on a comparative basis, and that doubt has been removed in the current period, the explanatory paragraph included in the auditor's report (following the ~~opinion paragraph~~ Opinion on the Financial Statements section) on the financial statements of the prior period should not be repeated.

* * *

## AU sec. 9342, *Auditing Accounting Estimates: Auditing Interpretations of Section 342*

* * *

**.03** *Required Information Presented*—When an entity discloses in its basic financial statements only information required by FASB Statement No. 107, the auditor may issue an ~~standard~~ unqualified opinion (assuming no other report modifications are necessary). The auditor may add an ~~emphasis-of-matter~~ explanatory paragraph describing the nature and possible range of such fair value information especially when management's best estimate of value is used in the absence of quoted market values (FASB Statement No. 107, paragraph 11 [AC section F25.115D]) and the range of possible values is significant (see paragraph 16 of Proposed Auditing Standard, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*). If the entity has not disclosed required fair value information, the auditor should evaluate whether the financial statements are materially affected by the departure from generally accepted accounting principles.

* * *

## AU sec. 9410, *Adherence to Generally Accepted Accounting Principles: Auditing Interpretations of Section 410*

* * *

**.15** Section 508, ~~*Reports on Audited Financial Statements*~~ [new proposed title] *Departures from Unqualified Opinions and Other Reporting Circumstances*, paragraph .41 states: "Information essential for a fair presentation in conformity with generally accepted accounting principles should be set forth in the financial statements (which include related notes)." For financial statements that are prepared on the basis of accounting principles that are acceptable at the financial-statement date but that will not be acceptable in the future, the auditor should consider whether disclosure of the impending change in principle and the resulting restatement are essential data. If he decides that the matter should be disclosed and it is not, the auditor should express a qualified or adverse opinion as to conformity with GAAP, as required by section 508.41.

* * *

**.18** Even if the auditor decides that the disclosure of the forthcoming change and its effects are adequate and, consequently, decides not to qualify his opinion, he nevertheless may decide to include an explanatory paragraph in his report if the effects of the change are expected to be unusually material. The explanatory paragraph should not be construed as a qualification of the auditor's opinion; it is intended to highlight circumstances of particular importance and to aid in interpreting the financial statements (see ~~section 508.19~~paragraph 16 of Proposed Auditing Standard, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*).

* * *

## AU sec. 411, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles*

**.01** An independent auditor's report contains an opinion as to whether the financial statements present fairly, in all material respects, an entity's financial position, results of operations, and cash flows in conformity with generally accepted accounting principles. An identification of the country of origin of those generally accepted accounting principles also is required (see ~~section 508.08h~~paragraph 6.o. of Proposed Auditing Standard, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*).

The purpose of this section is to explain the meaning of "present fairly" as used in the phrase "present fairly . . . in conformity with generally accepted accounting principles." In applying this section, the auditor should look to the requirements of the Securities and Exchange Commission for the company under audit with respect to the accounting principles applicable to that company.

* * *

## AU sec. 504, *Association With Financial Statements*

* * *

**.04** An accountant may be associated with audited or unaudited financial statements. Financial statements are audited if the accountant has applied auditing procedures sufficient to permit him to report on them as described in Proposed Auditing Standard, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion,* and AU sec.~~tion~~ 508, ~~*Reports on Audited Financial Statements*~~ [new proposed title] *Departures from Unqualified Opinions and Other Reporting Circumstances*. The unaudited interim financial statements (or financial information) of a public entity are reviewed when the accountant has applied procedures sufficient to permit him to report on them as described in section 722, *Interim Financial Information*.

* * *

## AU sec. 508, ~~Reports on Audited Financial Statements~~ ~~[fn *]~~ [new proposed title] *Departures from Unqualified Opinions and Other Reporting Circumstances*

~~[fn *] This section has been revised to reflect the conforming changes necessary due to the issuance of Statement on Auditing Standards No. 93.~~

**INTRODUCTION**

~~**.01** This section applies to auditors' reports issued in connection with audits [fn 1] of historical financial statements that are intended to present financial position, results of operations, and cash flows in conformity with generally accepted accounting principles. It distinguishes the types of reports, describes the circumstances in which each is appropriate, and provides example reports.~~

~~Note: When performing an integrated audit of financial statements and internal control over financial reporting, the auditor may choose to issue a combined report or separate reports on the company's financial statements and on internal control over financial reporting. Refer to paragraphs 85-98 of PCAOB Auditing Standard No. 5, *An Audit of*~~

~~*Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, and Appendix C, *Special Reporting Situations*, of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, for direction on reporting on internal control over financial reporting. In addition, see paragraphs 86-88 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, which includes an illustrative combined audit report.~~

~~[fn 1] An audit, for purposes of this section, is defined as an examination of historical financial statements performed in accordance with generally accepted auditing standards in effect at the time the audit is performed. Generally accepted auditing standards include the ten standards as well as the Statements on Auditing Standards that interpret those standards. In some cases, regulatory authorities may have additional requirements applicable to entities under their jurisdiction and auditors of such entities should consider those requirements.~~

~~**.02** This section does not apply to unaudited financial statements as described in section 504, *Association With Financial Statements*, nor does it apply to reports on incomplete financial information or other special presentations as described in section 623, *Special Reports*.~~

~~**.03** Justification for the expression of the auditor's opinion rests on the conformity of his or her audit with generally accepted auditing standards and on the findings. Generally accepted auditing standards include four standards of reporting. This section is concerned primarily with the relationship of the fourth reporting standard to the language of the auditor's report.~~

~~**.04** The fourth standard of reporting is as follows:~~

~~The report shall either contain an expression of opinion regarding the financial statements, taken as a whole, or an assertion to the effect that an opinion cannot be expressed. When an overall opinion cannot be expressed, the reasons therefor should be stated. In all cases where an auditor's name is associated with financial statements, the report should contain a clear-cut indication of the character of the auditor's work, if any, and the degree of responsibility the auditor is taking.~~

~~**.05** The objective of the fourth standard is to prevent misinterpretation of the degree of responsibility the auditor is assuming when his or her name is associated with financial statements. Reference in the fourth reporting standard to the financial statements "taken as a whole" applies equally to a complete set of financial statements and to an individual financial statement (for example, to a balance sheet) for one or more periods presented. (Paragraph .65 discusses the fourth standard of reporting as it applies to comparative financial statements.) The auditor may express an unqualified opinion on~~

~~one of the financial statements and express a qualified or adverse opinion or disclaim an opinion on another if the circumstances warrant.~~

~~**.06** The auditor's report is customarily issued in connection with an entity's basic financial statements—balance sheet, statement of income, statement of retained earnings and statement of cash flows. Each financial statement audited should be specifically identified in the introductory paragraph of the auditor's report. If the basic financial statements include a separate statement of changes in stockholders' equity accounts, it should be identified in the introductory paragraph of the report but need not be reported on separately in the opinion paragraph since such changes are part of the presentation of financial position, results of operations, and cash flows.~~

**~~THE AUDITOR'S STANDARD REPORT~~**

~~**.07** The auditor's standard report states that the financial statements present fairly, in all material respects, an entity's financial position, results of operations, and cash flows in conformity with generally accepted accounting principles. This conclusion may be expressed only when the auditor has formed such an opinion on the basis of an audit performed in accordance with generally accepted auditing standards.~~

~~**.08** The auditor's standard report identifies the financial statements audited in an opening (introductory) paragraph, describes the nature of an audit in a scope paragraph, and expresses the auditor's opinion in a separate opinion paragraph. The basic elements of the report are the following:~~

~~*a.* A title that includes the word *independent* [fn 3]~~

~~*b.* A statement that the financial statements identified in the report were audited~~

~~*c.* A statement that the financial statements are the responsibility of the Company's management [fn 4] and that the auditor's responsibility is to express an opinion on the financial statements based on his or her audit~~

~~*d.* A statement that the audit was conducted in accordance with generally accepted auditing standards and an identification of the United States of America as the country of origin of those standards (for example, auditing standards generally accepted in the United States of America or U.S. generally accepted auditing standards)~~

~~*e.* A statement that those standards require that the auditor plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement~~

~~f. A statement that an audit includes—~~

~~(1) Examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements~~

~~(2) Assessing the accounting principles used and significant estimates made by management~~

~~(3) Evaluating the overall financial statement presentation [fn 5]~~

~~*g.* A statement that the auditor believes that his or her audit provides a reasonable basis for his or her opinion~~

~~*h.* An opinion as to whether the financial statements present fairly, in all material respects, the financial position of the Company as of the balance sheet date and the results of its operations and its cash flows for the period then ended in conformity with generally accepted accounting principles. The opinion should include an identification of the United States of America as the country of origin of those accounting principles (for example, accounting principles generally accepted in the United States of America or U.S. generally accepted accounting principles [fn 6] )~~

~~*i.* The manual or printed signature of the auditor's firm~~

~~j. The date [fn 7] of the audit report~~

~~The form of the auditor's standard report on financial statements covering a single year is as follows:~~

~~Independent Auditor's Report~~

~~We have audited the accompanying balance sheet of X Company as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.~~

~~We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence~~

~~supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.~~

~~In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 20XX, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.~~

[~~*Signature*~~]

[~~*Date*~~]

~~The form of the auditor's standard report on comparative financial statements [fn 8] is as follows:~~

~~Independent Auditor's Report~~

~~We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.~~

~~We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.~~

~~In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.~~

[~~*Signature*~~]

[~~*Date*~~]

~~*k.* When performing an integrated audit of financial statements and internal control over financial reporting, if the auditor issues separate reports on the company's financial statements and on internal control over financial reporting, the following paragraph should be added to the auditor's report on the company's financial statements:~~

~~We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of X Company's internal control over financial reporting as of December 31, 20X3, based on [identify control criteria] and our report dated [date of report, which should be the same as the date of the report on the financial statements] expressed [include nature of opinions].~~

~~[fn 3] This section does not require a title for an auditor's report if the auditor is not independent. See section 504, *Association With Financial Statements*, for guidance on reporting when the auditor is not independent.~~

~~[fn 4] In some instances, a document containing the auditor's report may include a statement by management regarding its responsibility for the presentation of the financial statements. Nevertheless, the auditor's report should state that the financial statements are management's responsibility.~~

~~[fn 5] Section 411, *The Meaning of* Present Fairly in Conformity With Generally Accepted Accounting Principles, paragraphs .03 and .04, discuss the auditor's evaluation of the overall presentation of the financial statements. [As amended, effective for reports issued or reissued on or after June 30, 2001, by Statement on Auditing Standards No. 93.]~~

~~[fn 6] A U.S. auditor also may be engaged to report on the financial statements of a U.S. entity that have been prepared in conformity with accounting principles generally accepted in another country. In those circumstances, the auditor should refer to the guidance in section 534, *Reporting on Financial Statements Prepared for Use in Other Countries.* [Footnote added, effective for reports issued or reissued on or after June 30, 2001 by Statement on Auditing Standards No. 93.]~~

~~[fn 7] For guidance on dating the auditor's report, see section 530, *Dating of the Independent Auditor's Report*. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 93, October 2000.]~~

~~[fn 8] If statements of income, retained earnings, and cash flows are presented on a comparative basis for one or more prior periods, but the balance sheet(s) as of the end of one (or more) of the prior period(s) is not presented, the phrase "for the years then ended" should be changed to indicate that the auditor's opinion applies to each period for which statements of income, retained earnings, and cash flows are presented, such~~

~~as "for each of the three years in the period ended [date of latest balance sheet]." [Footnote renumbered by the issuance of Statement on Auditing Standards No. 93, October 2000.]~~

**.09** ~~The report may be addressed to the company whose financial statements are being audited or to its board of directors or stockholders. A report on the financial statements of an unincorporated entity should be addressed as circumstances dictate, for example, to the partners, to the general partner, or to the proprietor. Occasionally, an auditor is retained to audit the financial statements of a company that is not a client; in such a case, the report is customarily addressed to the client and not to the directors or stockholders of the company whose financial statements are being audited.~~

**.10** This section ~~also~~ discusses the circumstances that may require the auditor to depart from the ~~standard~~ auditor's unqualified report[fn8A] and provides reporting guidance in such circumstances. This section is organized by type of opinion that the auditor may express in each of the various circumstances presented; this section describes what is meant by the various audit opinions:

- ~~*Unqualified opinion*. An unqualified opinion states that the financial statements present fairly, in all material respects, the financial position, results of operations, and cash flows of the entity in conformity with generally accepted accounting principles. This is the opinion expressed in the standard report discussed in paragraph .08.~~

- ~~*Explanatory language added to the auditor's standard report*. Certain circumstances, while not affecting the auditor's unqualified opinion on the financial statements, may require that the auditor add an explanatory paragraph (or other explanatory language) to his or her report.~~

- *Qualified opinion*. A qualified opinion states that, except for the effects of the matter(s) to which the qualification relates, the financial statements present fairly, in all material respects, the financial position, results of operations, and cash flows of the entity in conformity with generally accepted accounting principles.

- *Adverse opinion*. An adverse opinion states that the financial statements do not present fairly the financial position, results of operations, or cash flows of the entity in conformity with generally accepted accounting principles.

- *Disclaimer of opinion.* A disclaimer of opinion states that the auditor does not express an opinion on the financial statements.

~~These opinions are discussed in greater detail throughout the remainder of this~~ This section also discusses other reporting circumstances such as reports on comparative financial statements.

[fn8A] The Proposed Auditing Standard, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion,* establishes requirements for the auditor regarding the content of the auditor's written report when the auditor expresses an unqualified opinion on the financial statements (the "auditor's unqualified report"). Paragraphs 85-89 and Appendix C of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, address the form and content of the auditor's report when the auditor performs an audit of internal control over financial reporting.

**~~EXPLANATORY LANGUAGE ADDED TO THE AUDITOR'S STANDARD REPORT~~**

~~**.11** Certain circumstances, while not affecting the auditor's unqualified opinion, may require that the auditor add an explanatory [fn 9] paragraph (or other explanatory language) to the standard report. [fn 10] These circumstances include:~~

~~a. The auditor's opinion is based in part on the report of another auditor (paragraphs .12 and .13).~~

~~*b.* There is substantial doubt about the entity's ability to continue as a going concern. [fn 11]~~

~~*c.* There has been a material change between periods in accounting principles or in the method of their application (paragraphs .17A through .17E).~~

~~*d.* A material misstatement in previously issued financial statements has been corrected (paragraphs .18A through .18C).~~

~~*e.* Certain circumstances relating to reports on comparative financial statements exist (paragraphs .68, .69, and .72 through .74).~~

~~*f.* Selected quarterly financial data required by SEC Regulation S-K has been omitted or has not been reviewed. (See section 722, *Interim Financial Information*, paragraph .50.)~~

~~*g.* Supplementary information required by the Financial Accounting Standards Board (FASB), the Governmental Accounting Standards Board (GASB), or the Federal Accounting Standards Advisory Board (FASAB) has been omitted, the presentation of such information departs materially from FASB, GASB, or FASAB guidelines, the auditor is unable to complete prescribed procedures with respect~~

~~to such information, or the auditor is unable to remove substantial doubts about whether the supplementary information conforms to FASB, GASB, or FASAB guidelines. (See section 558, *Required Supplementary Information*, paragraph .02.)~~

~~*h.* Other information in a document containing audited financial statements is materially inconsistent with information appearing in the financial statements. (See section 550, *Other Information in Documents Containing Audited Financial Statements*, paragraph .04.)~~

~~In addition, the auditor may add an explanatory paragraph to emphasize a matter regarding the financial statements (paragraph .19). [As amended, effective for reports issued or reissued on or after February 29, 1996, by Statement on Auditing Standards No. 79. Revised, November 2002, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 100.]~~

~~**fn 9** Unless otherwise required by the provisions of this section, an explanatory paragraph may precede or follow the opinion paragraph in the auditor's report. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 93, October 2000.]~~

~~**fn 10** See footnote 3. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 93, October 2000.]~~

~~**fn 11** Section 341, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*, describes the auditor's responsibility to evaluate whether there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time and, when applicable, to consider the adequacy of financial statement disclosure and to include an explanatory paragraph in the report to reflect his or her conclusions. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 93, October 2000.]~~

**~~Opinion Based in Part on Report of Another Auditor~~**

~~**.12** When the auditor decides to make reference to the report of another auditor as a basis, in part, for his or her opinion, he or she should disclose this fact in the introductory paragraph of his or her report and should refer to the report of the other auditor in expressing his or her opinion. These references indicate division of responsibility for performance of the audit. (See section 543, *Part of Audit Performed by Other Independent Auditors*.)~~

~~**.13** An example of a report indicating a division of responsibility follows:~~

~~Independent Auditor's Report~~

~~We have audited the consolidated balance sheets of ABC Company and subsidiaries as of December 31, 20X2 and 20X1, and the related consolidated statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits. We did not audit the financial statements of B Company, a wholly-owned subsidiary, which statements reflect total assets of $_______ and $________ as of December 31, 20X2 and 20X1, respectively, and total revenues of $_______ and $_______ for the years then ended. Those statements were audited by other auditors whose report has been furnished to us, and our opinion, insofar as it relates to the amounts included for B Company, is based solely on the report of the other auditors.~~

~~We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits and the report of other auditors provide a reasonable basis for our opinion.~~

~~In our opinion, based on our audits and the report of other auditors, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of ABC Company and subsidiaries as of December 31, 20X2 and 20X1, and the results of their operations and their cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.~~

*** * ***

**~~Lack of Consistency~~**

**~~.16~~** ~~The auditor should recognize the following matters relating to the consistency of the company's financial statements in the auditor's report if those matters have a material effect on the financial statements:~~

*~~a.~~* ~~A change in accounting principle.~~

*~~b.~~* ~~An adjustment to correct a misstatement in previously issued financial statements.~~

~~**Change in Accounting Principle**~~

~~**.17A** As discussed in PCAOB Auditing Standard No. 6, *Evaluating Consistency of Financial Statements*, the auditor should evaluate a change in accounting principle to determine whether (1) the newly adopted accounting principle is a generally accepted accounting principle, (2) the method of accounting for the effect of the change is in conformity with generally accepted accounting principles, (3) the disclosures related to the accounting change are adequate, and (4) the company has justified that the alternative accounting principle is preferable.[fn 12] A change in accounting principle that has a material effect on the financial statements should be recognized in the auditor's report on the audited financial statements through the addition of an explanatory paragraph following the opinion paragraph. If the auditor concludes that the criteria in this paragraph have been met, the explanatory paragraph in the auditor's report should include identification of the nature of the change and a reference to the note disclosure describing the change.~~

~~[fn 12] The issuance of an accounting pronouncement that requires use of a new accounting principle, interprets an existing principle, expresses a preference for an accounting principle, or rejects a specific principle is sufficient justification for a change in accounting principle, as long as the change in accounting principle is made in accordance with the hierarchy of generally accepted accounting principles. See FASB Statement 154, paragraph 14.~~

~~**.17B** Following is an example of an explanatory paragraph for a change in accounting principle resulting from the adoption of a new accounting pronouncement:~~

~~As discussed in Note X to the financial statements, the company has changed its method of accounting for [*describe accounting method change*] in [*year(s) of financial statements that reflect the accounting method change*] due to the adoption of [*name of accounting pronouncement*].~~

~~**.17C** Following is an example of an explanatory paragraph when the company has made a change in accounting principle other than a change due to the adoption of a new accounting pronouncement:~~

~~As discussed in Note X to the financial statements, the company has elected to change its method of accounting for [*describe accounting method change*] in [*year(s) of financial statements that reflect the accounting method change*].~~

~~**.17D** The explanatory paragraph relating to a change in accounting principle should be included in reports on financial statements in the year of the change and in subsequent years until the new accounting principle is applied in all periods presented. If the accounting change is accounted for by retrospective application to the financial~~

~~statements of all prior periods presented, the additional paragraph is needed only in the year of the change.~~

**~~.17E~~**

~~If the auditor concludes that the criteria in paragraph .17A for a change in accounting principle are not met, the auditor should consider the matter to be a departure from generally accepted accounting principles and, if the effect of the change in accounting principle is material, issue a qualified or adverse opinion.~~

**~~Correction of a Material Misstatement in Previously Issued Financial Statements~~**

**~~.18A~~** ~~Correction of a material misstatement in previously issued financial statements should be recognized in the auditor's report through the addition of an explanatory paragraph following the opinion paragraph.~~[fn 13] ~~The explanatory paragraph should include (1) a statement that the previously issued financial statements have been restated for the correction of a misstatement in the respective period and (2) a reference to the company's disclosure of the correction of the misstatement. Following is an example of an appropriate explanatory paragraph when there has been a correction of a material misstatement in previously issued financial statements.~~

~~As discussed in Note X to the financial statements, the 20X2 financial statements have been restated to correct a misstatement.~~

[fn 13] ~~The directions in paragraphs .68-.69 apply when comparative financial statements are presented and the opinion on the prior-period financial statements differs from the opinion previously expressed.~~

**~~.18B~~** ~~This type of explanatory paragraph in the auditor's report should be included in reports on financial statements when the related financial statements are restated to correct the prior material misstatement. The paragraph need not be repeated in subsequent years.~~

**~~.18C~~** ~~The accounting pronouncements generally require certain disclosures relating to restatements to correct a misstatement in previously issued financial statements. If the financial statement disclosures are not adequate, the auditor should address the lack of disclosure as discussed beginning at paragraph .41.~~

**~~Emphasis of a Matter~~**

**~~.19~~** ~~In any report on financial statements, the auditor may emphasize a matter regarding the financial statements. Such explanatory information should be presented in a separate paragraph of the auditor's report. Phrases such as "with the foregoing~~

~~[following] explanation" should not be used in the opinion paragraph if an emphasis paragraph is included in the auditor's report. Emphasis paragraphs are never required; they may be added solely at the auditor's discretion. Examples of matters the auditor may wish to emphasize are—~~

- ~~That the entity is a component of a larger business enterprise.~~
- ~~That the entity has had significant transactions with related parties.~~
- ~~Unusually important subsequent events.~~
- ~~Accounting matters, other than those involving a change or changes in accounting principles, affecting the comparability of the financial statements with those of the preceding period.~~

**DEPARTURES FROM UNQUALIFIED OPINIONS**

**Qualified Opinions**

* * *

**.20A** When the auditor expresses a qualified opinion, the auditor's report must include the basic elements of the auditor's unqualified report and critical audit matters described in paragraphs 6 and 7-13, respectively, of Proposed Auditing Standard, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*.[fn13A]

**fn13A** When the auditor expresses a qualified opinion, the section titled "The Auditor's Responsibilities Regarding Other Information"(described in paragraphs 13-14 of Proposed Auditing Standard, *The Auditor's Responsibilities Regarding Other Information in Certain Documents Containing Audited Financial Statements and the Related Auditor's Report*) also should include language that references the matter(s) for which the auditor has qualified the opinion.

**.21** When the auditor expresses a qualified opinion, he or she should disclose all of the substantive reasons for the qualified opinion in one or more separate ~~explanatory~~ "basis for departure from an unqualified opinion paragraph(s)" preceding the opinion paragraph in the Opinion on the Financial Statements section of the auditor's report. The auditor should also include, in the Opinion on the Financial Statements section ~~opinion paragraph~~, the appropriate qualifying language and a reference to the ~~explanatory~~ "basis for departure from an unqualified opinion paragraph." A qualified opinion should include the word *except* or *exception* in a phrase such as *except for* or *with the exception of*. Phrases such as *subject to* and *with the foregoing explanation* are not clear or forceful enough and should not be used. Since accompanying notes are part of the financial statements, wording such as *fairly presented, in all material respects, when read in conjunction with Note 1* is likely to be misunderstood and should not be used. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

> Note: The auditor would refer to Proposed Auditing Standard, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*, to determine if the matter for which the auditor qualified his or her opinion is also a critical audit matter.

**Scope Limitations**

**.22** The auditor can determine that he or she is able to express an unqualified opinion only if the audit has been conducted in accordance with ~~generally accepted auditing~~ the standards of the Public Company Accounting Oversight Board ("PCAOB") and if he or she has therefore been able to apply all the procedures he considers necessary in the circumstances. Restrictions on the scope of the audit, whether imposed by the client or by circumstances, such as the timing of his or her work, the inability to obtain sufficient appropriate evidential matter, or an inadequacy in the accounting records, may require the auditor to qualify his or her opinion or to disclaim an opinion. In such instances, the reasons for the auditor's qualification of opinion or disclaimer of opinion should be described in the report.

* * *

**.25** When a qualified opinion results from a limitation on the scope of the audit or an insufficiency of evidential matter, the auditor's report ~~situation~~ should ~~be~~ describe~~d~~ ~~in an explanatory~~ the basis for departure from an unqualified opinion in a paragraph preceding the opinion paragraph in the Opinion on the Financial Statements section and refer~~red~~ to in both the ~~scope~~ Basis of Opinion and the ~~opinion~~ Opinion on the Financial Statements ~~paragraphs~~ sections of the auditor's report. It is not appropriate for the scope of the audit to be explained in a note to the financial statements, since the description of the audit scope is the responsibility of the auditor and not that of the client. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

**.26** When an auditor qualifies his or her opinion because of a scope limitation, the wording in the ~~opinion paragraph~~ Opinion on the Financial Statements section should indicate that the qualification pertains to the possible effects on the financial statements and not to the scope limitation itself. Wording such as "In our opinion, except for the above-mentioned limitation on the scope of our audit . . ." bases the exception on the restriction itself, rather than on the possible effects on the financial statements and, therefore, is unacceptable. An example of a qualified opinion related to a scope limitation concerning an investment in a foreign affiliate (assuming the effects of the limitation are such that the auditor has concluded that a disclaimer of opinion is not appropriate) follows:

~~Independent Auditor's~~ Report of Independent Registered Public Accounting Firm

*To the shareholders and board of directors of X Company*

[~~*Same first paragraph as the standard report*~~ *Includes the same basic elements as the Introduction section of the auditor's unqualified report*]

[*Basis of Opinion*]

Our responsibility is to express an opinion on the Company's financial statements based on our audits. Except as discussed ~~in the following paragraph~~ below, we conducted our audits in accordance with ~~auditing~~ the standards of the PCAOB ~~generally accepted in the (United States) of America~~. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. ~~An audit~~ Such procedures ~~includes~~ include examining, on a test basis, appropriate evidence ~~supporting~~ regarding the amounts and disclosures in the financial statements. ~~An~~ Our audits also ~~includes~~ ~~assessing~~ included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements ~~presentation~~. We believe that our audits provide a reasonable basis for our opinion.

[*Opinion on the Financial Statements*]

We were unable to obtain audited financial statements supporting the Company's investment in a foreign affiliate stated at $_______ and $_______ at December 31, 20X2 and 20X1, respectively, or its equity in earnings of that affiliate of $_______ and $_______, which is included in net income for the years then ended as described in Note X to the financial statements; nor were we able to satisfy ourselves as to the carrying value of the investment in the foreign affiliate or the equity in its earnings by other auditing procedures.

In our opinion, except for the effects of such adjustments, if any, as might have been determined to be necessary had we been able to examine evidence regarding the foreign affiliate investment and earnings, the financial statements referred to in the first paragraph above present fairly, in all material respects, the financial position of X Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

[Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

* * *

**.34** An auditor may be asked to report on the balance sheet only. In this case, the auditor may express an opinion on the balance sheet only. An example of an unqualified opinion on a balance-sheet-only audit follows (the report assumes that the auditor has been able to satisfy himself or herself regarding the consistency of application of accounting principles):

~~Independent Auditor's~~ Report of Independent Registered Public Accounting Firm

*To the shareholders and board of directors of X Company*

[*Introduction*]

We have audited the accompanying balance sheet of X Company as of December 31, 20XX, and the related notes (collectively referred to as the "financial statement"). This financial statement is the responsibility of the Company's management.

We are a public accounting firm registered with the Public Company Accounting Oversight Board ("PCAOB") (United States) and are required to be independent with respect to the Company in accordance with the United States federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission ("SEC") and the PCAOB. We or our predecessor firms have served as the Company's auditor consecutively since [ *year* ].

[*Basis of Opinion*]

Our responsibility is to express an opinion on this financial statement based on our audit. We conducted our audit in accordance with ~~auditing~~ the standards ~~generally accepted in the~~ of the PCAOB ~~(United States) of America~~. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the ~~balance sheet~~ financial statement is free of material misstatement, whether due to error or fraud.

Our audit included performing procedures to assess the risks of material misstatements of the financial statement, whether due to error or fraud, and performing procedures that respond to those risks. ~~An audit~~ Such procedures ~~includes~~ include examining, on a test basis, appropriate evidence ~~supporting~~ regarding the amounts and disclosures in the ~~balance sheet~~ financial statement. ~~An~~ Our audit also ~~includes~~ included assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall ~~balance sheet~~ presentation of the financial statement. We believe that our audit of the ~~balance sheet~~ financial statement provides a reasonable basis for our opinion.

[*Opinion on the Financial Statement*]

In our opinion, the ~~balance sheet~~ financial statement referred to above presents fairly, in all material respects, the financial position of X Company as of December 31, 20XX, in conformity with accounting principles generally accepted in the United States of America.

*Critical Audit Matters*

*The Auditor's Responsibilities Regarding Other Information*

[*Signature*]

[*City and State or Country*]

[*Date*]

[Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

**Departure from a Generally Accepted Accounting Principle**

**.35** When financial statements are materially affected by a departure from generally accepted accounting principles and the auditor has audited the statements in accordance with ~~generally accepted auditing~~ the standards of the PCAOB, he or she should express a qualified (paragraphs .36 through .57) or an adverse (paragraphs .58 through .60) opinion. The basis for such opinion should be stated in the report.

[Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

* * *

**.37** When the auditor expresses a qualified opinion, he or she should disclose in the Opinion on the Financial Statements section of the report, in a separate ~~explanatory "~~basis for departure from an unqualified opinion paragraph(s)~~"~~ preceding the opinion paragraph ~~of the report~~, all of the substantive reasons that have led him or her to conclude that there has been a departure from generally accepted accounting principles. Furthermore, the ~~opinion paragraph~~ Opinion on the Financial Statements section of the report should include the appropriate qualifying language and a reference to the ~~explanatory "~~basis for departure from an unqualified opinion paragraph(s).~~"~~ [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

**.38** The ~~explanatory "~~basis for departure from an unqualified opinion paragraph(s)~~"~~ that discloses the reasons for the qualified opinion should also disclose the principal effects of the subject matter of the qualification on financial position, results of operations, and cash flows, if practicable. [fn 15] If the effects are not reasonably determinable, the report should so state. If such disclosures are made in a note to the financial statements, the ~~explanatory "~~basis for departure from an unqualified opinion paragraph(s)~~"~~ in the auditor's report may be shortened by referring to it. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

**.39** An example of a report in which the opinion is qualified because of the use of an accounting principle at variance with generally accepted accounting principles follows (assuming the effects are such that the auditor has concluded that an adverse opinion is not appropriate):

~~Independent Auditor's~~ Report of Independent Registered Public Accounting Firm

*To the shareholders and board of directors of X Company*

[~~*Same first and second paragraphs as the standard report*~~ *Includes the same basic elements as the Introduction and the Basis of Opinion sections of the auditor's unqualified report*]

[*Opinion on the Financial Statements*]

The Company has excluded, from property and debt in the accompanying balance sheets, certain lease obligations that, in our opinion, should be capitalized in order to conform with accounting principles generally accepted in the United States of America.

If these lease obligations were capitalized, property would be increased by $_______ and $_______, long-term debt by $_______ and $_______, and retained earnings by $_______ and $_______ as of December 31, 20X2 and 20X1, respectively. Additionally, net income would be increased (decreased) by $_______ and $_______ and earnings per share would be increased (decreased) by $_______ and $_______, respectively, for the years then ended.

In our opinion, except for the effects of not capitalizing certain lease obligations as discussed in the preceding paragraph, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

*The Auditor's Responsibilities Regarding Other Information*

[*Signature*]

[*City and State or Country*]

[*Date*]

[Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

**.40** If the pertinent facts are disclosed in a note to the financial statements, a separate paragraph (preceding the opinion paragraph in the Opinion on the Financial Statements section) of the auditor's report in the circumstances illustrated in paragraph .39 might read as follows:

As more fully described in Note X to the financial statements, the Company has excluded certain lease obligations from property and debt in the accompanying balance sheets. In our opinion, accounting principles generally accepted in the United States of America require that such obligations be included in the balance sheets.

[Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

* * *

**.42** Following is an example of a report qualified for inadequate disclosure (assuming the effects are such that the auditor has concluded an adverse opinion is not appropriate):

~~Independent Auditor's~~ Report of Independent Registered Public Accounting Firm

*To the shareholders and board of directors of X Company*

[~~*Same first and second paragraphs as the standard report*~~ *Includes the same basic elements as the Introduction and the Basis of Opinion sections of the auditor's unqualified report*]

[*Opinion on the Financial Statements*]

The Company's financial statements do not disclose [*describe the nature of the omitted disclosures*]. In our opinion, disclosure of this information is required by accounting principles generally accepted in the United States of America. In our opinion, except for the omission of the information discussed in the preceding paragraph, . . .

*Critical Audit Matters*

*The Auditor's Responsibilities Regarding Other Information*

[*Signature*]

[*City and State or Country*]

[*Date*]

[Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

* * *

**.44** ~~The auditor is not required to prepare a basic financial statement (for example, a statement of cash flows for one or more periods) and include it in the report~~ ~~i~~If the company's management declines to present ~~the statement~~ a basic financial statement (for example, a statement of cash flows for one or more periods)~~.~~ ~~Accordingly, in these cases~~, the auditor should ordinarily qualify the report in the following manner:

~~Independent Auditor's~~ Report of Independent Registered Public Accounting Firm

*To the shareholders and board of directors of X Company*

[*Introduction*]

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income and retained earnings for the years then ended, and the related notes (collectively referred to as the "financial statements"). These financial statements are the responsibility of the Company's management. ~~Our responsibility is to express an opinion on these financial statements based on our audit.~~

We are a public accounting firm registered with the Public Company Accounting Oversight Board ("PCAOB") (United States) and are required to be independent with respect to the Company in accordance with the United States federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission ("SEC") and the PCAOB. We or our predecessor firms have served as Company's auditor consecutively since [ *year* ].

[~~*Same second paragraph as the standard report*~~ *Includes the same basic elements as the Basis of Opinion section of the auditor's unqualified report*]

[*Opinion on the Financial Statements*]

The Company declined to present a statement of cash flows for the years ended December 31, 20X2 and 20X1. Presentation of such statement summarizing the Company's operating, investing, and financing activities is required by accounting principles generally accepted in the United States of America.

In our opinion, except that the omission of a statement of cash flows results in an incomplete presentation as explained in the preceding paragraph, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of December 31, 20X2 and 20X1, and the results of its operations for the years then ended in conformity with accounting principles generally accepted in the United States of America.

*Critical Audit Matters*

*The Auditor's Responsibilities Regarding Other Information*

[*Signature*]

[*City and State or Country*]

[*Date*]

[Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

* * *

**.51** ***Departures from generally accepted accounting principles related to changes in accounting principle***. Paragraph ~~.17A~~ 7 of Auditing Standard No. 6, *Evaluating Consistency of Financial Statements* includes ~~states~~ the criteria for evaluating a change in accounting principle. If the auditor concludes that the criteria have not been met, he or she should consider that circumstance to be a departure from generally accepted accounting principles and, if the effect of the accounting change is material, should issue a qualified or adverse opinion.

**.52** The accounting standards indicate that a company may make a change in accounting principle only if it justifies that the allowable alternative accounting principle is preferable. If the company does not provide reasonable justification that the alternative accounting principle is preferable, the auditor should consider the accounting change to be a departure from generally accepted accounting principles and, if the effect of the change in accounting principle is material, should issue a qualified or adverse opinion. The following is an example of a report qualified because a company did not provide reasonable justification that an alternative accounting principle is preferable:

~~Independent Auditor's~~ Report of Independent Registered Public Accounting Firm

*To the shareholders and board of directors of X Company*

[~~*Same first and second paragraphs as the standard*~~ *Includes the same basic elements as the Introduction and the Basis of Opinion sections of the auditor's unqualified report*]

[*Opinion on the Financial Statements*]

As disclosed in Note X to the financial statements, the Company adopted, in 20X2, the first-in, first-out method of accounting for its inventories, whereas it previously used the last-in, first-out method. Although use of the first-in, first-out method is in conformity with accounting principles generally accepted in the United States of America, in our opinion the Company has not provided reasonable justification that this accounting principle is preferable as required by those principles.[fn 17]

In our opinion, except for the change in accounting principle discussed in the preceding paragraph, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

*Critical Audit Matters*

*The Auditor's Responsibilities Regarding Other Information*

[*Signature*]

[*City and State or Country*]

[*Date*]

[Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

**fn17** Because this paragraph included in the example presented contains all of the information required in a~~n~~ ~~explanatory~~ "basis for departure from an unqualified opinion paragraph" on consistency, a separate explanatory paragraph (following the ~~opinion paragraph~~ Opinion on the Financial Statements section) as required by paragraphs ~~.17A thorough .17E of this section~~ 8 and 12-15 of Auditing Standard No. 6, *Evaluating Consistency of Financial Statements* is not necessary in this instance. A separate paragraph that identifies the change in accounting principle would be required if the substance of the disclosure did not fulfill the requirements outlined in these paragraphs. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 93, October 2000.]

* * *

**.58A** When the auditor expresses an adverse opinion, in addition to including the title, "Report of Independent Registered Public Accounting Firm," and the addressees, the auditor's report must include the opinion as described in paragraph .58 and the basic elements included in the following sections of the auditor's unqualified report:[fn17A]

a. Introduction section;

b. Basis of Opinion section;

c. The Auditor's Responsibilities Regarding Other Information section;[fn17B] and

d. Signature and Date section.

Note: Critical audit matters described in paragraphs 7-13 of Proposed Auditing Standard, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*, are not required in reports with adverse opinions.

**fn17A** Basic elements of the auditor's unqualified report are described in paragraph 6 of Proposed Auditing Standard, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion.*

**fn17B** When the auditor expresses an adverse opinion, the section titled "The Auditor's Responsibilities Regarding Other Information" (described in paragraphs 13-14 of Proposed Auditing Standard, *The Auditor's Responsibilities Regarding Other Information in Certain Documents Containing Audited Financial Statements and the Related Auditor's Report*) also should include language that references the matter(s) for which the auditor has issued an adverse opinion.

**.59** When the auditor expresses an adverse opinion, he or she should disclose in a separate ~~explanatory~~ "basis for departure from an unqualified opinion paragraph(s)" preceding the opinion paragraph in the Opinion on the Financial Statements section of the report (*a*) all the substantive reasons for his or her adverse opinion, and (*b*) the principal effects of the subject matter of the adverse opinion on financial position, results of operations, and cash flows, if practicable.[fn18] If the effects are not reasonably determinable, the report should so state. [fn19] [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

**fn19** When the auditor expresses an adverse opinion, he or she should also consider the need for an explanatory paragraph under the circumstances identified in paragraph ~~.11~~15~~,~~ ~~subsection (*b*), (*c*), (*d*), and (*e*)~~ of ~~this section~~ Proposed Auditing Standard, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 93, October 2000.]

**.60** When an adverse opinion is expressed, the opinion paragraph in the Opinion on the Financial Statements section of the report should include a direct reference to a separate "basis for departure from an unqualified opinion paragraph" ~~that discloses the basis for the adverse opinion~~, as shown below:

~~Independent Auditor's~~ Report of Independent Registered Public Accounting Firm

*To the shareholders and board of directors of X Company*

[~~Same first and second paragraphs as the standard~~ _Includes the same basic elements as the Introduction and the Basis of Opinion sections of the auditor's unqualified report_]

[_Opinion on the Financial Statements_]

As discussed in Note X to the financial statements, the Company carries its property, plant and equipment accounts at appraisal values, and provides depreciation on the basis of such values. Further, the Company does not provide for income taxes with respect to differences between financial income and taxable income arising because of the use, for income tax purposes, of the installment method of reporting gross profit from certain types of sales. Accounting principles generally accepted in the United States of America require that property, plant and equipment be stated at an amount not in excess of cost, reduced by depreciation based on such amount, and that deferred income taxes be provided.

Because of the departures from accounting principles generally accepted in the United States of America identified above, as of December 31, 20X2 and 20X1, inventories have been increased $_______ and $_______ by inclusion in manufacturing overhead of depreciation in excess of that based on cost; property, plant and equipment, less accumulated depreciation, is carried at $_______ and $_______ in excess of an amount based on the cost to the Company; and deferred income taxes of $_______ and $_______ have not been recorded; resulting in an increase of $_______ and $_______ in retained earnings and in appraisal surplus of $_______ and $_______, respectively. For the years ended December 31, 20X2 and 20X1, cost of goods sold has been increased $_______ and $_______, respectively, because of the effects of the depreciation accounting referred to above and deferred income taxes of $_______ and $_______ have not been provided, resulting in an increase in net income of $_______ and $_______, respectively.

In our opinion, because of the effects of the matters discussed in the preceding paragraphs, the financial statements referred to above do not present fairly, in conformity with accounting principles generally accepted in the United States of America, the financial position of X Company as of December 31, 20X2 and 20X1, or the results of its operations or its cash flows for the years then ended.

_The Auditor's Responsibilities Regarding Other Information_

[_Signature_]

[_City and State or Country_]

[_Date_]

[Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

* * *

**.62** A disclaimer is appropriate when the auditor has not performed an audit sufficient in scope to enable him or her to form an opinion on the financial statements. **[fn 20]** A disclaimer of opinion should not be expressed because the auditor believes, on the basis of his or her audit, that there are material departures from generally accepted accounting principles (see paragraphs .35 through .57). When disclaiming an opinion because of a scope limitation, the auditor should state in a separate paragraph or paragraphs all of the substantive reasons for the disclaimer. He or she should state that the scope of the audit was not sufficient to warrant the expression of an opinion. The auditor should not identify the procedures that were performed nor include the paragraph describing the characteristics of an audit (that is, the ~~scope paragraph of the auditor's standard~~ Basis of Opinion section of the auditor's unqualified report); to do so may tend to overshadow the disclaimer. In addition, the auditor should also disclose any other reservations he or she has regarding fair presentation in conformity with generally accepted accounting principles. [Paragraph renumbered and amended, effective for reports issued or reissued on or after February 29, 1996, by the issuance of Statement on Auditing Standards No. 79.]

**.62A** When the auditor disclaims an opinion, in addition to including the title, "Report of Independent Registered Public Accounting Firm," and the addressees, the auditor's report must include the basic elements included in the following sections of the auditor's unqualified report,[fn20A] modified appropriately as shown in an example report in paragraph .63:

a. Introduction section; and

b. Signature and Date section.

Note: Critical audit matters described in paragraphs 7-13 of Proposed Auditing Standard, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*, are not required in reports that disclaim an opinion.

**fn20A** Basic elements of the auditor's unqualified report are described in paragraph 6 of Proposed Auditing Standard, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion.*

**.63** An example of a report disclaiming an opinion resulting from an inability to obtain sufficient appropriate evidential matter because of the scope limitation follows:

~~Independent Auditor's~~ Report of Independent Registered Public Accounting Firm

*To the shareholders and board of directors of X Company*

[*Introduction*]

We were engaged to audit the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended, and the related notes (collectively referred to as the "financial statements"). These financial statements are the responsibility of the Company's management. [fn 21]

We are a public accounting firm registered with the Public Company Accounting Oversight Board ("PCAOB") (United States) and are required to be independent with respect to the Company in accordance with the United States federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB. We or our predecessor firms have served as the Company's auditor consecutively since [ *year* ].

[~~*Second paragraph of standard report*~~ *Basic elements in the Basis of Opinion section of the auditor's unqualified report should be omitted*]

[*Opinion on the Financial Statements*]

The Company did not make a count of its physical inventory in 20X2 or 20X1, stated in the accompanying financial statements at $_______ as of December 31, 20X2, and at $________ as of December 31, 20X1. Further, evidence supporting the cost of property and equipment acquired prior to December 31, 20X1, is no longer available. The Company's records do not permit the application of other auditing procedures to inventories or property and equipment.

Since the Company did not take physical inventories and we were not able to apply other auditing procedures to satisfy ourselves as to inventory quantities and the cost of property and equipment, the scope of our work was not sufficient to enable us to express, and we do not express, an opinion on these financial statements.

[*Signature*]

[*City and State or Country*]

[*Date*]

[fn21] The wording in the ~~first paragraph~~ Introduction section of the auditor's ~~standard~~ unqualified report is changed in a disclaimer of opinion because of a scope limitation.

The first sentence now states that "we were engaged to audit" rather than "we have audited" since, because of the scope limitation, the auditor was not able to perform an audit in accordance with ~~generally accepted auditing~~ the standards of the PCAOB. ~~In addition, the last sentence of the first paragraph is also deleted, because of the scope limitation, to eliminate the reference to the auditor's responsibility to express an opinion.~~ [Footnote renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 93, October 2000.]

* * *

## REPORTS ON COMPARATIVE FINANCIAL STATEMENTS

**.65** The fourth standard of reporting[fn21A] requires that an auditor's report contain either an expression of opinion regarding the financial statements *taken as a whole* or an assertion to the effect that an opinion cannot be expressed. Reference in the fourth reporting standard to the financial statements *taken as a whole* applies not only to the financial statements of the current period but also to those of one or more prior periods that are presented on a comparative basis with those of the current period. Therefore, a continuing auditor [fn 22] should update [fn 23] the report on the individual financial statements of the one or more prior periods presented on a comparative basis with those of the current period. [fn 24] Ordinarily, the auditor's report on comparative financial statements should be dated as of the date of completion of fieldwork for the most recent audit. (See section 530, *Dating of the Independent Auditor's Report*, paragraph .01.) [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995. As amended, effective September 2002, by Statement on Auditing Standards No. 98.]

**fn21A** See paragraph .02 of AU sec. 150, *Generally Accepted Auditing Standards*.

* * *

### Different Reports on Comparative Financial Statements Presented

**.67** Since the auditor's report on comparative financial statements applies to the individual financial statements presented, an auditor may express a qualified or adverse opinion, disclaim an opinion, or include an explanatory paragraph with respect to one or more financial statements for one or more periods, while issuing a different report on the other financial statements presented. Following are examples of reports on comparative financial statements ~~(excluding the standard introductory and scope paragraphs, where applicable)~~ with different reports on one or more financial statements presented.

**~~Standard~~ The Auditor's Unqualified Report on the Prior-Year Financial Statements and a Qualified Opinion on the Current-Year Financial Statements**

~~Independent Auditor's~~ Report of Independent Registered Public Accounting Firm

*To the shareholders and board of directors of X Company*

[~~*Same first and second paragraphs as the standard*~~ *Includes the same basic elements as the Introduction and the Basis of Opinion sections of the auditor's unqualified report*]

[*Opinion on the Financial Statements*]

The Company has excluded, from property and debt in the accompanying 20X2 balance sheet, certain lease obligations that were entered into in 20X2 which, in our opinion, should be capitalized in order to conform with accounting principles generally accepted in the United States of America. If these lease obligations were capitalized, property would be increased by $_______, long-term debt by $_______, and retained earnings by $_______ as of December 31, 20X2, and net income and earnings per share would be increased (decreased) by $_______ and $_______, respectively, for the year then ended.

In our opinion, except for the effects on the 20X2 financial statements of not capitalizing certain lease obligations as described in the preceding paragraph, the financial statements referred to above present fairly, in all material respects, the financial position of ABC Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

*Critical Audit Matters*

*The Auditor's Responsibilities Regarding Other Information*

[*Signature*]

[*City and State or Country*]

[*Date*]

**~~Standard~~ The Auditor's Unqualified Report on the Current-Year Financial Statements With a Disclaimer of Opinion on the Prior-Year Statements of Income, Retained Earnings, and Cash Flows**

~~Independent Auditor's~~ Report of Independent Registered Public Accounting Firm

*To the shareholders and board of directors of X Company*

[~~*Same first paragraph as the standard*~~ *Includes the same basic elements as the Introduction section of the auditor's unqualified report*]

[*Basis of Opinion*]

Our responsibility is to express an opinion on the Company's financial statements based on our audits. Except as explained in the ~~following~~ first paragraph in the Opinion on the Financial Statements section, we conducted our audits in accordance with ~~auditing~~ the standards ~~generally accepted in the~~ of the PCAOB ~~(United States) of America~~. Those standards require that we plan and perform our audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. ~~An audit~~ Such procedures ~~includes~~ include examining, on a test basis, appropriate evidence ~~supporting~~ regarding the amounts and disclosures in the financial statements. ~~An~~ Our audits also ~~includes~~ ~~assessing~~ included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statement ~~presentation~~. We believe that our audits provide a reasonable basis for our opinion.

[*Opinion on the Financial Statements*]

We did not observe the taking of the physical inventory as of December 31, 20X0, since that date was prior to our appointment as auditors for the Company, and we were unable to satisfy ourselves regarding inventory quantities by means of other auditing procedures. Inventory amounts as of December 31, 20X0, enter into the determination of net income and cash flows for the year ended December 31, 20X1.[fn 25]

Because of the matter discussed in the preceding paragraph, the scope of our work was not sufficient to enable us to express, and we do not express, an opinion on the results of operations and cash flows for the year ended December 31, 20X1.

In our opinion, the balance sheets of ABC Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the year ended December 31, 20X2, present fairly, in all material respects, the financial position of ABC Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the year ended December 31, 20X2, in conformity with accounting principles generally accepted in the United States of America.

**.69** If, in an updated report, the opinion is different from the opinion previously expressed on the financial statements of a prior period, the auditor should disclose all the substantive reasons for the different opinion in a separate ~~explanatory~~ paragraph(s) preceding the opinion paragraph in the Opinion on the Financial Statements section of his or her report.[fn 29] The ~~explanatory~~ paragraph(s) should disclose (*a*) the date of the auditor's previous report, (*b*) the type of opinion previously expressed, (*c*) if applicable, a statement that the previously issued financial statements have been restated for the correction of a misstatement in the respective period, (*d*) the circumstances or events that caused the auditor to express a different opinion, and (*e*) if applicable, a reference to the company's disclosure of the correction of the misstatement, and (*f*) the fact that the auditor's updated opinion on the financial statements of the prior period is different from his or her previous opinion on those statements. The following is an example of a~~n~~ ~~explanatory~~ paragraph that may be appropriate when an auditor issues an updated report on the financial statements of a prior period that contains an opinion different from the opinion previously expressed:

~~Independent Auditor's~~ Report of Independent Registered Public Accounting Firm

*To the shareholders and board of directors of X Company*

[~~*Same first and second paragraphs as the standard*~~ *Includes the same basic elements as the Introduction and the Basis of Opinion sections of the auditor's unqualified report*]

[*Opinion on the Financial Statements*]

In our report dated March 1, 20X2, we expressed an opinion that the 20X1 financial statements did not fairly present financial position, results of operations, and cash flows in conformity with accounting principles generally accepted in the United States of America because of two departures from such principles: (1) the Company carried its property, plant, and equipment at appraisal values, and provided for depreciation on the basis of such values, and (2) the Company did not provide for deferred income taxes with respect to differences between income for financial reporting purposes and taxable income. As described in Note X, the Company has changed its method of accounting for these items and restated its 20X1 financial statements to conform with accounting principles generally accepted in the United States of America. Accordingly, our present opinion on the 20X1 financial statements, as presented herein, is different from that expressed in our previous report. [fn 26]

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

*Critical Audit Matters*

*The Auditor's Responsibilities Regarding Other Information*

[*Signature*]

[*City and State or Country*]

[Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

* * *

**.74** If the financial statements of a prior period have been audited by a predecessor auditor whose report is not presented, the successor auditor should indicate in the ~~introductory paragraph~~ Basis of Opinion section of his or her report (a) that the financial statements of the prior period were audited by another auditor,[fn 29] (b) the date of his or her report, (c) the type of report issued by the predecessor auditor, and (d) if the report was other than ~~a standard~~ an auditor's unqualified report, the substantive reasons therefor.[fn 30] An example of a successor auditor's report when the predecessor auditor's report is not presented is shown below:

~~Independent Auditor's~~ Report of Independent Registered Public Accounting Firm

*To the shareholders and board of directors of X Company*

We have audited the accompanying balance sheet of ABC Company as of December 31, 20X2, and the related statements of income, retained earnings, and cash flows for the year then ended, and the related notes (collectively referred to as the "financial statements"). These financial statements are the responsibility of the Company's management.

We are a public accounting firm registered with the Public Company Accounting Oversight Board ("PCAOB") (United States) and are required to be independent with respect to the Company in accordance with the United States federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission ("SEC") and the PCAOB. We or our predecessor firms have served as the Company's auditor consecutively since [ *year* ].

[*Basis of Opinion*]

Our responsibility is to express an opinion on ~~these~~ the Company's financial statements based on our audit. The financial statements of ABC Company as of December 31, 20X1, were audited by other auditors whose report dated March 31, 20X2, expressed an unqualified opinion on those statements. We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud.

Our audit included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures include examining, on a test basis, appropriate evidence regarding the amounts and disclosure in the financial statements. Our audit also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audit provides a reasonable basis for our opinion.

[~~*Same second paragraph as the standard report*~~ *Opinion on the Financial Statements*]

In our opinion, the 20X2 financial statements referred to above present fairly, in all material respects, the financial position of ABC Company as of December 31, 20X2, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

*Critical Audit Matters*

*The Auditor's Responsibilities Regarding Other Information*

[*Signature*]

[*City and State or Country*]

[*Date*]

If the predecessor auditor's report was other than ~~a standard~~ an auditor's unqualified report, the successor auditor should describe the nature of and reasons for the explanatory paragraph added to the predecessor's report or the opinion qualification. Following is an illustration of the wording that may be included in the successor auditor's report:

> . . . were audited by other auditors whose report dated March 1, 20X2, on those statements included an explanatory paragraph that described the change in the Company's method of computing depreciation discussed in Note X to the financial statements.

If the financial statements have been adjusted, the ~~introductory paragraph~~ Basis of Opinion section should indicate that a predecessor auditor reported on the financial statements of the prior period before the adjustments. In addition, if the successor auditor is engaged to audit and applies sufficient procedures to satisfy himself or herself as to the appropriateness of the adjustments, he or she may also include the following paragraph in the auditor's report:

> We also audited the adjustments described in Note X that were applied to restate the 20X1 financial statements. In our opinion, such adjustments are appropriate and have been properly applied.

~~[Paragraph renumbered and amended, effective for reports issued or reissued on or after February 29, 1996, by the issuance of Statement on Auditing Standards No. 79.]~~

## AU sec. 9508, ~~Reports on Audited Financial Statements~~ [new proposed title] Departures from Unqualified Opinions and Other Reporting Circumstances: Auditing Interpretations of Section 508

* * *

**.01** *Question*—Section 508, ~~*Reports on Audited Financial Statements*~~ [new proposed title] *Departures from Unqualified Opinions and Other Reporting Circumstances*, paragraph .24 states that "Common restrictions on the scope of the audit include those applying to the observation of physical inventories and the confirmation of accounts receivable by direct communication with debtors. . . ." A footnote to that paragraph states: "Circumstances such as the timing of the work may make it impossible for the auditor to accomplish these procedures. In this case, if the auditor is able to satisfy himself or herself as to inventories or accounts receivable by applying alternative procedures, there is no significant limitation on the scope of the work, and the report need not include reference to the omission of the procedures or to the use of alternative procedures." Outside firms of nonaccountants specializing in the taking of physical inventories are used at times by some companies, such as retail stores, hospitals, and automobile dealers, to count, list, price and subsequently compute the total dollar amount of inventory on hand at the date of the physical count. Would obtaining the report of an outside inventory-taking firm be an acceptable alternative procedure to the independent auditor's own observation of physical inventories?

* * *

**.36** ~~Examples of~~ An example of the Introduction and the Opinion on the Financial Statements sections of an auditor's report~~s~~ on single year financial statements in the year of adoption of liquidation basis follows:[fn 1A] ~~with such an explanatory paragraph follow.~~

~~*Report on Single Year Financial Statements in Year of Adoption of Liquidation Basis*~~

[*Introduction*]

~~"~~We have audited the statement of net assets in liquidation of XYZ Company as of December 31, 20X2, and the related statement of changes in net assets in liquidation for the period from April 26, 20X2 to December 31, 20X2, and the related notes (collectively referred to as the "financial statements"). In addition, we have audited the statements of income, retained earnings, and cash flows for the period from January 1, 20X2 to April 25, 20X2, and the related notes (collectively referred to as the "financial statements"). These financial statements are the responsibility of the Company's management. ~~Our responsibility is to express an opinion on these financial statements based on our audit.~~

We are a public accounting firm registered with the Public Company Accounting Oversight Board ("PCAOB") (United States) and are required to be independent with respect to the Company in accordance with the United States federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission ("SEC") and the PCAOB. We or our predecessor firms have served as the Company's auditor consecutively since [ *year* ].

~~"We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence~~

~~supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.~~

[*Opinion on the Financial Statements*]

~~"~~As described in Note X to the financial statements, the stockholders of XYZ Company approved a plan of liquidation on April 25, 20X2, and the company commenced liquidation shortly thereafter. As a result, the company has changed its basis of accounting for periods subsequent to April 25, 20X2 from the going-concern basis to a liquidation basis.

"In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets in liquidation of XYZ Company as of December 31, 20X2, the changes in its net assets in liquidation for the period from April 26, 20X2 to December 31, 20X2, and the results of its operations and its cash flows for the period from January 1, 20X2 to April 25, 20X2, in conformity with accounting principles generally accepted in the United States of America applied on the bases described in the preceding paragraph."

**fn1A** The auditor's report must include other basic elements of the auditor's unqualified report and critical audit matters described in paragraphs 6 and 7-13, respectively, of Proposed Auditing Standard, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*.

~~*Report on Comparative Financial Statements in Year of Adoption of Liquidation Basis*~~
An example of the Introduction and the Opinion on the Financial Statements sections of an auditor's report on comparative financial statements in the year of adoption of liquidation basis follows: [fn1B]

[*Introduction*]

~~"~~We have audited the balance sheet of XYZ Company as of December 31, 20X1, the related statements of income, retained earnings, and cash flows for the year then ended, and the statements of income, retained earnings, and cash flows for the period from January 1, 20X2 to April 25, 20X2, and the related notes (collectively referred to as the "financial statements"). In addition, we have audited the statement of net assets in liquidation as of December 31, 20X2, and the related statement of changes in net assets in liquidation for the period from April 26, 20X2 to December 31, 20X2, and the related notes (collectively referred to as the "financial statements"). These financial statements are the responsibility of the Company's management. ~~Our responsibility is to express an opinion on these financial statements based on our audits.~~

We are a public accounting firm registered with the Public Company Accounting Oversight Board ("PCAOB") (United States) and are required to be independent with respect to the Company in accordance with the United States federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission ("SEC") and the PCAOB. We or our predecessor firms have served as the Company's auditor consecutively since [ *year* ].

~~"We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatements. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.~~

[*Opinion on the Financial Statements*]

~~"~~As described in Note X to the financial statements, the stockholders of XYZ Company approved a plan of liquidation on April 25, 20X2, and the company commenced liquidation shortly thereafter. As a result, the company has changed its basis of accounting for periods subsequent to April 25, 20X2 from the going-concern basis to a liquidation basis.

~~"~~In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of XYZ Company as of December 31, 20X1, the results of its operations and its cash flows for the year then ended and for the period from January 1, 20X2 to April 25, 20X2, its net assets in liquidation as of December 31, 20X2, and the changes in its net assets in liquidation for the period from April 26, 20X2 to December 31, 20X2, in conformity with accounting principles generally accepted in the United States of America applied on the bases described in the preceding paragraph.~~"~~

[fn1B] *Id.*

* * *

**12. Reference in Auditor's ~~Standard~~ Unqualified Report to Management's Report**

**.51** *Question*—One of the basic elements of the auditor's ~~standard~~ unqualified report is a statement that the financial statements are the responsibility of the Company's management. That statement is required in the auditor's report even when a document containing the auditor's report includes a statement by management regarding its responsibility for the presentation of the financial statements. When an annual shareholders' report (or other client-prepared document that includes audited financial statements) contains a management report that states the financial statements are the responsibility of management, is it permissible for the auditor's report to include a reference to the management report?

**.52** *Interpretation*—No. The statement about management's responsibilities for the financial statements required by ~~section 508, *Reports on Audited Financial Statements*~~ Proposed Auditing Standard, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*, should not be further elaborated upon in the auditor's ~~standard~~ unqualified report or referenced to management's report. Such modifications to the ~~standard~~ auditor's unqualified report may lead users to erroneously believe that the auditor is providing assurances about representations made by management about their responsibility for financial reporting, internal controls and other matters that might be discussed in the management report.

* * *

**14. Reporting on Audits Conducted in Accordance With the Standards of the PCAOB (United States) ~~Auditing Standards Generally Accepted in the United States of America~~ and in Accordance With International Standards on Auditing**

**.56** *Question*— ~~*Section 508, Reports on Audited Financial Statements*~~ Proposed Auditing Standard, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*, requires ~~states that a basic element of the auditor's report is~~ a statement that the audit was conducted in accordance with ~~generally accepted auditing~~ the standards of the PCAOB ~~and an identification of the United States of America as the country of origin of those standards~~. If the auditor conducts the audit in accordance with the standards of the PCAOB ~~generally accepted in the United States of America~~ and in accordance with the International Standards on Auditing promulgated by the International Auditing and Assurance Standards Board ~~Practices Committee~~ of the International Federation of Accountants, may the auditor so indicate in the auditor's report?

**.57** *Interpretation*—Yes. ~~Section 508~~ Proposed Auditing Standard, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*, requires that the auditor indicate in the auditor's report that the audit was conducted in accordance with ~~generally accepted auditing~~ the standards of the PCAOB ~~and an identification of the United States of America as the country of origin of those standards~~; however, ~~section 508~~ Proposed Auditing Standard, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*, does not prohibit the auditor from indicating that the audit also was conducted in accordance with another set of auditing standards. If the audit also was conducted in accordance with the International Standards on Auditing, in their entirety, the auditor may so indicate in the auditor's report. To determine whether an audit was conducted in accordance with the International Standards on Auditing, it is necessary to consider the text of the International Standards on Auditing in their entirety, including the basic principles and essential procedures together with the related guidance included in the International Standards on Auditing. ~~fn 1~~

~~fn 1 Appendix B, *Analysis of International Standards on Auditing*, identifies sections and paragraphs, if applicable, within the International Standards on Auditing that may require procedures and documentation in addition to those required by U.S. auditing standards.~~

**.58** When reporting on an audit performed in accordance with the standards of the PCAOB ~~auditing standards generally accepted in the United States of America~~ and International Standards on Auditing, the auditor should comply with the standards of the PCAOB ~~reporting standards generally accepted in the United States of America~~.

**.59** An example of reporting on an audit conducted in accordance with the standards of the PCAOB ~~auditing standards generally accepted in the United States~~ and in accordance with International Standards on Auditing follows:

[*Basis of Opinion*]

Our responsibility is to express an opinion on the Company's financial statements based on our audits. We conducted our audits in accordance with the standards of the PCAOB ~~auditing standards generally accepted in the United States of America~~ and in accordance with International Standards on Auditing. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud.

~~An~~ Our audits included~~s~~ performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures include examining, on a test basis, appropriate evidence regarding ~~supporting~~ the amounts and disclosures in the financial statements. ~~An~~ Our audits also included~~s~~ evaluating ~~assessing~~ the accounting principles used and significant estimates made by management, as well as evaluating the overall ~~financial statement~~ presentation of the financial statements. We believe that our audits provide~~s~~ a reasonable basis for our opinion.

* * *

**.61** *Interpretation*—If the prior-period audited financial statements are *unchanged*, pursuant to section 508, ~~*Reports on Audited Financial Statements*~~ [new proposed title]

*Departures from Unqualified Opinions and Other Reporting Circumstances*, paragraph .74, the successor auditor should indicate in the ~~introductory paragraph~~ Introduction section of his or her report (*a*) that the financial statements of the prior period were audited by another auditor, (*b*) the date of the predecessor auditor's report, (*c*) the type of report issued by the predecessor auditor, and (*d*) if the report was other than ~~a standard~~ an auditor's unqualified report, the substantive reasons therefor. The successor auditor ordinarily also should indicate that the other auditor has ceased operations. Footnote 29 of section 508 indicates that the successor auditor should not name the predecessor auditor in the report. An example of the reference that would be added to the ~~introductory paragraph~~ Basis of Opinion section of the successor auditor's report is presented as follows:

The financial statements of ABC Company as of December 31, 20X1, and for the year then ended were audited by other auditors who have ceased operations. Those auditors expressed an unqualified opinion on those financial statements in their report dated March 31, 20X2.

A reference to the predecessor auditor's report should be included even if the predecessor auditor's report on the prior-period financial statements is reprinted and accompanies the successor auditor's report, because reprinting does not constitute reissuance of the predecessor auditor’s report.

* * *

**.78** AU sec. ~~Section~~ 508.42 provides an example of a report qualified for inadequate disclosure (assuming the effects are such that the auditor has concluded an adverse opinion is not appropriate). ~~as follows:~~

~~Independent Auditor's Report~~

~~[*Same first and second paragraphs as the standard report*]~~

~~The Company's financial statements do not disclose [*describe the nature of the omitted disclosures*]. In our opinion, disclosure of this information is required by accounting principles generally accepted in the United States of America.~~

~~In our opinion, except for the omission of the information discussed in the preceding paragraph, . . .~~

* * *

**.83** Following is an illustration of a ~~report that expresses a~~ qualified opinion because the Schedule of Investments fails to disclose investments constituting more than 5 percent of net assets, but in all other respects conforms to the requirements of the Guide:

~~Independent Auditor's Report~~

[~~*Same first and second paragraphs as the standard report*~~ *Opinion on the Financial Statements section*]

The Schedule of Investments included in the Partnership's financial statements does not disclose required information about the following investments, each constituting more than 5 percent of the Partnership's total net assets, at December 31, 20X2:

- Amalgamated Buggy Whips, Inc., 10,000 shares of common stock—fair value $3,280,000 (Consumer nondurable goods)

- Paper Airplane Corp., 6.25% Cv. Deb. due 20XX, $4.5 million par value—fair value $4,875,000 (Aviation)

In our opinion, disclosure of this information is required by accounting principles generally accepted in the United States of America.

In our opinion, except for the omission of the information discussed in the preceding paragraph, the financial statements and financial highlights referred to above present fairly, …

**.84** An illustration of an adverse opinion relating to failure to present the entire Schedule of Investments and all of the related required information follows. [fn 6] This illustration assumes that the auditor has concluded that it is not practicable to present all of the required information. In such circumstances, the auditor presents in his or her report the missing information, where it is practicable to do so, and describes the nature of the missing information where it is not practicable to present the information in the report:

~~Independent Auditor's Report~~

[~~*Same first and second paragraphs as the standard report*~~ *Opinion on the Financial Statements section*]

The Partnership has declined to prepare and present a Schedule of Investments and the related information as of December 31, 20X2. Accounting principles generally accepted in the United States of America require presentation of this Schedule and the related information. Presentation of this Schedule would have disclosed required information about the following investments, each constituting more than 5 percent of the Partnership's total net assets, at December 31, 20X2:

- Amalgamated Buggy Whips, Inc., 10,000 shares of common stock—fair value $3,280,000 (Consumer nondurable goods) [fn 7]

- Paper Airplane Corp., 6.25% Cv. Deb. due 20XX, $4.5 million par value—fair value $4,875,000 (Aviation)

In addition, presentation of the Schedule of Investments would have disclosed [*describe the nature of the information that it is not practicable to present in the auditor's report*].

In our opinion, because the omission of a Schedule of Investments results in an incomplete presentation as explained in the preceding paragraph, the financial statements and financial highlights referred to above do not present fairly, …

## AU sec. 543*, Part of the Audit Performed by Other Independent Auditors*

* * *

**.07** When the principal auditor decides that he will make reference to the audit of the other auditor, his report should indicate clearly, in ~~both the introductory, scope and opinion paragraphs~~ <u>the Introduction, Basis of Opinion, and Opinion on Financial Statements sections</u> the division of responsibility as between that portion of the financial statements covered by his own audit and that covered by the audit of the other auditor. The report should disclose the magnitude of the portion of the financial statements audited by the other auditor. This may be done by stating the dollar amounts or percentages of one or more of the following: total assets, total revenues, or other appropriate criteria, whichever most clearly reveals the portion of the financial statements audited by the other auditor. The other auditor may be named but only with his express permission and provided his report is presented together with that of the principal auditor. [fn 3]

* * *

**.09** An example of appropriate reporting by the principal auditor indicating the division of responsibility when he makes reference to the audit of the other auditor follows:

~~Independent Auditor's~~ <u>Report of Independent Registered Public Accounting Firm</u>

<u>*To the shareholders and board of directors of X Company*</u>

<u>[*Introduction*]</u>

We have audited the consolidated balance sheet of X Company and subsidiaries as of December 31, 20...., and the related consolidated statements of income and retained earnings and cash flows for the year then ended, and the related notes (collectively referred to as the "financial statements"). These financial statements are the responsibility of the Company's management. ~~Our responsibility is to express an opinion on these financial statements based on our audits.~~

We did not audit the financial statements of B Company, a wholly-owned subsidiary, which statements reflect total assets and revenues constituting 20 percent and 22 percent, respectively, of the related consolidated totals. Those statements were audited by other auditors whose report has been furnished to us, and our opinion, insofar as it relates to the amounts included for B Company, is based solely on the report of the other auditors.

We are a public accounting firm registered with the Public Company Accounting Oversight Board ("PCAOB") (United States) and are required to be independent with respect to the Company in accordance with the United States federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission ("SEC") and the PCAOB. We or our predecessor firms have served as the Company's auditor consecutively since [ *year* ].

[*Basis of Opinion*]

Our responsibility is to express an opinion on the Company's financial statements based on our audits. We conducted our audit in accordance with the ~~auditing~~ standards of the PCAOB ~~generally accepted in the (United States) of America~~. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud.

Our audit included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. ~~An audit~~ Such procedures ~~includes~~ include examining, on a test basis, appropriate evidence ~~supporting~~ regarding the amounts and disclosures in the financial statements. ~~An~~ Our audit also ~~includes~~ ~~assessing~~ included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statement ~~presentation~~. We believe that our audit and the report of the other auditors provide a reasonable basis for our opinion.

[*Opinion on the Financial Statements*]

In our opinion, based on our audit and the report of the other auditors, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 20...., and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

*Critical Audit Matters*

*The Auditor's Responsibilities Regarding Other Information*

[*Signature*]

[*City and State or Country*]

[*Date*]

When two or more auditors in addition to the principal auditor participate in the audit, the percentages covered by the other auditors may be stated in the aggregate. ~~[Revised, April 1998, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 53 through 62. Revised, October 2000, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 93.]~~

**Procedures Applicable to Both Methods of Reporting**

**.10** Whether or not the principal auditor decides to make reference to the audit of the other auditor, he should make inquiries concerning the professional reputation and independence of the other auditor. He also should adopt appropriate measures to assure the coordination of his activities with those of the other auditor in order to achieve a proper review of matters affecting the consolidating or combining of accounts in the financial statements. These inquiries and other measures may include procedures such as the following:

* * *

c. Ascertain through communication with the other auditor:

* * *

(ii)That he or she is familiar with accounting principles generally accepted in the United States of America and with the ~~generally accepted auditing~~ standards of the Public Company Accounting Oversight Board ~~promulgated by the American Institute of Certified Public Accountants~~ and will conduct his or her audit and will report in accordance therewith.

* * *

* * *

**Other Auditor's Report Departs From ~~Standard~~ Auditor's Unqualified Report**

**.15** If the report of the other auditor is other than ~~a standard~~ an auditor's unqualified report, the principal auditor should decide whether the reason for the departure from the ~~standard~~ auditor's unqualified report is of such nature and significance in relation to the financial statements on which the principal auditor is reporting that it would require recognition in his own report. If the reason for the departure is not material in relation to such financial statements and the other auditor's report is not presented, the principal auditor need not make reference in his report to such departure. If the other auditor's report is presented, the principal auditor may wish to make reference to such departure and its disposition.

* * *

## AU sec. 544, *Lack of Conformity with Generally Accepted Accounting Principles*

* * *

**.04** When financial statements of a regulated entity are prepared in accordance with a basis of accounting prescribed by one or more regulatory agencies or the financial reporting provisions of another agency, the independent auditor may also be requested to report on their fair presentation in conformity with such prescribed basis of accounting in presentations for distribution in other than filings with the entity's regulatory agency. In those circumstances, the auditor should ~~use the standard form of report (see section 508, *Reports on Audited Financial Statements*, paragraph),~~ ~~modified~~ modify the auditor's report as appropriate (see section 508, [new proposed title] *Departures from Unqualified Opinions and Other Reporting Circumstances*, paragraphs .35 through .60 ~~.35-.60~~) because of the departures from generally accepted accounting principles, and then, in an additional paragraph to the report, express an opinion on whether the financial statements are presented in conformity with the prescribed basis of accounting. [As amended by Statement on Auditing Standards No. 62, effective for reports issued on or after July 1, 1989. As amended, effective for audits of financial statements for periods ended on or after December 31, 1996, by Statement on Auditing Standards No. 77.]

## AU sec. 551, *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents*

* * *

**.02** The auditor's ~~standard~~ unqualified report covers the basic financial statements: balance sheet, statement of income, statement of retained earnings or changes in stockholders' equity, and statement of cash flows. The following presentations are considered part of the basic financial statements: descriptions of accounting policies, notes to financial statements, and schedules and explanatory material that are identified as being part of the basic financial statements. For purposes of this section, basic financial statements also include an individual basic financial statement, such as a balance sheet or statement of income and financial statements prepared in accordance with a comprehensive basis of accounting other than generally accepted accounting principles.

* * *

**fn 4** See paragraph .10 for guidance when there is a modification of the auditor's ~~standard~~ unqualified report on the basic financial statements.

* * *

**.10** The auditor should consider the effect of a departure ~~any modifications in his standard~~ from the auditor's unqualified report when reporting on accompanying information. When the auditor expresses a qualified opinion on the basic financial statements, he should make clear the effects upon any accompanying information as well (see paragraph .14). When the auditor expresses an adverse opinion, or disclaims an opinion, on the basic financial statements, he should not express the opinion described in paragraph .06 on any accompanying information. [fn 5] An expression of such an opinion in these circumstances would be inappropriate because, like a piecemeal opinion, it may tend to overshadow or contradict the disclaimer of opinion or adverse opinion on the basic financial statements. (See section 508.64 and section 623.14.)

* * *

**.21** The auditor may be requested to describe the procedures applied to specific items in the financial statements. Additional comments of this nature should not contradict or detract from the description of the scope of his audit in the ~~standard~~ auditor's unqualified report. Also, they should be set forth separately rather than interspersed with the information accompanying the basic financial statements to maintain a clear distinction between management's representations and the auditor's representations. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 98, September 2002.]

* * *

## AU sec. 552, *Reporting on Condensed Financial Statement and Selected Financial Data*

* * *

**.02** In reporting on condensed financial statements or selected financial data in circumstances other than those described in paragraph .01, the auditor should follow the guidance in section 508, ~~*Reports on Audited Financial Statements*~~ [new proposed title] *Departures from Unqualified Opinions and Other Reporting Circumstances*, paragraphs .41 through .44, section 623, *Special Reports*, or other applicable Statements on Auditing Standards. [fn 2]

* * *

**.06** The following is an example of wording that an auditor may use in the circumstances described in paragraph .01(*a*) to report on condensed financial statements that are derived from financial statements that he or she has audited and on which he or she has issued ~~a standard~~ an auditor's unqualified report:

Independent Auditor's Report

We have audited, in accordance with auditing standards generally accepted in the United States of America, the consolidated balance sheet of X Company and subsidiaries as of December 31, 20X0, and the related consolidated statements of income, retained earnings, and cash flows for the year then ended (not presented herein); and in our report dated February 15, 20X1, we expressed an unqualified opinion on those consolidated financial statements.

In our opinion, the information set forth in the accompanying condensed consolidated financial statements is fairly stated, in all material respects, in relation to the consolidated financial statements from which it has been derived.

[Revised, October 2000, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 93.]

**.07** A client might make a statement in a client-prepared document that names the auditor and also states that condensed financial statements have been derived from audited financial statements. Such a statement does not, in itself, require the auditor to report on the condensed financial statements, provided that they are included in a document that contains audited financial statements (or that incorporates such statements by reference to information filed with a regulatory agency). However, if such a statement is made in a client-prepared document of a public entity that is required to file, at least annually, complete audited financial statements with a regulatory agency and that document does not include audited financial statements (or does not incorporate such statements by reference to information filed with a regulatory agency), ~~fn 6~~ the auditor should request that the client either (*a*) not include the auditor's name in the document or (*b*), include the auditor's report on the condensed financial statements, as described in paragraph .05. If the client will neither delete the reference to the auditor nor allow the appropriate report to be included, the auditor should advise the client that he does not consent to either the use of his name or the reference to him, and he should consider what other actions might be appropriate. [fn 7]

~~**fn 6** If such a statement is made in a client-prepared document that does not include audited financial statements and the client is not a public entity that is required to file complete audited financial statements with a regulatory agency (at least annually), the auditor would ordinarily express an adverse opinion on the condensed financial statements because of inadequate disclosure. (See section 508, *Reports on Audited Financial Statements*, paragraphs .41 through .44.) The auditor would not be expected to provide the disclosure in his report. The following is an example of an auditor's report on condensed financial statements in such circumstances when the auditor had previously audited and reported on the complete financial statements:~~

~~Independent Auditor's Report. We have audited the consolidated balance sheet of X Company and subsidiaries as of December 31, 20X0, and the related earnings, and cash flows for the year then ended (not presented herein). These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion. The condensed consolidated balance sheet as of December 31, 20X0, and the related condensed statements of income, retained earnings, and cash flows for the year then ended, presented on pages xx-xx, are presented as a summary and therefore do not include all of the disclosures required by accounting principles generally accepted in the United States of America. In our opinion, because of the significance of the omission of the information referred to in the~~

~~preceding paragraph, the condensed consolidated financial statements referred to above do not present fairly, in conformity with accounting principles generally accepted in the United States of America, the financial position of X Company and subsidiaries as of December 31, 20X0, or the results of its operations or its cash flows for the year then ended. [Footnote revised, October 2000, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 93.]~~

* * *

**.10** The following is an example of an additional paragraph included after the opinion paragraph in the Opinion on the Financial Statements section of the ~~an~~ auditor's report ~~that includes an additional paragraph~~ because ~~he~~ the auditor is also engaged to report on selected financial data for a five-year period ended December 31, ~~19~~20X5, in a client-prepared document that includes audited financial statements:

~~Independent Auditor's Report~~

~~We have audited the consolidated balance sheets of ABC Company and subsidiaries as of December 31, 19X5 and 19X4, and the related consolidated statements of income, retained earnings, and cash flows for each of the three years in the period ended December 31, 19X5. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.~~

~~We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provided a reasonable basis for our opinion.~~

Opinion on the Financial Statements

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the ABC Company and subsidiaries as of December 31, 20X5 and 20X4, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 20X5, in conformity with accounting principles generally accepted in the United States of America.

We have also previously audited, in accordance with ~~auditing~~ the standards ~~generally accepted in the~~ of the PCAOB ~~(United States) of America~~, the consolidated balance sheets as of December 31, 20X3, 20X2, and 20X1, and the related statements of income, retained earnings, and cash flows for the years ended December 31, 20X2, and 20X1, and the related notes (collectively referred to as the "financial statements") (none of which are presented herein); and we expressed unqualified opinions on those consolidated financial statements. In our opinion, the information set forth in the selected financial data for each of the five years in the period ended December 31, 20X5, appearing on page xx, is fairly stated, in all material respects, in relation to the consolidated financial statements from which it has been derived.

~~[Revised, October 2000, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 93.]~~

* * *

## AU sec. 560, *Subsequent Events*

* * *

**.09** Occasionally, a subsequent event of the second type has such a material impact on the entity that the auditor may wish to include in his or her report an explanatory paragraph directing the reader's attention to the event and its effects. (See ~~section 508.19~~paragraph 16 of Proposed Auditing Standard, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*.)

* * *

## AU sec. 623, *Special Reports*

**.01** This section applies to auditors' reports issued in connection with the following:

*** * ***

Note: If any of the auditor's reports described in this section are filed with the U.S. Securities and Exchange Commission, the auditor's report is required to include the basic elements of the auditor's unqualified opinion and critical audit matters as described in paragraphs 6 and 7-13, respectively, of Proposed Auditing Standard, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*. For qualified, adverse, and disclaimer of opinion reports, see requirements of AU sec. 508, [new proposed title] *Departures from Unqualified Opinions and Other Reporting Circumstances*.

* * *

fn 2 In some instances, a document containing the auditor's report may include a statement by management regarding its responsibility for the presentation of the financial statements. Nevertheless, the auditor's report should state that the financial statements are management's responsibility. However, the statement about management's responsibility should not be further elaborated upon in the auditor's ~~standard~~ report or referenced to management's report.

* * *

**.06** Unless the financial statements meet the conditions for presentation in conformity with a "comprehensive basis of accounting other than generally accepted accounting principles" as defined in paragraph .04, the auditor should modify his or her report ~~use the standard form of report (see section 508, *Reports on Audited Financial Statements*, paragraph .08) modified as appropriate~~ because of the departures from generally accepted accounting principles (see AU sec. 508, [new proposed title] *Departures from Unqualified Opinions and Other Reporting Circumstances*).

* * *

**.14** The auditor should not express an opinion on specified elements, accounts, or items included in financial statements on which he or she has expressed an adverse opinion or disclaimed an opinion based on an audit, if such reporting would be tantamount to expressing a piecemeal opinion on the financial statements (see section 508, ~~*Reports on Audited Financial Statements*~~ [new proposed title] *Departures from Unqualified Opinions and Other Reporting Circumstances*, paragraph .64). However, an auditor would be able to express an opinion on one or more specified elements, accounts, or items of a financial statement provided that the matters to be reported on and the related scope of the audit were not intended to and did not encompass so many elements, accounts, or items as to constitute a major portion of the financial statements. For example, it may be appropriate for an auditor to express an opinion on an entity's accounts receivable balance even if the auditor has disclaimed an opinion on the financial statements taken as a whole. However, the report on the specified element, account, or item should be presented separately from the report on the financial statements of the entity.

**.15** When an independent auditor is engaged to express an opinion on one or more specified elements, accounts, or items of a financial statement, the report should include—

*** * ***

b. A paragraph that—

(1) States that the specified elements, accounts, or items identified in the report were audited. If the audit was made in conjunction with an audit of the company's financial statements, the paragraph should so state and indicate the date of the auditor's report on those financial statements. Furthermore, any departure from the ~~standard~~ auditor's unqualified report on those statements should also be disclosed if considered relevant to the presentation of the specified element, account or item.

(2) States that the specified elements, accounts, or items are the responsibility of the Company's management and that the auditor is responsible for expressing an opinion on the specified elements, accounts or items based on the audit.

* * *

* * *

**.17** The auditor should consider the effect that any departure, including additional explanatory language because of the circumstances discussed in ~~section 508, *Reports on Audited Financial Statements*,~~ paragraph ~~.11~~15 of Proposed Auditing Standard, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*, from the ~~standard~~ auditor's unqualified report on the audited financial statements might have on the report on a specified element, account, or item thereof.

* * *

**.21** When an auditor's report on compliance with contractual agreements or regulatory provisions is included in the report that expresses the auditor's opinion on the financial statements, the auditor should include a paragraph, ~~after the opinion paragraph~~ following the Opinion on the Financial Statements section, that provides negative assurance relative to compliance with the applicable covenants of the agreement, insofar as they relate to accounting matters, and that specifies the negative assurance is being given in connection with the audit of the financial statements. The auditor should also ordinarily state that the audit was not directed primarily toward obtaining knowledge regarding compliance. In addition, the report should include a paragraph that includes a description and source of any significant interpretations made by the entity's management as discussed in paragraph .20d as well as a paragraph that restricts the use of the report to the specified parties as discussed in paragraph .20e. Following are examples of reports that might be issued:

* * *

**.31** Certain circumstances, while not affecting the auditor's unqualified opinion, may require that the auditor add additional explanatory language to the special report. These circumstances include the following:

*a.* *Lack of Consistency in Accounting Principles.* If there has been a change in accounting principles or in the method of their application, [fn 35] the auditor should add an explanatory paragraph to the report (following the opinion paragraph) that describes the change and refers to the note to the financial presentation (or specified elements, accounts, or items thereof) that discusses the change and its effect thereon [fn 36] if the accounting change is considered relevant to the presentation. Guidance on reporting in this situation is contained in ~~section 508,~~ ~~*Reports on Audited Financial Statements*~~, ~~paragraphs .16 through .18~~Auditing Standard No. 6, *Evaluating Consistency of Financial Statements*. [fns 37–38]

b. * * *

*c.* *Other Auditors.* When the auditor decides to make reference to the report of another auditor as a basis, in part, for his or her opinion, the auditor should disclose that fact in the introductory paragraph of the report and should refer to the report of the other auditors in expressing his or her opinion. Guidance on reporting in this situation is contained in section ~~508~~543, ~~*Reports on Audited Financial Statements*~~ *Part of Audit Performed by Other Independent Auditors*, paragraphs .~~12 and .13~~06-.09.

*d.* *Comparative Financial Statements (or Specified Elements, Accounts, or Items Thereof).* If the auditor expresses an opinion on prior-period financial statements (or specified elements, accounts, or items thereof) that is different from the opinion he or she previously expressed on that same information, the auditor should disclose all of the substantive reasons for the different opinion in a separate explanatory paragraph preceding the opinion paragraph of the report. Guidance on reporting in this situation is contained in section 508, ~~*Reports on Audited Financial Statements*~~ [new proposed title] *Departures from Unqualified Opinions and Other Reporting Circumstances*, paragraphs .68 and .69.

As in reports on financial statements prepared in conformity with generally accepted accounting principles, the auditor may add an explanatory paragraph to emphasize a matter regarding the financial statements (or specified elements, accounts, or items thereof). [Revised, February 1997, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 79.]

* * *

fn 22 When the auditor's report on compliance with contractual agreements or regulatory provisions is included in the report that expresses the auditor's opinion on the financial statements, the last two paragraphs of this report are examples of the paragraphs that should follow the ~~opinion paragraph~~ Opinion on the Financial Statements section of the auditor's report on the financial statements. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 77, November 1995.]

* * *

## AU sec. 9623, *Special Reports: Auditing Interpretations of Section 623*

* * *

**.45** *Interpretation*~~—Section 420.06~~ Auditing Standard No. 6, *Evaluating Consistency in Financial Statements* states that changes in accounting principles and methods of applying them affect consistency and require the addition of an explanatory paragraph (following the ~~opinion paragraph~~ Opinion on the Financial Statements section) in the auditor's unqualified report on the audited financial statements. Section 623.16 states that, if applicable, any departures from the auditor's ~~standard~~ unqualified report on the related financial statements should be indicated in the special report on an element, account, or item of a financial statement.

* * *

fn 10 Generally accepted accounting principles require the use of current-value accounting for financial statements of certain types of entities (for example, investment companies, employee benefit plans, personal financial statements, and mutual and common trust funds). This interpretation does not apply to reports on current-value financial statements of such entities. The auditor engaged to report on current-value financial statements of such entities should follow the guidance in AU sec~~tion~~. 508, ~~*Reports on Audited Financial Statements*~~ [new proposed title] *Departures from Unqualified Opinions and Other Reporting Circumstances*, Proposed Auditing Standard, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*, and the applicable industry audit guide.

* * *

**.83** *Interpretation*—No. An offering memorandum generally is a document providing information as the basis for negotiating an offer to sell certain assets or businesses or to raise funds. Normally, parties to an agreement or other specified parties for whom the special-purpose financial presentation is intended have not been identified. Accordingly, the auditor should follow the reporting guidance in section 508, ~~*Reports on Audited Financial Statements*~~ [new proposed title] *Departures from Unqualified Opinions and*

Other Reporting Circumstances, paragraphs .35–.44 and .58–.60. [Paragraph renumbered by the issuance of Statement of Position 01-5, December 2001.]

* * *

## AU sec. 634, *Letters for Underwriters and Certain Other Requesting Parties*

* * *

**.27** When the report on the audited financial statements and financial statement schedules included (incorporated by reference) in the registration statement ~~departs from the standard report~~ includes one or more explanatory paragraphs or a paragraph to emphasize a matter regarding the financial statements, ~~for instance, where one or more explanatory paragraphs or a paragraph to emphasize a matter regarding the financial statements have been added to the report~~, the accountants should refer [fn 18] to that fact in the comfort letter and discuss the subject matter of the paragraph. [fn 19] In those rare instances in which the SEC accepts a qualified opinion on historical financial statements, the accountants should refer to the qualification in the opening paragraph of the comfort letter and discuss the subject matter of the qualification. (See also paragraph .35*f*.) [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 76, September 1995.]

* * *

**.30** An underwriter may also request that the accountants comment in their comfort letter on (*a*) unaudited interim financial information required by item 302(a) of Regulation S-K, to which section 722 pertains or (*b*) required supplementary information, to which section 558, *Required Supplementary Information*, pertains. Section 722 and section 558 provide that the accountants should expand the ~~standard~~ auditor's unqualified report on the audited financial statements to refer to such information when the scope of their procedures with regard to the information was restricted or when the information appears not to be presented in conformity with generally accepted accounting principles or, for required supplementary information, applicable guidelines. Such expansions of the ~~accountants' standard~~ auditor's unqualified report in the registration statement would ordinarily be referred to in the opening paragraph of the comfort letter (see also paragraph .35*f*). Additional comments on such unaudited information are therefore unnecessary. However, if the underwriter requests that the accountants perform procedures with regard to such information in addition to those performed in connection with their review or audit as prescribed by sections 722 and 558, the accountants may do so and report their findings. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 76, September 1995.]

* * *

**.35** Comments included in the letter will often concern (*a*) unaudited condensed interim financial information (see paragraphs .36 through .38), [fn 27] (*b*) capsule financial information (see paragraphs .36 and .39 through .41), (*c*) pro forma financial information (see paragraphs .42 and .43), (*d*) financial forecasts (see paragraphs .36 and .44), and (*e*) changes in capital stock, increases in long-term debt, and decreases in other specified financial statement items (see paragraphs .36 and .45 through .53). For commenting on these matters, the following guidance is important:

*** * ***

f. When the report on the audited financial statements and financial statement schedules in the registration statement departs from the auditor's ~~standard~~ unqualified report, and the comfort letter includes negative assurance with respect to subsequent unaudited condensed interim financial information included (incorporated by reference) in the registration statement or with respect to an absence of specified subsequent changes, increases, or decreases, the accountant should consider the effect thereon of the subject matter of the qualification, explanatory paragraph(s), or paragraph(s) emphasizing a matter regarding the financial statements. The accountant should also follow the guidance in paragraph .27. An illustration of how this type of situation may be dealt with is shown in example I [paragraph .64].

[Paragraph renumbered by the issuance of Statement on Auditing Standards No. 76, September 1995.]

* * *

## AU sec. 722, *Interim Financial Information*

* * *

### Form of Accountant's Review Report

**.37** The accountant's review report accompanying interim financial information should consist of:

a. ~~A~~ The title ~~that includes the word *independent*~~, "Report of Independent Registered Public Accounting Firm".

a-1. Addressees that include, but are not necessarily limited to, (1) investors in the company, such as shareholders, and (2) the board of directors or equivalent body.[fn24A]

a-2. The name of the company whose interim financial information was reviewed.

a-3. The date of, or period covered by, the interim financial information and each related schedule, if applicable, identified in the report.

*** * ***

d. A statement that the review of interim financial information was conducted in accordance with the standards ~~established by the AICPA~~ of the Public Company Accounting Oversight Board ("PCAOB") (United States).

e. * * *

f. A statement that a review of interim financial information is substantially less in scope than an audit conducted in accordance with ~~generally accepted auditing~~ the standards of the PCAOB, the objective of which is an expression of an opinion regarding the financial statements taken as a whole, and accordingly, no such opinion is expressed.

g. * * *

h. * * *

h-1. The city and state (or city and country, in the case of non-U.S. auditors) from which the accountant's review report has been issued.

* * *

In addition, each page of the interim financial information should be clearly marked as unaudited.

**fn24A** For example, addressees might include other appropriate parties depending on the legal and governance structure of the company.

**.38** The following is an example of a review report: [fn 26]

~~Independent Accountant's~~ Report of Independent Registered Public Accounting Firm

*To the shareholders and board of directors of ABC Company*

We have reviewed the accompanying [*describe the interim financial information or statements reviewed*] of ABC Company and consolidated subsidiaries as of September 30, 20X1, and for the three-month and nine-month periods then ended. This (These) interim financial information (statements) is (are) the responsibility of the company's management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board ("PCAOB") (United States) ~~established by the American Institute of Certified Public Accountants~~. A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the ~~generally accepted auditing~~ standards of the PCAOB, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the accompanying interim financial information (statements) for it (them) to be in conformity with accounting principles generally accepted in the United States of America.

[*Signature*]

[*City and State or Country*]

[*Date*]

**.39** An accountant may be engaged to report on a review of comparative interim financial information. The following is an example of a review report on a condensed balance sheet as of March 31, 20X1, the related condensed statements of income and cash flows for the three-month periods ended March 31, 20X1 and 20X0, and a condensed balance sheet derived from audited financial statements as of December 31, 20X0, that were included in Form 10-Q. [fn 27]

~~Independent Accountant's~~ Report of Independent Registered Public Accounting Firm

*To the shareholders and board of directors of ABC Company*

We have reviewed the condensed consolidated balance sheet of ABC Company and subsidiaries as of March 31, 20X1, and the related condensed consolidated statements of income and cash flows for the three-month periods ended March 31, 20X1 and 20X0. These financial statements are the responsibility of the company's management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB")~~established by the American Institute of Certified Public Accountants~~. A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with ~~generally accepted auditing~~ the standards of the PCAOB, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to the condensed financial statements referred to above for them to be in conformity with accounting principles generally accepted in the United States of America.

We have previously audited, in accordance with ~~auditing~~ the standards ~~generally accepted in the~~ of the PCAOB ~~United States of America~~, the consolidated balance sheet of ABC Company and subsidiaries as of December 31, 20X0, and the related consolidated statements of income, retained earnings, and cash flows for the year then ended, and the related notes (collectively referred to as the "consolidated financial statements") (not presented herein); and in our report dated February 15, 20X1, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 20X0, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived. [fn 28]

[*Signature*]

[*City and State or Country*]

[*Date*]

**.40** The accountant may use and make reference to another accountant's review report on the interim financial information of a significant component of a reporting entity. This reference indicates a division of responsibility for performing the review. [fn 29] The following is an example of report including such a reference:

~~Independent Accountant's~~ Report of Independent Registered Public Accounting Firm

*To the shareholders and board of directors of ABC Company*

We have reviewed the accompanying [*describe the interim financial information or statements reviewed*] of ABC Company and consolidated subsidiaries as of September 30, 20X1, and for the three-month and nine-month periods then ended. This (These) interim financial information (statements) is (are) the responsibility of the company's management.

We were furnished with the report of other accountants on their review of the interim financial information of DEF subsidiary, whose total assets as of September 30, 20X1, and whose revenues for the three-month and nine-month periods then ended, constituted 15 percent, 20 percent, and 22 percent, respectively, of the related consolidated totals.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB") ~~established by the American Institute of Certified Public Accountants~~. A review of interim financial information (statements) consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with ~~generally accepted auditing~~ the standards of the PCAOB, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review and the report of other accountants, we are not aware of any material modifications that should be made to the accompanying interim financial information (statements) for it (them) to be in conformity with accounting principles generally accepted in the United States of America.

[*Signature*]

[*City and State or Country*]

[*Date*]

**.41** The accountant's report on a review of interim financial information should be modified for departures from generally accepted accounting principles, ~~[fn 30]~~ which include inadequate disclosure and changes in accounting principle that are not in conformity with generally accepted accounting principles. The existence of substantial doubt about the entity's ability to continue as a going concern or a lack of consistency in the application of accounting principles affecting the interim financial information would not require the accountant to add an additional paragraph to the report, provided that the interim financial information appropriately discloses such matters. Although not required, the accountant may wish to emphasize such matters in a separate explanatory paragraph of the report. See paragraphs .44 and .45 of this section for examples of paragraphs that address matters related to an entity's ability to continue as a going concern.

~~fn 30 If the circumstances contemplated by Rule 203, *Accounting Principles*, are present, the accountant should refer to the guidance in section 508, *Reports on Audited Financial Statements*, paragraph .15).~~

* * *

**.50** The auditor ordinarily need not modify his or her report on the audited financial statements to refer to his or her having performed a review in accordance with this section or to refer to the interim financial information accompanying the audited financial statements because the interim financial information has not been audited and is not required for the audited financial statements to be fairly stated in conformity with generally accepted accounting principles. The auditor's report on the audited financial statements should, however, be modified in the following circumstances:

* * *

d. The selected quarterly financial data required by item 302(a) of Regulation S-K has not been reviewed. The following is an example of a paragraph that should be added to the auditor's report if the selected quarterly financial data required by item 302(a) has not been reviewed.

   The selected quarterly financial data on page xx contains information that we did not audit, and, accordingly, we do not express an opinion on that data. We attempted but were unable to review the quarterly data in accordance with the standards ~~established by the American Institute of Certified Public Accountants~~ of the Public Company Accounting Oversight Board because we believe that the company's internal control for the preparation of interim financial information does not provide an adequate basis to enable us to complete such a review.

* * *

**APPENDIX 4**

## *Proposed Amendments to PCAOB Standards Related to the Proposed Other Information Standard*

In connection with its proposed auditing standard, *The Auditor's Responsibilities Regarding Other Information in Certain Documents Containing Audited Financial Statements and the Related Auditor's Report* (the "proposed other information standard"), the Board is proposing amendments to several of its auditing standards to conform to the requirements of the proposed other information standard.[1/]

Language that would be deleted by the proposed amendments is ~~struck through~~. Language that would be added is underlined. The presentation of proposed amendments to PCAOB standards by showing deletions and additions to existing sentences and paragraphs is intended to assist readers in easily comprehending the Board's proposed changes to existing auditing standards and interpretations. The Board's proposed amendments consist of only the deletion or addition of the language that has been struck through or underlined. This presentation does not constitute or represent a reproposal of all or of any other part of a standard or interpretation that may be amended.

The proposed amendments would amend specific auditing standards to reflect requirements of the proposed other information standard. Some of these auditing standards may need further updating, which the Board may consider under separate standard-setting projects. The proposed amendments in connection with the proposed other information standard primarily include updating references to auditing standards that are being amended or superseded, changing references to AU sec. 550, *Other Information in Documents Containing Audited Financial Statements,* applied by analogy, and moving the reporting example from AU sec. 9550, *Other Information in Certain Documents Containing Audited Financial Statements: Auditing Interpretations of Section 550,* to AU sec. 508, [new proposed title] *Departures from Unqualified Opinions and Other Reporting Circumstances*, related to considerations in the auditor's report

[1/] PCAOB Release No. 2013-002, *Proposed Reorganization of PCAOB Auditing Standards* (March 26, 2013), and PCAOB Release No. 2011-005, *Auditing Supplemental Information Accompanying Audited Financial Statements* (July 12, 2011), include proposed amendments that would supersede, amend, or delete paragraphs for which amendments are included in this proposed other information standard. If, prior to the conclusion of this rulemaking, the Board has adopted amendments that affect the amendments proposed in this release, the Board may make conforming changes to this proposed other information standard.

regarding a report by management on an audit of internal control over financial reporting.

The following standard and interpretation would be superseded by this proposal:

- AU sec. 550, *Other Information in Documents Containing Audited Financial Statements*, and

- AU sec. 9550, *Other Information in Documents Containing Audited Financial Statements: Auditing Interpretations of Section 550*.

The Board is requesting comments on all aspects of the proposed amendments. Significant proposed amendments are described in more detail in Appendix 6 of this release.

## Auditing Standard No. 7, *Engagement Quality Review*

* * *

[5/] See ~~paragraphs .04-.06 of AU sec. 550~~Proposed Auditing Standard, *The Auditor's Responsibilities Regarding* *Other Information in* *Certain* *Documents Containing Audited Financial Statements* *and the Related Auditor's Report*; AU sec. 711, *Filings Under Federal Securities Statutes*.

* * *

## Auditing Standard No. 16, *Communications with Audit Committees*

* * *

[27/] *See, e.g.*, ~~AU sec. 550~~Proposed Auditing Standard, *The Auditor's Responsibilities Regarding* *Other Information in* *Certain* *Documents Containing Audited Financial Statements* *and the Related Auditor's Report* ("proposed other information standard")*.* In addition to ~~AU sec. 550~~ the proposed other information standard, discussion of the auditor's consideration of other information is included in AU sec. 558, *Required Supplementary Information,* and AU sec. 711, *Filings Under Federal Securities Statutes.*

* * *

**APPENDIX B**

This appendix identifies other PCAOB rules and standards related to the audit that require communication of specific matters between the auditor and the audit committee.

* * *

- ~~AU sec. 550~~Proposed Auditing Standard, *The Auditor's Responsibilities Regarding Other Information in Certain Documents Containing Audited Financial Statements and the Related Auditor's Report*, paragraphs ~~.04 and .06~~8 and 10.

* * *

## AU sec. 9324, *Service Organizations: Auditing Interpretations of Section 324*

* * *

**.37** If the service organization includes information about the design deficiencies in the section of the document titled "Other Information Provided by the Service Organization," the service auditor should read the information and ~~consider applying by analogy the guidance in section 550, *Other Information in Documents Containing Audited Financial Statements.* In addition, the service auditor should~~ include a paragraph in his or her report disclaiming an opinion on the information provided by the service organization. The following is an example of such a paragraph.

> The information in section 4 describing XYZ Service Organization's plans to modify its disaster recovery plan is presented by the Service Organization to provide additional information and is not a part of the Service Organization's description of controls that may be relevant to a user organization's internal control. Such information has not been subjected to the procedures applied in the examination of the description of the controls applicable to the processing of transactions for user organizations and, accordingly, we express no opinion on it.

A service auditor also may consider communicating information about the design deficiencies in the section of the service auditor's document titled "Other Information Provided by the Service Auditor."

* * *

## AU sec. 9342, *Auditing Accounting Estimates: Auditing Interpretations of Section 342*

* * *

**.09** When the unaudited voluntary disclosures are included in a client-prepared document and are located on the face of the financial statements, the footnotes, or in a supplemental schedule, the voluntary disclosures should be ~~labelled~~ labeled "unaudited." When such unaudited information is not presented on the face of the financial statements, the footnotes, or in a supplemental schedule, the auditor should consider the ~~guidance~~ auditor's responsibilities in ~~section 550~~Proposed Auditing Standard, *The Auditor's Responsibilities Regarding Other Information in Certain Documents Containing Audited Financial Statements and the Related Auditor's Report*.

* * *

## AU sec. 508, *Reports on Audited Financial Statements*

* * *

**CONSIDERATIONS IN THE AUDITOR'S REPORT REGARDING REPORT BY MANAGEMENT ON AUDIT OF INTERNAL CONTROL OVER FINANCIAL REPORTING**

**.74A** In situations in which the company has determined that it is not required to obtain, nor did the company request the auditor to perform, an audit of internal control over financial reporting, the auditor should refer to the auditor's responsibilities regarding other information in annual reports filed with the SEC under the Securities Exchange Act of 1934 that contain audited financial statements and the related auditor's report in Proposed Auditing Standard, *The Auditor's Responsibilities Regarding Other Information in Certain Documents Containing Audited Financial Statements and the Related Auditor's Report*.

**.74B** If the auditor has not been engaged to examine and report on management's assertion about the effectiveness of the company's internal control over financial reporting, the auditor may include statements in the auditor's report that:

- The company is not required to have, nor was the auditor engaged to perform, an audit of its internal control over financial reporting;
- The audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the

circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control over financial reporting; and

- The auditor expresses no such opinion.

Following is an example of the Basis of Opinion section in the auditor's report that contains such statements:

[*Basis of Opinion*]

Our responsibility is to express an opinion on the Company's financial statements based on our audits. We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures include examining, on a test basis, appropriate evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

*** * ***

## AU sec. 551, *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents*

* * *

**.04** When an auditor submits a document containing audited financial statements to his client or to others, he has a responsibility to report on all the information included in the document. On the other hand, when the auditor's report is included in a client-prepared document [fn 2] and the auditor is not engaged to report on information accompanying the basic financial statements, his responsibility with respect to such information is described in (*a*) ~~section 550~~Proposed Auditing Standard, *The Auditor's Responsibilities Regarding Other Information in Certain Documents Containing Audited Financial Statements and the Related Auditor's Report*, and (*b*) other sections covering particular types of information or circumstances, such as section 558, *Required Supplementary Information*.

* * *

## AU sec. 558, *Required Supplementary Information*

* * *

**fn2** This section is not applicable to entities that voluntarily present supplementary information not required by GAAP. For example, entities that voluntarily present supplementary information on the effects of inflation and changes in specific prices, formerly required by FASB Statement No. 33, *Financial Reporting and Changing Prices*, are guided by ~~section 550~~Proposed Auditing Standard, *The Auditor's Responsibilities Regarding Other Information in Certain Documents Containing Audited Financial Statements and the Related Auditor's Report*. [Footnote revised, April 2000, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 91. As amended, effective September 2002, by Statement on Auditing Standards No. 98.]

* * *

**.03** Some entities may voluntarily include, in documents containing audited financial statements, certain supplementary information that is required of other entities. When an entity voluntarily includes such information as a supplement to the financial statements or in an unaudited note to the financial statements, the provisions of this section are applicable unless either the entity indicates that the auditor has not applied the procedures described in this section or the auditor includes in an explanatory paragraph in his report on the audited financial statements a disclaimer on the information. [fn3]The following is an example of a disclaimer an auditor might use in these circumstances:

> The [*identify the supplementary information*] on page XX (or in Note XX) is not a required part of the basic financial statements, and we did not audit or apply limited procedures to such information and do not express any assurances on such information.

When the auditor does not apply the procedures described in this section to a voluntary presentation of required supplementary information required for other entities, the provisions of ~~section 550~~Proposed Auditing Standard, *The Auditor's Responsibilities Regarding Other Information in Certain Documents Containing Audited Financial Statements and the Related Auditor's Report*, apply, only if the annual report containing the financial statements and the related auditor's report is an annual report filed with the SEC under the Securities Exchange Act of 1934.

* * *

**.05** The auditor's responsibility for other information not required by the FASB, GASB, or FASAB but included in certain annual reports—which are client-prepared documents [fn4]—is specified in ~~section 550~~Proposed Auditing Standard, *The Auditor's Responsibilities Regarding Other Information in Certain Documents Containing Audited Financial Statements and the Related Auditor's Report*. The auditor's responsibility for information outside the basic financial statements in documents that the auditor submits to the client or to others is specified in section 551. The auditor's responsibility for supplementary information required by the FASB, GASB or FASAB (called *required supplementary information*) is discussed in the paragraphs that follow. [Revised, April 2000, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 91.]

* * *

**.09** In conjunction with the audit of the financial statements, the auditor may subject the supplementary information to certain auditing procedures. If the procedures are sufficient to enable the auditor to express an opinion on whether the information is fairly stated in all material respects in relation to the financial statements taken as a whole, the auditor may expand the ~~audit~~ auditor's report to express such an opinion. ~~in accordance with section 550.07~~. ~~[Paragraph added, effective September 2002, by Statement on Auditing Standards No. 98.]~~In those circumstances, the auditor's report should describe clearly the character of the auditor's work and the degree of responsibility the auditor is taking regarding the supplementary information. The auditor may report on the supplementary information using the following examples:

a. Required supplementary information to which no qualification in the auditor's report on the financial statements applies:

Our audit was conducted for the purpose of forming an opinion on the financial statements taken as a whole. The [*identify the required supplementary information*] is presented for purposes of additional analysis and is not a required part of the financial statements. Such information has been subjected to the auditing procedures applied in the audit of the financial statements and, in our opinion, is fairly stated in all material respects in relation to the financial statements taken as a whole.

b. Required supplementary information to which a qualification in the auditor's report on the financial statements applies:

Our audit was conducted for the purpose of forming an opinion on the financial statements taken as a whole. The required supplementary information included in [*Schedules 1 and 2*] on page(s) [*XX and XX*] as of December 31, 19XX, is presented for purposes of additional analysis and is not a required part of the financial statements. The required supplementary information in such schedules has been subjected to the auditing procedures applied in the audit of the financial statements; and, in our opinion, except for [*describe reason for qualification*], such information is fairly stated in all material respects in relation to the financial statements taken as a whole.

* * *

## AU sec. 9634, *Letters for Underwriters and Certain Other Requesting Parties: Auditing Interpretations of Section 634*

* * *

**.04** The auditor may affirm to the board of directors that under generally accepted auditing standards, ~~the auditor is required to read the information~~ in addition to ~~audited~~ auditing the financial statements contained in the Form 10-K, the auditor is required to ~~for the purpose of considering~~ evaluate whether ~~such~~ the other information included in such annual reports filed with the SEC under the Securities Exchange Act of 1934 and contain audited financial statements and the related auditor's report contains (1) a material inconsistency, (2) a material misstatement of fact, (3) or both**,** and, if so, to respond appropriately, and to communicate in the auditor's report whether the other information contains a material inconsistency, a material misstatement of fact, or both (see Proposed Auditing Standard, *The Auditor's Responsibilities Regarding Other Information in Certain Documents Containing Audited Financial Statements and the Related Auditor's Report*). ~~may be materially inconsistent with information appearing in the financial statements (see section 550)~~. ~~However, the report to the board of directors should state that the auditor has no obligation to perform any procedures to corroborate such information.~~

* * *

## AU sec. 722, *Interim Financial Information*

* * *

**.18** *Inquiries and other review procedures.* The following are inquiries the accountant should make and other review procedures the accountant should perform when conducting a review of interim financial information:

*** * ***

f. Reading other information that accompanies the interim financial information and is contained in reports (1) to holders of securities or beneficial interests or (2) filed with regulatory authorities under the Securities Exchange Act of 1934 (such as Form 10-Q or 10-QSB), to consider whether such information or the manner of its presentation is materially inconsistent with the interim financial information or there is a material misstatement of fact in the other information.[fn 12] If the accountant concludes that there is a material inconsistency~~,~~ or ~~becomes aware of information that he or she believes is~~ a material misstatement of fact, ~~the action taken will depend on his or her judgment in the particular circumstances. In determining the appropriate course of action,~~ the accountant should consider the ~~guidance~~ requirements of ~~in~~ ~~section 550~~Proposed Auditing Standard, *The Auditor's Responsibilities Regarding Other Information in Certain Documents Containing Audited Financial Statements and the Related Auditor's Report.* ~~paragraphs .04 through .06)~~

PCAOB
Public Company Accounting Oversight Board

## APPENDIX 5

### *Additional Discussion of the Proposed Auditor Reporting Standard, Proposed Amendments to PCAOB Standards, and Comments on the Concept Release*

This Appendix discusses the Proposed Auditing Standard, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion* (the "proposed auditor reporting standard"), presented in Appendix 1, and the related proposed amendments to certain PCAOB auditing standards (the "proposed amendments"), presented in Appendix 3. This Appendix collectively refers to the proposed auditor reporting standard and proposed amendments as the "proposed auditor reporting standard and amendments."

Following the Board's initial outreach from October 2010 to March 2011,[1/] the Board issued on June 21, 2011 a concept release to seek public comment on potential changes to the auditor's reporting model (the "concept release").[2/] Additionally, the Board held a public roundtable[3/] on the concept release and changing the auditor's report was discussed at the Board's Investor Advisory Group ("IAG")[4/] and Standing Advisory Group ("SAG") meetings.[5/]

---

1/ See Section II., *Board Outreach*, of the Release for further discussion regarding the Board's outreach.

2/ *Concept Release on Possible Revisions to PCAOB Standards Related to Reports on Audited Financial Statements and Related Amendments to PCAOB Standards,* PCAOB Release No. 2011-003 (June 21, 2011), is available at http://pcaobus.org/Rules/Rulemaking/Docket034/Concept_Release.pdf.

3/ A transcript of the public roundtable discussions is available at http://pcaobus.org/Rules/Rulemaking/Docket034/09152011_Roundtable_Transcript.pdf.

4/ IAG meeting details and webcasts for March 2011 and 2012 are available at http://pcaobus.org/News/Events/Pages/03162011_IAGMeeting.aspx and http://pcaobus.org/News/Webcasts/Pages/03282012_IAGMeeting.aspx.

5/ See SAG meeting transcripts for November 2011 and 2012, available at http://pcaobus.org/Rules/Rulemaking/Docket034/11102011_SAG_Transcript.pdf, http://pcaobus.org/Rules/Rulemaking/Docket034/11162012_SAG_Transcript.pdf, and http://pcaobus.org/Rules/Rulemaking/Docket034/11152012_SAG_Transcript.pdf.

This Appendix discusses significant comments received during the Board's outreach regarding the auditor's reporting model and also provides additional background information regarding the requirements in the proposed auditor reporting standard and amendments.

The Board requests comments on specific questions included in this Appendix as well as on its proposal in general. Additionally, to assist the Board in evaluating the clarity of the Board's proposal relating to the communication of "critical audit matters,"[6/] the Board requests that commenters prepare and forward to the Board for its consideration examples of critical audit matters that could be communicated in the auditor's report under the proposed auditor reporting standard.[7/]

Further, the Board is seeking comment on economic considerations related to the proposed auditor reporting standard and amendments, including potential costs. To assist the Board in evaluating such matters, the Board is requesting relevant information and empirical data, to the extent available to commenters. Commenters providing cost estimates are requested to provide the basis for any estimate provided. Finally, the Board is seeking comment on the applicability of the proposed auditor reporting standard and amendments to specific entities, including the audits of brokers and dealers, investment companies, and employee stock purchase, savings, and similar plans. Considerations related to the applicability of the proposed auditor reporting standard and amendments to audits of emerging growth companies ("EGCs") are discussed in Appendix 7.

The following sections describe the requirements in the proposed auditor reporting standard and amendments. The Exhibit to this Appendix provides three illustrative examples of communications of critical audit matters.

## I. <u>Introduction (Paragraphs 1 – 3 of the Proposed Auditor Reporting Standard)</u>

The proposed auditor reporting standard establishes requirements for the content of the auditor's written report when the auditor expresses an unqualified opinion on the financial statements (the "auditor's unqualified report"). The auditor is in a position to express an unqualified opinion on the financial statements when the auditor conducted

---

[6/] <u>See</u> Section V., *Critical Audit Matters*, of this Appendix for discussion of the proposed critical audit matters.

[7/] Any such examples would be posted to the PCAOB Rulemaking Docket Matter No. 034 without edits or redactions.

an audit in accordance with the standards of the PCAOB and concludes that the financial statements, taken as a whole, are presented fairly, in all material respects, in conformity with the applicable financial reporting framework.

The proposed auditor reporting standard would supersede portions of existing AU sec. 508, *Reports on Audited Financial Statements*, ("existing AU sec. 508") that primarily relate to an unqualified opinion.[8/] When the auditor is unable to express an unqualified opinion on the financial statements, resulting from, for example, a scope limitation or from the financial statements containing a material departure from the applicable financial reporting framework, the auditor would continue to refer to the requirements in existing AU sec. 508. Existing AU sec. 508 would be retitled to "Departures from Unqualified Opinions and Other Reporting Circumstances" and also would include proposed amendments resulting from issuance of the proposed auditor reporting standard.[9/]

## II. Objectives (Paragraph 4 of the Proposed Auditor Reporting Standard)

Consistent with other recently issued PCAOB auditing standards, the Board has included a section on the objectives of the auditor in the proposed auditor reporting standard to highlight the overall context for the requirements of the standard. The proposed auditor reporting standard states that when the auditor concludes that an auditor's unqualified opinion is appropriate, the objectives of the auditor are to:

- Issue a written report that expresses an unqualified opinion on the financial statements and describes the basis for that opinion; and
- Communicate in the auditor's unqualified report critical audit matters relating to the audit of the financial statements or state that the auditor determined that there are no critical audit matters.

The Board's existing AU sec. 508 does not include an objective for the auditor when expressing an opinion on the financial statements. However, existing AU sec. 508 states that the report shall contain either an expression of opinion regarding the financial statements, taken as a whole, or an assertion to the effect that an opinion cannot be expressed, and, where an auditor's name is associated with financial

---

[8/] AU secs. 508.01-.09 and .11-.19 would be superseded.

[9/] See Section VII., *Amendments to Other PCAOB Standards*, for a discussion of how the requirements of the proposed auditor reporting standard relate to a qualified opinion, adverse opinion, and disclaimer of opinion.

statements, the report should contain a clear-cut indication of the character of the auditor's work, if any, and the degree of responsibility the auditor is taking.[10/] The objectives of the proposed auditor reporting standard include the auditor's expression of the opinion on the financial statements. Additionally, the basic elements that describe the nature of the audit and the auditor's responsibilities are similar to an indication of the character of the auditor's work.[11/]

Question Related to Section II:

1. Do the objectives assist the auditor in understanding the requirements of what would be communicated in an auditor's unqualified report? Why or why not?

## III. The Auditor's Unqualified Report (Paragraph 5 of the Proposed Auditor Reporting Standard)

The proposed auditor reporting standard provides the overall framework for the auditor's unqualified report. This framework would include:

- Basic elements;
- Communication of critical audit matters; and
- Other explanatory language (or an explanatory paragraph), as appropriate in the circumstances.

Because of changes being proposed to the auditor's report, the proposed auditor reporting standard uses the term "auditor's unqualified report" to differentiate it from the "auditor's standard report" described in existing AU sec. 508. The auditor's unqualified report, as described in the proposed auditor reporting standard, not only would include certain standardized language but also would include tailored language related to the auditor's communication of critical audit matters specific to the individual audit.

---

[10/] See existing AU sec. 508.04.

[11/] See Section IV., *Basic Elements*, of this Appendix for discussion of the proposed basic elements.

## IV. Basic Elements (Paragraph 6 of the Proposed Auditor Reporting Standard)

The proposed auditor reporting standard retains the basic elements from existing auditor reporting standards[12/] and incorporates elements from existing illustrative reports that accompany the existing auditor reporting standards. Additionally, the proposed auditor reporting standard improves the language for certain elements in the existing auditor reporting standards. Finally, the proposed auditor reporting standard adds new elements that provide more information about the audit and the auditor, such as information regarding auditor tenure and the auditor's responsibilities regarding other information outside the audited financial statements and the results of the auditor's evaluation of the other information.

The proposed auditor reporting standard retains the pass/fail model of the existing auditor's report. Many commenters supported retaining the pass/fail model because it clearly conveys the auditor's opinion regarding whether the financial statements are fairly presented. Additionally, commenters indicated support for the concise and useful message of the pass/fail model.

The proposed basic elements are intended to improve investors' and other financial statement users' understanding about the auditor, the nature of an audit, and the auditor's responsibilities. Except for the new proposed requirement regarding the auditor's responsibilities for other information outside the financial statements, the proposed changes to the basic elements do not represent a significant departure from existing requirements and the Board does not anticipate that they would impose significant additional costs.[13/] The Board, however, would expect audit firms to incur minimal one-time costs that relate primarily to updating a firm's methodology regarding auditor reporting. These changes might not result in significant recurring costs because they involve standardized language that, once implemented, would be the same or very similar across different auditors' reports.

---

12/ See AU sec. 508 and Auditing Standard No. 1, *References in Auditor's Reports to the Standards of the Public Company Accounting Oversight Board.*

13/ Costs related to reporting regarding the auditor's responsibilities for other information outside the financial statements and the results of the auditor's evaluation of the other information are discussed in Appendix 6.

## A. Basic Elements Retained from Existing Standards and Incorporated from Existing Illustrative Reports

### *1. Basic Elements Retained from Existing Standards*

The proposed auditor reporting standard retains the existing basic elements that are currently included in the auditor's report. Commenters indicated that these elements remain important for an understanding of the audit and the auditor's opinion and provide consistency and comparability among auditors' reports.

The basic elements retained from the existing auditor reporting standards include:

- A statement identifying each financial statement and related schedule, if applicable, that has been audited (paragraph 6.d. of the proposed auditor reporting standard);
- A statement that the financial statements are the responsibility of the company's management (paragraph 6.g. of the proposed auditor reporting standard);
- A statement that the auditor's responsibility is to express an opinion on the financial statements based on the audit (paragraph 6.j. of the proposed auditor reporting standard);
- A statement that the audit was conducted in accordance with the standards of the PCAOB (paragraph 6.k. of the proposed auditor reporting standard);
- A statement that an audit includes evaluating the overall presentation of the financial statements (paragraph 6.m.(4) of the proposed auditor reporting standard);
- A statement that the auditor believes that the audit provides a reasonable basis for the auditor's opinion (paragraph 6.n. of the proposed auditor reporting standard);
- An opinion that the financial statements present fairly, in all material respects, the financial position of the company as of the balance sheet date and the results of its operations and its cash flows for the period then

ended in conformity with the applicable financial reporting framework.[14/] The opinion should also include an identification of the applicable financial reporting framework (paragraph 6.o. of the proposed auditor reporting standard);

- The signature of the auditor's firm[15/] (paragraph 6.q. of the proposed auditor reporting standard);
- The city and state (or city and country, in the case of non-U.S. auditors) from which the auditor's report has been issued[16/] (paragraph 6.r. of the proposed auditor reporting standard); and
- The date of the auditor's report (paragraph 6.s. of the proposed auditor reporting standard).[17/]

*2. Basic Elements Incorporated from Existing Illustrative Reports*

In addition to the basic elements retained from the existing auditor reporting standards, the proposed auditor reporting standard also incorporates basic elements from the illustrative reports accompanying the existing reporting standards.[18/] Although these elements were not specifically required by existing auditor reporting standards,

---

14/ The terms used in the Opinion on the Financial Statements section, such as financial position, results of operations and cash flows, should be modified, as appropriate, depending on the type of company and required financial statements. For example, in an audit of an investment company, the auditor might use such terms as "the financial position," "the results of its operations," and "changes in its net assets" in the Opinion on the Financial Statements section of the auditor's report.

15/ See also U.S. Securities and Exchange Commission ("SEC") Rule 2-02(a) of Regulation S-X, 17 C.F.R. § 210.2-02(a).

16/ Id.

17/ See AU sec. 530, *Dating of the Independent Auditor's Report*.

18/ See illustrative reports on an audit of financial statements in existing AU sec. 508.08 and the Appendix of Auditing Standard No. 1.

the Board understands that, in practice, these elements generally are incorporated by auditors in the auditors' reports on financial statements filed with the SEC.[19/]

The proposed auditor reporting standard incorporates the following elements from the existing illustrative reports:

- The title, "Report of Independent Registered Public Accounting Firm" (paragraph 6.a. of the proposed auditor reporting standard);[20/]
- The name of the company whose financial statements were audited (paragraph 6.c. of the proposed auditor reporting standard); and
- The date of, or period covered by, each financial statement and related schedule, if applicable, identified in the report (paragraph 6.e. of the proposed auditor reporting standard).

The basic elements retained from the existing auditor reporting standards and incorporated from existing illustrative reports are generally understood by investors and other financial statement users and would continue to promote consistency among auditors' reports.

## B. Changes to Certain Language in the Existing Auditor's Report

The proposed auditor reporting standard would change the language for certain elements in the existing auditor's report. As further described below, the changes are being proposed in response to comments and to align the language with other PCAOB standards.

### *1. Addressees (Paragraph 6.b. of the Proposed Auditor Reporting Standard)*

The proposed auditor reporting standard would require the auditor's report to be addressed at least to (1) investors in the company, such as shareholders, and (2) the board of directors or equivalent body. The proposed auditor reporting standard indicates

---

[19/] Based on the PCAOB staff's review of 125 Form 10-K filings for fiscal year 2011, all auditors' reports incorporated these basic elements.

[20/] An auditor, whether registered or not, may be legally required to, or may agree voluntarily to, perform an engagement in accordance with PCAOB standards of a non-issuer. If the proposed auditor reporting standard is adopted, PCAOB staff may issue guidance regarding such situations.

that addressees might include other appropriate parties depending on, for example, the legal and governance structure of the company. Accordingly, the auditor's report also could be addressed to others, such as bondholders.

Under existing AU sec. 508, the auditor's report may be addressed to the company whose financial statements are being audited, its board of directors, or stockholders.[21/] Because the auditor is not required to address the auditor's report to a specific group, the auditor's report is not consistently addressed to the company's investors.[22/] In some instances, auditors address the auditor's report to the board of directors, or the company, rather than the company's investors.

Many commenters referred to investors as the "key customers" of the auditor's report, "the real client of the auditor," or "ultimately the ones paying for the auditor's opinions."[23/] Additionally, commenters suggested that the auditor's report should be addressed to the shareholders of the company in addition to the board of directors. In order to promote consistency in the addressees included in the auditor's report, the Board is proposing to require the auditor's report be addressed to investors in the company. The requirement for the auditor's report to be addressed to investors might serve as a reminder to the auditor that the auditor's ultimate customer is the investor.

*2. The Auditor's Responsibility for the Financial Statements, Including the Related Notes and, if Applicable, Schedules (Paragraph 6.f. of the Proposed Auditor Reporting Standard)*

The proposed auditor reporting standard would require the auditor to identify the financial statements, including the related notes and, if applicable, schedules, as part of the financial statements that were audited.

---

[21/] See existing AU sec. 508.09.

[22/] Based on the PCAOB staff's review of 125 Form 10-K filings for fiscal year 2011, there were approximately 5 percent of auditors' reports not addressed to investors.

[23/] See comments at the September 15, 2011 public roundtable on the alternatives presented in the concept release for changing the auditor's reporting model. See also United States v. Arthur Young, 465 U.S. 805, 819 note 15 (1984), which states, in part, "The SEC requires the filing of audited financial statements in order to obviate the fear of loss from reliance on inaccurate information, thereby encouraging public investment in the Nation's industries."

The proposed auditor reporting standard uses the term "financial statements" as used by the SEC, which includes all notes to the statements and all related schedules. The notes to the financial statements provide additional information about the financial statements, such as a summary of the significant accounting policies. The proposed auditor reporting standard also includes a sentence to clarify that the proposed auditor reporting standard and other PCAOB standards often refer to the notes as disclosures.[24/]

The schedules identified as part of the financial statements depend on the SEC's requirements for the type of issuer. For example, auditors of registered investment companies would refer to SEC Regulation S-X, 17 C.F.R. § 210.6-10, for the list of schedules required to be filed with the SEC, such as the summary schedule of investments in securities of unaffiliated issuers.

The proposed auditor reporting standard would not apply to supplemental schedules pursuant to AU sec. 551, *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents*, because those schedules are not considered part of the financial statements.[25/] The auditor should continue to look to the requirements of AU sec. 551 for the auditor's reporting responsibilities regarding supplemental schedules accompanying audited financial statements.[26/]

Under existing AU sec. 508, each financial statement audited is specifically identified in the auditor's report. Existing AU sec. 508 also describes the basic financial statements as the balance sheet, statement of income, statement of stockholders' equity, and statement of cash flows.[27/] The notes to the financial statements and, if applicable, the related schedules, are not identified as part of the financial statements under existing AU sec. 508. The proposed auditor reporting standard would require specific references to the related notes and, if applicable, schedules because those are

---

24/ See, e.g., Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement.*

25/ See AU sec. 551.03.

26/ On July 12, 2011, the Board issued Proposed Auditing Standard, *Auditing Supplemental Information Accompanying Audited Financial Statements,* PCAOB Release No. 2011-005 (July 12, 2011) available at http://pcaobus.org/Rules/Rulemaking/Docket036/PCAOB_Release_2011-005.pdf, which, if adopted, would supersede AU sec. 551.

27/ Existing AU sec. 508.06 describes these as the basic financial statements.

identified as part of the financial statements pursuant to SEC Rule 1-01(b) of Regulation S-X.

Many commenters supported the addition of language in the auditor's report regarding the auditor's responsibilities for financial statement notes. Some commenters noted that this change would bring the auditor's report more in line with the actual responsibilities of auditors as set out in existing auditing standards and would give more prominence to the auditor's responsibility for such disclosures.

Since the related notes and, if applicable, schedules are an integral part of the audited financial statements, the Board is proposing to make clear in the auditor's report the auditor's responsibilities for the notes to the financial statements and related schedules.

The proposed auditor reporting standard also recognizes that not every company is required by the SEC to include related schedules as part of the financial statements. If, however, these schedules are required by the SEC to be included as part of the audited financial statements, the auditor's report also would identify these schedules.

*3. The Auditor's Responsibility for Fraud (Paragraph 6.l. of the Proposed Auditor Reporting Standard)*

The proposed auditor reporting standard would revise the auditor's report to recognize the auditor's existing responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatements, whether caused by error or fraud.[28/]

Existing AU sec. 508 does not require the auditor's report to describe the auditor's responsibility related to error or fraud in planning and performing the audit. This proposed change does not modify the auditor's existing responsibilities with respect to fraud in a financial statement audit.

Many commenters supported describing the auditor's responsibility for fraud in the auditor's report. Those commenters generally suggested modifying the language in the auditor's report to add the phrase "whether caused by error or fraud." Another commenter specifically noted that this description would help achieve the objective of enhancing communication between auditors and users of the auditors' reports.

---

[28/] See paragraph .02 of AU sec. 110, *Responsibilities and Functions of the Independent Auditor*.

In the report by the U.S. Department of the Treasury Advisory Committee on the Auditing Profession ("ACAP"), ACAP requested the PCAOB to clarify in the auditor's report the auditor's role in detecting fraud under current auditing standards.[29/] Additionally, academic research suggests that some users might benefit from a specific statement in the auditor's report regarding fraud.[30/]

*4. Description of the Nature of an Audit (Paragraph 6.m. of the Proposed Auditor Reporting Standard)*

The proposed auditor reporting standard retains the requirement for the auditor's report to contain a description of the nature of an audit but revises that description to align it better with the requirements in the Board's existing standards.

Under existing standards, the nature of an audit is described in the auditor's report as follows:[31/]

- Examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements;
- Assessing the accounting principles used and significant estimates made by management; and
- Evaluating the overall financial statement presentation.

In 2010, the Board adopted eight standards (Auditing Standard Nos. 8-15) that improve the effectiveness of the auditor's identification of, assessment of, and response to the risks of material misstatement in an audit ("risk assessment standards"). The proposed auditor reporting standard updates the description related to the nature of the

---

29/ U. S. Department of the Treasury, *Final Report of the Advisory Committee on the Auditing Profession to the U.S. Department of the Treasury* ("ACAP report"), at VII:2 (October 6, 2008), available at http://www.treasury.gov/about/organizational-structure/offices/Documents/final-report.pdf. See generally, ACAP report, at VII:13-VII:19.

30/ See Glen L. Gray, Jerry L. Turner, Paul J. Coram, and Theodore J. Mock, *Perceptions and Misperceptions Regarding the Unqualified Auditor's Report by Financial Statement Preparers, Users, and Auditors*, 25 Accounting Horizons 659, 675-676 (2011).

31/ See existing AU sec. 508.08.f.

audit to reflect the auditor's responsibilities in a risk-based audit and to align the description with the language in the Board's risk assessment standards.

The proposed auditor reporting standard includes the following description of an audit:

- Performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks;
- Examining, on a test basis, appropriate evidence regarding the amounts and disclosures in the financial statements;
- Evaluating the accounting principles used and significant estimates made by management; and
- Evaluating the overall presentation of the financial statements.

## C. New Proposed Basic Elements Requirements

The proposed auditor reporting standard adds new basic elements to the auditor's unqualified report that would enhance investors' and other financial statement users' understanding about the auditor and an audit.

### 1. *Auditor Independence (Paragraph 6.h. of the Proposed Auditor Reporting Standard)*

The proposed auditor reporting standard would require the auditor to include a statement in the auditor's report that the auditor is a public accounting firm registered with the PCAOB (United States) and is required to be independent with respect to the company in accordance with the United States federal securities laws[32/] and the applicable rules and regulations of the SEC and the PCAOB.

Currently, the only indication of auditor independence in the auditor's report is in the title of the report "Report of Independent Registered Public Accounting Firm." Aside from the title, the auditor's report provides no further information regarding auditor

32/ The term "United States federal securities laws" has the same meaning as "securities laws" in PCAOB Rule 1001(s)(ii), *General Provisions*. "United States federal" has been added to distinguish for investors the country and governmental level (federal, state or local) of the referenced laws.

independence. The statement regarding auditor independence is not intended to affect auditor independence requirements under the securities laws, SEC rules,[33/] or PCAOB rules.[34/]

In the concept release, the Board sought comments on whether to include a statement in the auditor's report, in addition to the title, regarding the auditor's responsibilities related to independence. In general, commenters were supportive of this change with one commenter specifically noting that a stronger statement regarding auditor independence would both be informative for investors and a reminder to auditors of their obligation to be independent of the company.

According to a January 2008 U.S. Government Accountability Office report, "investors and other users of financial statements expect auditors to bring integrity, independence, objectivity, and professional competence to the financial reporting process and to prevent the issuance of misleading financial statements. The resulting sense of confidence in companies' audited financial statements, which is key to the efficient functioning of the markets for public companies' securities, can exist only if reasonable investors perceive auditors as independent and expert professionals who will conduct thorough audits."[35/] In the Board's view, adding a statement relating to auditor independence in the auditor's report could (1) enhance investors' and other financial statement users' understanding of the auditor's obligations to be independent and (2) serve as a reminder to auditors of these obligations.

*2. Auditor Tenure (Paragraph 6.i. of the Proposed Auditor Reporting Standard)*

The proposed auditor reporting standard would require the auditor to include in the auditor's report a statement containing the year the auditor began serving consecutively as the company's auditor. Currently this information is not required to be communicated by the auditor (or by management or the audit committee) to investors and other financial statement users.

Auditor tenure has been the subject of discussion for decades[36/] and continues to be a topic of discussion today.[37/] Some academic research indicates that engagements with short-term tenure are relatively riskier or that audit quality is improved when auditors have time to gain expertise in the company under audit and in the related industry.[38/] Meanwhile, other academic research indicates that investors that participated in a study view long-term auditor-company relationships as adversely affecting audit quality.[39/] Other academic research suggests that both short and long tenure can have detrimental effects on audit quality.[40/]

Disclosure of auditor tenure also has been considered by other regulators and standard setters. For example, under rules adopted by the United Kingdom ("UK")

[40/] See, e.g., Larry R. Davis, Billy S. Soo, and Gregory M. Trompeter, *Auditor Tenure and the Ability to Meet or Beat Earnings Forecasts*, 26 Contemporary Accounting Research 517, 517-548 (2009).

Financial Reporting Council, UK-listed companies are required to provide information on the length of auditor tenure in a separate section of the annual report.[41/]

Regardless of whether auditor tenure is viewed as a positive or negative influence on audit quality, investors and other financial statement users have indicated strong interest in this information.[42/] In developing the proposed requirement, the Board has not reached a conclusion regarding the relationship between audit quality and auditor tenure. The Board's inspection process has not been designed to determine a relationship between audit quality and auditor tenure. In light of the public interest in the subject of auditor tenure, the Board is proposing to include auditor tenure as a data point in the auditor's report.

In determining the year the auditor began serving consecutively as the company's auditor, the auditor would look to the year beginning when the firm signs an initial engagement letter to audit a company's financial statements or when the firm begins the audit, whichever is earlier. For example, if the auditor is appointed in January 2012 to audit a company's financial statements for the year ended December 31, 2012, and the auditor's report is dated February 28, 2013, the auditor would state 2012 as the year the auditor began serving consecutively as the company's auditor. In another example, if the auditor is appointed in January 2013 to audit a company's financial statements for the years ended December 31, 2010, 2011, and 2012, the auditor would state 2013 as the year the auditor began serving consecutively as the company's auditor.

The intent of the proposed requirement is to disclose the duration of the auditor's relationship with the company. For example, in a situation in which a company acquires another company, if the acquirer's current auditor continues serving subsequently as the company's auditor, the auditor tenure would continue. If the acquired company's auditor is selected to serve as the acquirer's auditor, the auditor tenure would begin anew.

---

41/ See UK - Financial Reporting Council Corporate Governance Code and Auditing Standards at http://www.frc.org.uk/Our-Work/Codes-Standards/Corporate-governance/UK-Corporate-Governance-Code.aspx.

42/ On April 19, 2013, the Council of Institutional Investors revised its corporate governance policies to state that "boards retaining an auditor beyond 10 years should be required to explain why doing so is in shareholders' interest." The revisions made to the Council of Institutional Investors' Policies on Corporate Governance are available at: http://www.cii.org/corp_gov_policies.

Additionally, the auditor's relationship with the company is not affected by the company's status as a public company. For instance, if a company went public but maintained its auditor, the auditor tenure would include the years the auditor served as the company's auditor both before and after the company became subject to the SEC financial reporting requirements.

The Board understands that, in some cases, the auditor may have difficulty determining the year the auditor began serving as the company's auditor, due to firm or company mergers, acquisitions, or changes in ownership structure. If the auditor is unaware of the year it became the company's auditor, the auditor could refer to publicly available information, such as the SEC's Electronic Data Gathering, Analysis and Retrieval ("EDGAR") for determining the year the auditor or the auditor's predecessor firm began serving as the company's auditor.[43/] EDGAR also may be used by investors to assess whether a company has filed a current report on Form 8-K to disclose a change in the company's auditor.[44/]

If the auditor is unable to obtain information regarding the year the auditor began serving consecutively as the company's auditor, the auditor would be required to state in the auditor's report that the auditor is uncertain as to the year the auditor became the company's auditor and provide the earliest year of which the auditor has knowledge. As noted above, this might apply in situations in which other firms were acquired by the auditor's firm or were merged with the auditor's firm, or in situations in which the company's ownership structure changed. The following is an example of such a statement that could be included in the auditor's report:

> We are uncertain as to the year we [or our predecessor firms] began serving consecutively as the auditor of the Company's financial statements; however, we are aware that we [or our predecessor firms] have been Company X's auditor [or Company X's auditor subsequent to the Company's merger] consecutively since at least 19XX.

The auditor may incur some initial costs to determine the year the auditor began serving consecutively as the company's auditor, but once the year has been determined the cost to include the disclosure about tenure should be minimal.

---

[43/] Many company's filings are available via EDGAR starting in 1994.

[44/] See Form 8-K, 17 C.F.R. § 249.308, Item 4.01 Changes in Registrant's Certifying Accountant.

*3. Other Information (Paragraph 6.p. of the Proposed Auditor Reporting Standard)*

The proposed auditor reporting standard would require the auditor to refer to the reporting requirements contained in the Board's companion Proposed Auditing Standard, *The Auditor's Responsibilities Regarding Other Information in Certain Documents Containing Audited Financial Statements and the Related Auditor's Report*, (the "proposed other information standard") when the auditor's report is included in a company's annual report filed with the SEC under the Securities Exchange Act of 1934 ("Exchange Act") that includes other information outside the company's audited financial statements as well as the audited financial statements and the related auditor's report.

When issuing an auditor's report, the reporting requirements of the proposed other information standard would require the auditor to include in a separate section of the auditor's report titled "The Auditor's Responsibilities Regarding Other Information" the following:

a. A statement that, in addition to auditing the company's financial statements [and the internal control over financial reporting (if applicable)], in accordance with the standards of the PCAOB, the auditor evaluated whether the other information contains a material inconsistency with the financial statements, a material misstatement of fact, or both;

b. Identification of the annual report that contains the other information, and the audited financial statements and the auditor's report, by referring to the SEC Exchange Act form type and the period end date of the financial statements;

c. A statement that the auditor's evaluation of the other information was based on relevant audit evidence obtained and conclusions reached during the audit;

d. A statement that the auditor did not audit the other information and does not express an opinion on the other information; and

e. A statement that, based on the evaluation, the auditor:

    (1) Has not identified a material inconsistency or a material misstatement of fact in the other information;[45/] or

---

[45/] This statement is appropriate in situations in which the auditor (1) has not identified a material inconsistency or a material misstatement of fact or (2) has identified

(2) Has identified a material inconsistency, a material misstatement of fact, or both in the other information that has not been appropriately revised and a description of the material inconsistency, the material misstatement of fact, or both.

In the concept release, the Board requested comments on whether the auditor's report should describe the auditor's responsibility with respect to other information. Some commenters supported including a description of the auditor's responsibilities with respect to other information outside the financial statements in the auditor's report. Some of these commenters indicated that a description of the auditor's responsibilities would be helpful for investors' and other financial statement users' understanding of the auditor's responsibilities with respect to other information and would address any misperception that the other information is audited. A number of commenters suggested that the Board also consider requiring the auditor to include in the auditor's report the auditor's conclusions on the work performed in addition to the description of the auditor's responsibilities regarding other information.

The proposed other information standard would strengthen the audit procedures the auditor would perform related to other information outside the financial statements when such information is included in a company's annual report filed with the SEC under the Exchange Act that also contains that company's audited financial statements and the related auditor's report. The proposed other information standard would provide a basis for enhancing the auditor's report regarding the auditor's responsibilities for other information and the results of the auditor's evaluation of the other information. These changes are intended to make the auditor's report more informative.[46/]

## D. Form of the Auditor's Unqualified Report

The basic elements of the proposed auditor's unqualified report are organized and categorized into introduction, basis of opinion, opinion on the financial statements, auditor's responsibilities regarding other information, and signature and date sections in the proposed auditor reporting standard. This categorization would replace previous references in PCAOB standards to introductory, scope, and opinion paragraphs. The purpose for this change is primarily to assist readers of the proposed auditor reporting

---

a material inconsistency, a material misstatement of fact, or both, that management has revised appropriately prior to the issuance of the auditor's report.

[46/] See Appendix 6 for proposed changes related to the auditor's responsibilities regarding other information.

standard to understand the standard as well as to provide easy reference to specific sections within the auditor's report.

One proposed change in the form of the report involves the replacement of the "scope paragraph" in existing AU sec. 508, which describes the nature of an audit,[47/] with a "Basis of Opinion" section. The proposed change in terminology is based on the statement in the auditor's unqualified report that "we believe our audits provide a reasonable basis for our opinion."

The proposed auditor reporting standard does not require that the basic elements appear in a specific order in the auditor's report, nor does it require that section titles be included, except for the section titles regarding the auditor's responsibilities for other information and critical audit matters. The proposed auditor reporting standard does not preclude the auditor from including section titles for other sections in the auditor's report.

Questions Related to Section IV:

2. The proposed auditor reporting standard would require the auditor's report to be addressed at least to (1) investors in the company, such as shareholders, and (2) the board of directors or equivalent body. Are there others to whom the auditor's report should be required to be addressed?

3. The proposed auditor reporting standard retains the requirement for the auditor's report to contain a description of the nature of an audit, but revises that description to better align it with the requirements in the Board's risk assessment standards. Are there any additional auditor responsibilities that should be included to further describe the nature of an audit?

4. The proposed auditor reporting standard would require the auditor to include a statement in the auditor's report relating to auditor independence. Would this statement provide useful information regarding the auditor's responsibilities to be independent? Why or why not?

5. The proposed auditor reporting standard would require the auditor to include in the auditor's report a statement containing the year the auditor began serving consecutively as the company's auditor.

---

[47/] See existing AU sec. 508.08.

a. Would information regarding auditor tenure in the auditor's report be useful to investors and other financial statement users? Why or why not? What other benefits, disadvantages, or unintended consequences, if any, are associated with including such information in the auditor's report?

b. Are there any additional challenges the auditor might face in determining or reporting the year the auditor began serving consecutively as the company's auditor?

c. Is information regarding auditor tenure more likely to be useful to investors and other financial statement users if included in the auditor's report in addition to EDGAR and other sources? Why or why not?

6. The proposed auditor reporting standard would require the auditor to describe the auditor's responsibilities for other information and the results of the evaluation of other information. Would the proposed description make the auditor's report more informative and useful? Why or why not?

7. Should the Board require a specific order for the presentation of the basic elements required in the auditor's report? Why or why not?

8. What other changes to the basic elements should the Board consider adding to the auditor's report to communicate the nature of an audit, the auditor's responsibilities, the results of the audit, or information about the auditor?

9. What are the potential costs or other considerations related to the proposed basic elements of the auditor's report? Are cost considerations the same for audits of all types of companies? If not, explain how they might differ.

## V. Critical Audit Matters (Paragraphs 7 – 14 of the Proposed Auditor Reporting Standard)

The current version of the auditor's report includes the auditor's opinion on whether the financial statements are fairly presented (pass) or not (fail). Beyond the pass/fail nature of the report, the report provides little, if any, information specific to the audit of the company's financial statements. The proposed auditor reporting standard would require the auditor to communicate specific information through the auditor's report regarding "critical audit matters," which would result in information in auditors' reports tailored to the audit.[48/]

The Board developed its proposal for communicating critical audit matters in the auditor's report in a way that should provide greater insight regarding the audit, without unduly burdening the financial reporting process. The auditor is well positioned to communicate this type of information to investors and other financial statement users through the auditor's report. Under the proposed auditor reporting standard, the auditor would determine critical audit matters by leveraging audit work already required to be performed under existing standards. The proposed auditor reporting standard does not intend to change the auditor's traditional role of attesting to matters in the financial statements and will not require auditors to provide analysis of the matters in the financial statements when communicating critical audit matters. Notably, the auditor's communication of critical audit matters would represent matters that have been addressed by the auditor in forming the opinion on the financial statements. Therefore, the communication of critical audit matters is not intended to, and should not, detract from, disclaim, or qualify the auditor's opinion.

Communication of critical audit matters in the auditor's report is intended to make the auditor's report more informative, thus increasing its relevance and usefulness to investors and other financial statement users. Academic research suggests that the prominence with which information is disclosed can have implications for investment decision making.[49/] Communication of critical audit matters in the auditor's report could focus investors' and other financial statement users' attention on challenges associated with the audit that may contribute to the information used in investment decision making. A more informative auditor's report could benefit investors and other financial statement users by increasing the prominence of potentially valuable information, thus increasing the value of the auditor's report.

Requiring auditors to communicate critical audit matters could help investors and other financial statement users focus on aspects of the company's financial statements that the auditor also found to be challenging. Communicating critical audit matters would provide investors and other financial statement users with previously unknown

---

48/ The communication of critical audit matters also would be required in an auditor's report with a qualified opinion. See further discussion in Section VII, F. *Amendments to Existing AU sec. 508*.

49/ See David Hirshleifer and Siew Hong Teoh, *Limited Attention, Information Disclosure, and Financial Reporting*, 36 Journal of Accounting and Economics 337, 337-386 (2003).

information about the audit that could enable them to analyze more closely any related financial statement accounts and disclosures. The communication of critical audit matters could help to alleviate the information asymmetry[50/] that exists between company management and investors. More specifically, company management is typically aware of the auditor's most challenging areas in the audit because of regular interactions with the auditor as part of the audit, but this information is not usually known to investors. Reducing the level of information asymmetry between company management and investors could result in more efficient capital allocation and, as academic research has shown, could lower the average cost of capital.[51/]

The auditor's focus on, and communication of, critical audit matters could lead to improved financial statement disclosures related to areas of the financial statements that gave rise to critical audit matters. Potential improvements to financial statement disclosures in such areas could occur because of increased attention by the auditor, management, and the audit committee to matters communicated by the auditor in the draft auditor's report regarding critical audit matters. The improvement in the related financial statement disclosures could incrementally increase the quality of the information[52/] in the financial statements. Academic research has indicated that increasing the amount or quality of information in financial reporting could result in more efficient capital allocation decisions.[53/]

Communication of critical audit matters under the proposed auditor reporting standard, however, could result in additional effort involving both one-time costs and

---

50/ Economists often describe information asymmetry as an imbalance, where one party has more or better information than another party.

51/ See David Easley and Maureen O'Hara, *Information and the Cost of Capital*, 59 The Journal of Finance 1553, 1553-1583 (2004).

52/ The term "quality of information" is formalized by the concept of precision. Information economics frequently treats information as consisting of two components: a signal that conveys information and noise which inhibits the interpretation of the signal. Precision is the inverse of noise so that decreased noise results in increased precision and a more readily interpretable signal. See Robert E. Verrecchia, *The Use of Mathematical Models in Financial Accounting*, 20 Journal of Accounting Research 1, 1-42 (1982).

53/ See Richard A. Lambert, Christian Leuz, and Robert E. Verrecchia, *Information Asymmetry, Information Precision, and the Cost of Capital*, 16 Review of Finance 1, 1-29 (2011).

recurring costs in each individual audit relative to the determination, preparation of language for communication, and documentation of critical audit matters in the auditor's report. Companies, including audit committees will likely also incur additional costs in reviewing the critical audit matters in the auditor's report. Section V.F., *Other Considerations for Critical Audit Matters,* of this Appendix provides a more detailed discussion regarding costs and related questions associated with the requirements for critical audit matters.[54/]

There also could be potential unintended consequences associated with requiring auditors to communicate critical audit matters in the auditor's report. For example, the effort required to determine, prepare language for communication, and document critical audit matters likely would occur during the final stages of the audit, which might reduce the time available to the auditor to review and complete the audit work.

Additionally, as critical audit matters in the auditor's report would not be something that investors and other financial statement users are accustomed to reviewing or analyzing, investors and other financial statement users could misunderstand the meaning of a critical audit matter. Further, investors may not understand that information important to an investment decision may not be highlighted as a critical audit matter. However, as financial statement disclosures have changed over time, investors and other financial statement users are accustomed to reviewing or analyzing new or different information. Therefore, such users should have the ability to interpret the meaning of critical audit matters communicated in an auditor's report.

## A. Definition of Critical Audit Matters (Paragraph A2 of the Proposed Auditor Reporting Standard)

The proposed auditor reporting standard defines critical audit matters as those matters the auditor addressed during the audit of the financial statements that (1) involved the most difficult, subjective, or complex auditor judgments; (2) posed the most difficulty to the auditor in obtaining sufficient appropriate evidence; or (3) posed the most difficulty to the auditor in forming an opinion on the financial statements.

---

54/ In addition, the discussion regarding costs for auditors related to critical audit matters appears in two different areas as follows: (1) recurring costs are discussed under each proposed requirement for critical audit matters throughout this Section and (2) one-time costs are discussed in Section V.F., *Other Considerations for Critical Audit Matters*, of this Appendix.

The auditor might identify either one matter or a number of matters that meet the definition of a critical audit matter. It is expected that, in most audits, there could be several matters that would meet the definition of a critical audit matter. Use of the word "most" in the definition of a critical audit matter does not imply that only one matter under each criteria would qualify as a critical audit matter. The word most also is not intended to imply that there is only one matter that surpasses all other matters; but rather to refer to the matter or matters that would stand out from the other numerous matters addressed during an audit in terms of difficulty, subjectivity, or complexity, as stated in the critical audit matters definition. Additionally, an audit matter could meet one, two, or all three of the criteria in the definition.

*1. Involved the Most Difficult, Subjective, or Complex Auditor Judgments*

The auditor exercises judgment in a variety of ways throughout an audit of financial statements. For instance, auditor judgment is used in determining the nature, timing, and extent of audit procedures; evaluating sufficient appropriate audit evidence; and forming an opinion on the financial statements.

The proposed auditor reporting standard anticipates that the auditor would determine what matters addressed during the audit involved the most difficult, subjective, or complex auditor judgment for communication in the auditor's report. The degree of difficulty, subjectivity, or complexity of auditor judgments can vary depending on the matter. For instance, matters that are subjective in nature generally would require a greater degree of auditor judgment than matters that are objective. Similarly, matters that are difficult or complex might require a greater degree of auditor judgment than matters that are relatively straightforward. For example, the auditor might determine that auditing the allowance for loan losses of a bank represented one of the areas that involved the most difficult, subjective, or complex auditor judgments because of (1) the high degree of complexity and subjectivity associated with evaluating the determination of the allowance for loan losses; (2) the significance of the assumptions in the accounting estimate, including the possibility of reasonable alternative assumptions; and (3) the high degree of uncertainty associated with the assumptions.

*2. Posed the Most Difficulty to the Auditor in Obtaining Sufficient Appropriate Evidence*

Audit evidence may be obtained by the auditor from several different sources, for example, from management; third parties, such as through confirmation; or from the auditor's own procedures, such as observation. The sufficiency of audit evidence is the measure of its quantity, whereas the appropriateness is the measure of its quality, that is, its relevance and reliability.[55/]

The auditor might experience difficulty in obtaining sufficient appropriate evidence in several ways. For instance, difficulty might result from unexpected extensive effort required by the auditor to obtain evidence. Difficulty could also result when the auditor obtains information that conflicts with audit evidence previously obtained, thereby raising questions about the reliability of the audit evidence.

Those matters arising in the audit that posed the most difficulty to the auditor in obtaining sufficient appropriate evidence would be communicated in the auditor's report under the proposed auditor reporting standard. For example, the auditor might determine that auditing fair value measurements of certain financial instruments represented one of the areas that posed the most difficulty in obtaining sufficient appropriate evidence because the auditor encountered difficulties in obtaining relevant and reliable evidence regarding observable inputs in an inactive market. In situations where there is little market activity, the auditor may need to evaluate unobservable inputs to measure fair value, which requires the auditor's assessment of the assumptions that market participants would use to price an asset or liability.[56/]

3. *Posed the Most Difficulty to the Auditor in Forming the Opinion on the Financial Statements*

Matters that posed the most difficulty to the auditor in forming the opinion on the financial statements are those matters arising from the audit that commenters described

---

[55/] See paragraphs 5 and 6 in Auditing Standard No. 15, *Audit Evidence*.

[56/] See Financial Accounting Standard Board's ("FASB") Accounting Standard Codification ("ASC") Topic 820, *Fair Value Measurements*, and International Accounting Standards Board's International Financial Reporting Standard No. 13, *Fair Value Measurement*, which define Level 3 inputs as unobservable inputs that are used to estimate the fair value of the asset or liability. Unobservable inputs should be used to measure fair value to the extent that relevant observable inputs are not available, thereby allowing a fair value measurement in situations in which there is little, if any, market activity for the asset or liability at the measurement date. Unobservable inputs should reflect the assumptions (including assumptions about risk) that market participants would use when pricing the asset or liability.

as "close calls" or matters that "kept the auditor up at night."[57] The types of matters that would meet this criteria represent matters that concerned the auditor when the auditor was making the final assessment of whether the financial statements present fairly the company's financial position, results of operations, and cash flows in conformity with the applicable financial reporting framework.[58]

Those matters arising in the audit that posed the most difficulty to the auditor in forming the opinion on the financial statements would be communicated in the auditor's report under the proposed auditor reporting standard. For example, the auditor might determine that revenue recognition represented an area that posed the most difficulty to the auditor in forming the opinion on the financial statements because the authoritative revenue recognition guidance is not directly applicable to the company's product sales raising challenges for the auditor in determining if revenue recognition principles were properly applied.

## B. Determination of Critical Audit Matters (Paragraphs 7 – 9 of the Proposed Auditor Reporting Standard)

### *1. Requirement to Determine Critical Audit Matters (Paragraphs 7 and 8 of the Proposed Auditor Reporting Standard)*

The proposed auditor reporting standard would require the auditor to determine the critical audit matters addressed in the audit of the current period's financial statements based on the results of the audit or evidence obtained.

Under the proposed auditor reporting standard, it is expected that, in most audits, the auditor would determine that there are critical audit matters. The proposed auditor reporting standard does not provide for an explicit exception from determining whether there are any critical audit matters for audits of certain types of entities. Since no two audits are alike, there may be critical audit matters even in an audit of a company with no operations or activities.

In determining the critical audit matters the auditor addressed during the audit, the auditor would leverage the work he or she already performed when conducting an

---

[57] See, e.g., comments made during the PCAOB's Roundtable on the Auditor's Reporting Model. The transcript is located at http://pcaobus.org/Rules/Rulemaking/Docket034/09152011_Roundtable_Transcript.pdf.

[58] See paragraph 1 of AU sec. 411, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles.*

audit under the Board's existing standards. Those standards currently require the auditor to perform various procedures to provide a foundation for the auditor's significant judgments and conclusions on which the auditor's opinion on the financial statements is based. The audit procedures applied throughout the audit are based primarily upon an auditor's identification of, assessment of, and response to the risk of material misstatement. The proposed auditor reporting standard would result in the auditor reporting on the most difficult and challenging aspects of the audit. The proposed auditor reporting standard does not impose new audit performance requirements, other than the determination, communication, and documentation of critical audit matters.

Because critical audit matters ordinarily are matters of such importance, they would be included in the matters required to be (1) documented in the engagement completion document under Auditing Standard No. 3, *Audit Documentation*; (2) reviewed by the engagement quality reviewer under Auditing Standard No. 7, *Engagement Quality Review*; (3) communicated to the audit committee under Auditing Standard No. 16, *Communications with Audit Committees* or other PCAOB standards; or (4) any combination of the three. The auditor's documentation and activities under these standards could provide the auditor with sources for identifying critical audit matters. However, the Board would not expect that each matter included in any one or more of these sources would be a critical audit matter.

The auditor's determination and communication of critical audit matters is not intended to take the place of the auditor's existing responsibilities under other audit performance and reporting standards. For example, the auditor's responsibilities associated with the auditor's consideration of an entity's ability to continue as a going concern and the related reporting requirements,[59/] and the auditor's communication of control deficiencies related to an audit of internal control over financial reporting that is integrated with an audit of financial statements or an audit of financial statements only,[60/] among other audit performance and/or reporting requirements, continue to exist unchanged. In addition, the communication of critical audit matters is not intended to function as an alternative to a departure from an unqualified opinion on the financial statements in difficult or challenging situations.

---

[59/] See AU sec. 341, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern,* and paragraph 15.a. of the proposed auditor reporting standard, which is being retained from the existing standard (AU sec. 508.11.b).

[60/] See Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, and AU sec. 325, *Communications About Control Deficiencies in an Audit of Financial Statements.*

Although the proposed auditor reporting standard is intended to leverage the work the auditor already performed when conducting an audit under the Board's existing standards, it could increase the auditor's focus on critical audit matters, which could result in enhancing the quality of the audit. Previous research has found that auditors increase audit hours and/or billing rates in response to audit risks.[61/] Although an increase in audit hours and/or billing rates likely would increase audit fees, an increase in focus on critical audit matters could also result in increased audit quality.[62/]

In determining critical audit matters under the proposed auditor reporting standard, auditors likely would incur recurring costs due to additional effort expended in individual audits. It is likely that senior members of the engagement teams, such as partners and senior managers, would be involved with determining the critical audit matters to be communicated in the auditor's report. In addition, reviews by others, such as the engagement quality reviewer and national office could also result in recurring costs.[63/]

*2. Factors (Paragraph 9 of the Proposed Auditor Reporting Standard)*

The proposed auditor reporting standard includes a list of factors intended to help the auditor determine, from the results of the audit or evidence obtained, which matters in the audit would meet the definition of critical audit matters. Depending on the matter and its circumstances, the applicability and related degree or scope of just one factor might lead an auditor to conclude that a matter is a critical audit matter. In other cases, however, the auditor might take into consideration a combination of factors in determining that a matter is a critical audit matter.

See also Mark F. Zimbleman, *The Effects of SAS No. 82 on Auditors' Attention to Fraud Risk Factors and Audit Planning Decisions*, 35 Journal of Accounting Research 75, 75-97 (1997).

[62/] See Gerald Lobo and Yuping Zhao, *Relation Between Audit Effort and Financial Report Misstatements: Evidence from Quarterly and Annual Restatements*, 88 The Accounting Review 1385,1385-1412 (2013).

[63/] See also Section V.F., *Other Considerations for Critical Audit Matters,* of this Appendix for a more detailed discussion regarding costs associated with the requirements for critical audit matters under the proposed auditor reporting standard.

In addition, the factors in the proposed auditor reporting standard are not intended to represent an all-inclusive list of factors pertaining to whether a matter meets the definition of a critical audit matter. There could be other factors that may be specific to the audit, which are not listed in the proposed auditor reporting standard, that affect whether a matter involved the most difficult, subjective, or complex auditor judgments, posed the most difficulty to the auditor in obtaining sufficient appropriate evidence, or posed the most difficulty to the auditor in forming an opinion on the financial statements.

The factors listed in the proposed auditor reporting standard are:

a. The degree of subjectivity involved in determining or applying audit procedures to address the matter or in evaluating the results of those procedures (paragraph 9.a. of the proposed auditor reporting standard)

A high degree of subjectivity may be involved in auditing matters that are complex or unusual, or both. For example, the arrangements pursuant to which a company recognizes revenue might be complex and require significant judgments regarding the development of estimates, such as the fair value of certain deliverables pursuant to a multiple element sales contract. In this example, determining or applying the appropriate audit procedures to test management's fair value measurements, or to evaluate whether management's estimates are reasonable, might involve one of the most subjective auditor judgments during the audit.

b. The nature and extent of audit effort required to address the matter (paragraph 9.b. of the proposed auditor reporting standard)

The nature and extent of audit effort relates to the time spent by the engagement team members performing the audit procedures; the level of knowledge, skill, and ability of engagement team members necessary to audit the matter;[64/] the extent of supervision needed based on the assessed risks of material misstatements;[65/] and the extent of discussions with management or within the firm,[66/] such as the firm's national office, or consultations outside the firm.

---

[64/] See paragraph 6.d. of Auditing Standard No. 10, *Supervision of the Audit Engagement*.

[65/] See paragraph 5.b. of Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*.

[66/] See paragraph 19 of QC sec. 20, *System of Quality Control for a CPA Firm's Accounting and Auditing Practice*.

An area that requires extensive audit effort might be an indicator that the matter was among the most difficult during the audit or required a significant amount of judgment. Matters that required extensive audit effort could include the significant involvement of more experienced engagement team members or an increase in the amount of time incurred in (1) supervising the auditing of the matter; (2) discussing the matter with management and the audit committee; or (3) consulting with the firm's national office about the matter.

c. The nature and amount of available relevant and reliable evidence regarding the matter or the degree of difficulty in obtaining such evidence (paragraph 9.c. of the proposed auditor reporting standard)

The sufficiency and appropriateness of the audit evidence obtained to support the matter, such as when the auditor identifies contrary evidence, might contribute to the degree of difficulty in applying audit procedures to address the matter.

Delays by management, the unavailability of company personnel, or unwillingness by management to provide information needed for the auditor to perform his or her audit procedures also could create challenges associated with obtaining relevant and reliable audit evidence.[67/]

d. The severity of control deficiencies identified relevant to the matter, if any (paragraph 9.d. of the proposed auditor reporting standard)

In both an audit of the financial statements and an audit of internal control over financial reporting that is integrated with an audit of financial statements, the auditor is required to obtain a sufficient understanding of internal control over financial reporting.[68/] In an integrated audit, the auditor would be required to audit the effectiveness of internal control over financial reporting.[69/] And in a financial statement audit, the auditor would be required to reach an understanding of the internal control over financial reporting and the company's control activities sufficient to assess the risk

---

[67/] Difficulties encountered by the auditor during the audit could represent a scope limitation, which may result in the auditor modifying the auditor's opinion or withdrawing from the engagement. See AU secs. 508.22-.32.

[68/] See paragraphs 18-40 of Auditing Standard No. 12.

[69/] See paragraph 1 of Auditing Standard No. 5.

of material misstatement in the financial statements and to design further audit procedures.[70/]

Because a deficiency or deficiencies in the company's internal control over financial reporting could have a significant effect on the conduct of the audit and on the level of difficulty in gathering audit evidence or forming an opinion on the financial statements, an internal control deficiency might be an indicator of a critical audit matter.

Although an auditor might determine a matter to be a critical audit matter because of the severity of an internal control deficiency, the communication of such a critical audit matter would not relieve the auditor from the auditor's existing auditing and reporting responsibilities under other PCAOB standards related to a company's internal control over financial reporting.[71/] This factor is intended to help the auditor determine which matters are critical audit matters and is not intended to supplement, replace, or create new audit requirements for matters related to internal control over financial reporting.

e. The degree to which the results of audit procedures to address the matter resulted in changes in the auditor's risk assessments, including risks that were not identified previously, or required changes to planned audit procedures, if any (paragraph 9.e. of the proposed auditor reporting standard)

The Board's risk assessment standards require the auditor to modify, among other things, the audit strategy, materiality levels, and the assessment of the risks of material misstatement if circumstances change during the course of the audit. Such changes could result from the discovery of a previously unidentified risk of material misstatement or audit evidence that contradicts the auditor's initial risk assessment. Also, the number of misstatements found by the auditor might be indicative that other misstatements might exist.

Since a matter that resulted in changes to the planned audit strategy or to changes to the risks initially identified could involve significant auditor judgment, it might be a critical audit matter.

---

70/ See paragraph 34 of Auditing Standard No. 12.

71/ See Auditing Standard No. 5, Auditing Standard No. 12, and AU sec. 325.

f. The nature and significance, quantitatively or qualitatively, of corrected and accumulated uncorrected misstatements related to the matter, if any (paragraph 9.f. of the proposed auditor reporting standard)

In forming an opinion on whether the financial statements are presented fairly, in all material respects, in conformity with the applicable financial reporting framework, the auditor's evaluation of audit results should include an evaluation of misstatements accumulated during the audit, including uncorrected misstatements.[72/] Misstatements can arise from error (that is, unintentional misstatement) or fraud.[73/]

A matter in which misstatements, either corrected or uncorrected, have been identified might lead the auditor to conclude that the matter is a critical audit matter.

g. The extent of specialized skill or knowledge needed to apply audit procedures to address the matter or evaluate the results of those procedures, if any (paragraph 9.g. of the proposed auditor reporting standard)

In auditing matters that are complex or subjective, the auditor may determine that using the work of a specialist to obtain sufficient appropriate evidence is necessary. For example, specialized skill or knowledge might be needed by the auditor in areas such as the valuation of complex financial instruments, determination of mineral reserves, actuarial determinations, or interpretation of technical requirements.

An auditor's determination that a matter required specialized skill or knowledge to obtain sufficient appropriate evidence might be an indication that the matter involved difficult, subjective, or complex auditor judgments. In such situations, the matter might be a critical audit matter.

h. The nature of consultations outside the engagement team regarding the matter, if any (paragraph 9.h. of the proposed auditor reporting standard)

Issues that are complex or unusual can arise in various stages during the audit. In such situations, the auditor might consult with the firm's national office, industry specialists, or external parties. For example, matters related to the auditor's evaluation of management's judgments, estimates, or accounting policies might lead to

---

[72/] See paragraphs 3-4 and 10-23 of Auditing Standard No. 14, *Evaluating Audit Results*.

[73/] See paragraph A2 of Auditing Standard No. 14.

consultation with others who might assist the auditor in arriving at the conclusions on which the auditor's opinion is based. Such matters might involve the most subjective or complex auditor judgments during the audit or might pose the most difficulty in forming an opinion on the financial statements. Consultation with others on a particular matter, therefore, might be an indication that the matter is a critical audit matter.

## C. Audit Period Covered by Critical Audit Matters (Paragraph 10 of the Proposed Auditor Reporting Standard)

The proposed auditor reporting standard would require the auditor to communicate critical audit matters for the audit of the current period's financial statements. While most companies' financial statements are presented on a comparative basis, and thus most audit reports cover a similar period, requiring auditors to communicate critical audit matters for the current period, rather than for all periods presented in the financial statements, would provide relevant information about the most recent audit and is intended to reflect a cost-sensitive approach to auditor reporting. In addition, investors and other financial statement users would be able to look at prior years' filings to analyze critical audit matters over time.

Because the communication of critical audit matters for prior periods also might be useful to investors and other financial statement users, the proposed auditor reporting standard states that, when the current period financial statements are presented on a comparative basis with those of one or more prior periods, the auditor should consider communicating critical audit matters relating to the prior periods when (1) the prior period's financial statements are made public for the first time, such as in an initial public offering or (2) issuing an auditor's report on the prior period's financial statements because the previously issued auditor's report could no longer be relied upon.

In situations in which a predecessor auditor has been asked to reissue his or her audit report on the financial statements of a prior period, existing standards require the auditor to consider whether the auditor's report on those statements is still appropriate after certain required procedures are performed.[74/] If the predecessor auditor determines that the auditor's report is still appropriate and is reissued, the communication of critical audit matters for the prior period need not be repeated. Since the communication of critical audit matters is only required for one year, the proposed auditor reporting standard would not require the communication of critical audit matters in the reissued report of the predecessor auditor for prior years.

---

[74/] See AU secs. 508.70-.73, which discusses the report of a predecessor auditor.

## D. Communication in the Auditor's Report of Critical Audit Matters (Paragraphs 11 – 13 of the Proposed Auditor Reporting Standard)

The proposed auditor reporting standard would require that, for each critical audit matter communicated in the auditor's report, the auditor (1) identify the critical audit matter; (2) describe the considerations that led the auditor to determine that the matter is a critical audit matter; and (3) refer to the relevant financial statement accounts and disclosures that relate to the critical audit matter, when applicable.

The Board expects that the auditor's communication of critical audit matters in the auditor's report would be presented in language and in a format that is clear, concise, and understandable to a financial statement user. The Board also expects that the communication would be tailored to the audit and thus would avoid boilerplate language and reflect the specific circumstances of the matter in relation to the audit of the company's financial statements. While the same audit matter may be determined to be a critical audit matter from one year to the next or from one audit to another, the auditor would be expected to tailor the communication of the critical audit matter to the specific facts and circumstances that existed during that particular current period's audit.

As noted previously, the auditor's communication of critical audit matters does not alter in any way the auditor's opinion on the financial statements taken as a whole. Accordingly, the proposed auditor reporting standard indicates that the auditor should not use language in the auditor's report that could be viewed as disclaiming, qualifying, restricting, or minimizing the auditor's responsibility for the critical audit matters or the auditor's opinion on the financial statements. In issuing an unqualified opinion on the financial statements, the auditor has a responsibility to plan and perform the audit to obtain reasonable assurance that the financial statements, taken as a whole, are fairly presented in all material respects. Critical audit matters in the auditor's report are matters that have been addressed by the auditor and, therefore, should not be described to imply that a critical audit matter disclaims or qualifies the auditor's opinion on the financial statements.

The following discussion presents the proposed elements of the communication in the auditor's report relative to critical audit matters in more detail.

### *1. Identify the Critical Audit Matter (Paragraph 11.a. of the Proposed Auditor Reporting Standard)*

In communicating the critical audit matter, the auditor would identify each audit matter that the auditor determined met the definition of a critical audit matter. For example, the audit of the valuation of certain complex financial instruments could be identified as a critical audit matter in the auditor's report because the matter posed the most difficulty to the auditor in obtaining sufficient appropriate evidence.

*2. Describe the Considerations That Led the Auditor to Determine That the Matter is a Critical Audit Matter (Paragraph 11.b. of the Proposed Auditor Reporting Standard)*

To enhance investors' and other financial statement users' understanding of the audit, the proposed auditor reporting standard would require the auditor to describe the considerations that led the auditor to determine that the matter is a critical audit matter. The description of considerations that led the auditor to determine a matter is a critical audit matter may be derived from one or more of the factors; however, the auditor would not be limited to the factors listed in the proposed auditor reporting standard, which also could include other factors specific to the audit. Additionally, the auditor's description should be specific to the circumstances. For instance, using the same example from above regarding certain complex financial instruments that are identified as a critical audit matter, the communication in the auditor's report might describe the auditor's considerations related to the lack of observable inputs, a high degree of measurement uncertainty, and significant judgments needed to audit the fair value assumptions. Further, when communicating critical audit matters in the auditor's report, the proposed auditor reporting standard would not require the auditor to describe the audit procedures related to critical audit matters. It would, however, not preclude an auditor from doing so.

*3. Refer to the Relevant Financial Statement Accounts and Disclosures That Relate to the Critical Audit Matter, When Applicable (Paragraph 11.c. of the Proposed Auditor Reporting Standard)*

The proposed auditor reporting standard also would require the auditor to refer to the relevant financial statement accounts and disclosures that relate to the critical audit matter, when applicable. Since the audit is of the company's financial statements, the auditor would be able to refer to the relevant financial statement accounts and disclosures in most cases. Following through on the example from above in which the critical audit matter was the valuation of certain complex financial instruments, the auditor would refer to the relevant financial statement account for financial instruments and the corresponding disclosure.

There also may be instances when a critical audit matter has a pervasive effect on the financial statements, such as an entity level control deficiency or circumstances in which there is no related financial statement account or disclosure. In such cases, the auditor would describe the matter and its effect on the audit of the financial statements, taken as a whole.

With regard to each of the proposed elements of the communication in the auditor's report, developing the language of critical audit matters to include in the auditor's report likely would result in additional recurring costs related to individual audits. These recurring costs likely would include additional time incurred by senior members of engagement teams, such as partners and senior managers. In addition, other recurring costs might relate to additional time incurred by others, such as the engagement quality reviewer and consultations with others, including national office. Further, additional time also might be incurred by the auditor as a result of discussions with management or the audit committee regarding the critical audit matters to be communicated in the auditor's report under the proposed auditor reporting standard.[75/]

*4. Illustrative Examples of Critical Audit Matters*

The Exhibit to this Appendix includes illustrative examples of communications of critical audit matters in the auditor's report. The Board has developed three different scenarios that contain background information, the company's related notes to the financial statements, determination of the critical audit matter, and the communication of the critical audit matter as it would appear in the auditor's report.[76/]

The Board is interested in obtaining other illustrative examples of communications of critical audit matters under the proposed auditor reporting standard. Thus, the Board is requesting that commenters prepare examples of communications of critical audit matters that could appear in an auditor's report under the proposed auditor reporting standard and provide those examples to the Board.[77/]

*5. Language Preceding Critical Audit Matters (Paragraphs 12 and 13 of the Proposed Auditor Reporting Standard)*

The proposed auditor reporting standard would require the auditor to include a section titled "Critical Audit Matters" and include specific language in the auditor's report both when critical audit matters are being communicated and when the auditor has determined that there are no critical audit matters to communicate. In both situations,

---

[75/] See also Section V.F., *Other Considerations for Critical Audit Matters,* of this Appendix for a more detailed discussion regarding costs associated with the requirements for critical audit matters under the proposed auditor reporting standard.

[76/] The examples contained in the Exhibit to this Appendix are based on hypothetical situations and have been prepared for illustrative purposes only. They are not intended to provide guidance or any suggestions regarding the accounting or disclosure required, nor any implied audit procedures, in the circumstances presented.

[77/] Any such examples would be posted to the PCAOB Rulemaking Docket Matter No. 034 without edits or redactions.

the language in the auditor's report is intended to inform investors and other financial statement users of the auditor's requirement to communicate critical audit matters and whether the auditor has determined there are any critical audit matters.

When the auditor determines that there are critical audit matters, the specific language for such situations notifies investors and other financial statement users that the auditor's communication of critical audit matters is not intended to affect the auditor's opinion on the financial statements and related disclosures, taken as a whole, and therefore, does not represent individual opinions for each critical audit matter.

In situations in which the auditor determines that there are no critical audit matters, the proposed specific language in the auditor's report would describe the auditor's responsibilities and indicate that the auditor determined that there are no critical audit matters.

## E. Documentation of Critical Audit Matters (Paragraph 14 of the Proposed Auditor Reporting Standard)

The proposed auditor reporting standard requires the auditor to document the auditor's determination of critical audit matters and refers the auditor to the documentation requirements for audits conducted under PCAOB standards (that is, Auditing Standard No. 3). To provide sufficient detail for a clear understanding of the conclusions reached by the auditor, the auditor's documentation related to critical audit matters should contain sufficient information to enable an experienced auditor,[78/] having no previous connection with the engagement, to understand the basis for the auditor's determination that (1) each reported matter was a critical audit matter and (2) non-reported audit matters that would appear to meet the definition of a critical audit matter were not critical audit matters.

As noted previously, in determining critical audit matters, the proposed auditor reporting standard anticipates that auditors would leverage the audit work already performed under existing auditing standards. This includes the information documented in the engagement completion document, matters reviewed by the engagement quality reviewer, or matters communicated to the audit committee. The auditor's documentation and activities under existing standards could provide the auditor with sources for identifying critical audit matters.

---

[78/] See note to paragraph 6 of Auditing Standard No. 3, which states that "[a]n *experienced auditor* has a reasonable understanding of audit activities and has studied the company's industry as well as the accounting and auditing issues relevant to the industry."

In fulfilling the documentation requirements under the proposed auditor reporting standard, the auditor would not be expected to provide an explanation for each matter documented in the engagement completion document, reviewed by the engagement quality reviewer, or communicated to the audit committee. The Board recognizes that documenting whether each such matter was a critical audit matter could result in an extensive amount of documentation that might be unnecessary. Accordingly, the auditor would be expected to document only those matters that were either communicated as critical audit matters or that would appear to meet the definition of a critical audit matter that were not communicated as such in the auditor's report.

*1. Audit Matters Reported as Critical Audit Matters*

As noted previously, the documentation of those matters the auditor communicated as critical audit matters would be required to meet the documentation requirements of Auditing Standard No. 3. That standard requires an auditor to prepare audit documentation that is in sufficient detail to provide a clear understanding of its purpose, source, and the conclusions reached.[79/] In addition, Auditing Standard No. 3 requires that audit documentation contain sufficient information to enable an experienced auditor, having no previous connection with the engagement, to understand the conclusions reached.[80/]

*2. Audit Matters Not Reported as Critical Audit Matters*

The Board is proposing a documentation requirement that is intended to encourage auditors to consider in a thoughtful and careful manner whether all matters that meet the definition of a critical audit matter are communicated in the auditor's report. The proposed auditor reporting standard would require the auditor to document why audit matters that would appear to meet the definition of a critical audit matter were not communicated as such by the auditor in the auditor's report.

Additionally, the Board is proposing this requirement to help the auditor and other reviewers, such as the engagement quality reviewer, have a better understanding of the basis for the auditor's determination of matters that would appear to meet the definition of a critical audit matter and were not communicated. Further, requiring documentation of the auditor's determination of such matters not communicated might have the indirect effect of preventing the omission of a critical audit matter due to potential management pressure to exclude the matter from the auditor's report.

---

[79/] See paragraph 2 of Auditing Standard No. 3.

[80/] See paragraph 6 of Auditing Standard No. 3.

The proposed documentation requirement of why audit matters that would appear to meet the definition of a critical audit matter were not communicated by the auditor in the auditor's report would reflect the requirements of Auditing Standard No. 3. For instance, if a matter was included in the engagement completion document, reviewed by the engagement quality reviewer, and communicated to the audit committee, it could appear to an experienced auditor having no previous connection to the audit, after also considering the factors in paragraph 9 of the proposed auditor reporting standard, that the matter met the definition of a critical audit matter. If the auditor determined that such a matter was not a critical audit matter, then the auditor would document the basis for the determination in the auditor's working papers with sufficient detail to explain the basis of the conclusions reached.

The auditor's documentation of critical audit matters under the proposed auditor reporting standard likely would result in additional recurring costs to the firm due to efforts expended in individual audits. These recurring costs likely would include additional time incurred to prepare documentation in sufficient detail to address the proposed requirements. This also might include additional review time incurred by others, such as senior members of the engagement team or the engagement quality reviewer.

## F. Other Considerations for Critical Audit Matters

Enhancing auditor reporting requirements necessarily will involve changes in practice, related cost implications and other challenges. Discussed below are potential economic considerations that might be relevant to auditors and companies, including audit committees. Also, discussed below are potential effects of disclosing information through the communication of a critical audit matter that otherwise would not be required to be disclosed under existing auditor or financial reporting standards, and liability considerations for auditors.

### *1. Effects of Additional Effort by Auditors and Companies, Including Audit Committees*

Based on its outreach to date, the Board anticipates that the communication of critical audit matters likely would have potential cost implications for auditors and companies, including their audit committees. Such costs would include those related to additional time to prepare and review auditors' reports.

*Auditors*

For auditors, costs might represent both one-time costs and recurring costs. The recurring costs for auditors regarding critical audit matters under the proposed auditor reporting standard have been discussed previously.[81] The one-time costs for auditors could be incurred as a result of (1) updating firm audit and quality control methodologies to reflect the new reporting requirements and (2) developing and conducting training of firm personnel on the new reporting requirements. When updating methodologies, some firms also likely would develop new quality control processes related to additional review or consultation on the determination, communication, and documentation of critical audit matters in the draft auditor's report, which also would result in incremental one-time costs.

*Companies, Including Audit Committees*

Companies, including audit committees, could incur additional recurring costs as a result of the proposed auditor reporting standard. For instance, audit fees may increase due to the new reporting requirements in the Board's proposal. Additionally, companies might incur one-time costs in developing, and recurring costs in performing, internal processes for the review of critical audit matters in the draft auditor's report and the related interaction with auditors and others.

Audit committees might also incur additional time for the review of critical audit matters to be communicated in the auditor's report and related discussions with the auditor and management.

Companies, including audit committees, also could spend additional time comparing their auditor's report to the auditors' reports of similar companies. Even though comparability regarding the pass/fail model will continue to be maintained, the communication of critical audit matters in the auditor's report that is specific to the audit of the company's current period financial statements would make the auditor's report less comparable among companies.

The communication of critical audit matters would result in differences among auditors' reports. For instance, the communication of critical audit matters is intended to

---

[81] See Sections V.B., *Determination of Critical Audit Matters;* V.D., *Communication in the Auditor's Report of Critical Audit Matters;* and V.E., *Documentation of Critical Audit Matters,* of this Appendix for discussion of recurring costs.

be tailored to the audit of the company; therefore, auditors' reports are not expected to be comparable from one auditor's report to the next. Such differences would relate to the auditor's determination of the matters that involved difficult judgments and difficulty in obtaining evidence or forming the opinion for a company based on that audit's particular facts and circumstances.

Company management and the audit committee might be concerned with the differences in auditors' reports because of investors' and other users' perceptions of the potential differences between the company's current period critical audit matters and those of prior periods or those of the company's competitors. However, investors have commented that they are interested in information that is specific to the audit of a company's financial statements, and therefore, would expect differences in auditors' reports among companies and reporting periods. Investors also have indicated that they are accustomed to analyzing company-specific information, such as information in financial statements or Management's Discussion & Analysis ("MD&A") that is specific to a company or a reporting period.

*2. Potential Effects of Disclosing Information that Otherwise Would Not be Required to be Disclosed*

The proposed auditor reporting standard would require the auditor to describe in the auditor's report the considerations that led the auditor to determine that the matter is a critical audit matter, in addition to identifying the matter and referencing the matter to the relevant financial statement accounts and disclosures, when applicable. The description of the considerations regarding the critical audit matter could include information about the audit or the financial statements that otherwise would not be required to be disclosed by either the auditor or the company under existing auditor reporting standards or requirements of the applicable financial reporting framework.

For example, under the proposed auditor reporting standard, the auditor could determine that a matter met the definition of a critical audit matter because it involved the most difficult, subjective, or complex auditor judgments, and, therefore, would be communicated as a critical audit matter in the auditor's report. However, under existing auditor reporting standards or requirements of the applicable financial reporting framework, such matter would not otherwise be required to be disclosed. Examples of such occurrences that might result in the communication of a critical audit matter could include situations involving (1) a deficiency in internal control over financial reporting that was not otherwise determined to be a material weakness and therefore, not required to be disclosed by management or the auditor; (2) a difficult decision by the auditor regarding a company's ability to continue as a going concern even though the auditor's ultimate decision was that substantial doubt did not exist, and therefore, did not require reporting by the auditor; or (3) a loss contingency, for which there was significant difficulty in obtaining audit evidence but that ultimately was decided by management and the auditor to not warrant disclosure by the company in the financial statements under existing financial reporting standards.

Although the Board is not seeking to constrain the information the auditor would communicate for critical audit matters under its proposal,[82/] it is seeking comments on whether there are potential issues raised by the auditor's reporting of information to investors as a result of communicating critical audit matters that otherwise would not have required disclosure under existing auditor and financial reporting standards.

*3. Liability Considerations*

Some commenters expressed concern that changes to the auditor's reporting model could result in increased liability for auditors and issuers. Liability may be imposed on auditors and issuers (as well as other securities market participants) under a number of different legal theories, depending on the specific facts and circumstances of a particular case, including pursuant to Section 11 of the Securities Act of 1933, Section 10(b) of the Exchange Act, as well as various state law causes of action. In discussing their concerns regarding potential liability, a number of commenters raised particular aspects of the Board's concept release that they viewed as troublesome from a liability perspective. For example, some commenters were critical of the auditor providing a supplement to the auditor's report containing an open-ended analysis or a discussion that could result in the auditor providing new information regarding the company, independent of the company's own disclosures in its financial statements. Further, other commenters, while recognizing potential liability concerns, suggested that the Board take a balanced approach in its rulemaking related to changes to the auditor's report.

In developing its proposal for communication of critical audit matters, the Board has sought a balanced approach that would promote more informative reporting about the audit (1) in a focused way and (2) that would not fundamentally change the auditor's current role of attesting on information prepared by management. Under the proposed auditor reporting standard, the auditor would be communicating information about the audit, based on audit procedures the auditor performed. The proposed auditor reporting

---

[82/] However, the proposed auditor reporting standard would provide that auditors should not use language that can be viewed as disclaiming, qualifying, restricting, or minimizing the auditor's responsibility for critical audit matters or the opinion on the financial statements. See further discussion regarding language in the auditor's communication of critical audit matters in Section V.D., *Communication in the Auditor's Report of Critical Audit Matters,* of this Appendix.

standard regarding critical audit matters would be guided by criteria and factors, rather than a separate free-form analysis. However, the determination of critical audit matters and the nature and extent of the communication in the auditor's report would be guided by the auditor's judgment, and the Board is not seeking to constrain the information the auditor would communicate for critical audit matters.[83/] The auditor's communication of critical audit matters would represent matters that have been addressed by the auditor in forming the opinion on the financial statements and is not intended to detract from, disclaim, or qualify the auditor's opinion.

The Board recognizes, however, that under its proposal, the auditor would be making new statements in the auditor's report that could raise potential liability concerns.

Questions Related to Section V:

10. Would the auditor's communication of critical audit matters be relevant and useful to investors and other financial statement users? If not, what other alternatives should the Board consider?

11. What benefits or unintended consequences would be associated with the auditor's communication of critical audit matters?

12. Is the definition of a critical audit matter sufficient for purposes of achieving the objectives of providing relevant and useful information to investors and other financial statement users in the auditor's report? Is the definition of a critical audit matter sufficiently clear for determining what would be a critical audit matter? Is the use of the word "most" understood as it relates to the definition of critical audit matters?

13. Could the additional time incurred regarding critical audit matters have an effect on the quality of the audit of the financial statements? What kind of an effect on quality of the audit can it have?

14. Are the proposed requirements regarding the auditor's determination and communication of critical audit matters sufficiently clear in the proposed standard? Why or why not? If not, how should the proposed requirements be revised?

---

83/ Id.

15. Would including the audit procedures performed, including resolution of the critical audit matter, in the communication of critical audit matters in the auditor's report be informative and useful? Why or why not?

16. Are the factors helpful in assisting the auditor in determining which matters in the audit would be critical audit matters? Why or why not?

17. Are there other factors that the Board should consider adding to assist the auditor in determining which matters in the audit would be critical audit matters? Why or why not?

18. Is the proposed requirement regarding the auditor's documentation of critical audit matters sufficiently clear?

19. Does the proposed documentation requirement for non-reported audit matters that would appear to meet the definition of a critical audit matter achieve the Board's intent of encouraging auditors to consider in a thoughtful and careful manner whether audit matters are critical audit matters? If not, what changes should the Board make to the proposed documentation requirement to achieve the Board's intent?

20. Is the proposed documentation requirement sufficient or is a broader documentation requirement needed?

21. What are the additional costs, including indirect costs, or other considerations related to the auditor's determination, communication, and documentation of critical audit matters that the Board should take into account? Are these costs or other considerations the same for all types of audits?

22. What are the additional costs, including indirect costs, or other considerations for companies, including their audit committees, related to critical audit matters that the Board should take into account? Are these costs or other considerations the same for audits of both large and small companies?

23. How will audit fees be affected by the requirement to determine, communicate, and document critical audit matters under the proposed auditor reporting standard?

24. Are there specific circumstances in which the auditor should be required to communicate critical audit matters for each period presented, such as in an initial public offering or in a situation involving the issuance of an

auditor's report on a prior period financial statement because the previously issued auditor's report could no longer be relied upon? If so, under what circumstances?

25. Do the illustrative examples in the Exhibit to this Appendix provide useful and relevant information of critical audit matters and at an appropriate level of detail? Why or why not?

26. What challenges might be associated with the comparability of audit reports containing critical audit matters? Are these challenges the same for audits of all types of companies? If not, please explain how they might differ.

27. What benefits or unintended consequences would be associated with requiring auditors to communicate critical audit matters that could result in disclosing information that otherwise would not have required disclosure under existing auditor and financial reporting standards, such as the examples in this Appendix, possible illegal acts, or resolved disagreements with management? Are there other examples of such matters? If there are unintended consequences, what changes could the Board make to overcome them?

28. What effect, if any, would the auditor's communication of critical audit matters under the proposed auditor reporting standard have on an auditor's potential liability in private litigation? Would this communication lead to an unwarranted increase in private liability? Are there other aspects of the proposed auditor reporting standard that could affect an auditor's potential liability in private litigation? Are there steps the Board could or should take to mitigate the likelihood of increasing an auditor's potential liability in private litigation?

## VI. Explanatory Language (Paragraphs 15 – 16 of the Proposed Auditor Reporting Standard)

Under existing PCAOB standards certain circumstances require that the auditor add explanatory language (or an explanatory paragraph) to the auditor's report. The proposed auditor reporting standard references those circumstances. Additionally, the auditor may add an explanatory paragraph to the auditor's report to emphasize a matter in the financial statements.[84/] This type of explanatory paragraph is not required by the

[84/] AU sec. 508.19 describes these types of explanatory paragraphs as "emphasis of a matter paragraphs" or "emphasis paragraphs."

proposed auditor reporting standard or other PCAOB standards. Explanatory language is added to the auditor's report to provide information about the financial statements or the audit without affecting the auditor's opinion on the financial statements. This approach is retained from existing AU sec. 508.[85/]

## A. Explanatory Language Required by Other PCAOB Standards (Paragraph 15 of the Proposed Auditor Reporting Standard)

The proposed auditor reporting standard, similar to existing AU sec. 508,[86/] provides a list of circumstances in which the auditor is required to add explanatory language to the auditor's report and provides references to other PCAOB standards in which these circumstances and related reporting requirements are described. In certain circumstances, the auditor might communicate this information in a separate paragraph, called an explanatory paragraph.

The circumstances under which the auditor is required to add an explanatory language would occur, for example, when there is substantial doubt about the company's ability to continue as a going concern,[87/] when the auditor's opinion is based in part on the report of another auditor and the auditor decides to refer to that report,[88/] or when there has been a material change between periods in accounting principles or in the method of their application.[89/] The list of circumstances that require explanatory language can serve as a single reference source for auditors regarding when explanatory language is required in the auditor's report.

The proposed requirement to communicate critical audit matters does not alter the existing requirements to add explanatory language. However, a matter that requires explanatory language, such as a restatement, also might be a matter that involved the most difficult judgments or posed the most difficulty to the auditor in forming the opinion. Therefore, the same matter – the restatement in this case – would require an explanatory paragraph in the auditor's report in accordance with Auditing Standard No.

---

[85/] See existing AU secs. 508.11 and .19.

[86/] See existing AU sec. 508.11.

[87/] See AU sec. 341.

[88/] See AU sec. 543, *Part of Audit Performed by Other Independent Auditors*.

[89/] See Auditing Standard No. 6, *Evaluating Consistency of Financial Statements*.

6 and also would be communicated as a critical audit matter in accordance with the proposed auditor reporting standard. The auditor may include a cross-reference in the auditor's report as appropriate.

Further, recent academic literature finds that companies that receive unqualified audit reports containing explanatory language as described in AU sec. 508, such as a change between periods in accounting principles,[90/] are more likely to subsequently restate their financial statements.[91/] More specifically, the study states that audit reports with explanatory language could indicate a heightened risk of financial statement misstatement and that standard setters should be cautious to not require additional reporting without considering the potential of diluting information provided by currently required explanatory language in auditor reports.[92/] The proposed auditor reporting standard retains the provisions of AU sec. 508 with respect to explanatory language, such as a change between periods in accounting principles and stipulates that the communication of critical audit matters would be in addition to any explanatory language included in the auditor's report. Accordingly, the communication of critical audit matters is not intended to dilute the information that would be provided by the required explanatory language but would provide more information about the audit that might also be informative to investors and other financial statement users.

## B. Paragraphs to Emphasize a Matter Regarding the Financial Statements (Paragraph 16 of the Proposed Auditor Reporting Standard)

The proposed auditor reporting standard retains from AU sec. 508 the ability for the auditor to add an explanatory paragraph to the auditor's report to emphasize a matter in the financial statements. Such explanatory paragraphs are currently used by auditors to emphasize (1) accounting matters, other than those involving a change in accounting principles, affecting the comparability of the financial statements and (2) other matters, such as the use of an accounting framework other than U.S. GAAP,

---

[90/] Id.

[91/] See Keith Czerney, Jaime J. Schmidt, and Anne M. Thompson, *Does Auditor 'Commentary' in Unqualified Audit Reports Reflect Financial Misstatement Risk?* Unpublished working paper (2013), available at http://papers.ssrn.com/sol3/papers.cfm?abstract_id=2245855.

[92/] Id.

litigation or regulatory matters, and certain fair value matters.[93/] Generally, an explanatory paragraph that emphasizes a matter in the financial statements points to a disclosure in the company's financial statements that discloses the matter without providing any further information.

Consistent with existing AU sec. 508, the proposed standard would not require the auditor to emphasize a matter but permits the auditor to add such explanatory paragraphs when the auditor determines that a matter presented or disclosed in the financial statements would be important to a user's understanding of the financial statements, such as a significant subsequent event.

The proposed requirement to communicate critical audit matters does not alter the auditor's ability to add an explanatory paragraph to the auditor's report to emphasize a matter in the financial statements. The auditor's communication of a critical audit matter may provide more information about the auditing aspect of the matter emphasized in the auditor's report.

Existing AU sec. 508 provides examples of matters the auditor may emphasize in the auditor's report.[94/] The proposed auditor reporting standard similarly provides a list of examples, which have been retained or enhanced from existing AU sec. 508, incorporates an additional example from the existing PCAOB standard,[95/] and adds new examples. While examples of potential matters that the auditor may emphasize in the auditor's report are provided in the proposed auditor reporting standard, the auditor also may decide to emphasize other matters in the financial statements if the auditor determines it is appropriate to do so.

<u>Questions Related to Section VI</u>:

29. Is it appropriate for the Board to include the description of the circumstances that would require explanatory language (or an explanatory paragraph) with references to other PCAOB standards in the proposed auditor reporting standard?

---

93/ In the audit reports of approximately 7,000 issuers with fiscal year 2011 filings, PCAOB staff identified audit reports containing explanatory paragraphs to emphasize matters in the financial statements in approximately 4.5% of the filings.

94/ <u>See</u> existing AU sec. 508.19.

95/ <u>See</u> paragraph .18 of AU sec. 9410, *Adherence to Generally Accepted Accounting Principles: Auditing Interpretations of Section 410*.

30. Is retaining the auditor's ability to emphasize a matter in the financial statements valuable? Why or why not?

31. Should certain matters be required to be emphasized in the auditor's report rather than left to the auditor's discretion? If so, which matters? If not, why not?

32. Should additional examples of matters be added to the list of possible matters that might be emphasized in the auditor's report? If so, what matters and why?

## VII. Amendments to Other PCAOB Standards

The Board is proposing amendments to several of its existing auditing standards to conform to the proposed auditor reporting standard. Appendix 3 contains the proposed amendments to existing PCAOB auditing standards related to the proposed auditor reporting standard. Significant amendments are described below.

### A. Amendments to Auditing Standard No. 5

Auditing Standard No. 5 establishes requirements and provides direction when an auditor is engaged to perform an audit of management's assessment of the effectiveness of internal control over financial reporting that is integrated with an audit of the financial statements.

The Board is proposing to amend the auditor's report on internal control over financial reporting to include the following amendments to conform to the proposed auditor unqualified report:

- Conform certain required elements of the auditor's report on the audit of internal control over financial reporting[96/] to the auditor's report on the audit of the financial statements; and

- Amend the example combined report.[97/]

The proposed amendments to the required elements of the auditor's report on the audit of internal control over financial reporting, as well as to the example combined report, would require:

---

96/ See paragraph 85 of Auditing Standard No. 5.

97/ See paragraph 87 of Auditing Standard No. 5.

- The title, "Report of Independent Registered Public Accounting Firm" (this title is included in the example combined report in Auditing Standard No. 5; however, the existing requirement in Auditing Standard No. 5 only specifies that the title include the word "independent");

- Addressees that include, but are not necessarily limited to (1) investors in the company, such as shareholders, and (2) the board of directors or equivalent body;

- Name of the company whose internal control over financial reporting was audited;

- Statement that the auditor is a public accounting firm registered with the PCAOB and is required to be independent with respect to the company in accordance with the United States federal securities laws and the applicable rules and regulations of the SEC and the PCAOB; and

- Statement containing the year the auditor began serving consecutively as the company's auditor.

Since the statements regarding the auditor's requirement to be independent and the auditor tenure are included as the proposed basic elements of the auditor's unqualified report, they also might be useful to the users of the auditor's report on the audit of internal control over financial reporting.

Additionally, the example combined report in Auditing Standard No. 5 would include a section titled "The Auditor's Responsibilities Regarding Other Information" that includes the reporting requirements related to auditor's responsibilities regarding other information outside the audited financial statements and the results of the auditor's evaluation of the other information. In addition, the proposed auditor reporting standard states that if the auditor performs an audit of internal control over financial reporting that is integrated with an audit of the financial statements and chooses to issue a combined report, the paragraph in the auditor's report describing the auditor's responsibilities regarding other information should be updated to indicate that the auditor audited both the financial statements and the company's internal control.

## B. Amendments to Auditing Standard No. 6

Auditing Standard No. 6 establishes requirements for the auditor's evaluation of the consistency of the financial statements, including changes to previously issued financial statements and the effect of that evaluation on the auditor's report. Auditing Standard No. 6 requires the auditor to include explanatory language in the auditor's report to recognize a change in accounting principle or a correction of a material misstatement in previously issued financial statements if the change has a material effect on the financial statements.[98/] The related reporting requirements and illustrative paragraphs, however, are currently included in existing AU sec. 508.[99/]

The proposed auditor reporting standard would amend Auditing Standard No. 6 to include the reporting requirements and illustrative paragraphs from existing AU sec. 508.[100/] This change was made because, except for a few circumstances, the reporting requirements for explanatory language are contained in the respective standards requiring such reporting.

## C. Amendments to Auditing Standard No. 7

The proposed amendments to Auditing Standard No. 7 would require the engagement quality reviewer to evaluate whether appropriate critical audit matters are communicated in the auditor's report. The engagement quality reviewer's evaluation could be facilitated by the documentation requirement of the proposed auditor reporting standard. The proposed auditor reporting standard requires the audit documentation to include the determination of critical audit matters in accordance with Auditing Standard No. 3, which would require the auditor's documentation to contain sufficient information to enable an experienced auditor, having no previous connection with the engagement, to understand the basis for the auditor's determination that (1) each reported matter was a critical audit matter and (2) non-reported audit matters that would appear to meet the definition of a critical audit matter were not critical audit matters.

Auditing Standard No. 7 currently requires the engagement quality reviewer in an audit engagement "to evaluate the significant judgments made by the engagement team and the related conclusions reached in forming the overall conclusion on the engagement and in preparing the engagement report."[101/] Therefore, the engagement

---

98/ See paragraphs 5-10 of Auditing Standard No. 6.

99/ See existing AU secs. 508.17A through .18C.

100/ See existing AU secs. 508.17B-.17D and .18A-.18B and the proposed amendments to paragraphs 12 through 17 of Auditing Standard No. 6. In previous PCAOB standard-setting projects, the substance of current AU sec. 508.17A has been repeated in existing paragraphs 7 and 8 of Auditing Standard No. 6 and the substance of current AU sec. 508.18C has been placed in existing paragraph 10 of Auditing Standard No. 6. Therefore, the Board is proposing to supersede AU secs. 508.17A and .18C without corresponding changes to Auditing Standard No. 6.

101/ See paragraph 9 of Auditing Standard No. 7.

quality reviewer is likely to discuss the matters determined to be critical audit matters with the engagement team. The proposed amendment would require the engagement quality reviewer to evaluate the engagement team's compliance with the requirements of the proposed auditor reporting standard regarding the auditor's communication of the critical audit matters.

**D. Amendments to Auditing Standard No. 16**

Auditing Standard No. 16 requires auditors to communicate certain significant audit and financial statement matters to the audit committee. Among other things, Auditing Standard No. 16 includes a requirement for the auditor to communicate to the audit committee matters related to departures from the auditor's unqualified report. Under the Board's existing standard, the auditor is required to communicate certain information when the auditor expects to (1) modify the opinion in the auditor's report and (2) include explanatory language or an explanatory paragraph in the auditor's report.[102/]

The proposed amendments to Auditing Standard No. 16 would delete the existing communication requirement regarding the auditor's report and would replace it with a requirement to provide to and discuss with the audit committee a draft of the auditor's report. Providing and discussing a draft of the report would inform the audit committee about the language in the audit report for tenure, critical audit matters, explanatory language (or explanatory paragraphs), and departures from an unqualified report. The proposed amendment to Auditing Standard No. 16, however, would not preclude the auditor from communicating with the audit committee any changes to the auditor's report prior to the preparation of the draft auditor's report.

**E. Amendment to AU sec. 336**

The proposed amendment to AU sec. 336, *Using the Work of a Specialist*, would enable the auditor to reference the use of a specialist in the auditor's report in connection with the auditor's communication of critical audit matters, if the auditor believes such reference will facilitate an understanding of the audit matter or the considerations that led the auditor to determine that the audit matter is a critical audit matter. Currently, existing AU sec. 336 states that the auditor should not refer to the work or findings of a specialist, except for situations in which the auditor decides to add explanatory language to his or her report or depart from an unqualified opinion.[103/] The proposed amendment is intended to explain that the auditor is not precluded from

---

[102/] See paragraph 21 of Auditing Standard No. 16.

[103/] AU secs 336.15-.16.

referencing the specialist if the reference is related to a critical audit matter. Because of the statement in the auditor's report that communication of critical audit matters does not alter in any way the auditor's opinion on the financial statements, taken as a whole, the auditor's reference to the use of specialists should not be misunderstood as a qualification of the auditor's opinion or a division of responsibility.

## F. Amendments to Existing AU sec. 508

The proposed auditor reporting standard would supersede portions of existing AU sec. 508 that primarily relate to an unqualified opinion.[104/] The remaining portions of existing AU sec. 508 primarily address departures from the auditor's unqualified report, such as a qualified opinion, an adverse opinion, or a disclaimer of opinion. Accordingly, existing AU sec. 508 would be retitled from "Reports on Audited Financial Statements" to "Departures from Unqualified Opinions and Other Reporting Circumstances."

The proposed amendments to the remaining portions of AU sec. 508 are not intended to change the substance of the remaining provisions of AU sec. 508. The proposed amendments would primarily consist of (1) requiring the communication of critical audit matters in certain circumstances; (2) revising certain terminology to align with the proposed auditor reporting standard; and (3) amending the illustrative reports. Further updating and revision may be required to existing AU sec. 508, as amended by this proposal, which would be considered by the Board in a separate standard-setting project.

The proposed amendments to AU sec. 508 include:

### *1. Communication of Critical Audit Matters in Opinions Other Than Unqualified*

*Qualified Opinion*

A qualified opinion states that, except for the effects of the matter(s) to which the qualification relates, the financial statements present fairly, in all material respects, the financial position, results of operations, and cash flows of the company in conformity with generally accepted accounting principles.[105/] Existing AU sec. 508 requires that when the auditor expresses a qualified opinion, he or she discloses all of the substantive reasons in a separate paragraph.

---

[104/] AU secs. 508.01-.09 and .11-.19 would be superseded.

[105/] See AU sec. 508.20.

The proposed amendments would require that when the auditor expresses a qualified opinion, the auditor's report also include, among other things, communication of critical audit matters. The Board would expect in most circumstances that the reason for the qualification of the auditor's report would also give rise to a critical audit matter. In that case, the auditor may include a cross-reference in the auditor's report as appropriate. However, in such an audit, there may be other matters meeting the criteria of a critical audit matter; therefore, requiring the communication of critical audit matters would be considered appropriate.

*Adverse Opinion*

An adverse opinion states that the financial statements do not present fairly the financial position, results of operations, or cash flows of the entity in conformity with generally accepted accounting principles.[106/] The existing requirements related to an adverse opinion were not amended to require the auditor to communicate critical audit matters. If the financial statements are not presented fairly, existing AU sec. 508 requires the auditor to explain the auditor's reason for the adverse opinion. Requiring the auditor to communicate additional critical audit matters was not considered necessary because the most important matter to investors and other financial statement users would be the reason for the adverse opinion.

*Disclaimer of Opinion*

A disclaimer of opinion states that the auditor does not express an opinion on the financial statements.[107/] The existing requirements related to a disclaimer of an opinion were not amended to require the auditor to communicate critical audit matters because the auditor is unable to form or has not formed an opinion as to the fairness of presentation of the financial statements. Because the auditor is not able to complete the audit and form an opinion on the financial statements, the auditor would not be able to determine the matters that involved the most difficult, subjective, or complex auditor judgments, posed the most difficulty in obtaining sufficient appropriate audit evidence, or posed the most difficulty in forming the opinion on the financial statements.

*2. The Term "Explanatory Paragraph"*

Existing AU sec. 508 includes references to the term "explanatory paragraph" that describe the auditor's responsibility to provide the reason for a departure from an

---

106/ See AU sec. 508.58.

107/ See AU sec. 508.61.

unqualified opinion. This term would be amended to "basis for departure from unqualified opinion paragraph" to differentiate this paragraph from an explanatory paragraph, as described in the proposed auditor reporting standard.

*3. Illustrative Reports*

Existing AU sec. 508 includes illustrative reports related to qualified opinions, adverse opinions, and disclaimers of an opinion. These reports would be amended to reflect the proposed basic elements of the auditor's unqualified report, as applicable in the particular reporting circumstances.

## G. Amendments to AU sec. 623

AU sec. 623, *Special Reports*, includes the reporting requirements for various types of special reports, such as reports on specified elements, accounts, or items of a financial statement. Since many of these reports are not required to be filed with the SEC, the Board did not amend the illustrative reports included in AU sec. 623. However, a note is proposed to be added to AU sec. 623 indicating that if any of the reports are to be filed with the SEC, the auditor would include the basic elements of the auditor's unqualified opinion and critical audit matters as described in paragraphs 6 and 7-14, respectively, of the proposed auditor reporting standard. For qualified, adverse, and disclaimer of opinion reports, AU sec. 623 also would be amended to include a reference to the requirements of AU sec. 508, [new proposed title] *Departures from Unqualified Opinions and Other Reporting Circumstances*.

## H. Other Amendments

The proposed amendments to other PCAOB standards primarily relate to:

- Updating references as a result of auditing standards that are being amended or superseded. For example, for references in the auditing standards to AU sec. 508, the proposed amendment would change the title from "Reports on Audited Financial Statements" to "Departures from Unqualified Opinions and Other Reporting Circumstances;"

- Updating illustrative reports for the basic elements of the proposed auditor reporting standard for the reports that are filed with the SEC. For example, updating the example report in AU sec. 543 that illustrates appropriate reporting by the principal auditor indicating the division of responsibility when the auditor makes reference to the audit of the other auditor; and

- Updating AU sec. 722, *Interim Financial Information*, for the basic elements of the proposed auditor reporting standard.

Questions Related to Section VII:

33. Are the proposed amendments to PCAOB standards, as related to the proposed auditor reporting standard, appropriate? If not, why not? Are there additional amendments to PCAOB standards related to the proposed auditor reporting standard that the Board should consider?

34. What are the potential costs or other considerations related to the proposed amendments? Are these cost considerations the same for all types of audits? If not, explain how they might differ.

## VIII. Considerations Related to Audits of Specific Entities

The Board is seeking comment on the applicability of the proposed auditor reporting standard and amendments to the audits of specific entities, including brokers and dealers, investment companies, and employee stock purchase, savings, and similar plans.

### A. Brokers and Dealers

*1. Background Information*

As Exchange Act Rule 17a-5 ("Rule 17a-5") requires that audits of brokers and dealers be conducted in accordance with PCAOB standards for fiscal years ending on or after June 1, 2014,[108/] the proposed auditor reporting standard and amendments, if adopted by the Board and approved by the SEC, would be applicable to such audits. At the publication date of the Board's proposal, the final SEC rules have not been published in the Federal Register.

Pursuant to Rule 17a-5, brokers and dealers are generally required to file with the SEC and other regulators annual audited financial statements.[109/] All of the statements contained in the annual audited financial statements of the broker or dealer are public, except that if the statement of financial condition is bound separately from the balance of the annual audited financial statements, the balance of the annual

---

108/ See SEC, *Broker-Dealer Reports*, Exchange Act Release No. 70073 (July 30, 2013), which includes the final rules available at http://www.sec.gov/rules/final/2013/34-70073.pdf. Citations in this Section are to SEC Rule 17a-5 under the Exchange Act, as revised in Exchange Act Release No. 70073.

109/ See SEC Rule 17a-5 of the Exchange Act, 17 C.F.R. § 240.17a-5.

audited financial statements is deemed confidential and thus available for use only by the SEC and others to whom the SEC gives authorization.[110/] Therefore, in situations in which the broker or dealer binds separately the statement of financial condition from the balance of the annual audited financial statements, the auditor generally would issue two separate auditor's reports that would have different content: (1) an auditor's report on the statement of financial condition that would be available to the public and (2) an auditor's report on the complete audited financial statements that, along with the audited financial statements, would be confidential and not available to the public.[111/]

There were approximately 4,230 brokers and dealers that filed annual audited financial statements with the SEC for fiscal periods ended during 2012.[112/] Based on research conducted by the PCAOB's Office of Research and Analysis ("ORA"), approximately 45% of these brokers and dealers filed a statement of financial condition that was bound separately from the balance of the annual audited financial statements. For those brokers and dealers, only the statement of financial condition, with the related auditor's report, is publicly available, while the complete annual audited financial statements, with the related auditor's report, are confidential. For the remaining 55% of the population of brokers and dealers, the complete annual audited financial statements and the related auditor's report are publicly available.[113/]

ORA's research also indicates that there are no issuers among the approximately 4,230 brokers and dealers that filed annual audited financial statements with the SEC for fiscal periods ended during 2012. Approximately 9% of the 4,230 brokers and dealers are subsidiaries of issuers. The remainder are not owned by issuers.

According to ORA's research, for the population of brokers and dealers that are not subsidiaries of issuers (1) approximately 90% are directly owned by an individual or an entity that owns more than 50% of the broker or dealer and (2) approximately 75% have five or fewer direct owners. A review of the title or status of the brokers' or dealers'

---

110/ See SEC Rule 17a-5(e).

111/ See also SEC Rule 17a-5(c)(2) regarding audited statements required to be provided to customers.

112/ This information is based on the number of brokers and dealers that filed annual audited financial statements with the SEC through May 1, 2013 for fiscal periods ended during 2012.

113/ ORA obtained information from the SEC's EDGAR database on brokers and dealers that filed public and confidential annual audit reports with the SEC.

direct owners who are individuals suggests that these owners are generally part of the broker's or dealer's management.

In summary, ORA's research indicates that ownership of brokers and dealers is primarily private, with individual owners generally being part of the management team.

*2. Comments on Concept Release*

The Board's concept release included a question about whether the changes to the auditor's reporting model should apply to all audit reports filed with the SEC, including those filed in connection with the financial statements of brokers and dealers. Many commenters who responded to this question in the concept release supported requiring the same reporting for all companies.

The Board received additional comments that were specific to audits of brokers and dealers from a small number of commenters. Some of those commenters suggested that the Board take into account the special characteristics of brokers and dealers in considering whether the changes to the auditor's report should apply to audits of brokers and dealers. Other commenters thought that certain changes, for example clarifications to language in the auditor's report, may be applicable to auditors' reports for brokers and dealers, but other changes to the auditor's report should not apply to audits of brokers and dealers. One commenter on the concept release noted that amendments to Rule 17a-5 proposed by the SEC would provide users of brokers' and dealers' financial statements with sufficient information that would make additional auditor reporting unnecessary.

**B. Investment Companies**

*1. Background Information*

The proposed auditor reporting standard and amendments, if adopted by the Board and approved by the SEC, would be applicable to the audits of investment companies. The Investment Company Act of 1940 ("Investment Company Act") generally defines an investment company as any issuer that is engaged primarily in the business of investing, reinvesting, or trading in securities.[114/] Investment companies registered with the SEC under the Investment Company Act are required to file with the SEC, on Form N-CSR, annual reports containing audited financial statements.[115/]

[114/] See Section 3(a)(1) of the Investment Company Act.

[115/] See SEC Rules under Section 30(e) of the Investment Company Act.

An investment company (1) is generally organized by an outside "sponsor" (also known as promoter[116/]), such as a bank or an insurance company and (2) has an investment adviser,[117/]which manages the investment company's portfolio securities for a fee. A sponsor might register many investment companies that generally would have the same or related investment advisers. Such investment companies are referred to as affiliated. Annual shareholder reports of affiliated investment companies that have the same fiscal year-end might be filed with the SEC in one Form N-CSR. This document generally contains a single auditor's report that refers to the financial statements of each audited investment company. The financial statements of the affiliated investment companies might contain some disclosures that would be similar across the affiliated investment companies, such as the management fee arrangements, because of the common investment adviser. Other disclosures might be different, such as disclosures related to the use of derivatives, because of the different investment strategies of each investment company.

Investment companies can also be part of master-feeder or fund of funds capital structures.[118/] In master-feeder structures, feeder investment companies invest all their assets in another investment company, known as the master fund, and own proportionate shares of the net assets of the master fund. Master-feeder accounting involves allocating the master's income, expenses, and realized and unrealized gains and losses among the feeder funds. Additionally, accounting policies of the master fund, such as valuation of investments of the master fund, may affect the feeder funds. A master and feeder fund may not be affiliated, may have different auditors, and different fiscal year ends. As described in SEC staff guidance, the annual report of each feeder fund generally contains the financial statements of both the master and the feeder fund.[119/]

Funds of funds are investment companies that invest in other investment companies. A fund of funds' structure is similar to that of a master-feeder, except that it

---

116/ See Section 2(a)(30) of the Investment Company Act.

117/ See Section 2(a)(20) of the Investment Company Act.

118/ See Section 12(d)(1) of the Investment Company Act, which describes investment companies involved in such structures as acquiring company and acquired company.

119/ See SEC "Dear CFO" letters at http://www.sec.gov/divisions/investment/noaction/1997/cfo110797.pdf and http://www.sec.gov/divisions/investment/noaction/1995/accountingcomment110295.pdf.

generally invests its assets in more than one other fund. Because of certain limitations under the Investment Company Act,[120/] an issuer fund of funds and the investee funds are often affiliated, but may have different auditors and fiscal year ends.

In January 2009, the SEC adopted amendments to Form N-1A that require every open-end management investment company prospectus to include a summary section consisting of key information about the investment company.[121/] The SEC described these amendments as intended to help investors to access key information that is important to an informed investment decision.[122/] In describing the rationale for the adopted amendments, the SEC stated that there was consensus among roundtable participants and other commenters that the key information that investors need to make an investment decision about an investment company includes information about the investment company's investment objectives and strategies, risks, costs, and performance.[123/] The investment company's costs and performance calculations are subject to audit and are included in the financial highlights, which are referred to in the auditor's report.

*2. Consideration of Comments on Concept Release*

The Board's concept release included a question about whether the changes to the auditor's reporting model should apply to all audit reports filed with the SEC, including those filed in connection with the financial statements of investment companies. Many commenters who responded to this question of the concept release supported requiring the same reporting for all companies.

The Board received comments that were specific to audits of investment companies from a small number of commenters. Those commenters generally expressed the view that additional auditor reporting should not apply to audits of investment companies. These commenters viewed investment companies' financial

---

[120/] See Section 12(d)(1) of the Investment Company Act.

[121/] See SEC, *Enhanced Disclosure and New Prospectus Delivery Option for Registered Open-End Management Investment Companies,* Securities Act Release No. 8998 (Jan. 13, 2009), at 7.

[122/] See SEC Release No. 8998, at 14-15.

[123/] See SEC Release No. 8998, at 9-11. See also ICI, *Understanding Investor Preferences for Mutual Fund Information* (Aug. 2006), at 2-3, available at http://www.ici.org/pdf/rpt_06_inv_prefs_full.pdf.

statements as inherently less complex than operating companies' financial statements and argued that the limited nature of an investment company's operations entails fewer estimates and judgments.

## C. Employee Stock Purchase, Savings, and Similar Plans

### *1. Background Information*

The proposed auditor reporting standard and amendments, if adopted by the Board and approved by the SEC, would be applicable to the audits of employee stock purchase, savings, and similar plans ("benefit plans"). Benefits plans that purchase and hold securities of the plan sponsor using participants' contributions are generally required to file with the SEC an annual report on Form 11-K[124/] that includes the benefit plan's audited financial statements and the related auditor's report.[125/] The audit of the financial statements included in a filing on Form 11-K is performed in accordance with the standards of the PCAOB. Benefit plans are also generally subject to the financial reporting requirements of the Employee Retirement Income Security Act of 1974 ("ERISA"), including the U.S. Department of Labor's ("DOL") rules and regulations for disclosure under ERISA.[126/]

In general, the primary objective of the financial statements of a benefit plan is to provide information about the plan's assets, liabilities, and ability to pay benefits. Defined-contribution benefit plan participants do not invest directly in a benefit plan; rather they select their investments outside of the benefit plan, with the plan holding the investments as its assets.

---

[124/] See Section 15(d) of 1934 Act.

[125/] A benefit plan's audited financial statements may also be included as part of the annual report of the issuer sponsoring the benefit plan. See SEC Rule 15d-21, C.F.R §240.15d-21.

[126/] See FASB ASC 960-10-05-6. Benefit plans subject to ERISA also file with the DOL an annual report on form 5500, including audited financial statements and an auditor's report. Pursuant to DOL requirements, the audit of the financial statements is performed under auditing standards generally accepted in the U.S., that is, not under PCAOB standards. ERISA-related information is available at the DOL website at http://www.dol.gov/compliance/laws/comp-erisa.htm#applicable_laws.

*2. Consideration of Comments on Concept Release*

The Board's concept release included a question about whether the changes to the auditor's reporting model should apply to all audit reports filed with the SEC. Many commenters who responded to this question of the concept release supported requiring the same reporting for all companies.

The Board received comments that were specific to audits of benefit plans from a small number of commenters. One commenter thought the Board should proceed with caution regarding employee benefit plans that file a Form 11-K. Another commenter said that users of pension plans' financial statements are not requesting or in need of an expanded auditor reporting model.

<u>Questions Related to Section VIII</u>:

35. Are the proposed auditor reporting standard and amendments appropriate for audits of brokers and dealers? If yes, are there any considerations that the Board should take into account with respect to audits of brokers and dealers?

36. Is the requirement of the proposed auditor reporting standard to communicate in the auditor's report critical audit matters appropriate for audits of brokers and dealers? If not, why not?

37. Since a broker or dealer may elect to file with the SEC a balance sheet and related notes bound separately from the annual audited financial statements, should the Board address situations in which the auditor may issue two different reports for the same audit of a broker or dealer? Why or why not?

38. Are the proposed auditor reporting standard and amendments appropriate for audits of investment companies? If yes, are there any considerations that the Board should take into account with respect to auditors' reports on affiliated investment companies, as well as companies that are part of master-feeder or fund of funds structures?

39. Are the proposed auditor reporting standard and amendments appropriate for audits of benefit plans? If yes, are there any considerations that the Board should take into account with respect to audits of benefit plans?

40. Should audits of certain companies[127/] be exempted from being required to communicate critical audit matters in the auditor's report? Why or why not?

## IX. Considerations Related to Effective Date

The proposed auditor reporting standard and amendments would be effective, subject to approval by the SEC, for audits of financial statements for fiscal years beginning on or after December 15, 2015. The Board's final decision on the effective date would take into account the extent and nature of comments received on the proposal as well as the timing of Board adoption of any final standard and amendments. Additionally, some commenters suggested that, depending on the extent of changes to the auditor's report, the Board consider a delayed compliance date depending on the size of the company. The Board is seeking comment on whether any special consideration should be given to a delayed compliance date for the proposed auditor reporting standard, such as for the audits of smaller companies.

Questions Related to Section X:

41. Is the Board's effective date appropriate for the proposed auditor reporting standard? Why or why not?

42. Should the Board consider a delayed compliance date for the proposed auditor reporting standard and amendments or delayed compliance date for certain parts of the proposed auditor reporting standard and amendments for audits of smaller companies? If so, what criteria should the Board use to classify companies, such as non-accelerated filer status? Are there other criteria that the Board should consider for a delayed compliance date?

---

127/ See Appendix 7 for a discussion on costs and other considerations related to EGCs.

## Exhibit – Illustrative Examples of Critical Audit Matters

This Exhibit contains three illustrative examples of communications of critical audit matters in an auditor's report. Each of the three illustrative examples contain background information, the company's related notes to the financial statements, determination of the critical audit matter, and the communication of the critical audit matter as it would appear in the auditor's report.

All three examples are based on hypothetical situations and have been prepared for illustrative purposes only. They are not intended to provide guidance or any suggestions regarding the accounting or disclosure required, nor any implied audit procedures, in the circumstances presented.

### A. Hypothetical Auditing Scenario #1 – Allowance for Sales Returns

#### *1. Background*

In the year ended January 31, 2013 ("fiscal 2013"), an established brick-and-mortar retail company ABC Retailer ("ABC" or the "Company") implements a strategic decision to expand its product offerings concurrent with developing a significant on-line sales channel. Simultaneously, it lengthens its existing 30-day sales returns policy to 60 days. This change in returns policy, along with the expanded product offerings and new on-line presence, are announced in a fiscal 2013 advertising campaign.

ABC's management projects a significant increase in sales and an increase in returns in fiscal 2013 as a result of these changes. The Company designs and implements new or enhanced procedures, processes, and systems during fiscal 2013 to address the product expansion, the on-line distribution channel, and the expected increase in customer returns.

ABC has significant historical experience to estimate sales allowances based on its traditional products and sales channel. Because of the strategic changes and longer sales return period, management performs an in-depth analysis of how changes in product mix, customer demographics, and the use of on-line "stores" to sell merchandise are likely to affect historical experience in sales returns. Management uses industry data and other sources, including the results of its own market research, to perform this analysis. Management also implements new systems to improve the identification, processing, and tracking of sales returns and develops a statistical model to estimate future returns. The statistical model relies on a number of inputs and assumptions derived from the sales return tracking system. As a result, management believes its historical experience in combination with the new systems and statistical model allow management to make reasonable estimates of sales returns for fiscal 2013.

During fiscal 2013, ABC's management decides to significantly lengthen the 60-day returns policy without publicly announcing a change to the stated policy. In response to on-line customer complaints about the Company's returns policy in the past, full refunds are given "no questions asked" for returns within 90 days and in specific circumstances for returns within 120 days. To reflect the lengthened sales returns policy, management makes adjustments to the sales returns allowance determined by the statistical model. These adjustments are partly based on data generated by the sales returns tracking system and partly based on management's judgment about how recent sales activity and other factors such as seasonality, recent promotions, and the nature and frequency of customer complaints are affecting ABC's application of its stated sales returns policy. Disclosure of management's actions regarding its sales returns policy was made in the MD&A.

*2. Excerpts From the Company's Notes to the Financial Statements*[128/]

***Note 1: Accounting Policies***

***Revenue Recognition***

We recognize revenue when the following criteria are met: persuasive evidence of an arrangement exists; delivery has occurred; the selling price is fixed or determinable; and collectability is reasonably assured. For sales made at our retail stores, we generally recognize revenue at the time of a sale to a customer. For sales made through our website, we generally recognize revenue at the time the merchandise is shipped to a customer. As part of our customer service strategy, we offer customers the right to return undamaged merchandise for a full refund if they are not satisfied with their purchase. We record an allowance for estimated returns as a reduction of gross revenues and cost of goods sold, and as an accrued current liability based on historical experience and trends. If we are unable to make reasonable estimates of future returns, revenue is deferred until the return period expires. In fiscal 2011, 2012, and 2013, no revenues were deferred due to an inability to make reasonable estimates of future returns.

Beginning in fiscal 2013, we use a statistical model that utilizes our historical experience to estimate future returns. Inputs and assumptions to our model include, among other factors: historical experience based on sales of similar products; the

---

[128/] Only financial statement information relating to the disclosure and determination of the revenue recognition relative to the allowance for sales returns is presented. Other required notes to the financial statements have been omitted from this example.

relative risk of returns based on the nature of the product, such as susceptibility to changes in technology or changes in demand due to new product introductions; historical data related to the effect that special promotions and/or seasonality has on returns; and the relative risk of returns based on the selling price of the merchandise and the sales channel that the customer used to make a purchase. We also incorporate expected changes, if any, in our returns policies and practices as well as changes in economic and buying trends that might impact customer demand and behavior. If actual returns are not consistent with our estimates, we factor the new information into our statistical model and adjust our previous estimate in the period new information becomes available.

*3. Determination of the Critical Audit Matter*

The auditor determined that the evaluation of the allowance for sales returns is a critical audit matter in the audit of ABC's fiscal 2013 financial statements.

Specific considerations, which led the auditor to determine that the auditor's evaluation of the allowance for sales returns is a critical audit matter, included:

- Extensive changes to the Company's business strategy, including changes to the Company's distribution channel through the use of on-line "stores" to sell merchandise;

- Significant lengthening of the Company's sales return policy (from 30 to 60 days) and flexible application of it (90 – 120 days);

- The development of a new statistical model to estimate future sales returns, which included management adjustments to the statistical model to reflect the flexible application of the sales return policy;

- Significant increase in the Company's expected sales returns;

- The extensive amount of consultation with the audit firm's national office regarding the design of appropriate audit procedures, evaluation of the results of those procedures, and assessment of compliance with U.S. GAAP relative to the audit of the allowance for sales returns;

- The significant difficulty in obtaining sufficient appropriate audit evidence to support management's subjective adjustments to the allowance computed by the statistical model; and

- The complexity and difficulty of evaluating whether the Company had a sufficient basis to make a reasonable estimate of sales returns.

*4. Communication of Critical Audit Matter in the Auditor's Report*

Critical Audit Matter

The standards of the PCAOB require that we communicate in our report critical audit matters relating to the audit of the current period's financial statements or state that we determined that there are no critical audit matters. Critical audit matters are those matters addressed during the audit that (1) involved our most difficult, subjective, or complex judgments; (2) posed the most difficulty to us in obtaining sufficient appropriate evidence; or (3) posed the most difficulty to us in forming our opinion on the financial statements. The critical audit matters communicated below do not alter in any way our opinion on the financial statements, taken as a whole.

We determined that our evaluation of the Company's allowance for sales returns was a critical audit matter in the audit of the Company's financial statements as of and for the fiscal year ended January 31, 2013. The Company developed a new on-line sales channel. This new sales channel could have significantly different return experience than sales through its more established retail stores. In addition, the Company simultaneously lengthened its return policy. The Company developed new models with different assumptions to reflect these changes in its estimate of the allowance for sales returns, a key element in recording revenue. The lack of historical experience with the new assumptions resulted in a high degree of measurement uncertainty in estimating the allowance for sales returns.

Because of these changes in the Company's distribution channel and sales return policy, our audit of the Company's allowance for sales returns (1) involved our difficult and subjective judgments in evaluating whether the Company had a sufficient basis to make a reasonable estimate of sales returns and (2) posed difficulty to us in obtaining sufficient appropriate evidence to support management's adjustments to the allowance for sales returns. We consulted with our national office on (1) the design and performance of audit procedures to test the data underlying management's assumptions used to estimate future sales returns and (2) our evaluation of the results of those procedures, including our assessment of the reasonableness of management's judgments regarding the effect that changes in the Company's return policies and practices, as well as changes in economic and buying trends that affect customer behavior, have on the estimate of future sales returns. The Company's accounting policy for sales returns is discussed in Note 1 to the financial statements.

## B. Hypothetical Auditing Scenario #2 – Valuation Allowance for Deferred Tax Assets

### *1. Background*

As of the year ended June 30, 2013 ("fiscal 2013"), XYZ Technology Company ("XYZ" or the "Company") has been in business for 10 years. In its first three years, as its "first generation" products were being developed and commercialized, the Company incurred losses for both financial reporting and federal income tax purposes. For income tax purposes, the losses are carried forward and subsequently utilized to reduce federal income taxes that otherwise would have been payable. By its sixth year of operations, XYZ is profitable for tax purposes, has no remaining net operating loss carryforwards, and has repaid its borrowings. Cash flows from operations are strong.

By fiscal 2010 (its seventh year of operations), competition begins to erode the Company's market share. XYZ reports breakeven results for financial reporting purposes and a small loss for income tax purposes in fiscal 2010. The loss is carried back for income tax purposes. The Company returns to profitability in fiscal 2011 by carefully controlling costs and by offering some "add-ons" to its "first generation" products that boost revenues.

During fiscal 2012 (its ninth year of operations), XYZ raises equity capital to provide additional liquidity for its ongoing development of "next generation" products (targeted to be introduced in fiscal 2014-2015). Due to the significant increase in development costs combined with continuing pressure on sales prices and unexpected cost increases in a critical component, XYZ reports a loss for both financial reporting and federal income tax purposes in fiscal 2012. A portion of the loss in fiscal 2012 creates a net operating loss carryforward. The Company's cash position remains strong.

During the year ended June 30, 2013, XYZ recalls one of its products due to a defect in a component supplied by a third party. Although the supplier is contractually obligated to reimburse the Company for the costs to recall and repair the defective products, the supplier disputes the role its component played in the product failure that led to the recall. Product development and marketing costs increase in preparation for the targeted 2014-2015 introduction of the "next generation" products. Additionally, costs are incurred (1) to exit certain unprofitable, peripheral product lines that are no longer consistent with XYZ's strategy and (2) to relocate its corporate office. The Company is able to somewhat mitigate the fiscal 2012 cost increase in a critical component but does not expect the cost of the component to return to historic levels in the near term.

As a result of these various circumstances, the Company incurs a significant pre-tax loss in the year ended June 30, 2013, for both financial reporting and federal income tax purposes. In combination with other book-tax differences and the net operating loss carryforward from fiscal 2012, XYZ reports net deferred tax assets as of June 30, 2013.

As required by U.S. GAAP, management evaluates whether the recorded amount of deferred tax assets as of June 30, 2013 is realizable. In evaluating the need for a valuation allowance, management evaluates both negative and positive evidence to determine whether it is more likely than not that its deferred tax assets will be realized. From management's perspective, negative evidence includes losses in 2013 and 2012. However, management determined that it has not incurred cumulative losses in recent years[129/] when evaluated over a three-year time frame.[130/] Management's positive evidence includes the Company's historical ability to utilize operating loss carryforwards, a 15-year carryforward period, and a forecast of increased revenues and profits in the next three years. That forecast includes the following expectations: (1) favorable settlement with the supplier related to the recall; (2) elimination of certain unprofitable, peripheral product lines; (3) decline in the level of product development spending; and (4) commercialization of the "next generation" products.

Management also considers that some of the current year loss is the result of the product recall, the exiting of certain product lines, and the relocation of the corporate office, events that are not expected to recur in the future. Further, management considers XYZ's strong cash position. Lastly, management does not identify any qualifying tax-planning strategies. Based on the weight of all available evidence, both positive and negative, management concludes that no valuation allowance is required.

---

[129/] See FASB ASC paragraph 740-10-30-16 through 30-24, *Income Taxes – Overall – Initial Measurement – Establishment of a Valuation Allowance for Deferred Tax Assets*, for the accounting requirements of a valuation allowance for deferred income tax assets including discussion regarding "cumulative losses in recent years."

[130/] ASC Topic 740-10-30-23 indicates that "[a]n entity shall use judgment in considering the relative impact of negative and positive evidence. The weight given to the potential effect of negative and positive evidence shall be commensurate with the extent to which it can be objectively verified. The more negative evidence that exists, the more positive evidence is necessary and the more difficult it is to support a conclusion that a valuation allowance is not needed for some portion or all of the deferred tax asset. A cumulative loss in recent years is a significant piece of negative evidence that is difficult to overcome."

2. *Excerpts From the Company's Notes to the Financial Statements*[131]

***Note 2: Accounting Policies***

**Income Taxes**

We account for income taxes under the asset and liability method. Deferred taxes are determined based on the temporary differences between the financial statement and tax basis of existing assets and liabilities using tax rates that under current tax law would be in effect in the years in which the differences are expected to reverse. The effect of a change in tax rates on deferred taxes is recognized in the period that includes the enactment date.

We make judgments regarding the realizability of our deferred tax assets. We consider our deferred tax assets to be realizable when we believe it is more likely than not that we will generate sufficient future taxable income to realize our deferred tax assets after consideration of all available evidence. We record a valuation allowance to reduce our deferred tax assets to the amount that we believe more than 50 percent likely to be realized. In assessing the need for a valuation allowance, we consider all positive and negative evidence, including the expected timing of reversals of existing temporary differences, projected future taxable income, tax planning strategies, and recent financial performance. The more negative evidence that exists, the more positive evidence is necessary and the more difficult it is to support a conclusion that a valuation allowance is not needed for some portion or all of the deferred tax asset. A cumulative loss in recent years is generally a significant piece of negative evidence that is difficult to overcome in determining that a valuation allowance is not needed.

***Note 12: Income Taxes***

As of June 30, 2013, our deferred tax asset of $XXX million related to federal net operating loss carryforwards will expire in approximately 14 to 15 years if not utilized. The determination of whether it is more than 50 percent likely that we will realize the full benefit of all our deferred tax assets, including the deferred tax asset related to the net operating loss carryforwards, requires significant judgment. That judgment includes evaluation of negative evidence, such as recent losses, and positive evidence, including projections of future taxable income during the carryforward period. As required by the accounting literature, more weight is given to objective evidence. Negative objective

---

[131] Only financial statement information relating to the disclosure and determination of deferred tax assets is presented. Other required notes to the financial statements have been omitted from this example.

evidence includes our losses in 2013 and 2012. However, we do not have cumulative losses in recent years when evaluated over a three-year time frame. Positive objective evidence that we considered in making our judgment included: (1) the effect of eliminating certain product lines and (2) the expectation that product recall costs and relocation costs will not recur in the future. Projections of future taxable income are subject to uncertainty due to various factors, including the general economic environment, industry and competitive conditions, timing of product enhancements and new product introductions, and the length of time of the projections included in the analyses. If our actual results are less favorable than current estimates and we revise our projections downward in future analyses, a valuation allowance may be required with a corresponding adjustment to earnings in the period in which such determination is made. As of June 30, 2013, based upon our estimates, we believe it is more likely than not that the Company will realize the full benefit of the existing deferred tax assets.

*3. Determination of the Critical Audit Matter*

The auditor determined that its assessment of management's evaluation of the realizability of deferred taxes is a critical audit matter.

Specific considerations, which led the auditor to determine that its assessment of management's evaluation of the realizability of deferred taxes is a critical audit matter, included:

- The auditor's prior experience with management's forecasts of future revenues and costs, which indicated that actual revenues and income typically differed from forecasted amounts;

- The subjectivity involved in evaluating whether the weight of the Company's positive evidence is sufficient to overcome the negative evidence;

- The extensive amount of consultations with the firm's National Office regarding: (a) the design and evaluation of the results of its audit procedures related to management's forecasts of improved profitability; (b) the appropriate application of the criteria under U.S. GAAP for recording a valuation allowance; (c) the assessment of management's judgments regarding the identification and evaluation of negative and positive evidence; and (d) the adequacy of XYZ's disclosure regarding risks and uncertainties that could significantly affect deferred tax assets in the near term; and

- High degree of difficulty auditing management's forecast of future revenues and income due to significant difficulty in obtaining objective evidence to support management's key judgments about (1) the timing, demand and pricing of "next generation" products, (2) the ongoing demand for (and the life cycle of) existing products, (3) the level of future development spending, (4) the amount of marketing costs associated with the commercialization of new products, (5) the outcome of the supplier dispute regarding recall costs, and (6) future cost increases or decreases in the cost of critical components.

*4. Communication of Critical Audit Matter in the Auditor's Report*

Critical Audit Matter

The standards of the PCAOB require that we communicate in our report critical audit matters relating to the audit of the current period's financial statements or state that we determined that there are no critical audit matters. Critical audit matters are those matters addressed during the audit that (1) involved our most difficult, subjective, or complex judgments; (2) posed the most difficulty to us in obtaining sufficient appropriate evidence; or (3) posed the most difficulty to us in forming our opinion on the financial statements. The critical audit matters communicated below do not alter in any way our opinion on the financial statements, taken as a whole.

We determined that our assessment of the Company's evaluation of the realizability of deferred tax assets was a critical audit matter in the audit of the Company's financial statements for the fiscal year ended June 30, 2013. Considerations that led to our determination, included the following:

- The Company exercised significant judgment in weighing positive and negative evidence regarding the realizability of the company's deferred tax assets, including in developing forecasts of projected future taxable income.

- The Company continues to experience increased competition with its "first generation" products which reduced revenue growth, sales prices and profitability. Further, the Company experienced an unexpected cost increase in a critical product component and does not anticipate that cost returning to historical levels;

- A return to profitability by the Company is dependent upon launching "next generation" products in the future; and

- The Company is experiencing increases in product development and marketing costs in preparation for its "next generation" products.

Because of these considerations, our assessment of the Company's evaluation of the realizability of deferred tax assets: (1) involved subjective auditor judgments in evaluating whether management's judgments regarding the weight given to positive and negative evidence is appropriate; (2) involved difficult auditor judgments in designing audit procedures to test the data underlying management's forecasts of its future taxable income; (3) posed difficulty in obtaining sufficient appropriate evidence to support management's forecasts of the timing and amount of future taxable income due to the lack of objective evidence; and (4) posed difficulty in forming an opinion on the financial statements because of the significance to the financial statements, taken as a whole, of the Company's determination regarding the recognition of a valuation allowance for its deferred tax assets.

We consulted with others outside the engagement team regarding: (1) compliance with U.S. GAAP; (2) the design and performance of audit procedures to test management's forecasts; and (3) our evaluation of the results of those procedures, including our assessment of the reasonableness of management's judgments and forecasts in light of independent assessments of future trends in the industry, analyst reports and publicly available information regarding relevant trends by key competitors. The Company's accounting policy for deferred taxes and its evaluation of the realizability of deferred tax assets are discussed in Notes 2 and 12 to the financial statements.

## C. Hypothetical Auditing Scenario #3 – Fair Value of Fixed Maturity Securities Held as Investments That are Not Actively Traded

### *1. Background*

JLE Financial Institution ("JLE" or the "Company") holds fixed maturity securities in its investment portfolio. As of December 31, 2012 ("fiscal 2012"), the Company's investment portfolio includes U.S. corporate and state and local government securities. In addition, approximately 35% of the portfolio consists of private label mortgage-backed securities and collateralized loan obligations, which have very little or no trading activity. All of these securities are classified as "available for sale" and reported at fair value in the Company's statement of financial position under U.S. GAAP.

In measuring the fair value of available for sale securities, the Company utilizes third party pricing services for its U.S. corporate and state and local government securities. JLE's process requires that it obtain an understanding of the pricing service's valuation techniques, assumptions, and other inputs important to the fair value estimate. Further, JLE has controls over information received from third party pricing services.

The process to determine the fair value of the Company's private label mortgage-backed securities and collateralized loan obligations valued primarily using in-house valuation models involves a significant amount of judgment, in large part because of the inherent imprecision in measuring the fair value of securities for which observable market prices are not available and the subjective nature of some of the inputs to the valuation model. In testing JLE's controls related to fair value estimates determined by in-house valuation models the auditor noted a control deficiency less severe than a material weakness relating to the controls employed by the pricing and valuation committee. As a result of the control deficiency, the auditor expanded the planned audit procedures for securities for which the control applied. In performing additional audit procedures on the population of securities for which the control applied, the auditor identified several misstatements due to JLE's recorded amounts falling outside of the range of reasonable estimates developed by the auditor's specialist.

*2. Excerpts From the Company's Notes to the Financial Statements*[132/]

***Note 6: Fair Value***

**Recurring Fair Value Measurements**

When observable inputs are not available, JLE's valuation methodologies rely on inputs that are significant to the estimated fair value that are not observable in the market or cannot be derived principally from, or corroborated by, observable market data. These unobservable inputs can be based in large part on management's judgment or estimation and cannot be supported by reference to recent market activity. Even though these inputs are unobservable, management believes they are consistent with what other market participants would use when pricing such securities and are considered appropriate given the circumstances. Securities that are valued using significant unobservable inputs or assumptions are classified as Level 3 in the fair value hierarchy.

While JLE believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date. During fiscal 2012, there were no changes to the valuation techniques that had a material impact on the Company's consolidated financial position or results of operations.

---

[132/] Only financial statement information relating to the disclosure and determination of the fair value of Level 3 fixed maturity investment securities is presented. Other required notes to the financial statements have been omitted from this example.

*U.S. corporate securities*

Valuations are based primarily on matrix pricing or other similar techniques that utilize observable inputs that are derived from, or corroborated by, observable market data, including quoted prices for identical or similar securities. In other cases, valuation is based primarily on quoted prices for identical or similar securities.

*State and local government securities*

These securities are principally valued using the market approach. Valuation is based primarily on matrix pricing using market observable inputs, including benchmark U.S. Treasury yields or other yields, issuer ratings, broker-dealer quotes, credit spreads and reported trades of similar securities.

*Private label mortgage-backed securities and collateralized loan obligations*

Valuation is based on in-house valuation models, discounted cash flow methodologies, or other techniques that utilize inputs that cannot be derived from, or corroborated by, currently observable data, including credit spreads that reflect specific credit-related issues. The pricing and valuation committee review the inputs used for each security for which the fair value is determined based on in-house valuation models.

*3. Determination of the Critical Audit Matter*

The auditor determined that the evaluation of management's fair value estimates of private label mortgage-backed securities and collateralized loan obligations measured using valuation models, is a critical audit matter.

Specific considerations, which led the auditor to determine that evaluation of management's fair value estimates of these securities, measured using valuation models, is a critical audit matter, included:

- The materiality of the private label mortgage-backed securities and collateralized loan obligations;

- The valuation techniques used to estimate the fair value of these securities which were based primarily on in-house models to estimate fair value;

- The control deficiency relating to the review by the pricing and valuation committee;

- The highly subjective nature of the judgments involved regarding unobservable inputs to the fair value measurements for these securities;

- The extensive amount of audit work required to obtain sufficient appropriate evidence to form a conclusion, including significant involvement of senior members of the engagement team;

- The use by the auditor of the work of a third party specialist with expertise in the valuation of complex financial instruments to develop independent estimates of fair value for corroborative purposes;

- The auditor's expansion of the planned audit procedures relating to the valuation of the mortgage-backed securities and collateralized loan portfolio as a result of contradictory evidence obtained from those audit procedures; and

- The auditor's proposed adjustments to the valuation of the mortgage-backed securities and collateralized loan obligations.

*4. Communication of Critical Audit Matter in the Auditor's Report*

Critical Audit Matter

The standards of the PCAOB require that we communicate in our report critical audit matters relating to the audit of the current period's financial statements or state that we determined that there are no critical audit matters. Critical audit matters are those matters addressed during the audit that (1) involved our most difficult, subjective, or complex judgments; (2) posed the most difficulty to us in obtaining sufficient appropriate evidence; or (3) posed the most difficulty to us in forming our opinion on the financial statements. The critical audit matters communicated below do not alter in any way our opinion on the financial statements, taken as a whole.

Approximately 35% of the Company's investment portfolio is comprised of private label mortgage-backed securities and collateralized loan obligations. Our audit of the Company's fair value of these securities in the audit of the Company's financial statements as of and for the fiscal year ended December 31, 2012 involved difficult and complex auditor judgments because these securities (1) trade less frequently and (2) were valued using in-house valuation models based on unobservable inputs, which are subject to a wide range of measurement uncertainty. Our audit of these securities required an extensive amount of audit work, including significant involvement of senior members of the engagement team and the involvement of a third party valuation specialist. Further, it was necessary to expand the planned audit procedures due to a control deficiency less severe than a material weakness noted in the Company's internal control system regarding fair value estimates, valued using in-house valuation models. Specifically, a control deficiency was determined relating to the controls employed by the pricing and valuation committee. Our audit procedures resulted in our identification of several misstatements that were corrected by the Company. The Company's disclosures related to nature and fair values of these securities and the methods the Company used to determine those fair values are in Note 6 to the financial statements.

## APPENDIX 6

### *Additional Discussion of the Proposed Other Information Standard, Proposed Amendments to PCAOB Standards, and Comments on the Concept Release*

This Appendix discusses the Proposed Auditing Standard, *The Auditor's Responsibilities Regarding Other Information in Certain Documents Containing Audited Financial Statements and the Related Auditor's Report* (the "proposed other information standard"), presented in Appendix 2, and the related proposed amendments to certain PCAOB auditing standards (the "proposed amendments") presented in Appendix 4. This Appendix collectively refers to the proposed other information standard and proposed amendments as the "proposed other information standard and amendments." The proposed other information standard would supersede AU sec. 550, *Other Information in Documents Containing Audited Financial Statements,* and AU sec. 9550, *Other Information in Documents Containing Audited Financial Statements: Auditing Interpretations of Section 550*.

Following the Board's initial outreach from October 2010 through March 2011,[1/] the Board issued on June 21, 2011 a concept release to seek public comment on potential changes to the auditor's reporting model (the "concept release").[2/] Additionally, the Board held a public roundtable[3/] on the concept release and changing the auditor's report was discussed at the Board's Investor Advisory Group ("IAG")[4/] and Standing

---

[1/] See Section II., *Board Outreach*, of the Release for further discussion regarding the Board's outreach.

[2/] *Concept Release on Possible Revisions to PCAOB Standards Related to Reports on Audited Financial Statements and Related Amendments to PCAOB Standards,* PCAOB Release No. 2011-003 (June 21, 2011) is available at http://pcaobus.org/Rules/Rulemaking/Docket034/Concept_Release.pdf.

[3/] A transcript of the public roundtable is available at http://pcaobus.org/Rules/Rulemaking/Docket034/09152011_Roundtable_Transcript.pdf.

[4/] IAG meeting details and webcasts for March 2011 and 2012 are available at http://pcaobus.org/News/Events/Pages/03162011_IAGMeeting.aspx and http://pcaobus.org/News/Webcasts/Pages/03282012_IAGMeeting.aspx.

Advisory Group ("SAG") meetings.[5/] Some commenters supported changes to the auditor's report that describe the auditor's existing responsibility related to information outside the financial statements to inform investors and other financial statement users of the extent of the auditor's responsibility for other information contained in a document that also contains the financial statements and the related auditor's report.

This Appendix discusses significant comments received during the Board's outreach regarding other information in documents containing audited financial statements and the auditor's report. It also provides additional background information regarding the requirements in the proposed other information standard and amendments.

The Board requests comments on specific questions included in this Appendix as well as on its proposal in general. Additionally, the Board is seeking comment on economic considerations related to the proposed other information standard and amendments, including potential costs. To assist the Board in evaluating such matters, the Board is requesting relevant information and empirical data, to the extent available to commenters. Commenters providing cost estimates are requested to provide the basis for any estimate provided. Finally, the Board is seeking comment on the applicability of the proposed other information standard and amendments to the audits of brokers and dealers. Considerations related to the applicability of the proposed other information standard and amendments to audits of emerging growth companies are discussed in Appendix 7.

The following sections describe the requirements in the proposed other information standard and amendments.

## I. Introduction (Paragraph 1 of the Proposed Other Information Standard)

The proposed other information standard establishes requirements regarding the auditor's responsibilities with respect to the other information in certain documents containing audited financial statements and the related auditor's report. As more fully described later in this section, the introduction to the proposed other information standard provides a description of "other information," as used in the proposed other

---

5/ SAG meeting transcripts for November 2011 and 2012 are available at http://pcaobus.org/Rules/Rulemaking/Docket034/11102011_SAG_Transcript.pdf, http://pcaobus.org/Rules/Rulemaking/Docket034/11162012_SAG_Transcript.pdf, and http://pcaobus.org/Rules/Rulemaking/Docket034/11152012_SAG_Transcript.pdf.

information standard, including (1) the documents to which the proposed other information standard would apply and (2) the information to which the proposed other information standard would not apply.

## A. Description of Other Information and Applicability of the Proposed Other Information Standard

### *1. Description of Other Information*

The proposed other information standard describes "other information" as information, other than the audited financial statements[6/] and the related auditor's report, in a company's annual report that is filed with the SEC under the Securities Exchange Act of 1934 ("Exchange Act") and contains that company's audited financial statements and the related auditor's report. The auditor's responsibilities with respect to other information outside the financial statements would thus focus on other information contained in annual reports filed with the SEC, such as Form 10-K. Annual reports filed with the SEC contain other information that is relevant and of interest to investors and other financial statement users.

Annual reports filed with the SEC under the Exchange Act may include information incorporated by reference from other SEC filings. Under the proposed other information standard, other information includes information contained in the annual report that is filed with the SEC under the Exchange Act as well as specific information that is incorporated by reference into the annual report.

Specifically, a note to the introduction of the proposed other information standard clarifies when information that is incorporated by reference would be included in the scope of the proposed other information standard. The note provides that other information includes information incorporated by reference into the Exchange Act annual report when the information is available to the auditor prior to the issuance of the auditor's report. Additionally, when the annual report is a Form 10-K, the other information in the annual report includes specific information incorporated by reference that is available to the auditor subsequent to the issuance of the auditor's report when that information is contained in the company's definitive proxy statement filed within 120

---

[6/] This standard uses the term "financial statements" as used by the U.S. Securities and Exchange Commission ("SEC") to include all notes to the statements and all related schedules. See SEC Rule 1-01(b) of Regulation S-X, 17 C.F.R. § 210.1-01(b).

days after the end of the fiscal year covered by the Form 10-K. No other information incorporated by reference in the annual report that is not available to the auditor prior to the issuance of the auditor's report is included in the scope of the proposed other information standard.

Annual reports filed with the SEC under the Exchange Act may be amended from time to time, including when there are revisions to amounts or disclosures in the previously issued audited financial statements. Amended annual reports, such as the Form 10-K/A, that contain the company's audited financial statements and the related auditor's report, are included in the scope of the proposed other information standard.

When an amended annual report contains revisions to amounts or disclosures in the previously issued financial statements that affect the auditor's report that was filed with the initial Form 10-K, then the amended annual report would be treated similar to an initial filing on Form 10-K. In this situation, because the auditor essentially is considering whether to update or issue a new auditor's report,[7/] the auditor would perform all the procedures under the proposed other information standard.

When an amended annual report does not contain revisions to amounts or disclosures in the previously issued financial statements that affect the auditor's report that was filed with the initial Form 10-K, then the auditor would treat the other information in the amended filing as not available prior to the issuance of the auditor's report.[8/]

The scope of the proposed other information standard contains some similarities to, and some differences from, the Board's existing auditing standard relating to other information, AU sec. 550.

AU sec. 550 currently applies to other information contained in (1) annual reports to holders of securities or beneficial interests, annual reports of organizations for charitable or philanthropic purposes distributed to the public, and annual reports filed with regulatory authorities under the Exchange Act or (2) other documents to which the

---

[7/] See AU sec. 530, *Dating of the Independent Auditor's Report*.

[8/] See Section IV.D., *Responding When the Other Information Is Not Available Prior to the Issuance of the Auditor's Report*.

auditor, at the client's request, devotes attention.[9/] Existing AU sec. 550 does not specifically mention information incorporated by reference into an annual report.

Thus, consistent with existing AU sec. 550, the proposed other information standard would apply to annual reports filed under the Exchange Act. However, certain other annual reports included in the scope of the existing standard, such as a company's annual report to security holders that is provided to, but not filed with, the SEC (sometimes referred to as the "glossy" annual report because it may appear as a glossy publication) would not be within the scope of the proposed other information standard. As discussed further below, in some cases, a glossy annual report may be incorporated by reference, either in whole or in part, into a company's Form 10-K prior to the issuance of the auditor's report. In those circumstances, the portions of the glossy annual report, other than the financial statements, that are incorporated by reference would be considered other information under the proposed other information standard.

Additionally, unlike existing AU sec. 550, the proposed other information standard would not apply to other documents to which the auditor, at the company's request, devotes attention. The proposed other information standard does not preclude the auditor from applying the procedures in the standard to such other documents. Also, the proposed other information standard does not preclude the auditor from applying additional procedures not described in the proposed other information standard to the other information.

Finally, the proposed other information standard is consistent with existing AU sec. 550 in that it would not apply to documents filed with the SEC under the Securities Act of 1933 ("Securities Act").[10/] The proposed other information standard, like AU sec. 550, refers the auditor to AU sec. 711, *Filings Under Federal Securities Statutes*, and the auditor's responsibilities for Securities Act filings under the federal securities laws.[11/] The Board recognizes, however, that certain Securities Act filings may incorporate by reference annual reports containing audited financial statements and audit reports that are filed with the SEC under the Exchange Act. For a further discussion regarding the Board's considerations related to Securities Act documents, see Section XII, *Considerations Related to Securities Act Documents*.

---

9/ See AU sec. 550.02.

10/ See AU sec. 550.03.

11/ See, e.g., Section 11(a) of the Securities Act, 15 U.S.C. § 77k(a).

*2. Applicability to Annual Reports Filed with the SEC under the Exchange Act That Contain Other Information*

As noted above, the proposed other information standard would apply to annual reports that are filed with the SEC under the Exchange Act that contain audited financial statements and the related auditor's report.

The proposed other information standard would apply to the version of the annual report document filed with the SEC either electronically using the Electronic Data Gathering, Analysis and Retrieval ("EDGAR") system[12/] or as a paper filing.[13/] Because the proposed other information standard is limited to annual reports that are filed with the SEC, the auditor's responsibilities would not extend to annual reports that are distributed by other means, such as corporate websites or social media. Information on websites, such as a company's own website, might contain audited financial statements, the related auditor's reports, or data derived from SEC filings. Consistent with existing AU sec. 9550,[14/] the proposed other information standard would not require auditors to evaluate information contained in electronic sites.

The annual reports covered by the proposed other information standard would include annual reports filed on Forms 10-K, 20-F, 40-F, and N-CSR, among others. The other information contained in these annual report filings can vary depending on the requirements of the SEC form on which the filing is made. For example, other information in a company's annual report filed on Form 10-K would include, among other items, Risk Factors; Selected Financial Data; Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A"); Certain Relationships and Related Transactions, and Director Independence; and exhibits.[15/]

---

12/ See SEC Rule 301 of Regulation S-T, 17 C.F.R. § 232.301. EDGAR currently provides an electronic filing process for submitting documents under the Securities Act, the Exchange Act, the Trust Indenture Act of 1939, and the Investment Company Act of 1940.

13/ See SEC Rule 101 of Regulation S-T, 17 C.F.R. § 232.101. For example, employee stock purchase, savings and similar plans may choose to file their annual reports with the SEC in electronic or paper format.

14/ See AU secs. 9550.16-.18.

15/ Any documents contained in the list of exhibits to the annual report would be considered other information in an annual report under the proposed other

Other information filed by an investment company issuer on Form N-CSR would include, among other items, Code of Ethics and Management's Discussion of Fund Performance ("MDFP").[16/]

Additionally, under the proposed other information standard, management's assertion on internal control over financial reporting would be considered other information when that assertion is included in an annual report filed with the SEC that contains audited financial statements and the related auditor's report, and management's assertion is not subject to an auditor's attestation under Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*. The auditor's responsibilities under the proposed other information standard regarding management's assertion on internal control over financial reporting generally would be consistent with existing AU sec. 9550.[17/] AU sec. 9550 states that, because an auditor is required to consider internal control in an audit of the financial statements, the auditor may be familiar with matters covered in management's assertion on internal control over financial reporting.

*3. Applicability to Information Incorporated by Reference in Annual Reports Filed with the SEC under the Exchange Act*

In many cases, the information incorporated by reference into an annual report filed with the SEC is available to the auditor prior to the issuance of the auditor's report. For example, as discussed above, the entire or portions of a company's glossy annual report may be incorporated by reference[18/] into a company's Form 10-K.[19/] Under the

---

information standard. The proposed other information standard would not apply to information formatted in eXtensible Business Reporting Language ("XBRL") that is furnished with the SEC as an exhibit or otherwise. See SEC, *Interactive Data to Improve Financial Reporting*, Release No. 33-9002 (Jan. 30, 2009) at 94-95 and 101.

16/ See Item 27(b)(7) of SEC Form N-1A for open-end investment companies. Money market investment companies are exempt from this requirement to provide MDFP. Form N-2, which sets reporting requirements for closed-end funds, does not require MDFP.

17/ See AU sec. 9550.07-.11.

18/ See Form 10-K, 17 C.F.R. § 249.310, General Instructions G, "Information to Be Incorporated by Reference," paragraph (2). See also SEC Exchange Act Rule 12b-23, 17 C.F.R. § 240.12b-23.

19/ Glossy annual reports may also be included as part of a combined report filed on Form 10-K. In this case, information from glossy annual reports, other than the proposed other information standard, information incorporated by reference that is available to the auditor prior to the issuance of the auditor's report would be considered other information and covered by the proposed other information standard. The auditor's responsibilities for other information that is incorporated by reference and is available prior to the issuance of the auditor's report would be the same as the auditor's responsibilities for other information contained in the document filed with the SEC.

Under the proposed other information standard, with one exception, the auditor would not be responsible for information incorporated by reference that is not available to the auditor prior to the issuance of the auditor's report. Specifically, the proposed other information standard would apply to information incorporated by reference in a Form 10-K from the company's definitive proxy statement filed within 120 days after the end of the fiscal year covered by the Form 10-K.[20/] Though this information may be filed subsequently, it is an essential part of the company's annual report on Form 10-K and is necessary to make the document complete.[21/]

---

audited financial statements, would be considered other information under the proposed other information standard. See Form 10-K, 17 C.F.R. § 249.310, General Instructions H, "Integrated Reports to Security Holders."

[20/] The information required by Part III of Form 10-K (i.e., Item 10. Directors, Executive Officers and Corporate Governance; Item 11. Executive Compensation; Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters; Item 13. Certain Relationships and Related Transactions, and Director Independence; and Item 14. Principal Accountant Fees and Services) may be incorporated by reference from a proxy statement. See SEC Exchange Act Rule 12b-23, 17 C.F.R. § 240.12b-23. See also Form 10-K, 17 C.F.R. § 249.310, General Instructions G, "Information to Be Incorporated by Reference," Paragraph (3).

[21/] The standard also would apply to the other information that was to be incorporated by reference from the proxy statement but was instead filed as an amendment to the Form 10-K. If a proxy statement is not filed with the SEC within 120 days after the end of the fiscal year covered by the Form 10-K, the information that was to be incorporated by reference from the proxy statement is instead filed as an amendment to the Form 10-K. See Form 10-K, 17 C.F.R. § 249.310, General Instructions G, "Information to Be Incorporated by Reference," paragraph (3).

## B. Information Included in Annual Reports Containing Audited Financial Statements and the Related Auditor's Report to Which the Proposed Other Information Standard Would Not Apply

Consistent with AU sec. 550,[22/] the proposed other information standard would not apply to (1) supplemental information addressed by Proposed Auditing Standard, *Auditing Supplemental Information Accompanying Audited Financial Statements*,[23/] and (2) required supplementary information addressed by AU sec. 558, *Required Supplementary Information*. The proposed other information standard also would not apply to management's assertion on internal control over financial reporting in an audit of internal control over financial reporting that is integrated with an audit of the financial statements.[24/] The information described in these circumstances would be subject to audit or other procedures under other PCAOB standards named above. Therefore, there is no need to impose the requirements of the proposed other information standard on that information because the auditor's responsibilities are already described in the other PCAOB standards.

The proposed other information standard would apply to the other information in the annual report of the company that is making the filing. Audited financial statements of an entity other than the company, such as a business acquired or to be acquired, may be required to be included in the company's annual report.[25/] The Board does not intend for the other entity's financial statements to be considered other information in the company's annual report, under the proposed other information standard, because they are not the company's financial statements and were already subject to a separate audit. Although the Board does not intend for the proposed other information standard to apply in such situations, the Board is seeking comment on whether the proposed other information standard should apply to audited financial statements of another entity that are required to be filed in a company's report under Article 3 of Regulation S-X and whether there are practical issues of doing so.

---

[22/] See AU sec. 550.03.

[23/] See *Proposed Auditing Standard, Auditing Supplemental Information Accompanying Audited Financial Statements, and Related Amendments to PCAOB Standards*, PCAOB Release No. 2011-005 (July 12, 2011).

[24/] See Auditing Standard No. 5.

[25/] See Article 3 of Regulation S-X.

Questions Related to Section I:

1. Is the scope of the proposed other information standard clear and appropriate? Why or why not? Are there Exchange Act documents, other than annual reports, that the Board should consider including in the scope of the proposed other information standard?

2. Is it appropriate to apply the proposed other information standard to information incorporated by reference? Why or why not? Are there additional costs or practical issues with including information incorporated by reference in the scope of the proposed other information standard? If so, what are they?

3. Is it appropriate to apply the proposed other information standard to amended annual reports? Why or why not? Are there additional costs or practical issues with including amended annual reports in the scope of the proposed other information standard? If so, what are they?

4. Should the company's auditor, the other entity's auditor, or both have responsibilities under the proposed other information standard regarding audited financial statements of another entity that are required to be filed in a company's annual report under Article 3 of Regulation S-X? Why or why not? Are there practical issues with applying the proposed other information standard to the other entity's audited financial statements?

## II. Objectives (Paragraph 2 of the Proposed Other Information Standard)

Consistent with other recently issued PCAOB auditing standards, the Board has included a section on the objectives of the auditor in the proposed other information standard to highlight the overall context for the requirements of the standard. Providing an overarching concept as audit objectives for the auditor to take into account can assist the auditor in performing the procedures required by the proposed other information standard and evaluating the results of those procedures.

The proposed other information standard states that the objectives of the auditor are:

- To evaluate whether the other information contains (1) a material inconsistency with amounts or information, or the manner of their presentation, in the audited financial statements ("material inconsistency");

(2) a material misstatement of fact; or (3) both and, if so, to respond appropriately; and

- When issuing an auditor's report, to communicate in the auditor's report the auditor's responsibilities for other information and whether, based on relevant audit evidence obtained and conclusions reached during the audit, the other information contains a material inconsistency, a material misstatement of fact, or both.

The Board's existing standard, AU sec. 550 does not specifically identify an objective for the auditor regarding other information.

Question Related to Section II:

5. Do the objectives assist the auditor in performing the procedures required by the proposed other information standard to evaluate the other information and report on the results of the evaluation?

## III. Evaluating the Other Information (Paragraphs 3 – 5 of the Proposed Other Information Standard)

The proposed other information standard would require the auditor to evaluate whether the other information contains (1) a material inconsistency, (2) a material misstatement of fact, or (3) both. As more fully described later in this section, the auditor's evaluation would include reading the other information and performing specific procedures based on relevant audit evidence obtained and conclusions reached during the audit.

AU sec. 550 currently requires the auditor to read the other information and consider whether such information, or the manner of its presentation, is materially inconsistent with information, or the manner of its presentation, appearing in the financial statements.[26/] Additionally, if, while reading the other information for a material inconsistency, the auditor becomes aware of information that the auditor believes is a material misstatement of fact, that is not a material inconsistency, the auditor is required to discuss the matter with management.[27/] Existing AU sec. 550 does not specify the procedures that the auditor should perform when considering the other information, but the standard describes the auditor's responsibilities for responding to identified material inconsistencies or material misstatements of fact.

26/ See AU sec. 550.04.

27/ See AU sec. 550.05.

## A. Material Inconsistency (Paragraph 3 of the Proposed Other Information Standard)

The proposed other information standard generally retains the description of material inconsistency under existing AU sec. 550. A material inconsistency would exist under the proposed other information standard when the other information is materially inconsistent with amounts or information, or the manner of their presentation, in the audited financial statements. The other information often includes amounts or qualitative statements that are directly related to the financial statements because they are intended to be the same as, or to provide greater detail about, amounts or information in the financial statements.

A material inconsistency would involve an inconsistency between amounts in the financial statements and amounts in the other information that have a direct relationship to the company's financial statements, such as quantitative information in the Selected Financial Data or MD&A sections, among others, of an annual report on Form 10-K, but would not be limited to only quantitative information. Qualitative statements, such as the description of the company's critical accounting policies, estimates, and related assumptions in the other information of an annual report on Form 10-K, also would be directly related to accounts and disclosures in the financial statements and thus might involve a material inconsistency.

## B. Material Misstatement of Fact (Paragraph 3 of the Proposed Other Information Standard)

The proposed other information standard also retains the concept of material misstatement of fact in AU sec. 550. Similar to the existing standard, the proposed other information standard does not define material misstatements of fact, but describes the concept of material misstatements of fact in the context of the auditor's responsibilities.

Material misstatements of fact could relate to, among others, statements about the company's competitive environment, technological developments, or supplier relationships. Although such statements in the other information do not directly relate to the accounts and disclosures in the financial statements, the auditor might have knowledge of such information as part of obtaining audit evidence or reaching conclusions during the audit.[28/] Such statements also might be an important driver of the company's stock market value or be of particular importance to investors.

---

[28/] For example, during the audit, the auditor may obtain such information as audit evidence in connection with obtaining an understanding of the company and its

For example, management might state in the other information that the company has the largest market share in the company's industry. This information could be material to an investor's decision about the company. The auditor might be aware, based on relevant audit evidence obtained during the audit, that the company does not have the largest share in the relevant industry. The proposed other information standard would require the auditor to evaluate whether management's statement represents a material misstatement of fact.

## C. Auditor's Responsibility to Evaluate (Paragraph 4 of the Proposed Other Information Standard)

The proposed other information standard would require the auditor to read the other information and, based on relevant audit evidence obtained and conclusions reached during the audit, evaluate the other information. In order to strengthen the auditor's performance responsibilities to provide a basis for the auditor to evaluate the other information, the proposed other information standard provides specific procedures the auditor would perform related to the other information. The procedures set forth in paragraph 4 of the proposed other information standard involve using information and evidence already obtained by the auditor rather than procedures to obtain additional evidence.

In evaluating whether the other information contains a material inconsistency, a material misstatement of fact, or both, the auditor would refer to the definition of materiality under the federal securities laws. In interpreting those laws, the United States Supreme Court has held that a fact is material if there is "a substantial likelihood that the . . . fact would have been viewed by the reasonable investor as having significantly altered the 'total mix' of information made available."[29/] As the Supreme Court has further explained, determinations of materiality require "delicate assessments of the inferences a 'reasonable shareholder' would draw from a given set of facts and the significance of those inferences to him . . .."[30/]

Since the purpose of evaluating the other information is to assess whether the other information contains a material inconsistency, a material misstatement of fact, or

---

environment. See paragraph 9 of Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*.

[29/] TSC Industries v. Northway, Inc., 426 U.S. 438, 449 (1976). See also, Basic, Inc. v. Levinson, 485 U.S. 224, 231 to 232 (1988).

[30/] TSC Industries, 426 U.S. at 450.

both, the Board believes that it is appropriate for the auditor to use the established definition of materiality under the federal securities laws applicable to corporate reporting for this evaluation. Auditors should be familiar with this definition because, among other things, it is used to evaluate whether uncorrected misstatements detected during the audit are material.[31/] The Board understands that MD&A and other parts of the other information may contain information that does not reach the quantitative materiality level established for purposes of planning the audit[32/] and that the auditor accordingly may not have obtained audit evidence concerning those matters. As discussed above, the auditor's responsibility to evaluate such information would be based on relevant audit evidence obtained and conclusions reached during the audit. If, however, on that basis, the auditor identifies a potential inconsistency or misstatement of fact in the other information, the auditor should assess its materiality under the federal securities laws' definition of that term.

*1. Auditor's Responsibility to Read*

As noted above, the proposed other information standard retains the requirement of existing AU sec. 550 for the auditor to read the other information. The requirement "to read" in the proposed other information standard has the same meaning as in AU sec. 550 and other PCAOB standards, such as reading interim financial information,[33/] board minutes,[34/] prospectuses and registration statements,[35/] and other information by the engagement quality reviewer or during a review of interim financial information.[36/]

---

[31/] See paragraph 17 of Auditing Standard No. 14, *Evaluating Audit Results.*

[32/] See Auditing Standard No. 11, *Consideration of Materiality in Planning and Performing an Audit.*

[33/] See, e.g., paragraphs .11 and .18.e. of AU sec. 722, *Interim Financial Information*.

[34/] See, e.g., AU secs. 722.18.a. and .19.

[35/] See, e.g., AU secs. 711.08-.11.

[36/] See, e.g., paragraphs 10.g. and 15.e. of Auditing Standard No. 7, *Engagement Quality Review,* and AU sec. 722.18.f.

*2. Auditor's Responsibility to Evaluate*

The proposed other information standard describes the auditor's responsibility as "should evaluate" the other information. Existing AU sec. 550 states that the auditor "should consider" whether the other information is materially inconsistent with the financial statements. AU sec. 550 further indicates that if the auditor concludes that there is a material inconsistency with the financial statements based on the auditor's reading and considering, then the auditor should perform certain procedures.[37/]

The proposed other information standard does not retain the term "should consider." PCAOB Rule 3101, *Certain Terms Used in Auditing and Related Professional Practice Standards,* indicates that if a Board standard provides that the auditor "should consider" an action or procedure, consideration of the action or procedure is presumptively mandatory while the action or procedure is not. As used in AU sec. 550, "should consider" is not followed by a specific action or procedure, but rather is described as a stand-alone requirement without further context regarding the action or procedure. "Should evaluate" is used in other PCAOB standards when the auditor is expected to come to a conclusion based on the performance of certain procedures.[38/]

The proposed other information standard differs from AU sec. 550 in that it requires the auditor to evaluate the other information for both a material inconsistency and a material misstatement of fact. Under existing AU sec. 550, the auditor's responsibility for a material misstatement of fact is conditioned on the auditor "becoming aware" of a material misstatement of fact while reading the other information for a material inconsistency. AU sec. 550 also currently states that, if the auditor becomes aware of information that he or she believes is a material misstatement of fact, that is not a material inconsistency, the auditor should consider that he or she may not have the expertise to assess the validity of the statement, that there may be no standards by which to assess its presentation, and that there may be valid differences of judgment or opinion.[39/]

The proposed other information standard would require the auditor to evaluate the other information for a material inconsistency and for a material misstatement of fact

---

[37/] See AU sec. 550.04.

[38/] See, e.g., Auditing Standard No. 7 and Auditing Standard No. 12.

[39/] See AU sec. 550.05.

based on relevant audit evidence obtained and conclusions reached during the audit. A consistent requirement to evaluate the other information for both material inconsistencies and for material misstatements of fact is appropriate because the auditor's evaluation would be based on the same factors – relevant audit evidence obtained and conclusions reached during the audit.

*3. Performing Procedures to Evaluate the Other Information*

In addition to reading the other information, the auditor's evaluation under the proposed other information standard would include performing procedures intended to help the auditor identify whether the other information contains material inconsistencies and material misstatements of fact. Existing AU sec. 550 does not specify any procedures for the auditor to perform in considering the other information.

The required procedures in the proposed other information standard set forth the nature and extent of the auditor's work to evaluate the other information. The procedures in paragraph 4 of the proposed other information standard involve using information and evidence already obtained by the auditor rather than procedures to obtain additional evidence. Specifically, the auditor's evaluation would be based on relevant audit evidence obtained and conclusions reached during the audit. Under other PCAOB standards, the auditor is required to obtain sufficient appropriate audit evidence[40/] and reach conclusions during the audit.[41/] These existing responsibilities provide the basis for the auditor's evaluation of the other information under the proposed other information standard.

Some commenters on the concept release indicated that they are aware that some auditors perform certain procedures related to the other information, such as comparing numbers in the other information to the audited financial statements, recalculating percentages, and providing input to management regarding the other information. Similarly, the Commission on the Auditors' Responsibilities established by the American Institute of Certified Public Accountants (known as the "Cohen Commission"), which examined the auditor's responsibilities and the form of the auditor's report, recommended in 1978 – prior to the establishment of the PCAOB – that the auditing standard for other information be revised to require the auditor to (1)

---

40/ See Auditing Standard No. 15, *Audit Evidence*.

41/ See Auditing Standard No. 14 and paragraphs 62-73 of Auditing Standard No. 5.

compare the other information to the financial statements and the audit work papers for inconsistencies with the auditor's knowledge as a result of the audit and (2) recompute percentages or information presented in a manner different from that in the financial statements.[42/] These recommendations of the Cohen Commission have never been adopted as requirements for the auditor.

Because existing AU sec. 550 does not require procedures other than to "read and consider" the other information, the application of the auditor's responsibilities regarding other information among accounting firms may not be consistent. While the Board believes that, in practice, some auditors currently perform procedures related to other information similar to the procedures in the proposed other information standard, the Board's proposal is designed to promote a consistent basis for the auditor's evaluation of other information. The required procedures are discussed in Subsections a.–d. of this Section.

The proposed procedures are more specific than the "read and consider" approach in existing AU sec. 550 and thus likely would increase auditor effort and, therefore, costs for firms, particularly those firms that might not currently be performing similar procedures on the other information. Also, enhancing the auditor's responsibilities from "becoming aware" of a material misstatement of fact under existing AU sec. 550[43/] to performing specific procedures to evaluate whether the other information contains a material misstatement of fact might result in additional auditor effort. It is also anticipated that auditors would incur one-time costs related to the proposed other information standard, such as updating firm audit methodologies to reflect the new performance and reporting requirements and training firm personnel.

The required procedures under the proposed other information standard would focus the auditor's attention on the identification of material inconsistencies between the other information and the company's financial statements and on the identification of material misstatements of fact, based on relevant audit evidence obtained and conclusions reached during the audit. When evaluating the other information, the auditor would be in a position to identify potential inconsistencies between the other information and the company's financial statements that could be difficult for investors

---

[42/] See AICPA, *The Commission on the Auditors' Responsibilities: Report, Conclusions and Recommendations* (1978) at 69 available at http://www.sechistorical.org/collection/papers/1970/1978_0101_CohenAuditors.pdf.

[43/] See AU sec. 550.05.

and other financial statement users to identify when analyzing the company's financial performance. Such inconsistencies could occur for a number of reasons, including unintentional error, managerial biases,[44/] or intentional misreporting.[45/] As a result of the auditor's evaluation of other information, and communication of any potential material inconsistencies or material misstatements of fact to the company's management, the proposed other information standard could promote consistency between the other information and the audited financial statements, which in turn could increase the amount and quality of information[46/] available to investors and other financial statement users. In general, increasing the amount or quality of information available to investors also could facilitate more efficient capital allocation decisions.[47/] Academic research has shown that the increased quality of information could result in a reduction in the average cost of capital.[48/]

[46/] The term "quality of information" is formalized by the concept of precision. Information economics frequently treats information as consisting of two components: a signal that conveys information and noise which inhibits the interpretation of the signal. Precision is the inverse of noise so that decreased noise results in increased precision and a more readily interpretable signal. See Robert E. Verrecchia, *The Use of Mathematical Models in Financial Accounting*, 20 Journal of Accounting Research 1, 1-42 (1982).

[47/] See Richard A. Lambert, Christian Leuz, and Robert E. Verrecchia, *Information Asymmetry, Information Precision, and the Cost of Capital*, 16 Review of Finance 1, 1-29 (2011).

[48/] Empirical research generally finds that increased public disclosure of information is associated with decreased cost of equity capital. For a review of the literature, see Christine A. Botosan, Marlene A. Plumlee, and Yuan Xie, *The Role of*

a. Amounts in the Other Information Related to the Financial Statements (Paragraph 4.a. of the Proposed Other Information Standard)

For amounts in the other information that are intended to be the same as, or provide greater detail about, amounts in the financial statements, the auditor would be required to evaluate the consistency of the amounts and the manner of their presentation with the financial statements or relevant evidence obtained during the audit. If the amounts in the other information are at the same level of detail as those in the financial statements, for example, amounts in the Selected Financial Data section, among others, of an annual report on Form 10-K, the auditor would evaluate the consistency of the amounts with amounts in the financial statements.

The other information also might contain amounts that are more disaggregated than the amounts in the financial statements. For example, amounts related to Results of Operations in the MD&A section, among others, of Form 10-K might be presented in a way that provides greater detail on a geographic or product basis than the amounts presented in the financial statements. In those situations, the auditor would evaluate the consistency of the amounts in the other information and the manner of their presentation with relevant evidence obtained during the audit that includes disaggregated information.

b. Qualitative Statements in the Other Information Related to the Financial Statements (Paragraph 4.b. of the Proposed Other Information Standard)

For any qualitative statement in the other information that is intended to represent, or provide greater detail about, information in the financial statements, the auditor would evaluate the consistency of the information and the manner of its presentation with the financial statements, including the financial statement disclosures, and with relevant audit evidence. Such qualitative other information might appear in the MD&A section, among others, of Form 10-K and relate to, for example, critical accounting policies, practices, and estimates or the description of off-balance sheet arrangements.

---

*Information Precision in Determining the Cost of Equity Capital,* 9 Review of Accounting Studies 233, 233-259 (2004).

c. Other Information That Is Not Directly Related to the Financial Statements (Paragraph 4.c. of the Proposed Other Information Standard)

With respect to other information that is not directly related to the financial statements, the auditor would compare the information to relevant audit evidence obtained and conclusions reached during the audit. Other information that is not directly related to the financial statements might appear in the Business, Risk Factors, or Quantitative and Qualitative Disclosures about Market Risk sections, among others, of an annual report on Form 10-K[49/] or the MDFP section of an annual report on Form N-CSR.[50/]

d. Recalculation of Amounts in the Other Information (Paragraph 4.d. of the Proposed Other Information Standard)

The proposed other information standard also would require the auditor to evaluate certain amounts in the other information by recalculating the amounts for mathematical accuracy. The amounts that would be subject to this procedure would be amounts in the other information that are calculated using amounts in (1) the other information; (2) the financial statements; or (3) relevant audit evidence.

For example, this requirement of the proposed other information standard would apply to amounts in the other information that the auditor can recalculate without the need to refer to a formula or when the formula is generally understood. The above-mentioned requirement would include amounts, such as totals or percentages, which are ordinarily calculated using simple mathematical operations that do not require a formula, as well as generally understood ratios, such as the current ratio. If the auditor needs to refer to a formula for the recalculation of an amount, such as for return on capital employed, the auditor would be required to recalculate the amount only when the formula is provided or described in the annual report. However, the auditor would not be required to evaluate the appropriateness or sufficiency of the formula used in the calculation.

---

[49/] See Instructions to Form 10-K available at http://www.sec.gov/about/forms/form10-k.pdf.

[50/] See Item 27(b)(7) of SEC Form N-1A for open-end investment companies. Money market investment companies are exempt from this requirement to provide MDFP.

## D. Responding When the Auditor Identifies a Potential Material Inconsistency, A Potential Material Misstatement of Fact, or Both (Paragraph 5 of the Proposed Other Information Standard)

As a result of performing the evaluation procedures under paragraph 4 of the proposed other information standard, the auditor might identify a potential material inconsistency, a potential material misstatement of fact, or both. If so, the proposed other information standard would require the auditor to discuss the matter with the company's management. The proposed other information standard also would require that the auditor perform additional procedures, as necessary, to determine whether there is a material inconsistency, a material misstatement of fact, or both. Such additional procedures might include (1) requests for additional documentation and (2) consultations outside of the engagement team, such as a national office or other parties with appropriate expertise. The procedures would vary based on the auditor's evaluation of the relevant facts and circumstances.

It is anticipated that, in many situations, the auditor's discussion with management and the results of the additional procedures would provide the auditor with additional information that could be sufficient to enable the auditor to determine if there is a material inconsistency, a material misstatement of fact, or both. If the auditor determines that there is a material inconsistency between the other information and the audited financial statements, the auditor also would determine whether the financial statements or the other information would require revision. A material misstatement of fact generally would require revision of the other information, not the financial statements, because a material misstatement of fact in the other information is not directly related to the financial statements.

Existing AU sec. 550 does not specify the procedures to be performed when the auditor identifies a potential material inconsistency but has not reached a conclusion about the material inconsistency. AU sec. 550 describes the auditor's responsibilities once the auditor has reached a conclusion that a material inconsistency exists. However, when the auditor becomes aware of information that the auditor believes is a material misstatement of fact, and prior to reaching a conclusion about the material misstatement of fact, AU sec. 550 currently requires the auditor to discuss the matter with management.[51/] The requirement in the proposed other information standard to discuss the matter with management is similar to the requirement in AU sec. 550 regarding a material misstatement of fact.

---

[51/] See AU sec. 550.05.

If the auditor identifies a potential material inconsistency, a potential material misstatement of fact, or both, and the auditor performs additional procedures, as necessary, the additional procedures likely would result in additional auditor effort as compared to the existing requirements in AU sec. 550.

Questions Related to Section III:

6. Is it appropriate to require the auditor to evaluate the other information for both a material inconsistency and for a material misstatement of fact? If not, why not?

7. Would the evaluation of the other information increase the quality of information available to investors and other financial statement users and sufficiently contribute to greater confidence in the other information? If not, what additional procedures should the Board consider?

8. Is the federal securities laws' definition of materiality the appropriate standard for the auditor's responsibility to evaluate the other information? Would applying this definition represent a change to the materiality considerations auditors currently use under AU sec. 550?

9. Are the proposed procedures with respect to evaluating the other information clear, appropriate, and sufficient? If not, why not?

10. Is it understood which amounts in the other information the auditor would be required to recalculate under paragraph 4.d.? If not, why not?

11. Are there additional costs beyond those described in this Appendix related to the proposed required procedures for the evaluation of the other information? If so, what would these costs be?

12. Are the proposed auditor responses under paragraph 5 appropriate when the auditor identifies a potential material inconsistency, a potential material misstatement of fact, or both? If not, why not?

13. Are there additional costs beyond those described in this Appendix related to responding when the auditor identifies a potential material inconsistency, a potential material misstatement of fact, or both? If so, what would these costs be?

## IV. Responding When the Auditor Determines That the Other Information Contains a Material Inconsistency, a Material Misstatement of Fact, or Both (Paragraphs 6-11 of the Proposed Other Information Standard)

### A. Communication with Management (Paragraph 6 of the Proposed Other Information Standard)

If the auditor determines that the other information contains a material inconsistency, a material misstatement of fact, or both, the proposed other information standard would require the auditor to request management to revise the other information. This requirement was retained from AU sec. 550 with respect to a material inconsistency.[52/] However, with respect to a material misstatement of fact, AU sec. 550 does not include an explicit requirement for the auditor to request that management revise the other information. Rather, AU sec. 550 includes a requirement for the auditor to propose that management consult with other parties, such as legal counsel.[53/]

### B. The Auditor's Response If Management Does Not Appropriately Revise the Other Information (Paragraph 7 of the Proposed Other Information Standard)

If management does not appropriately revise the other information, the auditor's response under the proposed other information standard would vary depending on whether the other information had been available to the auditor prior to the issuance of the auditor's report. When the other information is available to the auditor prior to the issuance of the auditor's report and management, in response to a request by the auditor, does not revise appropriately the other information to address a material inconsistency, a material misstatement of fact, or both, then the auditor would be required to perform certain procedures that are described in paragraphs 8 and 9 of the proposed other information standard and in Section IV.C., *Responding When the Other Information Is Available Prior to the Issuance of the Auditor's Report*, below. Additionally, when the other information is not available to the auditor prior to the issuance of the auditor's report and the other information is not appropriately revised by management, then the auditor would be required to perform other procedures described in paragraphs 10 and 11 of the proposed other information standard and in Section

---

52/ See AU sec. 550.04.

53/ See AU sec. 550.05.

IV.D., *Responding When the Other Information Is Not Available Prior to the Issuance of the Auditor's Report* below.

## C. Responding When the Other Information Is Available Prior to the Issuance of the Auditor's Report (Paragraphs 8-9 of the Proposed Other Information Standard)

Paragraphs 8-9 of the proposed other information standard set forth the auditor's response when (1) the auditor has determined that the other information available to the auditor prior to the issuance of the auditor's report contains a material inconsistency, a material misstatement of fact, or both and (2) the information is not appropriately revised by management. When the other information is available prior to the issuance of the auditor's report, the auditor's response would be the same whether the information is contained in the annual report or is incorporated by reference in it.

### *1. Communication with the Audit Committee (Paragraph 8 of the Proposed Other Information Standard)*

If management does not appropriately revise the other information after the auditor's request, the proposed other information standard would require the auditor to communicate the material inconsistency, the material misstatement of fact, or both, to the audit committee in a timely manner and prior to the issuance of the auditor's report.

Under existing AU sec. 550, if the other information is not revised to eliminate the material inconsistency, the auditor is required to communicate the material inconsistency to the audit committee.[54/] Additionally, if the auditor has concluded that a material misstatement of fact remains after communication to management, AU sec. 550 states that the auditor should communicate the material misstatement of fact to the audit committee, in writing.[55/]

The proposed other information standard would retain the requirements for the auditor to communicate to the audit committee, but would not require the communications regarding a material misstatement of fact to be in writing. This is consistent with the approach taken to communications to the audit committee under Auditing Standard No. 16, *Communications with Audit Committees,* which allows the

---

[54/] See AU sec. 550.04.

[55/] See AU sec. 550.06.

communication to be oral or written.[56/] Auditing Standard No. 16, however, requires the auditor to document communications with the audit committee in the work papers, whether such communications took place orally or in writing.[57/]

*2. Responding When the Other Information Is Not Appropriately Revised (Paragraph 9 of the Proposed Other Information Standard)*

If the other information is not appropriately revised after the auditor's communication with the audit committee, the proposed other information standard would require the auditor to determine his or her responsibilities under Section 10A of the Exchange Act ("Section 10A");[58/] AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*; and AU sec. 317, *Illegal Acts by Clients*. This would direct the auditor to his or her responsibilities under federal securities laws and other PCAOB standards.

Section 10A includes requirements that apply when the auditor detects or otherwise becomes aware of information indicating that an illegal act (whether or not perceived to have a material effect on the financial statements) has or may have occurred.[59/] AU sec. 316 provides requirements regarding the auditor's responsibilities related to fraud in the audit of financial statements. AU sec. 317 provides the nature and extent of the auditor's consideration in the audit of financial statements of the possibility for an illegal act by the company.

Additionally, if the other information is not appropriately revised after the auditor's communication to the audit committee, the proposed other information standard would require the auditor to determine whether to (1) issue an auditor's report that states that the auditor has identified in the other information a material inconsistency, a material misstatement of fact, or both that has not been appropriately revised and describes the material inconsistency, the material misstatement of fact, or both or (2) withdraw from the engagement. In determining whether to issue an auditor's report when the other information is not appropriately revised after the auditor's communication to the audit committee, the auditor would consider, among other things, the implications of being associated with an annual report that contains a material inconsistency, a material

---

56/ See paragraph 25 of Auditing Standard No. 16.

57/ Id.

58/ 15 U.S.C. § 78j-1.

59/ See Section 10A(b) of the Exchange Act, 15 U.S.C. § 78j-1(b).

misstatement of fact, or both. The Board is seeking comments regarding the appropriateness of issuing an auditor's report that states that the auditor has identified in the other information a material inconsistency, a material misstatement of fact, or both, that has not been appropriately revised and describes the material inconsistency, the material misstatement of fact, or both.

The proposed other information standard requires the same response and reporting by the auditor for both a material inconsistency and a material misstatement of fact in the other information because the auditor's evaluation of other information would be based on the same factors – relevant audit evidence obtained and conclusions reached during the audit. Investors are likely to be interested in matters that the auditor determined are material inconsistencies or material misstatements of fact in the other information. Additionally, investors might consider the other information that is directly related to the financial statements, as well as the other information that is not directly related to the financial statements, important in their investment decision making.[60/] Therefore, the proposed other information standard aligns the reporting responsibilities for both a material inconsistency and a material misstatement of fact.

There may be circumstances in which the auditor determines that issuing an auditor's report is not appropriate. Similar to existing AU sec. 550,[61/] such circumstances may arise when the nature of the material inconsistency or material misstatement of fact is such that it may affect the auditor's decision to be associated with the annual report. Under the proposed other information standard, such circumstances would require the auditor to determine whether to withdraw from the

---

[60/] See, e.g., IAG survey, *Role, Relevancy, and Value of the Audit.* The responses to survey question 13 indicate that investors often use other information, such as (1) MD&A, (2) Business Description, (3) Risk Factors, and (4) Proxy Information, to make investment decisions. The survey results were presented at the March 2012 IAG meeting and are available at http://pcaobus.org/News/Events/Documents/03282012_IAGMeeting/Audit_Firm_Practice_Survey_Summary.pdf.

[61/] See AU sec. 550.04, which states, in part, that "[o]ther information in a document may be relevant to an audit performed by an independent auditor or to the continuing propriety of his report." It further states that if the other information is not revised to eliminate the material inconsistency "[t]he action he takes will depend on the particular circumstances and the significance of the inconsistency in the other information."

engagement. Consideration of similar actions is currently required by AU sec. 550 with respect to material inconsistency,[62/] but that standard does not specify the auditor's responses with respect to a material misstatement of fact.

The proposed other information standard notes that the auditor may withhold the use of the auditor's report for a prior reporting period. If the auditor determines that it is not appropriate to issue an auditor's report for the current reporting period, the auditor also may withhold the use of the auditor's report for a prior reporting period. This is similar to existing AU sec. 550, which states that the auditor should consider actions such as withholding the use of the auditor's report in the annual report, if the other information is not revised to eliminate the material inconsistency.[63/] AU sec. 550, however, does not specify the period for which the report may be withheld.

**D. Responding When the Other Information is Not Available Prior to the Issuance of the Auditor's Report (Paragraphs 10-11 of the Proposed Other Information Standard)**

Paragraphs 10-11 of the proposed other information standard set forth the auditor's response when (1) the auditor has determined that certain other information, that is not available to the auditor prior to the issuance of the auditor's report, contains a material inconsistency, a material misstatement of fact, or both and (2) the information has not been appropriately revised by management.[64/]

---

62/ See AU sec. 550.04.

63/ Id.

64/ With respect to other information in an amended annual report that contains previously issued audited financial statements and the related auditor's report, the auditor would apply paragraphs 2-7 and 10-11 of the proposed other information standard. Those paragraphs also would apply to (1) information incorporated by reference in a Form 10-K from the company's definitive proxy statement filed within 120 days after the end of the fiscal year covered by the Form 10-K and (2) other information that was to be incorporated by reference from the company's definitive proxy statement but was instead filed as an amendment to the Form 10-K.

*1. Communication with the Audit Committee (Paragraph 10 of the Proposed Other Information Standard)*

If, after the auditor's request, management does not appropriately revise the other information that was not available prior to the issuance of the auditor's report, the proposed other information standard would require the auditor to communicate the material inconsistency, the material misstatement of fact, or both to the audit committee in a timely manner. This requirement is similar to the requirement when the other information is available prior to the issuance of the auditor's report.

*2. Responding When the Other Information Is Not Appropriately Revised (Paragraph 11 of the Proposed Other Information Standard)*

If the other information is not appropriately revised after the auditor's communication of the material inconsistency, material misstatement of fact, or both to the audit committee, and the auditor's report has been issued, the proposed other information standard would require the auditor to determine his or her responsibilities under Section 10A.[65/] Section 10A includes requirements that apply when the auditor detects or otherwise becomes aware of information indicating that an illegal act (whether or not perceived to have a material effect on the financial statements) has or may have occurred.[66/]

Additionally, the proposed other information standard would require the auditor to apply the procedures in AU sec. 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report.* AU sec. 561 provides procedures for the auditor when, subsequent to the date of the auditor's report, the auditor becomes aware that facts may have existed at that date which might have affected the auditor's report if the auditor had been aware of them.[67/]

The procedures in AU sec. 561 would apply in a situation in which the other information that was not available prior to the issuance of the auditor's report was not revised to eliminate a material inconsistency, a material misstatement of fact, or both.[68/]

---

65/ 15 U.S.C. § 78j-1.

66/ See Section 10A(b) of the Exchange Act, 15 U.S.C. § 78j-1(b).

67/ See AU sec. 561.01.

68/ See AU secs. 561.05 and .08-09.a.

For example, if the auditor identified a material inconsistency, a material misstatement of fact, or both in the related party information in a proxy statement covered by this standard, the auditor would:

- Determine the effect on the auditor's report if (1) the material inconsistency between the information about related parties in the other information and the audited financial statements, (2) the material misstatement of fact in the other information about related parties, (3) or both had been known to the auditor prior to the issuance of the auditor's report;[69/] and

- Notify each member of the company's board of directors of the material inconsistency, material misstatement of fact, or both, in the related party information and that if the other information is not appropriately revised, the auditor would take steps to prevent future reliance on the auditor's report.[70/]

If the other information is not appropriately revised after the auditor's notification to the board of directors, in this example the auditor would:

- Notify management and the audit committee that the auditor's report must no longer be associated with the financial statements;[71/] and

- Notify the SEC that the auditor's report should no longer be relied upon.[72/] This notification also would describe the effect the material inconsistency, material misstatement of fact, or both in the related party information would have had on "The Auditor's Responsibility Regarding Other Information" section in the auditor's report if it had been known to the

70/ See AU sec. 561.08. See also the auditor's communication requirements in Section 10A(b) of the Exchange Act, 15 U.S.C. § 78j-1(b), and AU sec. 317.

71/ See AU sec. 561.08a.

72/ See AU sec. 561.08b. See also the auditor's communication requirements in Section 10A(b) of the Exchange Act, 15 U.S.C. § 78j-1(b), and AU sec. 317.

auditor prior to the issuance of the auditor's report and describe the material inconsistency, material misstatement of fact, or both.[73/]

The auditor's responsibilities under AU sec. 561 are not affected when the auditor has resigned or been discharged.[74/] The auditor's responsibilities under the proposed other information standard to apply the procedures in AU sec. 561 similarly would not be affected by the auditor's resignation or dismissal.

Questions Related to Section IV:

14. Are the proposed auditor's responses under paragraphs 8 and 9 appropriate when the auditor determines that the other information that was available prior to the issuance of the auditor's report contains a material inconsistency, a material misstatement of fact, or both? Why or why not?

15. Is it appropriate for the auditor to issue an auditor's report that states that the auditor has identified in the other information a material inconsistency, a material misstatement of fact, or both, that has not been appropriately revised and describes the material inconsistency, the material misstatement of fact, or both? Under what circumstances would such a report be appropriate or not appropriate?

16. Are the proposed auditor's responses under paragraphs 10 and 11 appropriate when the auditor determines that the other information that was not available prior to the issuance of the auditor's report contains a material inconsistency, a material misstatement of fact, or both? Why or why not?

## V. Responding When the Auditor Determines That There Is a Potential Misstatement in the Audited Financial Statements (Paragraph 12 of the Proposed Other Information Standard)

The procedures in the proposed other information standard would require the auditor to evaluate the consistency of the other information to the audited financial

---

[73/] See AU sec. 561.09a.

[74/] See AU sec. 9561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report: Auditing Interpretations of Section 561*.

statements. These procedures would provide an increased auditor focus on other information, which could improve the auditor's identification of potential misstatements in the financial statements. Academic research indicates that comparing non-financial measures commonly found in the other information, such as number of properties and employee headcount, among others, to audited financial statements can help the auditor identify red flags for fraudulent financial reporting.[75/] To the extent that discrepancies between non-financial measures and reported financial performance are red flags for possible financial reporting issues, including fraud, requiring auditors to evaluate other information could help them detect misstatements.

As a result of procedures performed under paragraphs 4 and 5 of the proposed other information standard, the auditor might determine that there is a potential misstatement in the audited financial statements. If the auditor's report on the financial statements has not been issued, the auditor would refer to the requirements of Auditing Standard No. 14 and amended AU sec. 508, [new proposed title] *Departures from Unqualified Opinions and Other Reporting Circumstances,* in this situation.

Auditing Standard No. 14 establishes requirements regarding the auditor's evaluation of audit results and the determination of whether the auditor has obtained sufficient appropriate audit evidence. The auditor's evaluation includes, among other things, an evaluation of misstatements accumulated during the audit.[76/] Proposed amendments to AU sec. 508, as reflected in Appendix 3, would describe the reporting requirements related to departures from an unqualified opinion, such as a qualified opinion, an adverse opinion, or a disclaimer of opinion.

If the auditor's report has already been issued, the proposed other information standard refers the auditor to the procedures in AU sec. 561. AU sec. 561 provides procedures for the auditor when, subsequent to the date of the auditor's report, the auditor becomes aware that facts may have existed at that date that might have affected the auditor's report if the auditor had been aware of them.[77/] Under AU sec. 561, the auditor is required to perform procedures to determine whether the information

---

75/ See Joseph F. Brazel, Keith L. Jones, and Mark F. Zimbelman, *Using Nonfinancial Measures to Assess Fraud Risk*, 47 Journal of Accounting Research 1135, 1135-1166 (2009).

76/ See paragraph 4 of Auditing Standard No. 14.

77/ See AU sec. 561.01.

is reliable and whether the facts existed at the date of the auditor's report, including discussing the matter with company management and the board of directors.[78] The auditor's further responsibilities under AU sec. 561 depend on several factors, including, among others, the effect on the audited financial statements and the auditor's report.[79]

Question Related to Section V:

17. Are the proposed auditor's responses appropriate when, as a result of the procedures performed under the proposed other information standard, the auditor determines that there is a potential misstatement in the financial statements? Why or why not?

## VI. Reporting in the Auditor's Report (Paragraphs 13-14 of the Proposed Other Information Standard)

The proposed other information standard provides a basis for the auditor to report regarding the auditor's responsibilities for, and the results of, the auditor's evaluation of the other information. Reporting on the results of the auditor's evaluation of the other information would provide potentially significant information to investors.

The proposed other information standard would require that, when issuing an auditor's report, the auditor include specific statements regarding the auditor's responsibilities for, and the results of, the auditor's evaluation of other information. The auditor would be required to make these statements in a separate section of the auditor's report titled "The Auditor's Responsibilities Regarding Other Information."[80]

Regardless of whether the auditor identifies a material inconsistency, a material misstatement of fact, or both, when issuing an auditor's report, the auditor would be required to provide in the report the following:

- A statement that, in addition to auditing the company's financial statements [and the internal control over financial reporting (if applicable)],

---

[78] See AU sec. 561.05.

[79] See AU secs. 561.05-.08.

[80] The proposed auditor reporting standard refers the auditor to the reporting requirements of the proposed other information standard related to the auditor's responsibilities for and results of the auditor's evaluation of the other information.

in accordance with the standards of the PCAOB, the auditor evaluated whether the other information contains a material inconsistency with the financial statements, a material misstatement of fact, or both;

- Identification of the annual report that contains the other information, and the audited financial statements and the auditor's report, by referring to the SEC Exchange Act form type and period end date of the financial statements;

- A statement that the auditor's evaluation was based on relevant audit evidence obtained and conclusions reached during the audit of the financial statements; and

- A statement that the auditor did not audit the other information and does not express an opinion on it.

In addition, depending on whether the auditor has identified a material inconsistency, a material misstatement of fact, or both, when issuing an auditor's report, the auditor would be required to provide a statement that:

- The auditor has not identified a material inconsistency or a material misstatement of fact in the other information; or

- The auditor has identified a material inconsistency, a material misstatement of fact, or both, in the other information that has not been appropriately revised and a description of the material inconsistency, the material misstatement of fact, or both.

A statement in the auditor's report that the auditor has not identified a material inconsistency or a material misstatement of fact in the other information is appropriate in situations in which (1) the auditor has not identified a material inconsistency or a material misstatement of fact based on the auditor's evaluation of the other information and (2) the auditor has identified a material inconsistency, a material misstatement of fact, or both, that the auditor requested management to revise and management appropriately revised prior to the issuance of the auditor's report. In situations when management has revised the other information at the auditor's request because the auditor identified material inconsistencies or material misstatements of fact, and the auditor determines that appropriate revisions have been made, then the auditor's report would state that the auditor has not identified a material inconsistency or a material misstatement of fact in the other information since the annual report that is ultimately filed with the SEC no longer contains such inconsistencies or misstatements.[81/]

The proposed other information standard also provides illustrative language for the auditor's responsibilities for, and the results of, the auditor's evaluation of the other information.

The reporting requirements under the proposed other information standard are generally new. Existing AU sec. 508 does not require any statement in the auditor's report regarding the auditor's responsibilities with respect to other information. However, the proposed reporting responsibility when the auditor identified a material inconsistency that was not appropriately revised is similar to existing AU sec. 550 regarding a material inconsistency.[82/] Under AU sec. 550, if the other information is not revised to eliminate a material inconsistency, then the auditor is required to consider actions such as revising the report to include an explanatory paragraph describing the material inconsistency.

AU sec. 550 does not include a reporting responsibility regarding explanatory language for a material misstatement of fact in the other information. However, as noted above, the auditor's evaluation of the other information that is not directly related to the financial statements also might be important to investors in their investment decision making. Therefore, the proposed other information standard proposes the same reporting responsibilities for both a material inconsistency and a material misstatement of fact.

Some commenters supported including in the auditor's report a description of the auditor's responsibilities for other information. They generally indicated that such a description in the auditor's report would help users understand the auditor's responsibilities with respect to other information and address the misperception that the other information is audited. Additionally, some commenters suggested that the Board also consider requiring the auditor to include in the auditor's report the auditor's

---

[81/] In a situation in which the auditor identified a material inconsistency, a material misstatement of fact, or both that management subsequently revised, the auditor also has other responsibilities under other PCAOB standards, such as paragraphs 20-22 of Auditing Standard No. 14.

[82/] <u>See</u> AU sec. 550.04. <u>See</u> <u>also</u> existing AU sec. 508.11.h.

conclusions on the work performed in addition to the description of the auditor's responsibilities regarding other information.

The report of the Cohen Commission states that "[t]he lack of explicit acknowledgement of the auditor's responsibility for other information in the annual report has the potential to create user confusion . . .."[83/] Similar to the Board's proposal, the Cohen Commission recommended auditor reporting that includes a description of the auditor's work performed over the other information and the auditor's conclusions.[84/]

The Board notes that some of the other information not directly related to the audited financial statements might be non-financial in nature or related to the company's operations and, as a result, the auditor might not have obtained evidence or reached any conclusion regarding such information during the audit. The auditor's evaluation would be based on relevant audit evidence obtained and conclusions reached during the audit. The auditor would not be required to perform procedures to obtain additional evidence regarding other information not directly related to the financial statements that was not required to be obtained during the audit.

Requiring the auditor to state that he or she has identified a material inconsistency, a material misstatement of fact, or both that has not been appropriately revised would result in additional costs for the auditor related to situations in which a material inconsistency or a material misstatement of fact is identified, including the cost of conducting procedures to resolve and to report on such matters. Also, costs likely would arise for the company and its audit committee as a result of additional discussions with the auditor and others in connection with the description in the auditor's report.

Costs related to reporting under the proposed other information standard regarding a material inconsistency should be similar to those incurred under the existing AU sec. 550 because the requirements of the two standards are similar in this respect. Currently, the Board is not aware of any specific instance of an auditor's report being issued under the existing auditing standards[85/] and filed with the SEC that contains

---

83/ AICPA, *The Commission on the Auditors' Responsibilities: Report, Conclusions and Recommendations* (1978) at 69 available at http://www.sechistorical.org/collection/papers/1970/1978_0101_CohenAuditors.pdf.

84/ Id.

85/ See AU sec. 550.04. See also existing AU sec. 508.11.h.

explanatory language regarding a material inconsistency.[86/] This suggests that instances of material inconsistency generally are resolved between the auditor and the company. Therefore, the related reporting costs might be low.

Questions Related to Section VI:

18. Is the proposed reporting, including the illustrative language, appropriate and sufficiently clear? If not, why not?

19. Should the Board consider permitting or requiring the auditor to identify in the auditor's report information not directly related to the financial statements for which the auditor did not have relevant audit evidence to evaluate against? If so, provide examples.

20. What additional costs would the auditor or the company incur related to auditor reporting when the auditor identifies a material inconsistency, a material misstatement of fact, or both?

21. Would the proposed reporting, including the illustrative language, provide investors and other financial statement users with an appropriate understanding of the auditor's responsibilities for, and the results of, the auditor's evaluation of the other information? Why or why not?

22. Are there any practical considerations that the Board should consider when an auditor identifies a material inconsistency or a material misstatement of fact in the other information that management has appropriately revised prior to the issuance of the auditor's report?

## VII. Responsibilities of a Predecessor Auditor

Under existing auditing standards, before reissuing an auditor's report on the financial statements of a prior period, when those financial statements are to be presented on a comparative basis with audited financial statements of a subsequent

---

[86/] In the audit reports of approximately 7,000 issuers with fiscal year 2011 filings, PCAOB staff did not identify any audit report containing explanatory language regarding a material inconsistency in the other information. PCAOB staff performed additional searches of SEC filings for other fiscal years and did not identify any audit report containing explanatory language regarding a material inconsistency in the other information.

period, a predecessor auditor should consider whether the auditor's report is still appropriate.[87/] Prior to reissuing the auditor's report the predecessor auditor is required to (1) read the current period financial statements; (2) compare the current period financial statements to the prior period financial statements being presented; and (3) obtain representation letters from management and the successor auditor.[88/]

In connection with the reissuance of a predecessor auditor's report, the proposed other information standard notes that the requirements of the standard related to a material inconsistency would apply to a predecessor auditor in situations in which the predecessor auditor's report is included in an Exchange Act annual report containing other information filed with the SEC.[89/] The proposed other information standard would apply to a predecessor auditor only with respect to a material inconsistency between the other information and the financial statements for the period audited by the predecessor auditor. The requirements in the proposed other information standard with respect to a predecessor auditor are similar to those of AU sec. 550.[90/]

As described in existing AU sec. 508.73, a predecessor auditor's knowledge of the current activities of the company would be limited in the absence of a continuing relationship. Additionally, the procedures required of the predecessor auditor prior to reissuing the auditor's report[91/] do not provide the predecessor auditor with additional audit evidence or new conclusions related to the previous audit. Therefore, the predecessor auditor would not be able to evaluate other information not directly related to the prior period financial statements that is contained in the current period Exchange Act annual report filed with the SEC. For this reason, the proposed other information standard, consistent with existing AU sec. 550,[92/] does not include a responsibility for the predecessor auditor with respect to a material misstatement of fact.

---

87/ See AU sec. 508.71.

88/ Id.

89/ See footnote 6 of the proposed other information standard.

90/ See footnote 2 of AU sec. 550.

91/ See existing AU sec. 508.71.

92/ See footnote 2 of AU sec. 550.

The proposed other information standard would require the predecessor auditor to perform the procedures with respect to a material inconsistency based on relevant audit evidence obtained and conclusions reached during the predecessor auditor's previous audit. Therefore, the predecessor auditor's procedures would include reading and evaluating the other information in the current period annual report filed with the SEC for any material inconsistencies with the audited financial statements for the prior period. The predecessor auditor's procedures are not intended as an evaluation, with the benefit of hindsight, of the accuracy of the estimates and assumptions used in preparing the prior period's financial statements.

If the predecessor auditor concludes that there are no material inconsistencies, the predecessor auditor's report may be reissued. If, after communication with management and the audit committee, the predecessor auditor determines that the other information contains a material inconsistency, the predecessor auditor would be required to determine his or her responsibilities under federal securities laws and PCAOB standards. The predecessor auditor also may withhold the use of the auditor's report for the prior period.

Question Related to Section VII:

23. Are the proposed responsibilities of the predecessor auditor appropriate and sufficiently clear? If not, why not?

## VIII. Other Considerations

Liability may be imposed on auditors and issuers (as well as other securities market participants) under a number of different legal theories, depending on the specific facts and circumstances of a particular case, including pursuant to Section 11 of the Securities Act,[93/] Section 10(b) of the Exchange Act, as well as various state law causes of action. The Board is interested in the effect of such liability considerations and, accordingly, requests comments on the potential legal liabilities associated with the performance and reporting requirements under the proposed other information standard.

---

[93/] For example, the proposed reporting of the results of the auditor's evaluation of the other information may raise for auditors possible liability considerations under Section 11 of the Securities Act when the document filed under the Exchange Act that contains the proposed enhanced auditor's report is incorporated by reference into a registration statement filed under the Securities Act.

The Board's proposed other information standard includes three key elements: (1) adding a description in the auditor's report of the auditor's responsibilities relating to other information; (2) including specific procedures for the auditor to perform with respect to evaluating the other information; and (3) providing for specific responses to the results of the auditor's evaluation of the other information, including reporting in the auditor's report. The following discussion is intended to highlight some key Board considerations in developing each element.

The first element of the Board's proposal would require the auditor to describe, in the auditor's report, the auditor's responsibilities for other information in annual reports containing audited financial statements and the related auditor's report filed with the SEC under the Exchange Act. Many commenters suggested that including a description in the auditor's report would provide useful information to investors.

The second element of the Board's proposal involves specific procedures, based on relevant audit evidence and the auditor's conclusions, for (1) assessing the consistency of the other information with the amounts, information, and presentation of the financial statements and (2) identifying material misstatements of fact. Under the proposed other information standard, the auditor would evaluate the other information for consistency with the financial statements and for potential misstatements of fact because the auditor is knowledgeable about the company's financial statements and the audit evidence obtained during the audit.

In developing this aspect of its proposed approach, the Board took note of relevant comments on the concept release. Some commenters noted that auditors have responsibilities under existing PCAOB standards to read and consider information outside of the financial statements and that auditors have developed procedures and routinely review other information for consistency with the financial statements. Other commenters suggested that performing procedures over information prepared by the company is a traditional role for the auditor that maintains the appropriate line of accountability between the auditor and the company. The Board's proposal (1) incrementally strengthens the auditor's traditional role with respect to other information and (2) provides a specific basis for describing the auditor's responsibilities in the auditor's report.

Third, the Board is proposing specific responses and reporting based on the results of the auditor's evaluation. For example, when the auditor has not identified a material inconsistency or material misstatement of fact as a result of the evaluation of the other information, the auditor's report would describe the auditor's responsibilities and note that no material inconsistencies or material misstatements of fact were identified. However, when the auditor has identified a material inconsistency, a material misstatement of fact, or both that has not been appropriately revised by management, the auditor would be required to describe the material inconsistency, material misstatement of fact, or both in the auditor's report, if the auditor determined it was appropriate to issue the auditor's report. The proposed other information standard also would refer the auditor to existing PCAOB standards, such as AU secs. 316 and 317, and to federal securities law requirements that are already familiar to auditors. The proposed other information standard also includes other responses for the auditor.

While the Board did not specifically seek comment in the concept release related to reporting on other information in the auditor's report, the Board received some related comments during its outreach and considered them in developing the proposed other information standard. In connection with adding the description of the auditor's responsibilities in the auditor's report, some commenters suggested that the Board also consider requiring the auditor to include in the auditor's report the auditor's conclusions on the work performed, in addition to the description of the auditor's responsibilities regarding other information. A commenter on the auditor assurance alternative presented in the concept release noted that auditors today would not permit their audit opinion to be included in a filing if the other information was inappropriate or incomplete.

The Board received other comments suggesting that reporting relating to the auditor's involvement with other information should be in a separate section of the auditor's report and include an introduction that described the different nature of the auditor's work and that the auditor was not auditing the other information. Accordingly, the Board is proposing that the auditor's statements regarding other information be in a separate section of the auditor's report, and also is proposing language to make it clear that the auditor is not expressing an opinion on the other information.

The Board recognizes, however, that, under its proposal, the auditor would be making new statements in the auditor's report about the auditor's responsibilities for evaluating other information and the results of the evaluation of the other information, which could raise potential liability considerations.

<u>Questions Related to Section VIII</u>:

24. What effect, if any, would the reporting under the proposed other information standard have on an auditor's potential liability in private litigation? Would this reporting lead to an unwarranted increase in private liability? Are there steps the Board could or should take related to the

other information requirements to mitigate the likelihood of increasing an accounting firm's potential liability in private litigation?

25. Would reporting under the proposed other information standard affect an auditor's potential liability under provisions of the federal securities laws other than Section 10(b) of the Exchange Act, such as Section 11 of the Securities Act? Would it affect an auditor's potential liability under state law?

## IX. Proposed Amendments to PCAOB Standards

The Board is proposing amendments to several of its existing auditing standards to conform to the proposed other information standard. Appendix 4 provides the proposed amendments related to the proposed other information standard. Significant amendments are described below.

### A. Amendments to Existing AU sec. 508

In situations in which the company has determined that it is not required to obtain, nor did the company request the auditor to perform, an audit of internal control over financial reporting, AU sec. 9550 states that the auditor may consider adding statements to the auditor's report that the auditor was not engaged to examine management's assertion on the effectiveness of internal control over financial reporting and that the auditor does not express an opinion on management's assertion.[94/] Because AU sec. 9550 would be superseded by the proposed other information standard, existing AU sec. 508 would be amended to allow the auditor to continue including such statements in the auditor's report.[95/] Existing AU sec. 508 also would be expanded to include an example of the "Basis of Opinion" section in the auditor's report that contains such statements.

In order to make this information consistently available to investors, the Board is interested in commenters' views about requiring, rather than allowing, statements in the auditor's report that the auditor was not engaged to examine management's assertion

94/ See AU sec. 9550.10.

95/ See proposed paragraphs .74A-B of AU sec. 508 in Appendix 4.

on the effectiveness of internal control over financial reporting and that the auditor does not express an opinion on management's report.[96/]

## B. Amendments to AU sec. 558

AU sec. 558 includes a reference to AU sec. 550, which permits the auditor to express an opinion on certain other information if that information has been subjected to auditing procedures. If the auditor decides to report on such information, AU sec. 558 references the reporting requirements of AU sec. 551, *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents*.

Since the proposed other information standard would supersede AU sec. 550 and the Proposed Auditing Standard, *Auditing Supplemental Information Accompanying Audited Financial Statements*,[97/] would supersede AU sec. 551, the Board is proposing to add the relevant substantive requirements, which otherwise would be superseded, directly to AU sec. 558. Accordingly, the Board is proposing to amend paragraph .09 of AU sec. 558 to include the elements of paragraph .07 of AU sec. 550 and paragraphs .12 and .14 of AU sec. 551 related to expressing an opinion on other information that has been subjected to auditing procedures. Because AU sec. 550 would be superseded, the proposed amendment to AU sec. 558 would apply only to situations involving required supplementary information.

---

96/ In July 2013, the U.S. Government Accountability Office ("GAO") issued a report in which it recommended that the SEC consider requiring public companies, where applicable, to explicitly disclose whether they obtained an auditor attestation of their internal controls. The GAO's report concluded that "explicit disclosure would increase transparency and investor protection by making investors readily aware of whether a company has obtained an auditor attestation on internal controls. The disclosure could serve as an important indicator of the reliability of a company's financial reporting, which may influence investors' decisions." See GAO, *Internal Controls: SEC Should Consider Requiring Companies to Disclose Whether They Obtained an Auditor Attestation* (GAO-13-582) (July 3, 2013) at 37, available at http://www.gao.gov/assets/660/655710.pdf.

97/ See PCAOB Release No. 2011-005 (July 12, 2011).

## C. Amendments to AU sec. 722

AU sec. 722 includes a list of interim review procedures the auditor should perform when conducting a review of interim financial information. AU sec. 722 requires the auditor to "read and consider" the other information that accompanies the interim financial information and directs the auditor to consider AU sec. 550, which would be superseded by the proposed other information standard. AU sec. 722 would be amended to direct the auditor to consider the requirements of the proposed other information standard, if the auditor concludes that there is a material inconsistency, a material misstatement of fact, or both.

Questions Related to Section IX:

26. Are the proposed amendments to PCAOB standards, as related to the proposed other information standard, appropriate? If not, why not? Are there additional amendments to PCAOB standards related to the proposed other information standard that the Board should consider?

27. In the situations described in the proposed amendments to existing AU sec. 508, should the Board require, rather than allow, the auditor to include statements in the auditor's report that the auditor was not engaged to examine management's assertion on the effectiveness of internal control over financial reporting and that the auditor does not express an opinion on management's report?

## X. Considerations Related to Audits of Brokers and Dealers

As Exchange Act Rule 17a-5 ("Rule 17a-5") requires that audits of brokers and dealers be conducted in accordance with PCAOB standards for fiscal years ending on or after June 1, 2014,[98/] the proposed other information standard and amendments, if adopted by the Board and approved by the SEC, would be applicable to such audits. At the publication date of the Board's proposal, the final SEC rules have not been published in the Federal Register.

---

[98/] See SEC, *Broker-Dealer Reports*, Exchange Act Release No. 70073 (July 30, 2013), which includes the final rules available at http://www.sec.gov/rules/final/2013/34-70073.pdf. Citations in this Section are to SEC Rule 17a-5 under the Exchange Act, as revised in Exchange Act Release No. 70073.

Pursuant to Rule 17a-5, brokers and dealers are generally required to file with the SEC and other regulators annual audited financial statements on form X-17A-5.[99/] Form X-17A-5 includes, as part of the broker or dealer's filing, an oath or affirmation signed by an officer of the broker or dealer[100/] that the financial statements and supporting schedules[101/] are true and correct. Auditors of a broker's or a dealer's financial statements would read the oath or affirmation as part of the annual report filed with the SEC under the Exchange Act that contains audited financial statements and the related auditor's report, and evaluate the information in that oath or affirmation in accordance with the procedures in the proposed other information standard, as appropriate.

Rule 17a-5 also requires the broker or dealer to file a compliance report or an exemption report.[102/] The proposed other information standard would not apply to compliance or exemption reports by brokers or dealers as those reports and the related auditor reporting are addressed by *Proposed Standards for Attestation Engagements Related to Broker and Dealer Compliance or Exemption Reports Required by the U.S. Securities and Exchange Commission*.[103/]

The Board's concept release included a question about whether the changes to the auditor's reporting model should apply to all audit reports filed with the SEC, including those filed in connection with the financial statements of brokers and dealers. Many commenters who responded to this question in the concept release supported requiring the same reporting for all companies.

---

99/ See SEC Rule 17a-5 of the Exchange Act, 17 C.F.R. § 240.17a-5.

100/ See SEC Rule 17a-5(e)(2) of the Exchange Act, 17 C.F.R. § 240.17a-5e2.

101/ The proposed other information standard would not apply to supporting schedules required by Rule 17a-5. These schedules are addressed by Proposed Auditing Standard, *Auditing Supplemental Information Accompanying Audited Financial Statements.* See PCAOB Release No. 2011-005 (July 12, 2011).

102/ See SEC Rule 17a-5(d)(1)(i)(A) and (B), 17 C.F.R. § 240.17a-5d1iA and B.

103/ See *Proposed Standards for Attestation Engagements Related to Broker and Dealer Compliance or Exemption Reports Required by the U.S. Securities and Exchange Commission,* PCAOB Release No. 2011-004 (July 12, 2011).

The Board received additional comments that were specific to audits of brokers and dealers from a small number of commenters. Some of those commenters suggested that the Board take into account the special characteristics of brokers and dealers in considering whether the changes to the auditor's report should apply to audits of brokers and dealers. One commenter on the concept release noted that amendments to Rule 17a-5 proposed by the SEC would provide users of brokers' and dealers' financial statements with sufficient information that would make additional auditor reporting unnecessary.

Question Related to Section X:

28. Are the proposed other information standard and amendments appropriate for audits of brokers and dealers? If not, why not?

## XI. Considerations Related to Effective Date

The proposed other information standard and amendments would be effective, subject to approval by the SEC, for audits of financial statements for fiscal years beginning on or after December 15, 2015. The Board's final decision on the effective date would take into account the extent and nature of comments received on the proposals as well as the timing of Board adoption of any final standard and amendments. Additionally, some commenters suggested that, depending on the extent of changes to the auditor's report, the Board consider a delayed compliance date depending on the size of the company. The Board is seeking comment on whether any special consideration should be given to a delayed compliance date for the proposed other information standard, such as for the audits of smaller companies.

Questions Related to Section XI:

29. Is the Board's effective date appropriate for the proposed other information standard? Why or why not?

30. Should the Board consider a delayed compliance date for the proposed other information standard and amendments for audits of smaller companies? If so, what criteria should the Board use to classify companies, such as non-accelerated filer status? Are there other criteria that the Board should consider for a delayed compliance date?

## XII. Considerations Related to Securities Act Documents

The Board's proposed other information standard includes three key elements: (1) adding a description in the auditor's report of the auditor's responsibilities relating to other information contained in an annual report that includes audited financial statements and related auditor's report filed under the Exchange Act; (2) specifying procedures for the auditor to perform with respect to evaluating this other information; and (3) providing for specific responses to the results of the auditor's evaluation of the other information, including reporting in the auditor's report of the results of the auditor's evaluation. The proposed other information standard would supersede AU sec. 550 and AU sec. 9550. The proposed other information standard would not apply to documents containing audited financial statements and the related auditor's report that are filed with the SEC under the Securities Act, which is consistent with the approach in AU sec. 550.

Currently, AU sec. 550 refers the auditor to AU sec. 711 with respect to the auditor's responsibilities for filings under the Securities Act.[104/] AU sec. 711 refers the auditor to the provisions of Section 11 of the Securities Act.[105/] Section 11 imposes liability, subject to a due diligence defense, for material misstatements and omissions in a registration statement on "every accountant . . . who has with his consent been named as having prepared or certified any part of the registration statement, or as having prepared or certified any report or valuation which is used in connection with the registration statement, with respect to the statement . . . which purports to have been prepared or certified by him."[106/] Separately, Section 7 of the Securities Act[107/] requires issuers to file the consent of any accountant who is named as having prepared or

---

[104/] See AU sec. 550.03. This paragraph also refers the auditor to AU sec. 634, *Letters for Underwriters and Certain Other Requesting Parties,* which provides guidance to auditors for performing and reporting on the results of engagements to issue letters (commonly referred to as "comfort letters") regarding the other information contained in registration statements filed with the SEC.

[105/] See AU sec. 711.02. See also AU sec. 711.03 regarding the auditor's responsibilities as an expert and the burden of proof that the auditor must meet under Section 11(b) of the Securities Act when the auditor's report is included in a registration statement.

[106/] 15 U.S.C. § 77k(a)(4).

[107/] 15 U.S.C. § 77g.

certified any part of the registration statement or any valuation or report included in the registration statement.

Audit procedures contained in AU sec. 711 require the auditor to read relevant portions of the prospectus to make sure that (1) the auditor's name is not being used in a way that indicates greater responsibility than intended, and (2) the prospectus does not imply that the financial statements have been prepared by the auditor.[108/] Additionally, auditors perform certain procedures described under AU sec. 711 to identify any subsequent events that may impact the auditor's report included in the company's registration statement from the date of the auditor's report up to or shortly before the effective date of the registration statement as part of conducting a "reasonable investigation" pursuant to Section 11 of the Securities Act.[109/] When a company's annual report on Form 10-K is incorporated by reference into a shelf registration statement on Form S-3, AU sec. 711 requires that the auditor perform procedures with respect to subsequent events to a date as close to the date of the filing of the Form 10-K as is reasonable and practicable in the circumstances.[110/]

As previously described in this release, the proposed auditor reporting standard and the proposed other information standard are intended to increase the informational value of the auditor's report to promote the usefulness and relevance of the audit and the related auditor's report. Specifically, the proposed other information standard would respond to investor's interests in obtaining information regarding the auditor's responsibilities for other information that is contained in documents that include the audited financial statements and the related auditor's report. The Board began considering the existing auditing standard on other information in documents containing audited financial statements, specifically AU sec. 550, as part of its effort to develop a

---

[108/] See AU sec. 711.08.

[109/] See AU secs. 711.10-.11. See also AU secs. 711.12-.13 regarding the auditor's responsibilities if the auditor discovers or becomes aware of facts upon performing procedures subsequent to the date of the auditor's report.

[110/] See AU secs. 711.10-.11 and paragraph .07 of AU sec. 9711, *Filings Under Federal Securities Statutes: Auditing Interpretations of Section 711*. See also AU sec. 9711.05 regarding the auditor's responsibility to perform the procedures in AU secs. 711.10 and .11 when (1) a post-effective amendment to the shelf registration statement is filed as allowed under SEC Rule 430B of Regulation C, 17 C.F.R. § 230.430B or (2) an Exchange Act filing that includes or amends audited financial statements is incorporated by reference into the shelf registration statement.

description in the auditor's report regarding the auditor's responsibilities for other information in certain documents filed with the SEC. Through that consideration, the Board determined that changes were appropriate to provide a specific basis for the description in the auditor's report of the auditor's responsibilities for, and the results of, the auditor's evaluation of other information outside the financial statements.

The Board considered proposing to extend the applicability of the proposed other information standard to documents containing audited financial statements and the related auditor's report that are filed under the Securities Act. However, the Board has identified obstacles to applying the reporting requirements under the proposed other information standard to documents filed under the Securities Act. For example, a company will file a registration statement on Form S-1 with the SEC containing information required under the Securities Act and SEC rules and regulations as well as the company's audited financial statements and the related auditor's report. The SEC may require the company to file several amendments to the Form S-1 to update the information disclosed in the registration statement before it is declared effective by the SEC. Under current Securities Act rules, the auditor's report is not required to be updated for amendments to the registration statement, unless certain circumstances occur.[111/] Rather, the auditor consents to the continued use of the auditor's report in the registration statement.[112/] The filing of the auditor's consent with the company's registration statement does not change the date or content of the auditor's report filed with the original registration statement. Because an auditor is not required to update the auditor's report prior to the effective date of the company's registration statement, the auditor's report contained in the registration statement would reflect only the evaluation performed under the proposed other information standard of the other information as of the date of the auditor's report and not reflect the auditor's procedures under AU sec. 711 between the date of the auditor's report and the effective date of the registration statement.

The Board recognizes that a similar obstacle with the proposed other information standard would apply in the case when a company files a registration statement and incorporates by reference information from the company's annual report previously filed with the SEC. For example, under the proposed other information standard, an auditor

---

[111/] Under PCAOB standards, the auditor would be required to update the auditor's report under certain circumstances.

[112/] See SEC Rules 436 and 439 of Regulation C, 17 C.F.R. §§ 230.436 and 230.439.

would evaluate the other information contained in a company's annual report filed on Form 10-K and include a separate section in the auditor's report that stated the auditor's responsibilities for, and the results of, the auditor's evaluation of other information contained in the company's annual report. When the company later files a shelf registration statement on Form S-3 and incorporates by reference the company's previously filed annual report into the registration statement, the auditor would perform procedures on the other information contained in the shelf registration statement, as required under AU sec. 711. Similar to the reporting framework described above, the auditor is not required to update the auditor's report on the financial statement contained in the company's previously filed annual report that is incorporated by reference into the company's registration statement, but rather, the auditor consents to the continued use of the auditor's report.[113/] Therefore, the auditor's report that is part of the company's registration statement would reflect only the results of the auditor's evaluation under the proposed other information standard of the other information contained in the company's previously filed annual report and not reflect the auditor's procedures under AU sec. 711 on the portions of the shelf registration statement other than the previously filed annual report. As such, it is difficult to propose a meaningful auditor reporting requirement for the results of the auditor's evaluation of other information under the existing SEC reporting framework for Securities Act filings.

The Board acknowledges that investors and other financial statement users may believe that the auditor's level of involvement with, and related reporting on, other information in a document filed under the Securities Act, such as a registration statement for an initial public offering, should be no different than the auditor's responsibilities regarding other information contained in an annual report filed under the Exchange Act. The Board continues to assess whether it is possible to propose applying some of the elements of the proposed other information standard regarding the auditor's responsibilities over other information contained in documents filed under the Securities Act. For example, the Board considered proposing only the performance aspects of the proposed other information standard to Securities Act filings. However, the enhancements proposed in the other information standard were driven largely to enable auditor reporting on other information in annual reports filed under the Exchange Act. Additionally, the auditor already has responsibilities to perform procedures under AU sec. 711 for Securities Act filings. As such, the Board is requesting comments and information on the application of the proposed other information standard to Securities Act filings, including possible approaches to applying the reporting aspects of the proposed other information standard or the possible need for additional procedures regarding the auditor's responsibility for other information. The Board is particularly

---

[113/] Id.

interested in receiving comments on whether or not additional procedures under AU sec. 711 are necessary or appropriate.

Questions Related to Section XII:

31. Should the Board extend the application of the proposed other information standard to documents containing audited financial statements and the related auditor's report that are filed under the Securities Act? If so, are there obstacles other than those previously mentioned that the Board should consider before such a proposal is made? If not, why not?

32. Are there some elements of the proposed other information standard that the Board should consider requiring the auditor to perform related to other information contained in filings under the Securities Act, such as the auditor's responsibility to evaluate the other information? If so, which elements of the proposed other information standard should the Board consider including in the procedures currently required for Securities Act documents under AU sec. 711? If not, why not?

33. What costs or other challenges should the Board consider when assessing whether to propose extending some elements of the proposed other information standard to other information contained in documents filed under the Securities Act?

# APPENDIX 7

## *Considerations Regarding Audits of Emerging Growth Companies*

### I. Introduction

The Board is proposing two new standards and related amendments[1/] pursuant to its mission to protect the interests of investors and further the public interest in the preparation of informative, accurate, and independent audit reports. The proposed standards and amendments are intended to (1) increase the informational value of the auditor's report to promote the usefulness and relevance of the audit and the related auditor's report and (2) improve the auditor's procedures and enhance the auditor's responsibilities with respect to information outside the financial statements.

The Board's proposed auditor reporting standard would retain the pass/fail model, including the basic elements of the current auditor's report, and would provide more information to investors and other financial statement users regarding the audit and the auditor. Most significantly, the proposed auditor reporting standard would require the auditor to communicate in the auditor's report "critical audit matters" that would be specific to each audit. The auditor's required communication would focus on those matters the auditor addressed during the audit of the financial statements that involved the most difficult, subjective, or complex auditor judgments or posed the most difficulty to the auditor in obtaining sufficient appropriate audit evidence or forming an opinion on the financial statements.

Other proposed changes in the auditor's report would require a description of certain of the auditor's responsibilities, such as the auditor's responsibility to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The proposed auditor reporting standard

---

[1/] The Board's proposals include: (1) Proposed Auditing Standard, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion* (the "proposed auditor reporting standard"); (2) Proposed Auditing Standard, *The Auditor's Responsibilities Regarding Other Information in Certain Documents Containing Audited Financial Statements and the Related Auditor's Report* (the "proposed other information standard"); and (3) related proposed amendments to PCAOB standards (the "proposed amendments"). The Board's proposals are also referred to collectively as the "proposed standards and amendments."

also would add to the auditor's report new information regarding the audit and the auditor, such as statements about the auditor's responsibility to be independent, the length of the auditor's tenure as the company's auditor, and the auditor's responsibilities for, and the results of, the auditor's evaluation of information outside the financial statements.

As more fully described in the Release and Appendix 5, the Board is proposing an approach that it believes would increase the relevance and informational value of the auditor's report, including by requiring the auditor to provide specific insight into the audit of the company's financial statements.[2/] The proposed approach would be aligned with the Board's mission and is intended to be implemented in a cost-effective way. For example, because critical audit matters are determined based on the relative complexity and difficulty of the audit, the Board anticipates that the proposed auditor reporting standard would be scalable based on the size, nature, and complexity of the audit of the company. The Board also anticipates, however, that some of the enhanced basic elements and communication of critical audit matters in the auditor's report would have cost-related implications for auditors and companies, including audit committees.[3/]

The proposed other information standard is intended to improve the auditor's procedures and enhance the auditor's responsibilities with respect to "other information," that is, information other than the audited financial statements and the auditor's report, in a company's annual report filed with the U.S. Securities and Exchange Commission ("SEC" or "Commission") under the Securities Exchange Act of 1934 ("Exchange Act"). The proposed enhancements to the required auditor's procedures are intended to provide a specific basis for the auditor's description in the auditor's report of the auditor's responsibilities for, and the results of, the auditor's evaluation of the other information. As a result of the linkage between the proposed auditor reporting standard and the proposed other information standard, investors and other financial statement users would obtain useful information such as: (1) the nature and scope of the auditor's responsibilities with respect to the other information; (2) clarification of what other information was evaluated by the auditor; and (3) a description

[2/] The Board's approach to increase the relevance and informational value of the auditor's report is discussed more fully in Appendix 5, specifically Sections IV., *Basic Elements*; V., *Critical Audit Matters*; and VI., *Explanatory Language*.

[3/] The potential costs related to the proposed auditor reporting standard are discussed more fully in Appendix 5, specifically Sections IV., *Basic Elements*, and V.F., *Other Considerations for Critical Audit Matters*.

of the results of the auditor's evaluation based on the auditor's procedures on the other information.

As described in the Release and Appendix 6, the required procedures under the proposed other information standard are intended to provide consistency and improve the auditor's evaluation of other information, which could be of importance to investment decision making.[4/] The Board believes that the proposed approach to the auditor's responsibilities for other information would be scalable to less complex companies, based on the nature and extent of the information outside the financial statements for such companies as compared to companies with more extensive operations. The Board, however, also anticipates that the proposed other information standard would have cost implications for auditors and companies, including audit committees.[5/]

In developing the proposed standards and amendments, the Board considered (1) the information communicated in the current auditor's report; (2) the potential benefits that may result from auditors providing additional communications; (3) the potential costs related to the approach proposed by the Board; (4) alternative approaches; (5) current developments in similar projects by other standard setters;[6/] (6) relevant academic research; and (7) significant comments received by the Board from its outreach efforts. In considering the nature and extent of changes to the existing

---

4/ The Board's approach to improve the auditor's evaluation of other information is discussed more fully in Appendix 6, specifically Sections III., *Evaluating the Other Information*; and V., *Responding When the Auditor Determines That There is a Potential Misstatement in the Audited Financial Statements*.

5/ The potential costs related to the proposed other information standard are discussed more fully in Appendix 6, specifically Sections III.C.3., *Performing Procedures to Evaluate the Other Information*; VI., *Reporting in the Auditor's Report*; and VIII., *Other Considerations*.

6/ The International Auditing and Assurance Standards Board ("IAASB") has similar projects related to changes to the auditor's report and the auditor's responsibilities regarding other information. In addition, there are a legislative proposal by the European Commission ("EC") and a subsequent European Parliamentary report that relate to audits of public interest entities. Most recently, the United Kingdom's Financial Reporting Council ("FRC") adopted revisions to its auditor reporting standard. The IAASB's projects, the EC's proposal and subsequent report, and the FRC's revised standard would require auditor reporting on certain additional matters.

auditor's report and the auditor's responsibilities for other information, the Board sought to respond to the needs of investors and other financial statement users by making the auditor's report more informative while not adding unnecessary burden to the financial reporting process.

## II. Statutory Background

The Board is considering the proposed standards and amendments pursuant to its authority under the Sarbanes-Oxley Act of 2002 ("Act").[7/] If ultimately approved by the Board, the proposed standards and amendments will be filed for approval by the Commission. Pursuant to Section 107(b)(3) of the Act, the Commission shall approve a proposed standard if it finds that the standard is "consistent with the requirements of [the] Act and the securities laws, or is necessary or appropriate in the public interest or for the protection of investors."

The Act was amended by Section 104 of the Jumpstart Our Business Startups Act ("JOBS Act")[8/] to provide that any additional rules adopted by the Board subsequent to April 5, 2012 do not apply to the audits of "emerging growth companies" ("EGCs")[9/] unless the SEC "determines that the application of such additional requirements is necessary or appropriate in the public interest, after considering the protection of

---

[7/] Pub. L. No. 107-204. Pursuant to Section 101 of the Act, the mission of the Board is to oversee the audits of companies that are subject to the securities laws, and related matters, in order to protect the interests of investors and further the public interest in the preparation of informative, accurate, and independent audit reports. Section 103 of the Act authorizes the Board to adopt auditing standards for use in public company audits "as required by this Act or the rules of the [Securities and Exchange] Commission, or as may be necessary or appropriate in the public interest or for the protection of investors." In addition, Section 982 of the Dodd-Frank Wall Street Reform and Consumer Protection Act expanded the authority of the PCAOB to oversee the audits of registered brokers and dealers, as defined in the Exchange Act. See Pub. L. No. 111-203. The term "registered broker or dealer" is defined in Section 3(a)(48) of the Exchange Act.

[8/] Pub. L. No. 112-106 (April 5, 2012).

[9/] Section 3(a)(80) of the Exchange Act defines the term "emerging growth company."

investors and whether the action will promote efficiency, competition, and capital formation."[10/]

In addition, the JOBS Act specified that "[a]ny rules of the Board requiring…a supplement to the auditor's report in which the auditor would be required to provide additional information about the audit and the financial statements of the issuer (auditor discussion and analysis) shall not apply to an audit of an emerging growth company…".[11/] The proposed standards and amendments, if adopted, will be subject to a separate determination by the SEC regarding their applicability to audits of EGCs. Before adoption, the proposed standards and amendments will be subject to an evaluation as to whether the Board should recommend to the SEC that the proposed standards and amendments be applicable to the audits of EGCs and the SEC will make a separate determination regarding the applicability of the proposed standards and amendments to the audits of EGCs. At this time no determination has been made about the applicability of the proposed standards and amendments to the audits of EGCs.

This Appendix contains a discussion of considerations relating to EGCs and includes data on EGCs. This Appendix also includes specific questions and requests relevant information, including potential costs, and empirical data, to the extent available to commenters, regarding the potential application of the proposed standards and amendments to the audits of EGCs. Commenters providing cost estimates are requested to provide the basis for any estimate provided. The Board is requesting commenters' views on the applicability of the proposed standards and amendments to the audits of EGCs and responses to specific questions in order to provide information to enable the Board to assist the SEC in making its determination regarding the applicability of the proposed standards and amendments to the audits of EGCs.

---

[10/] See Section 103(a)(3)(C) of the Act, as added by Section 104 of the JOBS Act.

[11/] Id. An auditor's discussion and analysis ("AD&A") currently does not exist in auditing standards but was described as one of several conceptual alternatives for changing the auditor's reporting model in the PCAOB's *Concept Release on Possible Revisions to PCAOB Standards Related to Reports on Audited Financial Statements and Related Amendments to PCAOB Standards* (the "concept release"), PCAOB Release No. 2011-003 (June 21, 2011). Section IV.A., *Auditor's Discussion and Analysis,* of this Release describes an AD&A and related comments received on the concept release.

The Board's Release, as well as Appendices 5 and 6, provide related information regarding the proposed standards and amendments, including discussions of the following areas (1) the background of and reasons for the proposed standards and amendments; (2) the Board's approach, including consideration of alternatives; (3) key changes and improvements from existing requirements; and (4) potential costs related to the proposed standards and amendments. Economic considerations related to the proposed standards and amendments are noted in the Release and this Appendix, with Appendices 5 and 6 providing further discussion regarding the economic considerations related to each proposed standard.

## III. Characteristics of Self-Identified EGCs

The PCAOB has begun to monitor implementation of the JOBS Act in order to better understand the characteristics of EGCs[12/] and inform the Board's considerations regarding whether it should request that the SEC apply the proposed standards and amendments to audits of EGCs. To assist commenters, the Board is providing the following information regarding EGCs that it has compiled from public sources.[13/]

---

12/ In general terms, an issuer qualifies as an EGC if it has total annual gross revenue of less than $1 billion during its most recently completed fiscal year (and its first sale of common equity securities pursuant to an effective registration statement under the Securities Act of 1933 ("Securities Act") did not occur on or before December 8, 2011). See JOBS Act Section 101(a), (b), and (d). Once an issuer is an EGC, the issuer retains its EGC status until the earliest of: (1) the first year after it has total annual gross revenue of $1 billion or more (as indexed for inflation every five years by the SEC); (2) the end of the fiscal year after the fifth anniversary of its first sale of common equity securities under an effective Securities Act registration statement; (3) the date on which the company issues more than $1 billion in non-convertible debt during the prior three-year period; or (4) the date on which it is deemed to be a "large accelerated filer" under the Exchange Act (generally, a company that has been public for at least one year and has an equity float of at least $700 million). See Section 3(a)(80) of the Exchange Act.

13/ To obtain data regarding EGCs, the PCAOB's Office of Research and Analysis reviewed registration statements and Exchange Act reports filed with the SEC with filing dates between April 5, 2012, and May 15, 2013, for disclosures by companies related to their EGC status. Companies with filings indicating that they are no longer EGCs are not included in this analysis. Any filings subsequent to May 15, 2013 are not included in this analysis. The PCAOB has not validated these companies' self-identification as EGCs. The information presented also does not include data for

As of May 15, 2013, based on the PCAOB's research, 909 SEC registrants have identified themselves as EGCs in SEC filings.

These companies operate in diverse industries. The five most common Standard Industrial Classification ("SIC") codes applicable to these companies are: blank check companies; pharmaceutical preparations; real estate investment trusts; prepackaged software services; and computer processing/data preparation services.

The five SIC codes with the highest total assets as a percentage of the total assets of the population of EGCs are: federally chartered savings institutions; real estate investment trusts; national commercial banks; state commercial banks; and natural gas transmission. Total assets of EGCs in these five SIC codes represent approximately 42% of the total assets of the population of EGCs. EGCs in three of these five SIC codes represent financial institutions (that is, federally chartered savings institutions, national commercial banks, and state commercial banks) and the total assets for these three SIC codes represent approximately 28% of the total assets of the population of EGCs.

A majority of the companies that have identified themselves as EGCs have begun reporting information under the securities laws since 2012. Of these companies, approximately:

- 25% identified themselves in registration statements and were not reporting under the Exchange Act as of May 15, 2013.
- 55% of the companies that have identified themselves as EGCs began reporting under the Exchange Act in 2012 or later.
- 20% of the companies have been reporting under the Exchange Act since 2011 or earlier.

Approximately 20% of these companies have securities listed on a U.S. national securities exchange as of May 15, 2013.

---

companies that have filed confidential registration statements and have not subsequently made a public filing.

Approximately 65% of the companies that have identified themselves as EGCs and filed an Exchange Act filing indicated that they were smaller reporting companies.[14/]

Audited financial statements were available for nearly all of the companies that have identified themselves as EGCs.[15/] For those companies for which audited financial statements were available and based on information included in the most recent audited financial statements filed as of May 15, 2013:

- The reported assets ranged from zero to approximately $18.2 billion. The average and median reported assets were approximately $183.7 million and approximately $0.3 million, respectively.[16/]

- The reported revenues ranged from zero to approximately $959.1 million. The average and median reported revenues were approximately $56.3 million and zero, respectively.

---

[14/] The SEC adopted its smaller reporting company rules in *Smaller Reporting Company Regulatory Relief and Simplification*, Securities Act Release No. 8876 (Dec. 19, 2007). Generally, companies qualify to be smaller reporting companies and, therefore, have scaled disclosure requirements if they have less than $75 million in public equity float. Companies without a calculable public equity float will qualify if their revenues were below $50 million in the previous year.

[15/] Audited financial statements were available for 897 of the 909 self-identified EGCs. Audited financial statements were not available for some EGCs that have filed registration statements that have not been declared effective.

[16/] For purposes of comparison, the PCAOB compared the data compiled with respect to the population of companies that identified themselves as EGCs with companies listed in the Russell 3000 Index in order to compare the EGC population with the broader issuer population. The Russell 3000 was chosen for comparative purposes because it is intended to measure the performance of the largest 3,000 U.S. companies representing approximately 98% of the investable U.S. equity market (as marketed on the Russell website). The average and median reported assets of issuers in the Russell 3000 were approximately $12.1 billion and approximately $1.5 billion, respectively. The average and median reported revenues from the most recent audited financial statements filed as of May 15, 2013 of issuers in the Russell 3000 were approximately $4.6 billion and $717.2 million, respectively.

- The average and median reported assets among companies that reported revenues greater than zero were approximately $365.8 million and $59.9 million, respectively. The average and median reported revenues among companies that reported revenue greater than zero were approximately $113.5 million and $17.2 million, respectively.
- Approximately 48% identified themselves as "development stage entities" in their financial statements.[17/]
- Approximately 35% were audited by firms that are annually inspected by the PCAOB (that is, firms that have issued audit reports for more than 100 public company audit clients in a given year) or are affiliates of annually inspected firms. Approximately 65% were audited by triennially inspected firms (that is, firms that have issued audit reports for 100 or fewer public company audit clients in a given year) that are not affiliates of annually inspected firms.
- Approximately 55% had an explanatory paragraph included in the auditor's report on their most recent audited financial statements describing that there is substantial doubt about the company's ability to continue as a going concern.[18/]

Approximately 40% of the self-identified EGCs that provided a management report on internal control over financial reporting stated in the report that the company's internal control over financial reporting was not effective.[19/]

---

17/ According to Financial Accounting Standards Board ("FASB") standards, development stage entities are entities devoting substantially all of their efforts to establishing a new business and for which either of the following conditions exists: (a) planned principal operations have not commenced or (b) planned principal operations have commenced, but there has been no significant revenue from operations. See FASB Accounting Standards Codification, Subtopic 915-10, Development Stage Entities – Overall.

18/ Approximately 1% of the population of companies in the Russell 3000 Index have an explanatory paragraph describing that there is substantial doubt about the company's ability to continue as a going concern.

19/ Approximately 4% of the population of companies in the Russell 3000 Index provided a management report on internal control over financial reporting stating that the company's internal controls over financial reporting were not effective.

The JOBS Act includes a provision that allows Securities Act registration statements of EGCs to include two years of audited financial statements instead of three years for the initial public offering of common equity securities. Approximately 750 of the self-identified EGCs would not be required to present more than two years of financial statements regardless of the JOBS Act relief.[20/] Approximately 75% of the remaining portion of the EGC population have opted out of the provision by providing in their registration statements audited financial statements for three years instead of two. Some of the EGCs that opted out of this provision described in their filings risks related to taking advantage of some of the JOBS Act provisions. Risks described included the company's common stock becoming less attractive to investors and their financial statement disclosures not being comparable to those of similar companies.

## IV. Economic Considerations

The economic considerations summarized below are addressed in the Release, Appendix 5, and Appendix 6, and could apply to both small and large companies. A number of these considerations are relevant to efficiency, competition, and capital formation.

### A. Proposed Auditor Reporting Standard

The proposed auditor reporting standard would require the auditor to communicate in the auditor's report critical audit matters. Critical audit matters ordinarily are matters of such importance in the audit that they would be included in the matters required to be (1) documented in the engagement completion document under Auditing Standard No. 3, *Audit Documentation*; (2) reviewed by the engagement quality reviewer under Auditing Standard No. 7, *Engagement Quality Review*; (3) communicated to the audit committee under Auditing Standard No. 16, *Communications with Audit Committees* or other PCAOB standards; or (4) any combination of the three. Thus, the proposed auditor reporting standard is intended to leverage the work the auditor already performed when conducting an audit under the Board's existing standards and does not impose new audit performance requirements, other than the determination, communication, and documentation of critical audit matters.

---

[20/] Some EGCs (1) are already afforded such relief as smaller reporting companies, (2) have existed for less than three years, (3) follow the reporting requirements of development stage entities which require an income statement since inception, or (4) have not filed a Securities Act registration statement yet, and thus have not availed themselves of this relief.

The Board believes that auditor reporting linked to matters identified during the audit that involved the most difficult judgments or the most difficulty in obtaining evidence or forming the opinion is responsive to the requests of many investors for information that should provide a greater degree of insight into the audit. Communication of critical audit matters is expected to result in information specific to each audit of a company's financial statements, and would highlight important aspects of the audit.

Additionally, the proposed auditor reporting standard would add to the auditor's report new information regarding the audit or the auditor, such as statements about the auditor's responsibility to be independent, the length of the auditor's tenure as the company's auditor, and the auditor's responsibilities for, and the results of, the auditor's evaluation of information outside the financial statements. This new information generally would be standardized language about the audit or the auditor and would be the same or very similar among different auditors' reports.

The proposed auditor reporting standard retains from the existing standard[21/] the use of explanatory paragraphs in the auditor's report, including the auditor's ability to emphasize a matter regarding the financial statements.

The Board also anticipates that some of the enhanced basic elements and communication of critical audit matters in the auditor's report would have cost-related implications for auditors and companies, including audit committees, such as:[22/]

- One-time costs that relate primarily to updating an audit firm's methodology and training regarding auditor reporting for basic elements and critical audit matters. Additionally, the auditor may incur some initial costs to determine the year the auditor began serving consecutively as the company's auditor;
- Recurring costs in each individual audit relative to the determination, communication in the auditor's report, and documentation of critical audit matters; and

---

[21/] AU sec. 508, *Reports on Audited Financial Statements*.

[22/] The potential costs related to the proposed auditor reporting standard are discussed more fully in Appendix 5, specifically Sections IV., *Basic Elements,* and V.F, *Other Considerations for Critical Audit Matters*.

- Recurring costs for the company, including the audit committee, for reviewing the critical audit matters included in the draft auditor's report.

There could be potential unintended consequences associated with requiring auditors to communicate critical audit matters in the auditor's report. For example, the effort required to determine, prepare language for communication, and document critical audit matters likely would occur during the final stages of the audit, which might reduce the time available to the auditor to review and complete the audit work.

Requiring auditors to communicate critical audit matters could help investors and other financial statement users focus on aspects of the company's financial statements that the auditor also found to be challenging. Communicating critical audit matters would provide investors and other financial statement users with previously unknown information about the audit that could enable them to analyze more closely any related financial statement accounts and disclosures. The communication of critical audit matters could help to alleviate the information asymmetry[23/] that exists between company management and investors. More specifically, company management is typically aware of the auditor's most challenging areas in the audit because of regular interactions with the auditor as part of the audit, but this information is not usually known to investors. Reducing the level of information asymmetry between company management and investors could result in more efficient capital allocation and, as academic research has shown, could lower the average cost of capital.[24/]

The auditor's focus on, and communication of, critical audit matters could lead to improved financial statement disclosures related to areas of the financial statements that gave rise to critical audit matters. Potential improvements to financial statement disclosures in such areas could occur because of increased attention by the auditor, management, and the audit committee of matters communicated by the auditor in the draft auditor's report regarding critical audit matters. The improvement in the related financial statement disclosures could incrementally increase the quality of the information[25] in the financial statements. Academic research has indicated that

---

23/ Economists often describe information asymmetry as an imbalance, where one party has more or better information than another party.

24/ See David Easley and Maureen O'Hara, *Information and the Cost of Capital*, 59 The Journal of Finance 1553, 1553-1583 (2004).

25/ The term "quality of information" is formalized by the concept of precision. Information economics frequently treats information as consisting of two components: a increasing the amount or quality of information in financial reporting could result in more efficient capital allocation decisions.[26/]

Auditor's reports that include critical audit matters would be specific to the audit of the company. Therefore, auditors' reports would be different between the company's current period critical audit matters and those of prior periods or those of the company's competitors. Some investors have commented that they are interested in information that is specific to the audit of a company's financial statements, and therefore, would expect differences in auditors' reports among companies and reporting periods. Critical audit matters, however, would not necessarily include all the information important to an investment decision.

Additionally, as critical audit matters in the auditor's report would not be something that investors and other financial statement users are accustomed to reviewing or analyzing, investors and other financial statement users could misunderstand a critical audit matter or the meaning of a critical audit matter. However, as financial statement disclosures have changed over time, investors and other financial statement users are accustomed to reviewing or analyzing new or different information. Therefore, such users should have the ability to interpret the meaning of critical audit matters communicated in an auditor's report.

Some comments regarding alternatives presented in the concept release indicated that more information about the audit in the auditor's report could lead to more efficient pricing of equity securities, either through changes in expected future earnings or changes in the discount rate used to value future earnings, or both.

As previously noted, the Board anticipates that the communication of critical audit matters would result in auditor's reports that could vary significantly – both among companies and reporting periods. Academics that conducted a study of financial

---

signal that conveys information and noise which inhibits the interpretation of the signal. Precision is the inverse of noise so that decreased noise results in increased precision and a more readily interpretable signal. See Robert E. Verrecchia, *The Use of Mathematical Models in Financial Accounting*, 20 Journal of Accounting Research 1, 1-42 (1982).

[26/] See Richard A. Lambert, Christian Leuz, and Robert E. Verrecchia, *Information Asymmetry, Information Precision, and the Cost of Capital*, 16 Review of Finance 1, 1-29 (2011).

analysts to assess how they use an auditor's report as part of a company evaluation found that the variability of information content would mean that the information would not be just confirming prior beliefs about financial statement quality but would be more likely to affect user decision making and increase the perceived quality of the audit.[27/]

Communication of critical audit matters in the auditor's report is intended to make the auditor's report more informative, thus increasing its relevance and usefulness to investors and other financial statement users. Academic research suggests that the prominence with which information is disclosed can have implications for investment decision making.[28/] Communication of critical audit matters in the auditor's report could focus investors' and other financial statement users' attention on challenges associated with the audit that may contribute to the information used in investment decision making. Making the auditor's report more informative can benefit investors and other financial statement users by increasing the prominence of potentially valuable information, thus increasing the value of the auditor's report.

The auditor's focus on, and communication of, critical audit matters could lead to improved financial statement disclosures related to areas of the financial statements that gave rise to critical audit matters. Potential improvements to financial statement disclosures in such areas could occur because of increased attention by the auditor, management, and the audit committee of matters communicated by the auditor in the draft auditor's report regarding critical audit matters. The improvement in the related financial statement disclosures could incrementally increase the amount or quality of the information in the financial statements. Academic research has indicated that increasing the amount or quality of information in financial reporting could result in more efficient capital allocation decisions.[29/]

## B. Proposed Other Information Standard

The proposed other information standard includes three key elements: (1) adding a description in the auditor's report of the auditor's responsibilities relating to other information; (2) including specific procedures for the auditor to perform with respect to evaluating the other information; and (3) providing for specific responses to the results of the auditor's evaluation of the other information, including reporting in the auditor's report.

The proposed other information standard would respond to investors' interests in obtaining information regarding the auditor's responsibilities for other information outside the financial statements that is contained in documents that include the audited financial statements and the related auditor's report. The proposed other information standard is intended to improve the auditor's procedures and enhance the auditor's responsibilities with respect to other information, further protecting the interests of investors. The proposed other information standard includes specific procedures designed to improve the auditor's evaluation of the other information. These procedures are intended to provide consistency in practice among auditors when evaluating the other information or responding to material inconsistencies or material misstatements of fact identified in the other information. These proposed procedures also are intended to provide a specific basis for the auditor's description in the auditor's report of the auditor's responsibilities for, and the results of, the auditor's evaluation of the other information. The Board, however, also anticipates that the proposed other information standard would have some cost implications for auditors and companies, including audit committees, such as:[30/]

- One-time costs, for example, updating audit firm methodologies to reflect the new performance and reporting requirements and training firm personnel;

- Recurring costs related to increased auditor effort to evaluate the other information, particularly for firms that might not currently be performing evaluation procedures on the other information similar to those in the proposed other information standard;

---

[30/] The potential costs related to the proposed other information standard are discussed more fully in Appendix 6, specifically Sections III.C.3., *Performing Procedures to Evaluate*; VI., *Reporting in the Auditor's Report;* and VIII., *Other Considerations*.

- Costs for the auditor related to situations in which a material inconsistency or a material misstatement of fact is identified, including costs related to performing procedures to respond to, and report on, such material inconsistency, material misstatement of fact, or both;[31/] and

- Costs that might also arise for the company and its audit committee as a result of additional discussions with the auditor and others in connection with the description in the auditor's report.

The enhanced reporting requirements regarding other information are designed to provide investors and other users of financial information with an understanding of the auditor's responsibilities related to the other information as well as the results of the auditor's evaluation of the other information.

The required procedures under the proposed other information standard would focus the auditor's attention on the identification of material inconsistencies between the other information and the company's financial statements and on the identification of material misstatements of fact. When evaluating the other information, the auditor would be in a position to identify potential inconsistencies between the other information and the company's financial statements that could be difficult for investors and other financial statement users to identify when analyzing the company's financial performance. Such inconsistencies could occur for a number of reasons, including unintentional error, managerial biases,[32/] or intentional misreporting.[33/] As a result of the auditor's evaluation of other information and communication of any potential material inconsistencies or material misstatements of fact to the company's management, the

---

[31/] Costs related to reporting under the proposed other information standard regarding a material inconsistency should be similar to those incurred under the existing standard because the requirements of the two standards are similar in this respect.

[32/] See, e.g., Catherine M. Schrand and Sarah L.C. Zechman, *Executive Overconfidence and the Slippery Slope to Financial Misreporting*, 53 Journal of Accounting and Economics 311, 311-329 (2012) and Paul Hribar and Holly Yang, *CEO Overconfidence and Management Forecasting,* Unpublished working paper (2013) available at http://ssrn.com/abstract=929731.

[33/] See Joseph F. Brazel, Keith L. Jones, and Mark F. Zimbelman, *Using Nonfinancial Measures to Assess Fraud Risk*, 47 Journal of Accounting Research 1135, 1135-1166 (2009).

proposed other information standard could promote consistency between the other information and the audited financial statements, which in turn could increase the amount and quality of information[34/] available to investors and other financial statement users. In general, increasing the amount or quality of information available to investors could also facilitate more efficient capital allocation decisions.[35/] Academic research has shown that the increased quality of information could also result in a reduction in the average cost of capital.[36/]

## V. Request for Comment on the Applicability of the Proposed Standards and Amendments to Emerging Growth Companies

The Board is in the process of considering how the proposed standards and amendments might affect audits of EGCs.

Based on the data outlined in Section III, *Characteristics of Self-Identified EGCs*, above, EGCs generally appear to be smaller and newer public companies. Although it may be often assumed that such companies would have operations, and respectively audits, that are less complex, this may not be true for many EGCs.

As noted in Section III above, financial institutions represent approximately 28% of the total assets of EGCs. Given the nature of the operations of financial institutions, the audits of these EGCs might involve subjective or complex areas, such as the auditor's evaluation of the determination of the allowance for loan losses or the valuation of financial instruments with little market activity. Therefore, in the audits of these EGCs, the auditor might be addressing matters that meet the definition of critical audit matters because they involved difficult, subjective, or complex auditor judgments.

---

[34/] See Robert E. Verrecchia, *The Use of Mathematical Models in Financial Accounting*, 20 Journal of Accounting Research 1, 1-42 (1982).

[35/] See Richard A. Lambert, Christian Leuz, and Robert E. Verrecchia, *Information Asymmetry, Information Precision, and the Cost of Capital*, 16 Review of Finance 1, 1-29 (2011).

[36/] Empirical research generally finds that increased public disclosure of information is associated with decreased cost of equity capital. For a review of the literature, see Christine A. Botosan, Marlene A. Plumlee, and Yuan Xie, *The Role of Information Precision in Determining the Cost of Equity Capital,* 9 Review of Accounting Studies 233, 233-259 (2004).

The data presented in Section III above also suggests that EGCs are 10 times more likely than the population of companies in the Russell 3000 Index to have a management report on internal control over financial reporting stating that the company's internal control over financial reporting was not effective. As a result, in the audits of EGCs, the auditor might be presented with control deficiencies of high severity which likely would be a consideration in the auditor's determination of critical audit matters because the control deficiencies might, for example, pose difficulty to the auditor in obtaining sufficient appropriate audit evidence.

Further, the data presented in Section III above indicates that for 55% of the EGCs the auditor's report on the most recent audited financial statements includes an explanatory paragraph describing that there is substantial doubt about the company's ability to continue as a going concern, as compared to 1% for the population of companies in the Russell 3000 Index. This suggests that for the majority of EGCs the auditor is evaluating whether there is substantial doubt about the company's ability to continue as a going concern. Depending on the facts and circumstances, the auditor's evaluation might meet the definition of critical audit matters.

As described in Section III above, a review of SEC filings of EGCs indicates that three quarters of the EGCs that could have taken advantage of a JOBS Act provision to present two years of financial statements in their registration statements have chosen not to avail themselves of this provision and instead presented three years, which is generally required of non-EGC companies. Discussion included in EGC filings suggests that taking advantage of JOBS Act provisions that allow more limited disclosures in a company's filings is viewed by at least some EGCs as presenting risks that they are unwilling to take.

The application of the proposed auditor reporting standard, specifically the requirement to communicate critical audit matters, may be beneficial to EGCs because critical audit matters would provide more information about the company's audit to investors and other financial statement users. In general, there is less information available in the market about smaller and newer companies than there is about larger, more established companies. For example, smaller companies have very little, if any, analyst coverage which lessens the entire mix of information made available to investment bankers, fund managers, and individual investors which makes markets less efficient.[37/] The communication of critical audit matters would provide more information

---

[37/] See SEC, *Final Report of the Advisory Committee on Smaller Public Companies to the U.S. Securities and Exchange Commission*, (April 23, 2006) at 73, available at http://www.sec.gov/info/smallbus/acspc.shtml.

to investors and provide insight about the most difficult, subjective, or complex matters that the auditor addressed in the audit. Providing meaningful information about the audit, such as the communication of critical audit matters in the auditor's report, could thus be particularly beneficial to smaller and newer companies. The availability of such information could contribute toward investors making more informed decisions, resulting in more efficient capital allocation and lower average cost of capital.

As noted in Section III above, many EGCs have identified themselves as smaller reporting companies. Smaller reporting companies generally apply the SEC's scaled disclosure rules.[38/] Therefore, these companies have less other information for the auditor to evaluate under the proposed other information standard than larger companies. Thus, EGCs that are smaller reporting companies may incur less cost related to the evaluation of the other information than larger companies.

As the Board's considers whether it should request the SEC to apply the proposed standards and amendments to the audits of EGCs, the Board reviewed relevant comments received in response to the concept release and from the Board's Standing Advisory Group ("SAG"). The concept release, which was issued before the JOBS Act became law, included a question about whether the changes to the auditor's reporting model should apply to all audit reports filed with the SEC, including those filed in connection with the financial statements of public companies, investment companies, investment advisers, brokers and dealers, and others. Commenters diverged on whether certain types of companies should be excluded from the scope of changes to the auditor reporting model.

Some commenters that responded to this question in the concept release suggested that, depending on the nature and extent of changes to the auditor's report, the Board give different consideration to the auditors' reports of smaller companies, which would include many EGCs. Suggested examples of such considerations include a phased-in implementation depending on the size of the company; application of any new requirements only to larger companies followed by consideration of expanding the requirements to smaller companies; and total exemption for companies under certain market capitalization. The reasons for the suggested different considerations include

---

[38/] The SEC adopted a new system of disclosure rules for smaller reporting companies. The new rules were effective February 4, 2008. They are scaled to reflect the characteristics and needs of smaller companies and their investors. See SEC, *Smaller Reporting Company Regulatory Relief and Simplification,* Securities Act Release No. 8876 (Dec. 19, 2007).

greater cost constraints typically experienced by smaller companies; differences in corporate structure, complexity, and the types of users of smaller companies' financial information; and statutory exemptions for certain smaller companies from the requirement for an auditor's report on internal control over financial reporting.

In contrast, other commenters that responded to this question in the concept release supported requiring the same reporting for all companies regardless of nature or size. The primary reason of these commenters' views was better consistency and comparability of auditors' reports across companies.

Likewise, some participants at the May 2012 SAG meeting commented that they do not support the development of separate auditing standards for EGC and non-EGC public companies because it would be very difficult for the auditor to apply an "on/off switch" with respect to the auditor's responsibilities.[39/] Those participants described a differential approach to EGCs as challenging and resulting in unnecessary complications for audits of EGCs. These participants did not clarify whether their comments relate to audit performance standards, reporting standards, or both. This concern of having different auditing standards for EGCs may be mitigated to the extent that reporting on critical audit matters is a discrete and separable task.

As noted previously, approximately 65% of EGCs were audited by triennially inspected firms that are not affiliated with annually inspected firms. Approximately 76% of triennially inspected firms audit 10 or fewer issuers[40/] which could indicate that these are small firms with more limited resources. Therefore, developing and maintaining different methodologies for audits of EGCs and non-EGCs, as well as the related staff training, could have a disproportionately negative effect on triennially inspected firms because of higher costs in relation to their income.

Exempting EGCs from the proposed standards and amendments might put them at an informational disadvantage compared to larger and more established companies that would be subject to the proposed standards and amendments. For example, if the

---

39/ See May 2012 SAG meeting available at http://pcaobus.org/News/Webcasts/Pages/05172012_SAGMeeting.aspx.

40/ See Exhibit 1 of *Report on 2007-2010 Inspections of Domestic Firms That Audit 100 or Fewer Public Companies*, PCAOB Release No. 2013-001 (Feb. 25, 2013) available at http://pcaobus.org/Inspections/Documents/02252013_Release_2013_001.pdf.

standards do not apply to audits of EGCs, but are applicable to audits of larger and more established companies, the potential disparity between the two groups of companies in the amount and quality of public information available for investment decision making could increase. To the extent that market participants perceive adoption of the proposed standards and amendments as a step toward lowering information asymmetry between company management and investors, exempting EGCs from the proposed standards and amendments may also put them at a disadvantage. Exempting EGCs from the proposed standards and amendments could cause investors to perceive additional risk and uncertainty with EGCs, which could put EGCs at a competitive disadvantage compared to non-EGCs in attracting available capital.

The Board is interested in commenters' views on the impact of the proposed standards and amendments on audits of EGCs. The Board is soliciting comments generally on issues it should consider relating to the applicability of the proposed standards and amendments to EGCs, as well as responses to the specific questions below.

Questions:

1. Should the proposed standards and amendments be applicable for audits of EGCs? Why or why not?

2. Are there any other considerations related to competition, efficiency, and capital formation that the Board should take into account with respect to applying the proposed standards and amendments to audits of EGCs?

3. Are there any special characteristics of EGCs that the Board should consider related to the proposed auditor reporting standard, including the communication of critical audit matters?

4. Would audits of EGCs be more, less, or equally likely to have critical audit matters?

5. Are there any special characteristics of EGCs that the Board should consider related to the proposed other information standard and amendments?

6. What costs would audit firms incur when implementing the proposed auditor reporting standard, including the communication of critical audit matters, for audits of EGCs? How will those costs differ from the costs for audits of larger and more established companies?

7. What costs would audit firms incur when implementing the proposed other information standard for audits of EGCs? How will those costs differ from the costs for audits of larger and more established companies?

8. Are there particular costs or burdens applicable to EGCs that the Board should consider when determining what recommendation to provide the Commission regarding the application of the proposed auditor reporting standard and amendments to EGCs?

9. Are there particular costs or burdens applicable to EGCs that the Board should consider when determining what recommendation to provide the Commission regarding the application of the proposed other information standard and amendments to EGCs?

10. For auditors of both EGCs and other SEC registrants, would it be more costly not to apply the proposed standards and amendments to audits of EGCs because the firms would need to develop and maintain two audit methodologies?

| PROPOSED AUDITING STANDARD—<br><br>THE AUDITOR'S REPORT ON AN AUDIT OF FINANCIAL STATEMENTS WHEN THE AUDITOR EXPRESSES AN UNQUALIFIED OPINION<br><br>AND RELATED AMENDMENTS TO PCAOB STANDARDS | PCAOB Release No. 2016-003<br>May 11, 2016<br><br>PCAOB Rulemaking<br>Docket Matter No. 034 |

Summary: The Public Company Accounting Oversight Board ("PCAOB" or "Board") is reproposing a standard, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*, which would supersede portions of AS 3101, *Reports on Audited Financial Statements*, and related amendments to PCAOB standards.

Public Comment: Interested persons may submit written comments to the Board. Comments should be sent to the Office of the Secretary, PCAOB, 1666 K Street, NW, Washington, DC 20006-2803. Comments also may be submitted by email to comments@pcaobus.org or through the Board's website at www.pcaobus.org. All comments should refer to PCAOB Rulemaking Docket Matter No. 034 in the subject or reference line and should be received by the Board by August 15, 2016.

Board Contacts: Jennifer Rand, Deputy Chief Auditor (202/207-9206, randj @pcaobus.org); Jessica Watts, Associate Chief Auditor (202/207-9376, wattsj@pcaobus.org); Karen Wiedemann, Associate Counsel (202/591-4411, wiedemannk@pcaobus.org); Elena Bozhkova, Assistant Chief Auditor (202/207-9298, bozhkovae@pcaobus.org); and Ekaterina Dizna, Assistant Chief Auditor (202/591-4125, diznae@pcaobus.org).

**Contents**

## I. Summary

The Board is reproposing the auditor reporting standard, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion* ("reproposed standard" or "reproposal"). The reproposal would retain the pass/fail model of the existing auditor's report, which is generally acknowledged to be a useful signal as to whether the audited financial statements are presented fairly. Consistent with the Board's statutory mandate to "protect the interests of investors and further the public interest in the preparation of informative, accurate and independent audit reports,"[1] the reproposal also seeks to enhance the form and content of the report to make it more relevant and informative to investors and other financial statement users. In particular, the auditor's report would include a description of "critical audit matters," which would provide audit-specific information about especially challenging, subjective, or complex aspects of the audit as they relate to the relevant financial statement accounts and disclosures.

The reproposal builds on more than five years of Board outreach, in which many investors and other financial statement users have consistently urged the Board to make the auditor's report more relevant and informative. Outside the United States, other regulators and standard setters have also moved toward expanded auditor reporting.

The auditor's report is the primary means by which the auditor communicates information regarding the audit of the financial statements to investors and other financial statement users. As currently designed, however, the auditor's report conveys very little of the information obtained and evaluated by the auditor as part of the audit. And while the auditor's report has generally remained unchanged since the 1940s, companies' operations have become more complex and global, and the financial reporting frameworks have evolved toward an increasing use of estimates and fair value measurements. As part of the audit, auditors often perform procedures involving challenging, subjective, or complex judgments, such as evaluating calculations or models, the impact of unusual transactions, and areas of significant risk. Although the auditor is required to communicate with the audit committee regarding such matters, this information is not known to investors. Given the increased complexity of financial reporting, which requires the auditor to evaluate complex calculations or models and make challenging or subjective judgments, the current form of the auditor's report does little to address the information asymmetry[2] between investors and auditors. This may

---

1 Section 101(a) of the Sarbanes-Oxley Act of 2002 ("Sarbanes-Oxley").

2 Economists often describe this imbalance, where one party has more or better information than another party, as "information asymmetry." As part of the system of financial reporting, the audit of the financial statements helps reduce the information

limit the extent to which the auditor's report can address the information asymmetry between investors and management.

In recent years, many investors and others have stated that auditors should provide additional information in the auditor's report to make the report more relevant and useful.[3] At the same time, other commenters, primarily issuers and accounting firms, have argued that it would be inappropriate for the auditor to provide financial analysis or disclosures on behalf of the company being audited. The reproposed standard is intended to respond to investor requests for additional information about the financial statement audit by increasing the relevance and usefulness of the auditor's report, without imposing requirements beyond the auditor's expertise or mandate.

The communication of critical audit matters would inform investors and other financial statement users of matters arising from the audit that required especially challenging, subjective, or complex auditor judgment, and how the auditor responded to those matters. The Board believes that critical audit matters are likely to be identified in areas that investors have indicated would be of particular interest to them, such as significant management estimates and judgments made in preparing the financial statements; areas of high financial statement and audit risk; unusual transactions; and other significant changes in the financial statements.

In addition to informing investors and other financial statement users about areas of the audit that were especially challenging, subjective, or complex and helping them understand how the auditor addressed these areas, the Board believes that the communication of critical audit matters should help focus investor attention on these matters and provide a new perspective on the financial statements. For instance, additional reporting by the auditor could facilitate analysis of the financial statements and help investors and analysts engage management with targeted questions about

---

asymmetry investors face by providing an independent opinion about whether the financial statements are presented fairly in all material respects.

[3] *See* survey, *Improving the Auditor's Report*, which was presented by the working group of the PCAOB's Investor Advisory Group ("IAG") on the Auditor's Report and The Role of the Auditor (Mar. 16, 2011) ("IAG 2011 survey"). *See also* CFA Institute's *Usefulness of the Independent Auditor's Report Survey Results* (May 4, 2011); *Independent Auditor's Report Survey Results* (Mar. 31, 2010); and *Independent Auditor's Report Monthly Poll Results* (Mar. 12, 2008) ("CFA survey and poll results"). *See also* transcripts and participant statements from the Board's April 2014 public meeting, available on the Board's website in Rulemaking Docket Matter No. 034, *Proposed Auditing Standards on the Auditor's Report and the Auditor's Responsibilities Regarding Other Information and Related Amendments* ("Docket 034").

critical audit matters. To the extent the identification and communication of critical audit matters increases focus by auditors, audit committees, and management on the matters identified as critical audit matters, it may also lead to an incremental increase in audit quality and the quality of information presented in the financial statements and related disclosures.

In addition to critical audit matters, the reproposal includes other improvements to the existing auditor's report under AS 3101 (currently AU sec. 508[4]), *Reports on Audited Financial Statements*, primarily intended to clarify the auditor's role and responsibilities related to the audit of the financial statements and make the auditor's report easier to read.

The reproposed standard would include the following significant changes to the existing auditor's report:

- *Critical audit matters*—would require communication in the auditor's report of any critical audit matters arising from the audit of the current period's financial statements.
    - *Definition of a critical audit matter*—any matter that was communicated or required to be communicated to the audit committee and that:
        - Relates to accounts or disclosures that are material to the financial statements, and
        - Involved especially challenging, subjective, or complex auditor judgment.
    - *Factors in determining critical audit matters*—the auditor would take into account a nonexclusive list of factors in determining whether a matter

[4] In 2015, the PCAOB adopted and the U.S. Securities and Exchange Commission ("SEC") approved the reorganization of PCAOB auditing standards using a topical structure and a single, integrated numbering system. *See Reorganization of PCAOB Auditing Standards and Related Amendments to PCAOB Standards and Rules*, PCAOB Release No. 2015-002 (Mar. 31, 2015); SEC, *Public Company Accounting Oversight Board; Order Granting Approval of Proposed Rules To Implement the Reorganization of PCAOB Auditing Standards and Related Changes to PCAOB Rules and Attestation, Quality Control, and Ethics and Independence Standards*, Exchange Act Release No. 75935 (Sept. 17, 2015), 80 FR 57263 (Sept. 22, 2015). The reorganized amendments will be effective as of December 31, 2016, but may be used and referenced before that date. *See* PCAOB Release No. 2015-002, at 21.

involved especially challenging, subjective, or complex auditor judgment, such as the auditor's assessment of the risks of material misstatement, including significant risks.

- o *Communication in the auditor's report*—the auditor would identify the critical audit matter, describe the principal considerations that led the auditor to determine that the matter is a critical audit matter, describe how it was addressed in the audit, and refer to the relevant financial statement accounts and disclosures. If there are no critical audit matters, the auditor would so state in the auditor's report.
- o *Documentation*—the auditor would document the basis for its determination of whether each matter that both: (1) was communicated or required to be communicated to the audit committee and (2) relates to accounts or disclosures that are material to the financial statements, involved especially challenging, subjective, or complex auditor judgment.

- *Additional Improvements to the Auditor's Report*
  - o *Clarifications of existing auditor responsibilities*—enhance certain standardized language in the auditor's report, including adding a statement about auditor independence and the phrase "whether due to error or fraud," when describing the auditor's responsibilities under PCAOB standards to obtain reasonable assurance about whether the financial statements are free of material misstatements;
  - o *Tenure*—add a basic element of the auditor's report related to auditor tenure; and
  - o *Standardized form of the auditor's report*—require the opinion be the first section of the auditor's report and require section titles to guide the reader.

The reproposal has been informed by comments received on the 2013 proposal,[5] the Board's April 2014 public meeting,[6] analysis of economic considerations, academic research, and international developments. In particular, while the concept of critical

---

[5] *See Proposed Auditing Standards—The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion; the Auditor's Responsibilities Regarding Other Information in Certain Documents Containing Audited Financial Statements and the Related Auditor's Report; and Related Amendments to PCAOB Standards*, PCAOB Release No. 2013-005 (Aug. 13, 2013) ("2013 proposal" or "proposed standard").

[6] *See* transcripts and participant statements from the public meeting, available on the Board's website in Docket 034.

audit matters has been carried forward from the 2013 proposal, the reproposed requirements have been narrowed in a number of respects, including by:

- Limiting the source of potential critical audit matters to matters communicated or required to be communicated to the audit committee;
- Adding a materiality component to the definition of critical audit matter;
- Narrowing the definition to only those matters that involved especially challenging, subjective, or complex auditor judgment; and
- Revising the related documentation requirement.

In addition, the reproposed communication requirement has been expanded to require the auditor to describe how the critical audit matter was addressed in the audit. As under the 2013 proposal, the reproposed communication of critical audit matters would not change the auditor's current role of attesting to information prepared by management.

The reproposed standard would generally apply to audits conducted under PCAOB standards. However, unlike the 2013 proposal, communication of critical audit matters would not be required for audits of brokers and dealers reporting under the Securities Exchange Act of 1934 ("Exchange Act") Rule 17a-5; investment companies other than business development companies; and employee stock purchase, savings, and similar plans ("benefit plans").[7]

The 2013 proposal also included another new auditing standard, *The Auditor's Responsibilities Regarding Other Information in Certain Documents Containing Audited Financial Statements and the Related Auditor's Report*, regarding the auditor's responsibilities for other information outside the financial statements.[8] The Board is not reproposing the "other information" auditing standard at this time but plans to determine next steps at a later date.

---

[7] The other requirements of the reproposed standard would be applicable to audits of these types of entities.

## II. Background

### A. Rulemaking History

Changes to the auditor's report have been discussed by several commissions and committees, including the 2008 U.S. Department of the Treasury Advisory Committee on the Auditing Profession ("ACAP").[9] ACAP recommended that the PCAOB consider improvements to the auditor's report, noting that the increasing complexity of global business operations compels a growing use of judgments and estimates, including those related to fair value measurements, and also contributes to greater complexity in financial reporting.

The PCAOB commenced its standard-setting project on the auditor's reporting model in 2010 with outreach to different stakeholders, including investors, financial statement preparers, and auditors. During that outreach, many investors expressed dissatisfaction with the content of the existing auditor's report because it provides to investors little, if any, information specific to the audit of the company's financial statements. Generally, preparers, audit committee members, and auditors were not supportive of adding company-specific information to the auditor's report, arguing that the company, through its management or audit committee, should be the primary source of the company's financial information. Changes to the auditor's report were also discussed at the March 2011 IAG meeting.[10] Some investors who participated in that meeting suggested that expanded auditor reporting would have been helpful before and during the 2008 financial crisis.[11] Later in March 2011, the Board held an open meeting to discuss findings from its outreach.[12]

[12] *See* meeting details and webcast for PCAOB Open Board meeting on March 22, 2011, available on the Board's website.

In June 2011, the Board issued a concept release to solicit comment on a number of potential changes to the auditor's report.[13] The Board also held a public roundtable in September 2011 to obtain additional insight on the alternatives presented in the concept release.[14] Changes to the auditor's report were also discussed at the November 2011 and 2012 meetings of the Board's Standing Advisory Group ("SAG").[15]

After considering the results of its outreach and comments on its concept release, in August 2013, the Board proposed an auditing standard that included, among other things, new requirements for auditors to communicate critical audit matters, as well as additional improvements to the auditor's report.[16] The Board received 248 comment letters on the 2013 proposal. Most commenters to the 2013 proposal generally supported the Board's objective to improve the auditor's report to make it more informative and relevant to financial statement users, but commenters' views varied on the nature and extent of such changes, particularly as to critical audit matters.[17] Commenters generally supported changes to the basic elements; however, commenters' views varied as to critical audit matters, with investors and large accounting firms generally supporting communication of critical audit matters, with some modifications, smaller accounting firms being less supportive, and preparers and audit committee members generally opposing communication of critical audit matters.

In April 2014, the Board held a public meeting to obtain further input on the 2013 proposal from a diverse group of investors and other financial statement users, preparers, audit committee members, auditors, and others.[18] The 2013 proposal was

further discussed at the November 2013 and June 2014 SAG meetings, and the October 2013 and October 2014 IAG meetings.[19]

## B. Initiatives of Other Regulators and Standard Setters

### *1. Overview of the Requirements of the IAASB, the EU, and the FRC*

The form and content of the auditor's report is undergoing change globally. In recent years, several international regulators and standard setters, including the International Auditing and Assurance Standards Board ("IAASB"), the European Union ("EU"), and the Financial Reporting Council in the United Kingdom ("FRC"), have adopted requirements for expanded auditor reporting that go beyond the binary pass/fail model. While their underlying requirements for expanded auditor reporting differ in the details, there is a common theme in these initiatives: communicating information about audit-specific matters in the auditor's report. In addition to expanded auditor reporting, many of these initiatives also include other changes to the form and content of the auditor's report.

Several commenters have urged the Board to work together with these other regulators and standard setters to improve the auditor's report. The Board recognizes that the regulatory environments in other jurisdictions are different from the United States, requiring the Board to address unique U.S. requirements and characteristics in its standard-setting projects. Even so, the Board is considering carefully the efforts undertaken in other jurisdictions, and, as described in more detail below, the Board's reproposal is analogous in many respects to auditor reporting requirements recently established in other jurisdictions.

*IAASB*. In September 2014, the IAASB adopted changes to the requirements for the auditor's report, including a new requirement for the auditor to communicate "key audit matters" for audits of listed companies.[20] Key audit matters are selected from matters communicated with those charged with governance and are defined as those matters that, in the auditor's professional judgment, were of most significance in the audit of the financial statements of the current period.[21] The IAASB requires that the description of each key audit matter in the auditor's report include: (1) why the matter

[19] *See* SAG and IAG meeting transcripts, available on the Board's website in Docket 034.

[20] The IAASB changes to the auditor's report are effective for audits of financial statements for periods ending on or after December 15, 2016.

[21] *See* paragraph 8 of International Standard on Auditing ("ISA") 701, *Communicating Key Audit Matters in the Independent Auditor's Report*.

was considered to be a key audit matter, (2) how the matter was addressed in the audit, and (3) reference to the related disclosures, if any, in the financial statements.[22]

As part of its auditor reporting project, the IAASB also adopted additional changes to the form and content of the auditor's report. These include a statement that the auditor is independent of the entity in accordance with the relevant ethical requirements relating to the audit,[23] an enhanced description of the responsibilities of the auditor,[24] and requiring the auditor's opinion to be the first paragraph of the auditor's report.[25]

*EU*. In April 2014, the EU adopted legislation creating a number of new requirements, including expanded auditor reporting requirements, for audits of public-interest entities ("PIEs"), such as listed companies, credit institutions, and insurance companies.[26] Under the EU reforms, the auditor's report for a PIE is required to include a description of the most significant assessed risks of material misstatement, including assessed risks of material misstatement due to fraud, as well as a summary of the auditor's response to those risks and, where relevant, key observations arising with respect to those risks. In addition, the EU reforms require a statement that the auditor remained independent of the audited entity and disclosure of auditor tenure.

*FRC*. In June 2013, the FRC revised its auditor reporting requirements for entities that apply the UK Corporate Governance Code.[27] The auditors of those entities

[23] *See* paragraph 28(c) of ISA 700 (Revised), *Forming an Opinion and Reporting on Financial Statements*.

[24] *See* paragraph 37 of ISA 700.

[25] *See* paragraph 23 of ISA 700.

[26] *See* Article 10, *Audit Report*, of Regulation (EU) No 537/2014 of the European Parliament and of the Council ("Regulation (EU) No 537/2014"). EU member states have until June 2016 to adopt the provisions of the EU legislation into their own national laws and rules. Information on member state implementation is available at http://ec.europa.eu/finance/auditing/reform/index_en.htm.

[27] These entities include companies with a premium listing of equity shares on the London Stock Exchange, regardless of whether they are incorporated in the U.K. or elsewhere. The changes made to the auditor's report were designed to complement other changes made to the UK Corporate Governance Code that require the audit

are required, among other things, to describe the risks of material misstatement that had the greatest effect on: (1) the overall audit strategy; (2) the allocation of resources in the audit; and (3) directing the efforts of the engagement team. In addition, auditors are required to provide an explanation of how the scope of the audit addressed the risks.[28]

In April 2016, the FRC adopted a final rule updating its 2013 auditor reporting requirements to incorporate the EU and the IAASB requirements.[29] Under the final rule, the FRC adopted the IAASB's definition of key audit matters. In the application and other explanatory material on the definition of key audit matters, the FRC identified risks of material misstatement, as determined under both its existing requirements and those of the EU, as key audit matters under that definition. When the FRC proposed these rule changes in September 2015, it stated that it did not expect the incorporation of its own requirements and those of the EU to result in an increase in the number of key audit matters communicated in the auditor's report over what would be required by the IAASB standard alone.[30]

*2. Comparison of the Board's Reproposal to Other Requirements*

Even though the underlying auditor reporting requirements of other regulators and standard setters are different in the details, in many respects, the initiatives are analogous to the Board's reproposal. All of these initiatives would result in expanding the auditor's report beyond the traditional pass/fail model to communicate information specific to the particular audit. Although the processes of identifying these matters would vary across jurisdictions, there are commonalities in the underlying criteria

---

committee to describe significant issues it considered relating to the financial statements. *See* Section C.3.8 of FRC UK Corporate Governance Code (Sept. 2012).

[28] *See* paragraphs 19A–B of ISA (UK and Ireland) 700 (Revised June 2013), *The Independent Auditor's Report on Financial Statements* ("UK ISA 700 (2013)"). The FRC 2013 requirements became effective for audits of financial statements for periods beginning on or after October 1, 2012.

[29] *See* the FRC's Final Draft, International Standards on Auditing (UK and Ireland) 701*, Communicating Key Audit Matters in the Independent Auditor's Report* (Apr. 2016). This rule is effective for audits of financial statements for periods beginning on or after June 17, 2016.

[30] *See* the FRC's *Enhancing Confidence in Audit: Proposed Revisions to the Ethical Standard, Auditing Standards, UK Corporate Governance Code and Guidance on Audit Committees* (Sept. 2015).

regarding matters to be communicated and the communication requirements, such that expanded auditor reporting could result in the communication of many of the same matters under the various approaches. The Board will continue monitoring developments of expanded auditor reporting in other jurisdictions throughout the rulemaking process and will continue to consider their relevance to its own standard-setting project.[31]

Section IV, *Discussion of the Reproposal*, includes descriptions of IAASB, EU, and FRC 2013 requirements that are analogous to the key provisions of the reproposed standard. The FRC recently adopted a final rule that updates its 2013 auditor reporting requirements to incorporate the EU and the IAASB requirements, which has not yet gone into effect. Because the FRC 2013 requirements govern the expanded auditor reporting that has occurred in the United Kingdom and is the subject of the FRC reports and academic studies described elsewhere in this release, the FRC 2013 requirements are used as a basis for comparison.

The IAASB's standard is most similar to the Board's reproposal since it requires the auditor to communicate key audit matters selected from matters communicated with those charged with governance. The FRC, under its 2013 requirements, and the EU start with the risks of material misstatement and contemplate a different process for determining matters to be communicated than the Board's reproposal. The FRC stated, however, that key audit matters under the IAASB standard are broadly equivalent to the assessed risks of material misstatement included in the UK ISA 700 (2013).[32]

The IAASB and the FRC 2013 requirements are also accompanied by application and other explanatory materials that provide further guidance on the standards. These materials are excluded from the descriptions that follow of the IAASB, EU, and FRC provisions because they are not part of the requirements.

---

[31] For example, the Board and PCAOB staff had discussions with representatives from the IAASB, EU, and FRC regarding their initiatives, and the April 2014 public meeting included representatives from these organizations.

[32] *See* the FRC's *Extended Auditor’s Reports, A Further Review of Experience* (Jan. 2016) ("FRC 2016 Report"), at 7.

## III. Overview of the Reproposal

The Board is reproposing the auditor reporting standard, which would retain the pass/fail opinion[33] of the existing auditor's report but would make significant changes to the existing auditor's report, including the following:

- *Critical audit matters*—would require the auditor to communicate in the auditor's report any critical audit matters arising from the current period's audit or state that the auditor determined that there are no critical audit matters (*see* Figure 1):
  - o A critical audit matter would be defined as a matter that was communicated or required to be communicated to the audit committee and that: (1) relates to accounts or disclosures that are material to the financial statements and (2) involved especially challenging, subjective, or complex auditor judgment.
  - o In determining whether a matter involved especially challenging, subjective, or complex auditor judgment, the auditor would take into account, alone or in combination, factors specific to the audit, including:
    - ▪ The auditor's assessment of the risks of material misstatement, including significant risks;
    - ▪ The degree of auditor subjectivity in determining or applying audit procedures to address the matter or in evaluating the results of those procedures;
    - ▪ The nature and extent of audit effort required to address the matter, including the extent of specialized skill or knowledge needed or the nature of consultations outside the engagement team regarding the matter;
    - ▪ The degree of auditor judgment related to areas in the financial statements that involved the application of significant judgment or estimation by management, including estimates with significant measurement uncertainty;

---

[33] This type of opinion has been commonly described as pass/fail because the auditor opines on whether the financial statements are fairly presented (pass) or not (fail).

- The nature and timing of significant unusual transactions and the extent of audit effort and judgment related to these transactions; and

- The nature of audit evidence obtained regarding the matter.

o The communication of each critical audit matter would include:

- Identifying the critical audit matter;

- Describing the principal considerations that led the auditor to determine that the matter is a critical audit matter;

- Describing how it was addressed in the audit; and

- Referring to the relevant financial statement accounts and disclosures.

o The documentation of critical audit matters would include the basis for the auditor's determination of whether each matter that both: (1) was communicated or required to be communicated to the audit committee and (2) relates to accounts or disclosures that are material to the financial statements, involved especially challenging, subjective, or complex auditor judgment.

- *Additional Improvements to the Auditor's Report* – the reproposal also includes a number of other improvements to the auditor's report that are primarily intended to clarify the auditor's role and responsibilities related to the audit of the financial statements, provide additional information about the auditor, or make the auditor's report easier to read:

o *Independence*—include a statement regarding the requirement for the auditor to be independent;

o *Auditor tenure*—include a statement regarding the auditor's tenure;

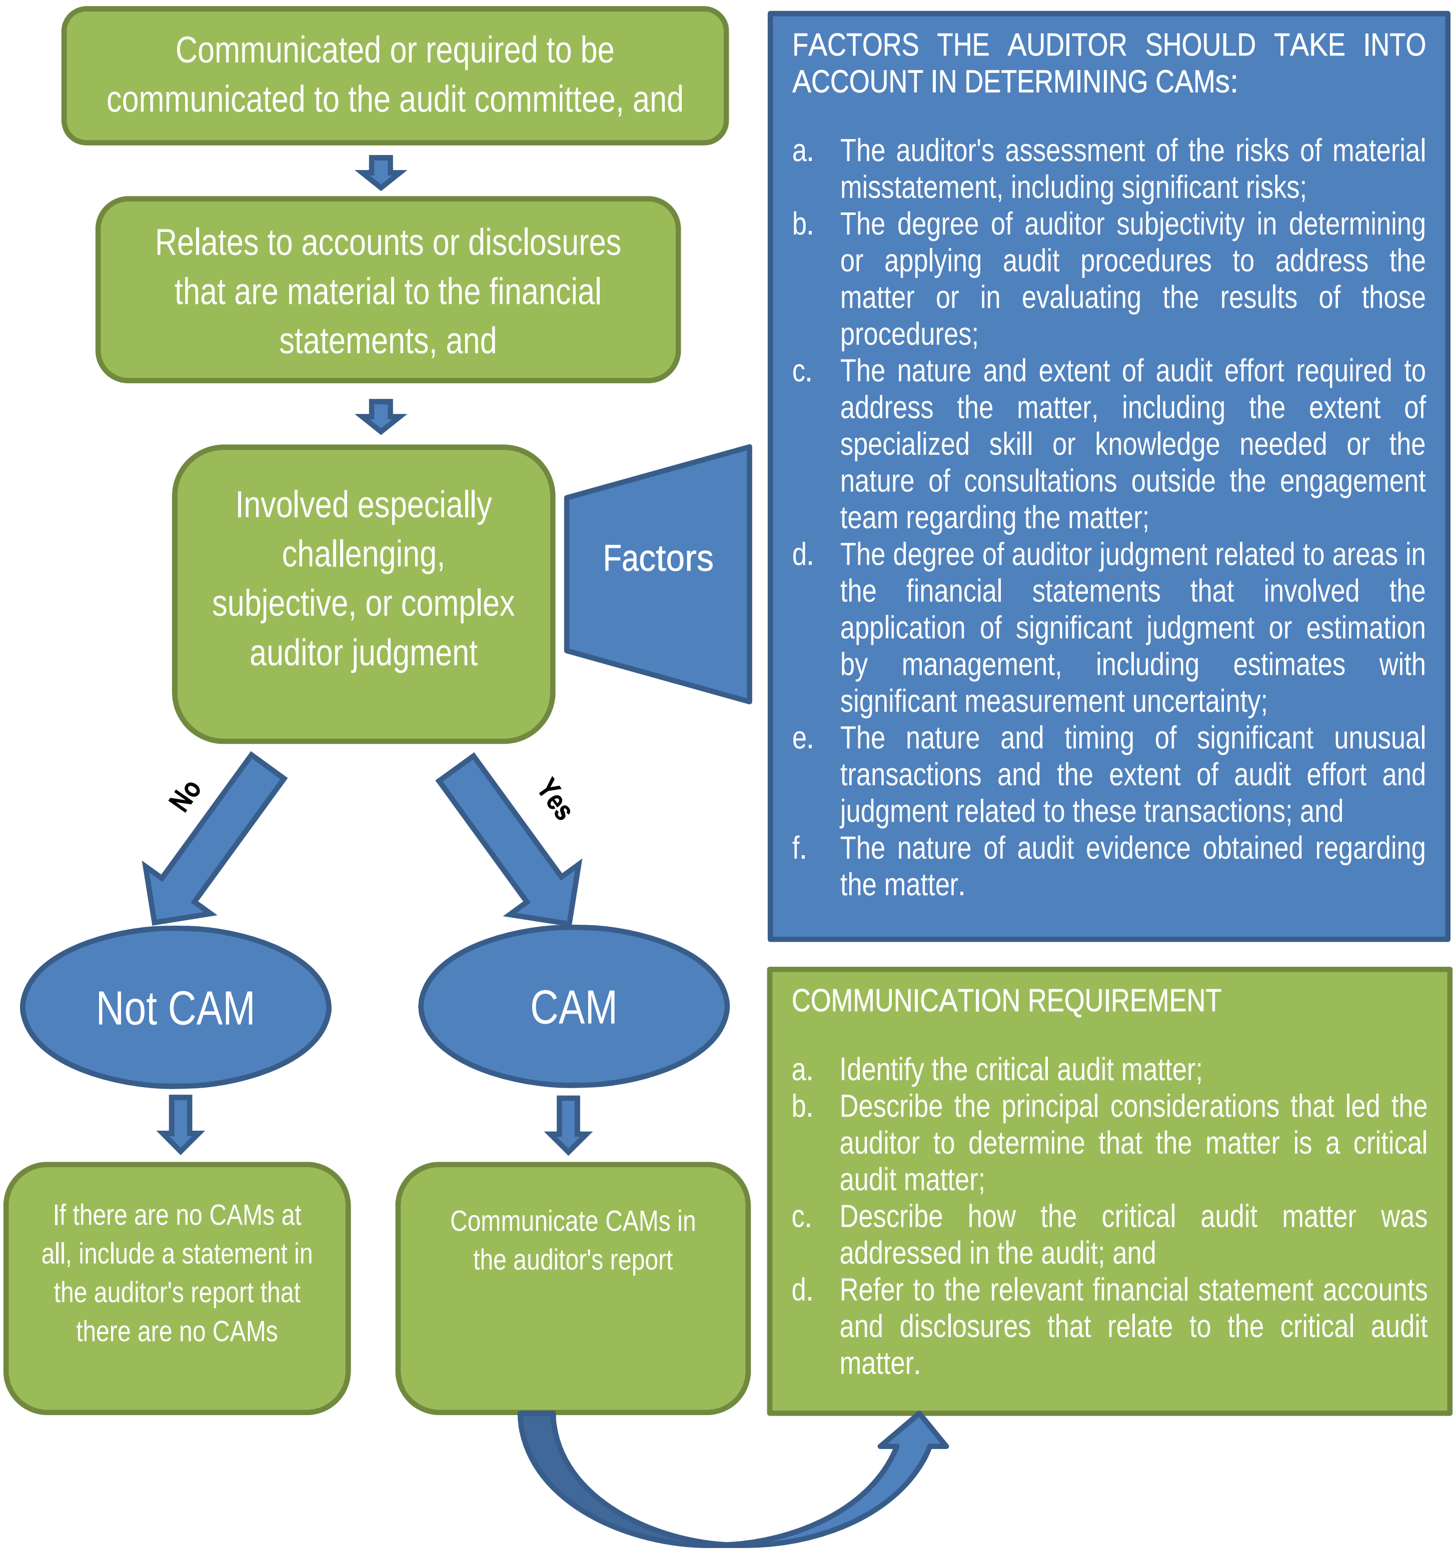
o *Addressee*—include a requirement to address the auditor's report to the company's shareholders and board of directors or equivalents, and expressly permit additional addresses;

o *Enhancements to basic elements*—enhance certain standardized language in the auditor's report, including adding the phrase *whether due to error or fraud*, when describing the auditor's responsibility under PCAOB standards to obtain reasonable assurance about whether the financial statements are free of material misstatements; and

- *Standardized form of the auditor's report*—require the opinion to be the first section of the auditor's report and require section titles to guide the reader.

The reproposed standard is attached as Appendix 1.

***Figure 1*. Determining and Communicating Critical Audit Matters ("CAMs")**



## IV. Discussion of the Reproposal

### A. Critical Audit Matters

The 2013 proposal introduced the concept of "critical audit matters," which the auditor would have been required to communicate in the auditor's report. Communication of critical audit matters in the auditor's report was intended to provide more information about the audit and therefore make the auditor's report more informative and relevant to investors and other financial statement users.

Investors, investor advocates, and analysts generally supported the proposed requirement to communicate critical audit matters. Some of them stated that the communication of critical audit matters would be relevant to investors and other financial statement users by informing them of issues identified in the audit that were significant to the auditor and focusing their attention on issues that would be pertinent to understanding the financial statements. The larger accounting firms generally supported including critical audit matters in the auditor's report, with some modification of the proposed requirements, while smaller accounting firms and associations of accountants were generally less supportive and suggested that critical audit matter reporting may be misunderstood by investors and other financial statement users. Some commenters, primarily companies and audit committee members, did not support the requirements. These commenters asserted that critical audit matters would not provide relevant information to investors, may be duplicative of the company's disclosure, may result in disclosing information not otherwise required to be disclosed, could increase cost, or could delay completion of the audit. The Board has taken into consideration all comments, including those received from investors, accounting firms, companies, audit committee members, and others in reproposing auditor communication of critical audit matters.

Under the reproposal, the concept of critical audit matters is similar to the one introduced in the 2013 proposal.[34] However, the definition of critical audit matter and other requirements have been modified based on comments and other considerations. Critical audit matters would be determined using a principles-based framework leveraging the work already performed by the auditor under existing PCAOB standards. Since critical audit matters are determined using a principles-based framework, the Board anticipates that the critical audit matters would be scalable based on the size, nature, and complexity of the audit.

---

[34] Communication of critical audit matters would not be required for the audits of brokers and dealers reporting under Exchange Act Rule 17a-5; investment companies other than business development companies; and benefit plans. *See* Section VII.

*1. Determination of Critical Audit Matters*

a. Definition of Critical Audit Matter

The definition of critical audit matters in the 2013 proposal included those matters the auditor addressed during the audit of the financial statements that:

(1) Involved the most difficult, subjective, or complex auditor judgments;

(2) Posed the most difficulty to the auditor in obtaining sufficient appropriate evidence; or

(3) Posed the most difficulty to the auditor in forming the opinion on the financial statements.

Under the 2013 proposal, critical audit matters ordinarily would have been included in matters required to be: (1) documented in the engagement completion document, which summarizes the significant issues and findings from the audit; (2) reviewed by the engagement quality reviewer; (3) communicated to the audit committee; or (4) any combination of the three.

In the reproposal, the standard has been revised to define a critical audit matter as any matter arising from the audit[35] of the financial statements that was *communicated or required to be communicated to the audit committee* and that *relates to accounts or disclosures that are material to the financial statements* and *involved especially challenging, subjective, or complex auditor judgment*.

i. Communicated or Required to Be Communicated to the Audit Committee

Commenters generally suggested that the matters communicated to the audit committee should be the source for the auditor's determination of critical audit matters. A commenter stated that, given the audit committee's oversight of the audit and role in representing the interests of shareholders, this would be an appropriate starting point for consideration of critical audit matters. In a limited implementation trial by several accounting firms of auditor reporting requirements under the 2013 proposal, engagement teams observed that using matters communicated to the audit committee

---

[35] Rather than referring to "matters addressed during the audit," the reproposed definition refers to matters "arising from the audit." This aligns with the terminology used in AS 1301 (currently Auditing Standard No. 16), *Communications with Audit Committees,* regarding matters required to be communicated to the audit committee.

as the only source for identification of critical audit matters "might be more effective and may result in the identification of those matters important to the audit in a more effective and efficient manner."[36]

Some commenters stated that matters documented in the engagement completion document and reviewed by the engagement quality reviewer would have already been considered when determining which matters to communicate to the audit committee. Some of these commenters also asserted that it is unlikely that a matter that is determined to be a critical audit matter would not have already been communicated to the audit committee. Other commenters noted that limiting the source of critical audit matters to matters communicated to the audit committee would limit the possibility of considering and communicating too many matters as critical audit matters.

In response to comments, the reproposed standard narrows the source of critical audit matters to matters communicated or required to be communicated to the audit committee. This approach would build on auditor communication requirements under AS 1301, other PCAOB rules and standards,[37] and applicable law,[38] and would also include communications made to the audit committee that were not required as a source of potential critical audit matters.

PCAOB standards require the auditor to communicate to the audit committee, among other things:

- Significant risks identified by the auditor;

- Certain matters regarding the company's accounting policies, practices, and estimates;

---

[36] This limited implementation trial (described by the Center for Audit Quality as a "field test") was initiated and conducted by nine registered public accounting firms under the auspices of the Center for Audit Quality. *See* letter from the Center for Audit Quality (June 19, 2014), at 4, available on the Board's website in Docket 034.

[37] *See* Appendix B of AS 1301, which identifies other rules and standards that require audit committee communication, such as AS 2410 (currently Auditing Standard No.18), *Related Parties*, and AS 2502 (currently AU sec. 328), *Auditing Fair Value Measurements and Disclosures*.

[38] *See, e.g.*, Section 10A(k) of the Exchange Act, 15 U.S.C. 78j-1(k); Rule 2-07 of Regulation S-X, 17 CFR 210.2-07; and Rule 10A-3 under the Exchange Act, 17 CFR 240.10A-3.

- Significant unusual transactions;
- Certain matters regarding the auditor's evaluation of the company's relationships and transactions with related parties; and
- Other matters arising from the audit that are significant to the oversight of the company's financial reporting process.

Required communications to the audit committee generally include the areas in which investors have expressed particular interest in obtaining information in the auditor's report.

Under the reproposal, critical audit matters would be drawn from matters required to be communicated to the audit committee (even if not actually communicated) and matters actually communicated (even if not required). It seems likely that especially challenging, subjective, or complex auditor judgments would relate to areas that are required to be communicated to the audit committee, either under a specific requirement or more broadly as a matter that is significant to audit committee oversight of the financial reporting process.[39] The approach under the reproposal scopes in the broadest population of audit committee communications and would not require the auditor to determine whether matters communicated to the audit committee were required to be communicated.

Some commenters expressed concerns that requiring communication of critical audit matters could have a chilling effect on auditor communications with the audit committee. With respect to any matters required to be communicated to the audit committee, there should not be a chilling effect or reduced communications to the audit committee. It would seem that any chilling effect would relate to matters that are not explicitly required to be communicated to the audit committee. Given the broad scope of communications required under AS 1301, there should be few communications affected by that possibility. Moreover, other factors, including the two-way dialogue between the audit committee and the auditor, should mitigate the risk of reduced communications.

ii. Relates to Accounts or Disclosures That Are Material to the Financial Statements

Some commenters suggested limiting critical audit matters to matters that are material to the financial statements. These commenters were concerned that the auditor otherwise may be required to communicate information that management is not required to disclose under the applicable financial reporting framework and SEC

---

[39] *See* AS 1301.24.

reporting requirements. Some commenters also stated that communicating immaterial matters would: (1) lead management to revise its disclosures to include a discussion of any matter identified as a critical audit matter, regardless of materiality or (2) weaken and obscure the auditor's opinion because such matters would be irrelevant to investors and other financial statement users.

In response to comments, the reproposed definition of critical audit matters requires that the matter relate to accounts or disclosures that are material to the financial statements.[40] "Relates to" clarifies that the critical audit matter could be an element of an account or disclosure and does not necessarily need to correspond to the entire account or disclosure in the financial statements. For example, the auditor's evaluation of the company's goodwill impairment assessment could be a critical audit matter; it would relate to goodwill because impairment is an element of that account. In addition, a critical audit matter may not necessarily relate to a single account or disclosure but could have a pervasive effect on the financial statements or relate to many accounts or disclosures. For example, the auditor's evaluation of the company's ability to continue as a going concern or the risk of management's override of internal control could also represent critical audit matters depending on the circumstances of a particular audit.

Because the definition of critical audit matters has been narrowed to include only those matters that relate to accounts or disclosures that are material to the financial statements, there may be certain matters that would have been critical audit matters under the 2013 proposal that would not be critical audit matters under the reproposed standard. For example, a loss contingency that was communicated to the audit committee, but that was determined to be remote and thus not to warrant disclosure under the applicable financial reporting framework, would not meet the reproposed definition of a critical audit matter even if it involved especially challenging auditor judgment. However, matters that would not themselves constitute critical audit matters under the reproposed definition, such as information about the company's processes and controls, could be included, for example, in the description of the principal considerations that led the auditor to determine that a matter is a critical audit matter.

---

[40] The definition of materiality is established under the U.S. federal securities laws. In interpreting those laws, the U.S. Supreme Court has held that a fact is material if there is "a substantial likelihood that the . . . fact would have been viewed by the reasonable investor as having significantly altered the 'total mix' of information made available." *See TSC Industries v. Northway, Inc.*, 426 U.S. 438, 449 (1976). *See also Basic, Inc. v. Levinson*, 485 U.S. 224, 231 to 232 (1988). As the Supreme Court has further explained, determinations of materiality require "delicate assessments of the inferences a 'reasonable shareholder' would draw from a given set of facts and the significance of those inferences to him . . ." *TSC Industries*, 426 U.S. at 450.

iii. Involved Especially Challenging, Subjective, or Complex Auditor Judgment

While some commenters generally supported the proposed definition of critical audit matters, other commenters were concerned that including the second and third criteria of the proposed definition (matters that posed the most difficulty to the auditor in obtaining sufficient appropriate evidence or in forming the opinion on the financial statements) could lead to the reporting of unimportant matters or to misinterpretation by users of the financial statements that the auditor is uncomfortable with the related accounting or disclosure of the matter identified as a critical audit matter.

In response to comments, the reproposed standard retains only the first criterion of the proposed definition, but revises it from "involved the most difficult, subjective, or complex auditor judgments" to "involved especially challenging, subjective, or complex auditor judgment." The proposal included a note clarifying that the word "most" did not imply that only one matter would qualify as a critical audit matter. The use of the word "especially" in the reproposal is intended to convey more clearly that there could be multiple critical audit matters and that the matters are assessed on a relative basis within the specific audit. Further, the word "difficult" was replaced with "challenging" in the reproposed definition based on a commenter's suggestion that "difficult" has negative overtones that suggest critical audit matters are necessarily problematic.

Several commenters suggested that investors would be most interested in auditor reporting on: (1) significant management estimates and judgments made in preparing the financial statements and the auditor's assessment of them; (2) areas of high financial statement and audit risk; (3) unusual transactions, restatements, and other significant changes in the financial statements; and (4) the quality, not just the acceptability, of the company's accounting practices and policies.[41]

The reproposed critical audit matter definition would likely cover issues raised in auditing many of the areas identified by investors. For example, the auditor may communicate critical audit matters related to significant management estimates and judgments, areas of the financial statements with a higher risk of material misstatement and audit risk, and significant unusual transactions. However, communication of auditor's assessments of the quality of a company's accounting practices and policies, while not precluded, is not required under the reproposal because there is no framework for such assessments and the determinations are inherently subjective.

---

[41] These are the same categories of information identified by investor respondents to the IAG 2011 survey.

b. Factors

The 2013 proposal included the following nonexclusive list of factors for the auditor to take into account when determining whether a matter involved the most difficult, subjective, or complex auditor judgment:

- The degree of subjectivity involved in determining or applying audit procedures to address the matter or in evaluating the results of those procedures;
- The nature and extent of audit effort required to address the matter;
- The nature and amount of available relevant and reliable evidence regarding the matter or the degree of difficulty in obtaining such evidence;
- The severity of control deficiencies identified relevant to the matter, if any;
- The degree to which the results of audit procedures to address the matter resulted in changes in the auditor's risk assessments, including risks that were not identified previously, or required changes to planned audit procedures, if any;
- The nature and significance, quantitatively or qualitatively, of corrected and accumulated uncorrected misstatements related to the matter, if any;
- The extent of specialized skill or knowledge needed to apply audit procedures to address the matter or evaluate the results of those procedures, if any; and
- The nature of consultations outside the engagement team regarding the matter, if any.

Commenters in general stated that including factors to consider would assist the auditor in determining critical audit matters.

In the limited implementation trial conducted by several accounting firms, engagement teams observed that the factors that appeared to be most useful in determining critical audit matters were those relating to the degree of auditor subjectivity in determining or applying audit procedures, the nature and extent of audit effort required to address the matter, and the nature and amount of available audit evidence.[42] Under the reproposed standard, these three factors would be retained substantially as proposed. The limited implementation trial also suggested that factors related to the extent of specialized skill or knowledge needed to apply audit procedures and the nature of consultations were also relevant to the determination of critical audit matters. Under the reproposed standard, these factors were retained but combined to create one factor on the nature and extent of audit effort.

Some commenters questioned the usefulness of two factors included in the 2013 proposal: the severity of relevant control deficiencies and the nature and significance of corrected and uncorrected misstatements. Some of these commenters stated that these factors would lead the auditor to determine matters as critical audit matters in areas where the company has no existing reporting obligation, such as control deficiencies less severe than material weaknesses, or where the company has determined that the matters are not material and therefore do not require disclosure under the financial reporting framework, such as uncorrected misstatements that were deemed immaterial. In response to comments and to align the factors with the revised definition of critical audit matters, the reproposed standard does not retain these as separate factors. However, aspects of these factors could still be relevant in the auditor's consideration of other factors, such as the nature and extent of audit effort required to address the matter.

Additionally, the Board modified the factor related to the auditor's assessment of risks of material misstatement, which under the 2013 proposal had focused on changes from the auditor's initial risk assessment. A commenter stated that the proposed factor was less relevant than other proposed factors in determining critical audit matters. Some commenters stated that determination of critical audit matters should focus on audit risk or significant risk. Recognizing the importance of the auditor's entire risk assessment process and in response to comments, the reproposed factor encompasses more broadly the auditor's assessment of risks of material misstatement, including significant risks, rather than just changes in the auditor's risk assessment.

The Board also modified the factor related to the auditor obtaining available relevant and reliable evidence. A commenter stated that matters for which the auditor had the most difficulty in obtaining relevant and reliable audit evidence may not be relevant to users of the financial statements. However, as noted above, in the limited implementation trial conducted by several accounting firms, engagement teams observed that this factor appeared to be one of the most useful in determining critical audit matters.[43] After considering comments, the proposed factor was retained but

---

[42] *See* letter from the Center for Audit Quality (June 19, 2014), at 4, available on the Board's website in Docket 034.

[43] *Id*.

aligned with the reproposed definition of critical audit matters, which no longer includes matters that posed the most difficulty to the auditor in obtaining sufficient appropriate evidence, and focused on the nature of audit evidence obtained regarding the matter.

Some commenters suggested new areas that could be of particular interest to investors and useful in the determination of critical audit matters. In addition, a commenter on the PCAOB Staff Consultation Paper, *Auditing Accounting Estimates and Fair Value Measurements* (Aug. 19, 2014), suggested that significant measurement uncertainty be added as a consideration in determining critical audit matters. In response to these comments, the reproposed standard includes the following new factors:

- *The degree of auditor judgment related to areas in the financial statements that involved the application of significant judgment or estimation by management, including estimates with significant measurement uncertainty*—Areas of the financial statements in which management has to apply significant judgment and estimation are likely to include highly uncertain matters or matters that are susceptible to significant measurement uncertainty.

- *The nature and timing of significant unusual transactions and the extent of audit effort and judgment related to these transactions*—A company's significant unusual transactions can create complex accounting and financial statement disclosures and could pose increased risks of material misstatement.

Some commenters also recommended a factor based on the extent of interaction with the audit committee. The reproposed standard does not include this factor because the extent of interaction might not be a meaningful indicator of the complexity or significance of the matter and it may create incentives to limit communication between the auditor and the audit committee.

Under the reproposed standard, once the auditor identifies a matter communicated or required to be communicated to the audit committee that relates to accounts or disclosures that are material to the company's financial statements, the auditor would take into account the following nonexclusive list of factors when determining whether a matter involved especially challenging, subjective, or complex auditor judgment:

- The auditor's assessment of the risks of material misstatement, including significant risks;

- The degree of auditor subjectivity in determining or applying audit procedures to address the matter or in evaluating the results of those procedures;

- The nature and extent of audit effort required to address the matter, including the extent of specialized skill or knowledge needed or the nature of consultations outside the engagement team regarding the matter;

- The degree of auditor judgment related to areas in the financial statements that involved the application of significant judgment or estimation by management, including estimates with significant measurement uncertainty;

- The nature and timing of significant unusual transactions and the extent of audit effort and judgment related to these transactions; and

- The nature of audit evidence obtained regarding the matter.

The determination should be made in the context of the particular audit, with the aim of providing audit-specific information rather than a discussion of generic risks. The reproposed factors provide a principles-based framework for the auditor to use in assessing whether a matter involved especially challenging, subjective, or complex auditor judgment. Depending on the matter, the auditor's determination that a matter is a critical audit matter might be based on only one factor, a combination of the factors, or other factors specific to the audit.

Because the determination of critical audit matters is principles-based, the standard does not contemplate circumstances or matters that, if present, would always constitute critical audit matters. For example, the standard does not provide that all matters determined to be "significant risks" under PCAOB standards would be critical audit matters.[44] Some significant risks may be determined to be critical audit matters, but not every significant risk would involve especially challenging, subjective, or complex auditor judgment. To illustrate, revenue recognition is presumed to be a fraud risk and all fraud risks are significant risks;[45] however, if a matter related to revenue recognition does not involve especially challenging, subjective, or complex auditor judgment, it would not be a critical audit matter.

---

[44] A significant risk is "a risk of material misstatement that requires special audit consideration." Paragraph .A5 of AS 2110 (currently Auditing Standard No. 12), *Identifying and Assessing Risks of Material Misstatement*.

[45] *See* AS 2110.71.

c. Audit Period Covered by Critical Audit Matters

The 2013 proposal would have required the auditor to communicate critical audit matters for the audit of the current period's financial statements. Because the communication of critical audit matters for prior periods might also be useful to investors and other financial statement users in certain situations, the proposed standard provided that the auditor should consider communicating critical audit matters relating to prior periods when: (1) the prior period's financial statements are made public for the first time, such as in an initial public offering ("IPO"), or (2) issuing an auditor's report on the prior period's financial statements because the previously issued auditor's report could no longer be relied upon, such as a reaudit.

Some commenters generally supported communicating critical audit matters for only the current period's financial statements or for all periods if audited financial statements have not been made public previously. Other commenters stated that critical audit matters should be communicated for all periods presented.

The reproposal retains the requirement to communicate critical audit matters only for the current audit period. While most companies' financial statements are presented on a comparative basis, and thus most audit reports cover a similar period, requiring auditors to communicate critical audit matters for the current period, rather than for all periods presented, would provide relevant information about the most recent audit and is intended to reflect a cost-sensitive approach to auditor reporting. In addition, investors and other financial statement users would be able to look at prior years' filings to analyze critical audit matters over time. However, the auditor would not be precluded from including critical audit matters for prior periods.

The reproposed standard changed the "should consider" requirement for prior periods in IPO and reaudit situations to "may" communicate critical audit matters for prior periods. This change allows the auditor to include critical audit matters for prior periods when the auditor decides it is appropriate to do so.

If the auditor's report is dual dated, the auditor would determine whether the new information for which the auditor's report is dual dated gives rise to any additional critical audit matters.

Additionally, consistent with the 2013 proposal, in situations in which a predecessor auditor has been asked to reissue its auditor's report, the communication of critical audit matters for the prior period need not be repeated. Since the communication of critical audit matters is only required for the current year, it is not required in the reissued report of the predecessor auditor for prior years. Commenters generally supported this approach.

*Requirements of Other Regulators and Standard Setters*

*IAASB.* Under the IAASB's standard, "key audit matters" are defined as those matters that, in the auditor's professional judgment, were of most significance in the audit of the financial statements of the current period. Key audit matters are determined using a two-step process. First, the auditor identifies the matters communicated with those charged with governance[46] that required significant auditor attention in performing the audit, taking into account:

- Areas of higher assessed risks of material misstatement, or significant risks;
- Significant auditor judgments relating to areas in the financial statements that involved significant management judgment, including accounting estimates that have been identified as having high estimation uncertainty; and
- The effect on the audit of significant events or transactions that occurred during the period.[47]

Second, of the matters that required significant auditor attention, the auditor identifies those of most significance in the audit as the key audit matters.[48] The IAASB requires the communication of key audit matters for the current period only.[49]

*EU.* The EU requires the auditor to describe the most significant assessed risks of material misstatement, including assessed risks of material misstatement due to fraud.[50] The EU does not specify the period for which these need to be described.

*FRC*. The FRC requires the auditor to describe the risks of material misstatement that had the greatest effect on: (1) the overall audit strategy; (2) the allocation of

resources in the audit; and (3) directing the efforts of the engagement team.[51] The FRC does not specify the period for which these need to be described.

*Questions*:

1. Is the definition of "critical audit matter" appropriate for purposes of achieving the Board's objective of providing relevant and useful information in the auditor's report for investors and other financial statement users? Is the definition sufficiently clear to enable auditors to apply it consistently? If not, describe why the definition may not be clear, including examples demonstrating your concern.

    a. Are matters communicated or required to be communicated to the audit committee the appropriate source for critical audit matters? Why or why not?

    b. Are there any audit committee communications that should be specifically excluded from consideration as a source of potential critical audit matters? If so, identify and explain the reason for the exclusion.

    c. Is the "relates to accounts or disclosures that are material to the financial statements" component of the definition of a critical audit matter appropriate and clear? Why or why not?

    d. Is the "involved especially challenging, subjective, or complex auditor judgment" component of the definition of a critical audit matter appropriate and clear? Why or why not?

2. Are factors helpful in assisting the auditor in determining which matters involved especially challenging, subjective, or complex auditor judgment? Why or why not?

3. Are there any factors that the Board should consider adding or removing to better assist the auditor in determining which matters involved especially challenging, subjective, or complex auditor judgment? If so, what are those factors?

4. Are there specific circumstances in which the auditor should be required to communicate critical audit matters for each period presented, rather than

[51] *See* paragraphs 19A of UK ISA 700 (2013).

only the current period? For example, should communication be required in an IPO or in a reaudit? Why or why not?

*2. Communication of Critical Audit Matters*

Under the 2013 proposal, the auditor would have been required to include introductory language preceding the communication of critical audit matters and to communicate critical audit matters by identifying each matter, describing the auditor's considerations for determining that the matter was a critical auditor matter, and referring to the relevant financial statements accounts and disclosures.

Comments varied on the proposed communication of critical audit matters in the auditor's report and the level of detail the auditor should provide. While some commenters stated that the proposed requirements regarding auditor's communication of critical audit matters are sufficiently clear, many suggested improvements to some of the components of the communication requirement. Other commenters were concerned that financial statement users would not understand critical audit matters due to the lack of sufficient context about a matter briefly described in the auditor's report and the lack of knowledge regarding certain terms used to describe a critical audit matter. After consideration of comments, the Board has made a number of changes, as described below.

a. Introductory Language

The reproposed standard retains the requirements to include in the auditor's report a section titled "Critical Audit Matters" and specific language preceding the description of critical audit matters. However, the specific language has been simplified and aligned with the reproposed definition of a critical audit matter.

Some commenters stated that the communication of critical audit matters in the auditor's report could undermine the auditor's pass/fail opinion on the financial statements, taken as a whole, by leading some investors to believe that the auditor is qualifying the report in the areas of the critical audit matters or expressing a separate opinion on each critical audit matter. In response to comments and to reduce the risk of such a misunderstanding, the introductory language in the critical audit matter section of the auditor's report has been modified in the reproposed standard to expressly state that the auditor is not providing a separate opinion on the critical audit matters or on the accounts or disclosures to which they relate.

The reproposed standard retains the note contained in the 2013 proposal stating that language that could be viewed as disclaiming, qualifying, restricting, or minimizing the auditor's responsibility for the critical audit matters or the auditor's opinion on the financial statements is not appropriate and may not be used. In response to comments, the note also clarifies that the language used to communicate a critical audit matter should not imply that the auditor is providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates. In addition, the reproposed standard makes clear that the auditor's report contains an expression of opinion on the financial statements, taken as a whole.

b. Communication Requirement

Under the 2013 proposal, for each critical audit matter, the auditor would have been required to:

- Identify the critical audit matter;
- Describe the considerations that led the auditor to determine that the matter is a critical audit matter; and
- Refer to the relevant financial statement accounts and disclosures that relate to the critical audit matter.

The communication requirements are retained from the 2013 proposal, with the addition of a requirement to describe how the critical audit matter was addressed in the audit. Additionally, certain language has been modified in response to commenters and aligned with the reproposed definition of a critical audit matter.

Under the reproposed standard, the auditor would be required to:

- Identify the critical audit matter;
- Describe the principal considerations that led the auditor to determine that the matter is a critical audit matter;
- Describe how the critical audit matter was addressed in the audit; and
- Refer to the relevant financial statement accounts and disclosures that relate to the critical audit matter.

*Identify the Critical Audit Matter and Describe the Principal Considerations that led the Auditor to Determine that the Matter is a Critical Audit Matter*

Some commenters stated that a requirement to describe all the considerations that led the auditor to determine that a matter is a critical audit matter could lead to a checklist approach, which could result in standardized or boilerplate language and diminish the value of critical audit matters. These commenters suggested that the description should be limited to the principal or primary considerations.

In response to comments, the reproposed standard clarifies that the auditor is required to describe only the principal considerations that led the auditor to determine that the matter is a critical audit matter. The auditor's description of the principal considerations should be specific to the circumstances and provide a clear, concise, and understandable discussion of why the matter involved especially challenging, subjective, or complex auditor judgment. It is expected that the communication would be tailored to the audit to avoid standardized language and to reflect the specific circumstances of the matter.

*Describe How the Critical Audit Matter was Addressed in the Audit*

Some commenters suggested adding a requirement to describe how each critical audit matter was addressed in the audit because this would be of interest to users and consistent with the objective of providing more information about the audit. However, other commenters stated that including audit procedures in the description of a critical audit matter would not necessarily make the auditor's report more informative and useful. Additionally, some commenters suggested that certain specific procedures, such as consultations with the auditor's national office or the use of specialists, should not be mentioned.

In response to comments, the reproposed standard includes a new requirement for the auditor to describe how each critical audit matter was addressed in the audit. Because of differing commenter views about the description of how each critical audit matter was addressed in the audit, the reproposed standard does not prescribe a specific way to meet this requirement. For example, in describing how the critical audit matter was addressed in the audit, the auditor may describe: (1) the auditor's response or approach that was most relevant to the matter; (2) a brief overview of procedures performed; (3) an indication of the outcome of the auditor's procedures; and (4) key observations with respect to the matter, or some combination of these elements.[52] If the auditor provides an indication of the outcome of the auditor's procedures in the description of a critical audit matter, language used to communicate a critical audit matter should not imply that the auditor is providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates. It is also not appropriate for the auditor to use language that could call into question the auditor's opinion on the financial statements, taken as a whole.

---

[52] These elements are similar to the IAASB's elements described in paragraph A46 of ISA 701. The EU also requires that the auditor describe key observations with respect to the most significant assessed risks of material misstatement.

While the description of how the critical audit matter was addressed in the audit would require judgment, the auditor should bear in mind that the intent of communicating critical audit matters is to provide information about the audit of the company's financial statements that would be useful to investors. Limiting the use of highly technical accounting and auditing terms in the description of critical audit matters, particularly if the auditor chooses to describe audit procedures, may help financial statement users better understand these matters in relation to the audit of the financial statements.

*Refer to the Relevant Financial Statement Accounts and Disclosures that Relate to the Critical Audit Matter*

The reproposed auditor reporting standard also would require the auditor to refer to the relevant financial statement accounts and disclosures that relate to the critical audit matter.

*Illustrative Examples of the Communication of Critical Audit Matters*

The examples below are based on hypothetical situations for two different companies and have been prepared for illustrative purposes only to show how a critical audit matter could be communicated in the auditor's report. They are not intended to provide guidance or any suggestions regarding the number of critical audit matters or the accounting or auditing in the circumstances presented. Additionally, the description of a critical audit matter is not intended to provide a list of all audit procedures performed.

**Company A**
**Critical Audit Matter**

The critical audit matter communicated below is a matter arising from the current period audit that was communicated or required to be communicated to the audit committee and that: (1) relates to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. Critical audit matters do not alter in any way our opinion on the financial statements, taken as a whole, and we do not provide separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

*Allowance for Loan Losses – New Loan Product*

As more fully described in Note 7 to the financial statements, during 2014, the Company [a mid-size regional bank] began actively marketing a nine-year auto loan in addition to the three- and five-year auto loans historically marketed. At December 31, 2015, the nine-year loans represented approximately 18% of the auto loan portfolio. The Company estimates and records an allowance for loans that are impaired but are not yet specifically identified (collective impairment allowance) by developing a loss rate based on historical losses and other factors, including qualitative adjustments to historical loss rates based on relevant market factors. Since management has limited historical loss data for the nine-year loans, it developed a new model to estimate this allowance using historical loss data from its auto loans of shorter terms and loss data from external sources for auto loans of longer terms to model a loss rate for the nine-year loans. In addition, management made qualitative adjustments to the historical loss rates to reflect lower borrower quality and higher risk of collateral impairment compared to its shorter term loans and for economic factors, primarily due to increasing unemployment in the markets served. There was a significant amount of judgment required by management when developing the model, which in turn involved our significant judgment.

The principal considerations for our determination that the allowance for loan losses for nine-year auto loans is a critical audit matter are that it is a new loan product with limited historical loss data and auditing the estimated allowance for losses on these loans involved our complex and subjective judgment.

Our audit procedures related to the collective impairment allowance for the nine-year loans included the following procedures, among others.

We tested the effectiveness of controls over the Company's new model, historical loss data, and the calculation of a loss rate. We also evaluated the qualitative adjustment to the historical loss rates, including assessing the basis for the adjustments and the reasonableness of the significant assumptions. We tested the accuracy and evaluated the relevance of the historical loss data as an input to the new model.

We used a specialist to assist us in evaluating the appropriateness of the new model and to review the loss data from external sources used by the Company to determine its relevance to the Company's nine-year loan portfolio and consistency with external data from other sources. Finally, with the assistance of the specialist, we evaluated the incorporation of the applicable assumptions into the model and tested the model's computational accuracy.

**Company B**
**Critical Audit Matter**

The critical audit matter communicated below is a matter arising from the current period audit that was communicated or required to be communicated to the audit committee and that: (1) relates to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. Critical audit matters do not alter in any way our opinion on the financial statements, taken as a whole, and we do not provide separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

*Accounting for Acquisitions*
Refer to Notes 2 and 13 to the financial statements

The Company's strategy includes growth by acquisition. Acquisitions represent a significant component of the Company's sales growth through the addition of new customers and new products. During 2015 the Company completed eight acquisitions for net consideration of $2.1 billion. The most significant of these were (1) the acquisition of all outstanding equity of ABC Inc. for net consideration of $1.1 billion and (2) the acquisition of all outstanding equity of XYZ Corp. for net consideration of $0.5 billion.

Auditing the accounting for the Company's 2015 acquisitions involved a high degree of subjectivity in evaluating management's estimates, such as the recognition of the fair value of assets acquired and liabilities assumed. We planned and performed the following procedures in connection with forming our overall opinion on the financial statements. We tested controls over the accounting for acquisitions, such as controls over the recognition and measurement of assets acquired, liabilities assumed, and consideration paid and payable, including contingent consideration. For each of the acquisitions, we read the purchase agreements, evaluated the significant assumptions and methods used in developing the fair value estimates, and tested the recognition of (1) the assets acquired and liabilities assumed at fair value; (2) the identifiable acquired intangible assets at fair value; and (3) goodwill measured as a residual.

More specifically, for the acquisitions of ABC and XYZ, we assessed whether (1) intangible assets, such as acquired technology, customer lists, and noncompetition agreements, were properly identified, and (2) the significant assumptions, including discount rates, estimated useful lives, revenue growth rates, projected profit margins, and the expected rate of return, used in valuing these intangibles were reasonable. Specifically, when assessing the assumptions related to the revenue growth rate and projected profit margins, we evaluated whether the assumptions used were reasonable considering the past performance of ABC and XYZ and the Company's history related to similar acquisitions and considered whether they were consistent with evidence obtained in other areas of the audit, such as assumptions used by the Company in its budget.

The purchase consideration for the acquisitions of ABC and XYZ also reflected, in part, the estimated fair value of significant contingent consideration arrangements based on attainment of product development milestones and patent approvals. In testing the valuation of contingent consideration, we assessed the terms of the arrangements and the conditions that must be met for the arrangements to become payable. Finally, we evaluated management's classification of contingent payments to continuing employees as either contingent consideration in the business combination or employee compensation.

c. Additional Considerations Related to the Communication Requirement

Some commenters expressed concerns that the proposed requirement to communicate critical audit matters would undermine the role of the audit committee or management by requiring the auditor to disclose information about the company's financial statements that would typically be management's responsibility to disclose. Since the auditor would be communicating information regarding the audit rather than information directly about the company and its financial statements, the communication of critical audit matters should not diminish the governance role of the audit committee and management's responsibility for the company's disclosure of financial information. In addition, communicating critical audit matters is not a substitute for disclosures in the financial statements that the applicable financial reporting framework requires management to make, or that are otherwise necessary to achieve fair presentation.

Many commenters also stated that the communication of critical audit matters in areas where the company has no current reporting obligation could result in the auditor disclosing confidential information about the company or effectively imposing on management a lower disclosure threshold that would go beyond the applicable financial reporting framework or SEC reporting requirements. Some commenters raised concerns that the communication of critical audit matters would cause harm by requiring auditors to disclose confidential information about the company.

In addition to revising the definition of a critical audit matter to require that the matter relate to accounts and disclosures that are material to the financial statements, the reproposed standard adds a note to address commenters' concerns about the auditor becoming the source of original (and potentially confidential) information about the company. The note indicates that when describing critical audit matters in the auditor's report, the auditor is not expected to provide information about the company that has not been made publicly available by the company[53] unless such information is necessary to describe the principal considerations that led the auditor to determine that a matter is a critical audit matter or how the matter was addressed in the audit. For example, in describing the principal considerations that led the auditor to determine that revenue recognition is a critical audit matter, it is possible that the auditor could provide more information than is provided in management's disclosures. In circumstances when information about the company has not previously been made publicly available, management may decide that additional management disclosures would be useful to

---

[53] Companies make information publicly available in a variety of ways, including the annual report, press releases, or other public statements.

financial statement users. However, management's decision about whether to disclose additional information does not affect the auditor's responsibility to describe the principal considerations that led the auditor to determine that a matter is a critical audit matter or how the matter was addressed in the audit.

Some commenters suggested that the standard should provide guidance on how the auditor should correct errors or misstatements in the reporting of critical audit matters, such as an incorrect or incomplete description of a critical audit matter or the omission of a critical audit matter from the auditor's report. In principle, auditors should approach such errors and misstatements in the same way they would approach any other error or misstatement in the auditor's report that does not affect the auditor's opinion or the ability of market participants to rely on the opinion.[54] It appears that under current practice, SEC filings have been amended solely to correct errors in auditor's reports, such as missing firm signatures, incorrect auditor's report dates, or missing explanatory paragraphs.[55]

d. Ability to Communicate No Critical Audit Matters

The reproposed standard retains from the 2013 proposal the possibility that the auditor could determine that there are no critical audit matters and, if so, would include a statement to that effect in the "Critical Audit Matters" section of the auditor's report.[56] A commenter suggested that having no critical audit matters should be rare and that each auditor's report should have at least one critical audit matter to communicate.

The determination of critical audit matters would be based on the facts and circumstances of each audit. The Board expects that, in most audits to which the requirement to communicate critical audit matters would apply, the auditor would

---

[54] The reproposed standard indicates that the auditor's communication of critical audit matters does not alter in any way the auditor's opinion on the financial statements, taken as a whole.

[55] PCAOB staff reviewed amended annual report filings on SEC Form 10K/A from 2011–2013 and identified 52 instances where the company disclosed that it amended the annual report solely to correct errors in the auditor's report without other changes to the financial statements or other disclosures.

[56] Since communication of critical audit matters would not be required for the audits of brokers and dealers reporting under Exchange Act Rule 17a-5; investment companies other than business development companies; and benefit plans, the auditor's report for the audits of these entities would not be required to include the statement that there are no critical audit matters.

determine that at least one matter involved especially challenging, subjective, or complex auditor judgment. There may be critical audit matters even in an audit of a company with limited operations or activities. However, there may be circumstances in which the auditor determines there are no matters that meet the definition of a critical audit matter and, in those circumstances, the auditor would communicate that there were no critical audit matters.

*Requirements of Other Regulators and Standard Setters*

*IAASB.* For each key audit matter, the IAASB requires the auditor to reference the related disclosures, if any, in the financial statements and address: (1) why the matter was considered to be one of most significance in the audit and therefore determined to be a key audit matter and (2) how the matter was addressed in the audit.[57] The IAASB allows the auditor to determine that there are no key audit matters to communicate in the auditor's report and, if so, requires a statement to this effect.[58]

*EU.* The EU requires the auditor to include in the auditor's report: (1) a description of the most significant assessed risks of material misstatement, including assessed risks of material misstatement due to fraud; (2) a summary of the auditor's response to the risks; and (3) where relevant, key observations arising with respect to the risks.[59]

*FRC.* The FRC requires the auditor, among other things, to: (1) describe those assessed risks of material misstatement that were identified by the auditor and (2) provide an overview of the scope of the audit, including an explanation of how the scope addressed the assessed risks of material misstatement.[60] The explanations of the matters set out in the auditor's report should be described in a way that: (1) enables a user to understand their significance in the context of the audit of the financial statements as a whole and not as discrete opinions on separate elements of the financial statements; (2) enables the matters to be related directly to the specific circumstances of the audited entity and are not therefore generic or abstract matters

[57] *See* paragraph 13 of ISA 701.

[58] *See* paragraphs 14 and 16 of ISA 701.

[59] *See* requirements in 2(c) of Article 10, *Audit Report*, of Regulation (EU) No 537/2014.

[60] *See* paragraph 19A of UK ISA 700 (2013).

expressed in standardized language; and (3) complements the description of significant issues required to be made by the audit committee.[61]

*Questions*:

5. Are the reproposed requirements regarding the description of critical audit matters in the auditor's report, including the principal considerations and how the matter was addressed in the audit, sufficiently clear for consistent implementation by auditors? Why or why not? If not, how could the requirements be clarified?

6. Do the reproposed communication requirements appropriately address commenter concerns regarding auditor communication of critical audit matters, such as:

   a. The auditor providing original information in describing the principal considerations for the determination that the matter is a critical audit matter or describing how the matter was addressed in the audit, and

   b. Investors and other financial statement users misinterpreting critical audit matters as undermining the auditor's pass/fail opinion or providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate?

   Are there other steps the Board could take to address these concerns? If so, what are they?

7. In addition to referring to the relevant financial statement accounts and disclosures, would it be appropriate for the auditor to refer to relevant disclosures outside the financial statements when communicating a critical audit matter? Why or why not?

8. Is it appropriate for the reproposed standard to retain the possibility of the auditor determining that there are no critical audit matters and, if so, require a statement to that effect in the auditor's report? Why or why not?

*3. Documentation of Critical Audit Matters*

Under the 2013 proposal, documentation would have been required for each reported critical audit matter, as well as matters that "appeared to meet" the definition of

---

[61] *See* paragraph 19B of UK ISA 700 (2013).

a critical audit matter but were determined not to be critical audit matters and thus not reported. Some commenters generally supported documenting the matters that were determined to be critical audit matters. One of these commenters stated that the documentation should focus on why matters are of such importance that they are included in the auditor's report. Several commenters expressed concern that the documentation requirement for non-reported matters, which are matters that would appear to meet the definition of a critical audit matter but were determined not to be critical audit matters, was too broad and not aligned with current audit documentation requirements.

The reproposed definition of a critical audit matter narrows the source of critical audit matters to matters communicated or required to be communicated to the audit committee and adds a materiality component. Thus, under the reproposed standard, auditors would be required to document the basis for the auditor's determination whether each matter that both: (1) was communicated or required to be communicated to the audit committee and (2) relates to accounts or disclosures that are material to the financial statements, involved or did not involve especially challenging, subjective, or complex auditor judgment. This approach should address, at least in part, commenters' concerns about the proposed documentation requirement because the potential population of matters that may need to be documented has been narrowed. The documentation requirement would also facilitate the review by the engagement quality reviewer.[62]

The auditor could comply with the documentation requirement in a variety of different ways. For example, the auditor could start with the communications to the audit committee, which are already documented, identify which of those matters relate to accounts or disclosures that are material to the financial statements, and then document the basis for the auditor's determination of whether each matter involved especially challenging, subjective, or complex auditor judgment. In documenting the basis for the determination, the auditor may include the factors the auditor took into account. This documentation may be prepared as an extension to the audit committee documentation or the auditor may prepare separate documentation.

The amount of documentation required could vary with the circumstances. For example, the auditor's basis for the determination may be so clear for some matters that

[62] Under the existing audit documentation requirement, audit documentation facilitates the planning, performance, and supervision of the engagement, and is the basis for the review of the quality of the work because it provides the reviewer with written documentation of the evidence supporting the auditor's significant conclusions. *See* paragraph .02 of AS 1215 (currently Auditing Standard No. 3), *Audit Documentation*.

a single sentence would be sufficient, while other matters may require more extensive documentation. Additionally, the description of a critical audit matter in the auditor's report would generally suffice as documentation for matters determined to be critical audit matters.

*Requirements of Other Regulators and Standard Setters*

The IAASB requires the auditor to document the matters that required significant auditor attention and the rationale for the auditor's determination as to whether or not each of these matters is a key audit matter.[63] The EU does not include documentation requirements for expanded auditor reporting. The FRC does not include specific documentation requirements related to expanded auditor reporting.[64]

*Question*:

9. Is the reproposed documentation requirement clear and appropriate? Why or why not? If not, how should the documentation requirement be formulated?

*4. Liability Considerations Related to Critical Audit Matters*

In the 2013 proposal, the Board acknowledged that, by disclosing critical audit matters, the auditor would be making new statements in the auditor's report that could raise potential liability concerns. As discussed in that release, liability may be imposed on auditors under a number of different legal theories depending on the specific facts and circumstances of a particular case, including pursuant to Section 11 of the Securities Act of 1933, Section 10(b) of the Exchange Act, and various state law causes of action. The Board specifically sought comment on what effect the communication of critical audit matters would have on private liability and whether there were any steps the Board could or should take to address any likelihood of an increase in potential liability in private litigation.

The potential for increased auditor liability was cited as a concern by a number of commenters on the Board's 2013 proposal. Several commenters expressed concerns that investors who suffer a financial loss could assert legal claims against the auditor based on their reliance on the auditor's statements in the auditor's report regarding critical audit matters. These commenters suggested, for example, that an investor that

---

[63] *See* paragraph 18(a) of ISA 701.

[64] General documentation requirements appear in ISA (UK and Ireland) 230, *Audit Documentation*.

suffered a loss following a decline in the issuer's stock price could assert that the auditor made a material misstatement regarding a critical audit matter, made a statement about a critical audit matter that made the auditor's other statements in the auditor's report misleading, or omitted a critical audit matter from the auditor's report. It should be noted that any such claimant would have to establish all of the elements of a claim (for example, when applicable, loss causation and reliance).

Some commenters raised more specific liability concerns about critical audit matters. One commenter argued that plaintiffs may attempt to use critical audit matters as de facto admissions of uncertainty or even error. Several commenters asserted that the lack of clarity or elements of judgment in the process of determining critical audit matters would make it easy for a plaintiff to claim in hindsight that an audit matter should have been disclosed as a critical audit matter. Others argued that auditors, to avoid being second-guessed, would have the incentive to identify too many critical audit matters in an effort to protect themselves from liability.

Other commenters claimed that the fact-specific nature of critical audit matters or of certain potential elements of the description of critical audit matters, such as the audit procedures used, would make it difficult to obtain early dismissal of claims. In their view, this could support meritless claims, potentially undermining the stringent pleading standards of the Private Securities Litigation Reform Act of 1995, which were intended to curtail nonmeritorious claims against auditors and avoid the costs and burdens associated with them. Information provided regarding critical audit matters could also affect other aspects of securities fraud claims (for example, by potentially undercutting a claim of reliance).

Several commenters highlighted the proposed requirement to document the auditor's determination that a matter was not a critical audit matter as increasing litigation risk with respect to such matters. As one of these commenters explained, the proposed documentation requirement could create a detailed documentary record of the auditor's determination that a matter was not "critical" and therefore give rise to increased litigation risk with respect to any "identified but not determined to be critical" matter.

Some commenters argued that critical audit matters could also increase litigation risk for companies as well as the auditor because the new statements required of the auditor could form a basis for new legal claims, and plaintiffs may attempt to use critical audit matters as a "road map" for litigation against the company.

On the other hand, one commenter asserted that communicating critical audit matters conceptually could decrease auditor and company legal exposure when the accounting in the areas of the critical audit matters is subsequently challenged, because the communication of critical audit matters is about disclosure of risks and challenges.

The commenter further stated that the noncommunication of such matters would be more problematic from a litigation point of view.

Many of the commenters that expressed concerns about the potential for increased auditor liability also suggested changes to the 2013 proposal that, in their view, would reduce the liability impact of critical audit matters determination and communication. For example, several commenters suggested ways to limit and clarify the process for determining critical audit matters, such as narrowing the source of critical audit matters to matters communicated to the audit committee, incorporating the concept of materiality, and refining the factors used to determine critical audit matters. Commenters also suggested changes to the proposed communication requirements, such as requiring communication of only the principal considerations that led the auditor to determine a matter was a critical audit matter, rather than all considerations; prohibiting auditor reporting of information not required to be disclosed by the company; and clarifying the auditor's statements about the nature of critical audit matters. The Board has taken these commenter suggestions for reducing potential incremental liability into account in formulating the reproposal (for example, modifying the source of critical audit matters, adding a materiality component, refining the factors, and modifying the communication requirement).

*Questions*:

10. What effect, if any, could the auditor's communication of critical audit matters under the reproposed standard have on private litigation? Would this communication lead to an unwarranted increase in private liability?

11. Do the changes from the 2013 proposal address concerns that have been raised about private liability? If not, what additional changes would you suggest should be made?

12. Are there other steps the Board could or should take to address the likelihood of increasing an auditor's or company's potential liability in private litigation through the requirement to communicate critical audit matters in the auditor's report?

## B. Additional Improvements to the Auditor's Report

The 2013 proposal provided a list of basic elements to be included in every auditor's report. Some of these basic elements, such as the auditor's opinion, identification of the financial statements audited, and management's and auditor's responsibilities, were drawn from the existing auditor reporting standard.[65] Other basic

[65] *See* AS 3101.06–.08.

elements, such as the name of the company under audit and the date of the financial statements, were incorporated from existing illustrative auditor's reports. Commenters broadly supported these basic elements and they are being reproposed substantially as proposed.

*1. Clarification of Existing Auditor's Responsibilities*

The 2013 proposal included requirements that would enhance standardized language of the auditor's report by clarifying the nature and scope of the auditor's existing responsibilities, such as a new statement regarding auditor independence and the addition of the phrase "whether due to error or fraud," when describing the auditor's responsibility under PCAOB standards to obtain reasonable assurance about whether the financial statements are free of material misstatements. In addition, the proposal included a requirement intended to promote uniformity with respect to the addressee of the report.

a. Auditor Independence

The proposed standard would have required the auditor to include a statement in the auditor's report that the auditor is a public accounting firm registered with the PCAOB and is required to be independent with respect to the company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the SEC[66] and the PCAOB.[67]

Some commenters stated that the statement regarding auditor independence would provide useful information to investors and other financial statement users and could enhance an investor's understanding of the auditor's role. Other commenters preferred a more definitive statement on auditor independence, such as stating that the auditor is in fact independent and in compliance with applicable independence rules. Yet other commenters stated that the statement would be redundant with the title of the auditor's report or could distract from the main objective of the auditor's report.

The Board considered the comments and is retaining the statement regarding auditor independence as originally proposed.[68] The independence statement in the

---

[66] *See* SEC Rule 2-01 of Regulation S-X, 17 CFR 210.2-01.

[67] *See* PCAOB Rule 3520, *et seq*.

[68] In situations in which an auditor that is not registered with the Board is required by law to, or voluntarily agrees to, perform an audit in accordance with PCAOB standards, there may be certain modifications to the auditor's report, such as the title and the statement regarding independence requirements. If the Board adopts the

auditor's report could both enhance investors' and other financial statement users' understanding of the auditor's existing obligations to be independent, and serve as a reminder to auditors of these obligations. The statement regarding auditor independence is not intended to, and would not, affect auditor independence requirements under the securities laws, SEC rules, or PCAOB rules.

*Requirements of Other Regulators and Standard Setters*

The IAASB requires that the auditor's report include a statement that the auditor is independent of the entity in accordance with the relevant ethical requirements relating to the audit and has fulfilled the auditor's other ethical responsibilities in accordance with these requirements.[69] The EU requires a statement in the auditor's report that the auditor remained independent of the audited entity in conducting the audit.[70] The FRC requires the auditor to state that the auditor is required to comply with the United Kingdom's ethical standards for auditors, which include requirements regarding auditor independence.[71]

*Question:*

13. Is the reproposed requirement relating to auditor independence clear? Would this information improve investors' and other financial statement users' understanding of the auditor's independence responsibilities? Why or why not?

b. Addressee

Under the existing standard, the auditor's report may be addressed to the company whose financial statements are being audited, its board of directors, or stockholders.[72] Under current practice, the auditor's report is generally addressed to

---

reproposed standard, the staff will provide guidance for these situations, such as by updating Staff Questions and Answers, *Audits of Financial Statements of Non-Issuers Performed Pursuant to the Standards of the Public Company Accounting Oversight Board.*

69 *See* paragraph 28(c) of ISA 700.

70 *See* requirements in 2(f) of Article 10, *Audit Report*, of Regulation (EU) No 537/2014.

71 *See* paragraph 15 of UK ISA 700 (2013).

72 *See* AS 3101.09.

one or more of the following: (1) the board of directors and stockholders/shareholders, or their equivalent for issuers that are not organized as corporations; (2) the plan administrator or plan participants for benefit plans; and (3) the directors or equity owners for brokers or dealers.[73]

To promote consistency in addressing the auditor's report to the company's investors, the proposed standard would have required the auditor's report to be addressed to: (1) investors in the company, such as shareholders, and (2) the board of directors or equivalent body. The proposed standard stated that addressees would not necessarily be limited to these parties and might include other appropriate parties depending on, for example, the legal and governance structure of the company.

Some commenters generally supported the requirement as proposed. Other commenters expressed concerns that requiring or suggesting that the auditor's report be addressed to other parties besides the board of directors and shareholders, such as bondholders, could adversely affect auditors' legal posture in some types of legal proceedings. In particular, these commenters were concerned that the additional addressees might gain the ability to assert direct state law claims against the auditor in some circumstances.

In response to these comments and to promote greater uniformity in the addressees of the auditor's report, the reproposed standard would limit required addressees to the shareholders and the board of directors, or equivalents for companies not organized as corporations.[74] Auditors would retain the option to include additional addressees.

*Requirements of Other Regulators and Standard Setters*

The IAASB requires that the auditor's report be addressed as appropriate, based on the circumstances of the engagement.[75] The EU does not specify the addressee of the auditor's report. The FRC requires that the auditor's report be addressed as required

---

[73] This information is based on a review by PCAOB staff of a random sample of 2014 fiscal year-end auditor's reports for issuers and brokers and dealers.

[74] For example, for benefit plans, an addressee equivalent to shareholders is the plan participants; for issuers organized as trusts, an addressee equivalent to the board of directors is the board of trustees.

[75] *See* paragraph 22 of ISA 700.

by the circumstances of the engagement.[76] UK auditor's reports are typically addressed to either the members or the shareholders of the company.[77]

*Questions:*

14. Is it appropriate to limit the required addressees to the shareholders and the board of directors, or equivalents for companies not organized as corporations? Are there other parties to whom the auditor's report should be required to be addressed, and if so, who are they?

15. Is it clear how the auditor's report would be addressed for companies not organized as corporations? Why or why not?

c. Enhancements to the Basic Elements

The 2013 proposal would have changed the language for certain elements in the existing auditor's report. These proposed elements included:

- *Financial statement notes*—The identification of the financial statements, including the related notes and, if applicable, schedules, as part of the financial statements that were audited.[78] Under the existing standard, the notes to the financial statements and the related schedules are not identified as part of the financial statements.

- *Error or fraud*—A description of the auditor's responsibility to plan and perform the audit to obtain reasonable assurance about whether the

---

76 *See* paragraph 13 of UK ISA 700 (2013).

77 *See* paragraph A5 of UK ISA 700 (2013).

78 The proposed and reproposed standards use the term "financial statements" to include all notes to the statements and all related schedules, as used under SEC rules that apply to issuers. *See* Section 1-01(b) of Regulation S-X, 17 CFR 210.1-01(b), which states in part, "the term financial statements . . . shall be deemed to include all notes to the statements and all related schedules." The reproposed standard would not apply to schedules included as supplemental information, as defined in AS 2701 (currently Auditing Standard No. 17), *Auditing Supplemental Information Accompanying Audited Financial Statements*, because those schedules are not considered part of the financial statements. The auditor should continue to look to the requirements of AS 2701 for the auditor's reporting responsibilities regarding supplemental information accompanying audited financial statements.

financial statements are free of material misstatements, whether caused by error or fraud.[79] The existing standard does not require the auditor's report to contain the phrase *whether due to error or fraud*.

- *Nature of the audit*—The description of the nature of the audit reflected the auditor's responsibilities in a risk-based audit and aligned the description with the language in the Board's risk assessment standards, including:
    - o Performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks;
    - o Examining, on a test basis, appropriate evidence regarding the amounts and disclosures in the financial statements;
    - o Evaluating the accounting principles used and significant estimates made by management; and
    - o Evaluating the overall presentation of the financial statements.

Commenters generally supported the proposed language for these basic elements of the auditor's report. Some commenters objected to the inclusion of the phrase *whether due to error or fraud*, saying it could provide a false sense of security to financial statement users and a perceived transfer of responsibility from management in preventing and detecting fraud, thus exposing companies to greater risk of fraud and unintentionally increasing auditor liability. However, under existing standards, the auditor has a responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud.[80] Therefore, this element is retained in order to clarify the auditor's existing responsibilities in this area.

The reproposed standard retains these basic elements substantially as proposed.

---

[79] *See* paragraph .02 of AS 1001 (currently AU sec. 110), *Responsibilities and Functions of the Independent Auditor*.

[80] *See* AS 1001.02.

*2. Auditor Tenure*

The 2013 proposal would have required the auditor to include in the auditor's report a statement containing the year the auditor began serving consecutively as the company's auditor. Currently information about auditor tenure is not required to be communicated to investors by the auditor, management, or the audit committee.[81] However, as discussed below, there is a growing trend toward voluntarily disclosure of auditor tenure. The intent of the reproposed requirement, consistent with the 2013 proposal, is to require consistent reporting of the duration of the auditor's relationship with the company and have this information in a consistent location—the auditor's report.

a. Disclosure of Tenure

Some commenters opposed a requirement to disclose auditor tenure in the auditor's report on the basis that such disclosure could result in false conclusions about correlations between auditor tenure and audit quality. These and other commenters suggested that tenure could be disclosed in the firm's annual report filed with the PCAOB, the company's proxy statement, or elsewhere. Some commenters were concerned that, in the illustrative report, auditor tenure placed next to the statement on auditor independence may imply a relationship between auditor independence and tenure of service.

Other commenters asserted that information regarding auditor tenure would be useful to financial statement users, for example, in understanding the audit committee's oversight of the auditor or in deciding whether to vote to ratify the appointment of the auditor. Recent analysis of corporate proxy statements for annual meetings of shareholders has found that a growing number of companies are disclosing auditor tenure,[82] presumably due to interest from investors. However, such voluntary

---

[81] Investors may manually review company filings on the SEC's Electronic Data Gathering, Analysis and Retrieval system ("EDGAR") to determine when the company changed auditors. For example, although company filings are not available via EDGAR prior to 1994, investors may review a company's periodic filings since that time or any Form 8-K filings in EDGAR. *See* 17 CFR 249.308, Item 4.01 Changes in Registrant’s Certifying Accountant. Not all companies are required to file Form 8-K. Information about auditor tenure may be less accessible for investment companies and brokers and dealers, which have different SEC filing requirements.

[82] The Center for Audit Quality, together with Audit Analytics, reviewed corporate proxies filed through the end of June 2015 and 2014 of 1,500 Standard and Poor's ("S&P") Composite companies. Their analysis identified that in 2015 and 2014 auditor tenure was disclosed in the annual proxy statements of 54 and 47 percent of the

information may not be disclosed in the same location in the proxy statement; for instance, some disclosures are in the audit committee report while others are in another section of the proxy.[83] Further, the proxy rules do not apply to all companies required to be audited under PCAOB standards; for example, foreign private issuers, brokers and dealers, and most investment companies are not required to prepare proxy statements. The SEC has explored through a concept release the potential of requiring disclosure of auditor tenure in the audit committee report.[84] The Board will continue to monitor developments on the SEC concept release.

While commenters' views and academic research[85] continue to be divided on the relationship of auditor tenure and audit quality, the Board is reproposing to include auditor tenure[86] to make this data point readily available in the auditor's report. Requiring the disclosure of auditor tenure in the auditor's report would ensure that the disclosure is in a consistent location—the auditor's report—for all companies and would reduce search costs for investors and other financial statement users who are interested in this piece of information. The standard does not specify a required location within the auditor's report for the statement on auditor tenure. The illustrative report in the reproposed standard includes the statement on auditor tenure at the end of the

---

S&P 500 large-cap companies, respectively, 44 and 42 percent of the S&P MidCap 400 companies, respectively, and 46 and 50 percent of the S&P SmallCap 600 companies, respectively. *See* Center for Audit Quality and Audit Analytics, *2015 Audit Committee Transparency Barometer* (Nov. 3, 2015). Separately, during their review of proxy statements of Fortune 100 companies, Ernst & Young identified that 59 percent of the companies reviewed voluntarily disclosed auditor tenure in 2015 compared to 50 percent in 2014, 30 percent in 2013, and 25 percent in 2012. *See* Ernst & Young, *Let's Talk: Governance—Audit Committee Reporting to Shareholders 2015 Proxy Season Review* (Sept. 2015).

[83] *See* Center for Audit Quality and Audit Analytics, *2015 Audit Committee Transparency Barometer* (Nov. 3, 2015).

[84] *See* SEC, *Possible Revisions to Audit Committee Disclosures*, Exchange Act Release No. 75344 (July 1, 2015), 80 FR 38995 (July 8, 2015) ("SEC concept release").

[85] *See* Section VI.D.2.e for a discussion of academic research regarding auditor tenure.

[86] The statement regarding the auditor's tenure would include the year the firm, rather than the engagement partner, began serving consecutively as the company's auditor.

auditor's report, after the signature of the firm. However, the auditor may choose another location in the auditor's report.

The Board is also seeking comment on whether disclosure of auditor tenure would be more appropriately made by the auditor in another location, specifically the Board's Form AP, *Auditor Reporting of Certain Audit Participants*, ("Form AP") rather than in the auditor's report. Recently, the Board adopted Form AP, which, assuming final approval by the SEC, will provide investors and other financial statement users with information about engagement partners and other accounting firms that participate in audits of issuers.[87]

b. Determination of Tenure

Some commenters stated that histories of mergers and acquisitions, involving both audit firms and companies, may make it challenging for the auditor to determine auditor tenure. The reproposed standard retains a note from the 2013 proposal that states that if there is uncertainty as to the year the auditor began serving consecutively as the company's auditor, such as due to firm or company mergers, acquisitions, or changes in ownership structure, the auditor should state that the auditor is uncertain as to the year the auditor became the company's auditor and provide the earliest year of which the auditor has knowledge.

Additionally, the auditor's relationship with the company is not affected by the company's status as a public company. For instance, if a company went public but maintained its auditor, the auditor tenure would include the years the auditor served as the company's auditor both before and after the company became subject to SEC reporting requirements.

Several commenters stated that clarification should be provided regarding applying the auditor tenure disclosure to investment companies because of the unique structure of investment companies, which are often organized as an investment company complex.[88] These commenters suggested that, since an investment company complex may include many investment companies with different inception dates,

---

[87] *See Improving the Transparency of Audits: Rules to Require Disclosure of Certain Audit Participants on a New PCAOB Form and Related Amendments to Auditing Standards*, PCAOB Release No. 2015-008 (Dec. 15, 2015).

[88] *See* SEC Rule 2-01(f)(14)(i) of Regulation S-X, 17 CFR 210.2-01(f)(14)(i) for the definition of an investment company complex, which includes not only investment companies but also investment advisers, private investment companies, and other entities.

disclosure of auditor tenure should be the same for each investment company in the investment company complex and measured from the date the auditor first audited any investment company in the complex. In response to comments, the reproposed standard requires that, for an investment company that is part of a group of investment companies,[89] the auditor's statement regarding tenure would contain the year the auditor began serving consecutively as the auditor of any investment company in the group of investment companies.[90] For example, if Firm A has been auditing investment companies in XYZ group of investment companies since 1980, the current auditor's report for XYZ fixed income fund, whose inception date was in 2010, would state that Firm A has served as the auditor of one or more XYZ investment companies since 1980. This disclosure would provide information on the length of the auditor's relationship with the group of investment companies because of common control at the group level.

*Requirements of Other Regulators and Standard Setters*

The EU requires a statement in the auditor's report that indicates the total uninterrupted engagement period, including previous renewals and reappointments of the statutory auditors or the audit firms.[91] The IAASB and the FRC do not include a similar requirement.

*Questions:*

16. Are the reproposed requirements for information regarding auditor tenure appropriate and clear? Why or why not? Are there any specific circumstances that could affect a firm's ability to include tenure information

---

[89] A group of investment companies means any two or more registered investment companies that hold themselves out to investors as related companies for purposes of investment and investor services. *See* Section 12(d)(1)(G)(ii) of the Investment Company Act of 1940 ("Investment Company Act"). The term "group of investment companies" is used to indicate that auditor tenure would be measured from the start of the relationship between the auditor and the management of any registered investment company in the group and not with respect to other entities that may be part of an investment company complex, such as investment advisers or private investment companies.

[90] The following is an example of such statement: "We have served as the auditor of one or more [Group Name] investment companies since [year]."

[91] *See* requirements in 2(b) of Article 10, *Audit Report*, of Regulation (EU) No 537/2014.

in the auditor's report which the Board should consider? If so, what are they?

17. Is it appropriate to disclose the earliest period the auditor began auditing any company in the group of investment companies even if the auditor has not audited all of the companies in the group for the same period of time? Why or why not?

18. Should disclosure of auditor tenure be made on Form AP rather than in the auditor's report? Why or why not?

19. Would requiring disclosure of auditor tenure in the auditor's report reduce investor search costs? Why or why not? Should the Board require a specific location for disclosure of auditor tenure in the auditor's report? If so, where and why?

*3. Additional Basic Elements Suggested by Commenters*

As part of the proposal, the Board considered potential additional elements in the auditor's report. The Board received little comment on additional elements; however, two commenters suggested that the following elements should be included in the auditor's report:

- A statement that the procedures performed and the audit evidence obtained provide a reasonable basis for the opinion;
- A statement that the references to the financial statements throughout the auditor's report relate to the financial statements, taken as a whole;
- An expanded description of the responsibilities of management, including a description of the responsibilities of the audit committee with respect to the financial statements;
- A description of the meaning of reasonable assurance; and
- A description of the auditor's use of professional judgment and professional skepticism throughout the audit.

Since it may not be practical to describe these elements concisely, adding these to the auditor's report would unnecessarily lengthen it without providing additional useful information to investors. As a result, the reproposed standard does not include these additional elements.

A commenter also suggested that the auditor's report should include a discussion of materiality and how it is used by the auditor in the audit as well as the related dollar amount.[92] Other commenters from the Board's initial outreach stated that disclosing materiality levels in the auditor's report could have negative implications on audit quality by reducing the element of surprise necessary in an audit.[93] In addition, investors did not evidence a strong demand for reporting materiality levels in the auditor's report.[94] For these reasons, the reproposed standard does not require this element.

*Question*:

20. Are the changes to the basic elements of the auditor's report to communicate the nature of an audit, the auditor's responsibilities, the results of the audit, or information about the auditor appropriate and clear? Why or why not?

## C. Explanatory Language and Emphasis of a Matter

### *1. Explanatory Language Required by Other PCAOB Standards*

The proposed standard, similar to the existing standard,[95] provided a list of circumstances in which the auditor would have been required to add explanatory language to the auditor's report and included references to other PCAOB standards in which these circumstances and related reporting requirements are described. These circumstances include when there is substantial doubt about the company's ability to continue as a going concern and a restatement of previously issued financial statements, among others.

Commenters generally supported providing in the proposed standard a list of circumstances that require explanatory language in the auditor's report on the basis that keeping this information in a single place would facilitate consistency in execution. The

---

[92] Such a requirement would be similar to the FRC requirement that the auditor provide an explanation of how the auditor applied the concept of materiality in planning and performing the audit. *See* paragraph 19A of UK ISA 700 (2013).

[93] *See* PCAOB Release No. 2011-003, Appendix C, for a detailed discussion of the staff's outreach regarding reporting materiality levels.

[94] *Id.*

[95] *See* AS 3101.11.

reproposed standard retains the list of explanatory paragraphs and related references substantially as proposed.

In the 2013 proposal, the Board sought comment on whether to require new explanatory language in the auditor's report in cases where the company is required to report on internal control over financial reporting ("ICFR") but has determined that it is not required to obtain, and did not request the auditor to perform, an audit of ICFR.[96] Commenters supported such a requirement because it would help to clarify the auditor's responsibility when there is no auditor's report on ICFR. Under current standards, auditors may also, at their discretion, include language in the auditor's report indicating that they were not engaged to examine management's assertion about the effectiveness of internal control over financial reporting.[97] The Board understands that, in practice, the auditor often includes a statement in the auditor's report to clarify the auditor's responsibilities when the company has not engaged the auditor to perform an audit of the company's ICFR.[98] The reproposed standard includes a reference to a new proposed requirement in AS 3105, *Departures from Unqualified Opinions and Other Reporting Circumstances*,[99] for the auditor to add such explanatory language.

PCAOB staff has also observed that auditor’s reports of investment companies often include similar statements. The Board is seeking comment whether the auditor should be required to include an explanatory paragraph in all cases, even in situations when management has no requirement to report on ICFR.

---

[96] This may be the case for companies that are subject to Section 404(a) of Sarbanes-Oxley, which mandates management ICFR reporting, but not Section 404(b), which mandates auditor ICFR reporting. Section 404(a) generally applies to companies that are subject to the reporting requirements of the Exchange Act, other than registered investment companies. Certain categories of companies that are subject to Section 404(a), such as non-accelerated filers and emerging growth companies, are not subject to Section 404(b).

[97] *See* paragraph 10 of AI 20, *Other Information in Documents Containing Audited Financial Statements: Auditing Interpretations of AS 2710* (currently AU sec. 9550, *Other Information in Documents Containing Audited Financial Statements: Auditing Interpretations of Section 550*).

[98] Based on the PCAOB's staff review of a sample of 1,169 auditor's reports for nonaccelerated filers for fiscal year 2014, approximately 83 percent included a statement generally consistent with the reproposed requirement.

[99] *See* reproposed amendments to AS 3105.59–.60.

*Interaction between critical audit matters and explanatory paragraphs*. The 2013 proposal stated that communication of critical audit matters would not alter existing requirements to add explanatory language and that the same matter could be described both in the critical audit matter section and using explanatory language with a cross-reference, as appropriate. A commenter stated that, in a circumstance in which a matter constitutes a critical audit matter and requires an explanatory paragraph, the discussion in the auditor's report should be integrated to avoid duplication and repetitiveness. Other commenters suggested not requiring an explanatory paragraph if the same matter is already communicated as a critical audit matter.

The reproposed standard clarifies that critical audit matters are not a substitute for required explanatory paragraphs. However, there could be situations in which a matter meets the definition of a critical audit matter and also requires an explanatory paragraph, such as going concern. For these situations, both the explanatory paragraph and the required communication regarding the critical audit matter would be provided. The auditor may include the communication requirements of a critical audit matter in the explanatory paragraph with a cross-reference in the critical audit matter section to the explanatory paragraph. Alternatively, the auditor may choose to provide both an explanatory paragraph and the critical audit matter communication separately in the auditor's report with a cross-reference between the two sections. While the information reported in a critical audit matter may be redundant of some of the information already provided in the explanatory paragraph, the critical audit matter would provide incremental information, such as how the matter was addressed in the audit.

*2. Emphasis of a Matter*

The 2013 proposal, similar to the existing standard, provided the ability for the auditor to add a paragraph to the auditor's report to emphasize a matter regarding the financial statements ("emphasis paragraph").[100] Emphasis paragraphs are not required but may be used by auditors to draw the reader's attention to matters, such as significant transactions with related parties and unusually important subsequent events. Under the proposal, emphasis paragraphs would have referred only to information presented or disclosed in the financial statements. The proposed standard provided a list of examples primarily from existing standards.

Commenters broadly supported retaining the auditor's ability to emphasize a matter in the financial statements. The reproposed standard retains emphasis paragraphs substantially as proposed and retains most of the proposed examples.[101]

---

[100] *See* AS 3101.19.

[101] The reproposed standard does not retain the example emphasis paragraph regarding retroactive application of the prospective change in accounting

While the reproposed standard provides examples of potential matters that the auditor may emphasize in the auditor's report, the auditor may also decide to emphasize other matters in the financial statements if the auditor determines it is appropriate to do so. Additionally, the reproposed standard removes the sentence stating that an emphasis paragraph refers only to information presented or disclosed in the financial statements since this is not specified under the existing standard and the reproposed standard does not intend to change current practice.

*Interaction between critical audit matters and emphasis paragraphs*. Under the 2013 proposal, communication of critical audit matters would not have altered the auditor's ability to add an emphasis paragraph to the auditor's report. Some commenters suggested that the standard should address the relationship between critical audit matters and emphasis paragraphs. The reproposed standard states that emphasis paragraphs are not a substitute for required critical audit matters. The Board notes that critical audit matters are required and emphasis paragraphs are included only at the discretion of the auditor. The reproposed standard provides a list of examples of matters that the auditor may emphasize regarding the financial statements. However, if a matter that the auditor considers emphasizing meets the definition of a critical audit matter, the auditor would be required to identify the matter as a critical audit matter in the auditor's report and would be subject to the other communication requirements for critical audit matters. The auditor would not be expected to include an emphasis paragraph in the auditor's report about a matter that meets the definition of a critical audit matter.

*Requirements of Other Regulators and Standard Setters*

Under the requirements of other regulators and standard setters, there are no analogous explanatory paragraphs, except for reporting on going concern. The Board's reproposed approach is similar to the IAASB's approach to the interaction between a paragraph regarding the company's ability to continue as a going concern and key audit matters, although the underlying requirements for auditor reporting on going concern vary.[102] Under the IAASB's approach, an emphasis of matter paragraph is not required

---

principle. This example was included in AU sec. 9410, *Adherence to Generally Accepted Accounting Principles: Auditing Interpretation of Section 410*, which has been rescinded as part of the reorganization of PCAOB auditing standards. *See* PCAOB Release 2015-002.

[102] *See* paragraph A1 of ISA 570, *Going Concern*, and paragraph 15 of ISA 701.

for a matter that was determined to be a key audit matter.[103] The EU and the FRC have separate requirements related to going concern reporting that do not specifically address the interaction with their expanded auditor reporting.[104] The IAASB, FRC, and EU do not have requirements for reporting on ICFR.

*Questions*:

21. Is the interaction between the communication of critical audit matters and required explanatory paragraphs clear and appropriate? Why or why not?

22. Should auditors be permitted to include the critical audit matter communications in the required explanatory paragraph? Would integrating explanatory paragraphs and critical audit matters be helpful to investors? Alternatively, would it decrease the impact of the explanatory paragraph? Why or why not?

23. Should the Board's requirement to include an explanatory paragraph in the auditor's report when the auditor did not perform an audit of ICFR apply not only if company's management is required to report on ICFR, but also if management is not required to report, such as for investment companies?

24. Is the interaction between the communication of critical audit matters and emphasis paragraphs clear and appropriate? Why or why not?

## D. Information About Certain Audit Participants

On May 9, 2016, the SEC approved new rules and related amendments to the Board's auditing standards, including amendments to AS 3101, that will provide investors and other financial statement users with information about engagement partners and other accounting firms that participate in audits of issuers.[105] Firms will be required to file Form AP with the PCAOB for each issuer audit, disclosing this information. In addition to filing Form AP, firms will also have the choice to include this

---

[103] *See* paragraph 8 of ISA 706, *Emphasis of Matter Paragraphs and Other Matter Paragraphs in the Independent Auditor's Report*.

[104] *See* ISA (UK and Ireland) 570, *Going Concern*, and *see* Article 28, *Audit Reporting*, of Directive 2014/56/EU of the European Parliament and of the Council.

[105] *See* PCAOB Release No. 2015-008 (Dec. 15, 2015).

information in the auditor's report.[106] The reproposed standard incorporates the adopted amendments to AS 3101 for situations in which the auditor decides to include information about certain audit participants in the auditor's report. The reproposed standard would require the auditor to use an appropriate section title when providing this information in the auditor's report, but does not require a specific location in the auditor's report.

*Requirements of Other Regulators and Standard Setters*

The IAASB requires the auditor to include the name of the engagement partner in the auditor's report for audits of listed entities.[107] Under EU law, the engagement partner is required to sign the audit report in all EU countries, including the United Kingdom.[108] Unlike disclosure of the engagement partner's name, disclosure of other accounting firms that participated in the audit is not required by the IAASB, FRC, or the EU.

## E. Form of the Auditor's Report

The proposed standard did not require that the basic elements appear in a specific order in the auditor's report, although as part of the proposal the Board sought comment on whether to require a specific order. The proposed standard only required a title for the "Critical Audit Matters" section, but did not preclude the auditor from including section titles for other sections in the auditor's report.

Some commenters suggested that, to allow for a more effective delivery of key messages and enhance comparability between reports for different companies, the Board should require a specific order of the sections in the auditor's report. Other commenters suggested that there should be flexibility. Some commenters recommended that section titles be required for all sections of the auditor's report.

In response to comments, the reproposed standard would require the "Opinion on the Financial Statements" section to be the first section of the auditor's report, immediately followed by the "Basis for Opinion" section. The reproposed standard does

---

[106] When the auditor divides responsibility for the audit under AS 1205, *Part of the Audit Performed by Other Independent Auditors* (currently AU sec. 543, *Part of Audit Performed by Other Independent Auditors*), the auditor's report must acknowledge the involvement of the other auditor.

[107] *See* paragraph 45 of ISA 700.

[108] Directive 2006/43/EC of the European Parliament and of the Council, Article 28, *Audit Reporting* (May 17, 2006).

not specify an order for the remaining sections of the auditor's report, which would include explanatory paragraphs and critical audit matters. This approach allows for consistency in the location of the opinion and basis for opinion sections, with flexibility for the other elements of the auditor's report. The reproposed standard would also require titles for all sections of the auditor's report to provide consistency and assist users in identifying the individual sections of the auditor's report.

*Requirements of Other Regulators and Standard Setters*

The reproposed approach with respect to the order of the sections of the auditor's report is generally consistent with that of the IAASB.[109] The EU and FRC do not specify an order to the auditor's report.

*Question*:

25. Would the reproposed requirements for a specific order of certain sections in the auditor's report and for section titles make the auditor's report easier to use? Should the standard allow more or less flexibility in the presentation of the auditor's report?

## V. <u>Amendments to Other PCAOB Standards</u>

The Board is reproposing amendments to several of its existing auditing standards solely to conform to the reproposed standard.[110] The Board is not proposing any further changes to these existing auditing standards at this time, although the Board recognizes that some of the existing auditing standards, such as the standard proposed to be redesignated as AS 3105, may need further updating. The Board may consider proposing further changes to these standards under separate standard-setting projects.

### A. Proposed AS 3105, *Departures from Unqualified Opinions and Other Reporting Circumstances*

AS 3101.10 and .20-.76 primarily address departures from the auditor's unqualified opinion, such as a qualified opinion, an adverse opinion, or a disclaimer of opinion. These paragraphs also address other reporting circumstances, such as

---

[109] *See* paragraphs 23–28 of ISA 700.

[110] The reproposed amendments are contained in Appendix 2.

reporting on comparative financial statements. These paragraphs are proposed to be redesignated as AS 3105.[111]

Similar to the 2013 proposal, proposed AS 3105 is not intended to change the circumstances in which the auditor would depart from an unqualified opinion. The changes from the current standard would primarily: (1) require the communication of critical audit matters in certain circumstances; (2) revise certain terminology to align with the reproposed standard; and (3) amend the illustrative reports for the basic elements of the reproposed standard and the required order of certain sections of the auditor's report.

Proposed AS 3105 includes:

1. *Communication of Critical Audit Matters in Reports Containing Other than Unqualified Opinions*

   a. *Qualified opinion*—Similar to the 2013 proposal, proposed AS 3105 would require that when the auditor expresses a qualified opinion, the auditor's report also include communication of critical audit matters, if applicable for the company under audit.

   b. *Adverse opinion*—Similar to the 2013 proposal, the existing requirements related to an adverse opinion are not proposed to be amended to require the auditor to communicate critical audit matters because, in such circumstances, the most important matter to investors and other financial statement users would be the reason for the adverse opinion.

   c. *Disclaimer of opinion*—Similar to the 2013 proposal, the existing requirements related to a disclaimer of an opinion are not proposed to be amended to require the auditor to communicate critical audit matters because, in such circumstances, the most important matter to investors and other financial statement users would be the reason for the disclaimer of opinion.

2. *Considerations in the Auditor's Report Regarding Report by Management on Audit of ICFR*

As noted previously, in the 2013 proposal, the Board sought comment regarding requiring an explanatory paragraph in situations in which the company has determined

[111] AS 3101.01-.09 and .11-.19 would be amended and restated as provided in Appendix 1.

that it is not required to obtain, nor did the company request the auditor to perform, an audit of ICFR. Commenters supported such a requirement.

The Board is proposing to amend AS 3105 to provide the reporting requirements and appropriate language to be added to the auditor's report in such situations.[112]

*Requirements of Other Regulators and Standard Setters*

Under the IAASB's approach, a matter giving rise to a qualified, adverse, or disclaimer of opinion is by nature a key audit matter.[113] However, in such circumstances (1) the matter should not be described in the key audit matter section of the auditor's report, (2) the auditor should report on the matter in accordance with applicable standards, and (3) the auditor should include a reference in the key audit matter section to the basis for modified opinion section where the matter is reported.[114] The requirements to determine and communicate key audit matters, other than the matters giving rise to the modified opinion, would still apply when the auditor expresses a qualified or adverse opinion, but not when the auditor disclaims an opinion on the financial statements.[115] The FRC and the EU do not include specific requirements for expanded auditor reporting when the auditor's report contains other than an unqualified opinion.

## B. Other Amendments to PCAOB Standards

The reproposed amendments to other PCAOB standards are substantially as proposed. These include:

- AS 2201 (currently Auditing Standard No. 5), *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*—amending the example report to conform to the reproposed auditor's report on the financial statements;

- AS 2820 (currently Auditing Standard No. 6), *Evaluating Consistency of Financial Statements*—amending to include the existing reporting

---

[112] *See* reproposed amendments to AS 3105.59–.60.

[113] *See* paragraph 15 of ISA 701.

[114] *Id*.

[115] *See* paragraph A7 of ISA 701 and paragraph 29 of ISA 705, *Modifications to the Opinion in the Independent Auditor's Report*.

requirements and illustrative explanatory language related to a change in accounting principle or a restatement that is currently in AS 3105;

- AS 1220 (currently Auditing Standard No. 7), *Engagement Quality Review*—amending to require the engagement quality reviewer to evaluate the engagement team's determination, communication, and documentation of critical audit matters;

- AS 1301—amending to require the auditor to provide to and discuss with the audit committee a draft of the auditor's report; and

- AS 4105, *Reviews of Interim Financial Information* (currently AU sec. 722, *Interim Financial Information*)—amending for the basic elements of the reproposed standard.

Commenters generally supported the proposed amendments.

*Question*:

26. Are the reproposed amendments to PCAOB standards appropriate? If not, why not? Are there additional amendments related to the reproposed standard that the Board should consider? If so, what are they?

## VI. Economic Considerations

### A. Need for the Rulemaking

#### *1. Critical Audit Matters*

Investors and other financial statement users know less about a company's financial performance than do others closer to the financial reporting process, particularly management. This information asymmetry[116] can result in situations where capital is allocated suboptimally. The system of financial reporting in the United States, which requires periodic reporting of information, including annual financial statements, helps address the information asymmetry between investors and management. Board of directors and audit committee oversight of the financial reporting process can further reduce this information asymmetry by enhancing the quality of the information disclosed to the public. As part of this system, the audit of the financial statements also helps

[116] Economists often describe "information asymmetry" as an imbalance, where one party has more or better information than another party.

reduce the information asymmetry investors face by providing an independent opinion about whether the financial statements are presented fairly in all material respects.

Companies' operations continue to become more complex and global. In addition, over the last decade, there have been changes in the financial reporting frameworks relating to accounting estimates and an increasing use of fair value as a measurement attribute, together with new related disclosure requirements.[117] These estimates and fair value measurements, which are important to a financial statement user's understanding of the company's financial position and results of operations, can be highly subjective, require significant judgment, and can result in increased measurement uncertainty in financial statements.[118] The increased complexity of financial reporting, including the growing use of complex accounting estimates and fair value measurements may contribute to the information asymmetry between investors and management, despite the fact that management is required to provide significant disclosures to investors and other financial statement users. Investors may find information provided by an independent third party (i.e., the auditor) particularly relevant in this setting.

As part of the audit, auditors often perform procedures involving challenging, subjective, or complex judgments, such as evaluating calculations or models, the impact of unusual transactions, and areas of significant risk. Although the auditor is required to communicate with the audit committee regarding such matters, the auditor's report has not been expanded to provide this information to investors and generally provides only a standardized pass/fail opinion. Because the auditor's report generally does not contain audit-specific information, the auditor knows more about the company and its financial reporting and the challenges of the audit than is reflected in the auditor's report. Given the increased complexity of financial reporting, which requires the auditor to evaluate complex calculations or models and make challenging or subjective judgments, the current form of the auditor's report does little to address the information asymmetry between investors and auditors. This may limit the extent to which the auditor's report can address the information asymmetry between investors and management.

Although commenters on the Board's rulemaking have consistently affirmed the usefulness of a pass/fail auditor's opinion, many have also advocated for a more relevant and useful auditor's report that provides additional information from the

---

[117] *See* PCAOB Staff Consultation Paper, *Auditing Accounting Estimates and Fair Value Measurements* (Aug. 19, 2014).

[118] *See* IAASB Project Proposal, Revision of ISA 540, *Auditing Accounting Estimates, Including Fair Value Accounting Estimates, and Related Disclosures* (Mar. 2016).

auditor's perspective. For example, one commenter argued that an expanded auditor's report "will facilitate better analysis and heighten user confidence in the audited financial statements."[119] The Board believes that expanding the auditor's report to provide information about especially challenging, subjective, or complex auditor judgments should help investors and other financial statement users "consume" the information presented in management's financial statements more effectively. Stated in economic terms, an expanded auditor's report should reduce the information asymmetry between investors and auditors, which should in turn reduce the information asymmetry between investors and management about the company's financial performance.

a. Increasing the Informativeness of the Auditor's Report to Address Information Asymmetry

The communication of critical audit matters would inform investors and other financial statement users about areas of the audit that required especially challenging, subjective, or complex auditor judgment, including the principal considerations for determining the matters and how the matters were addressed in the audit. The Board believes that the communication of critical audit matters should help focus investors' and other financial statement users' attention on these matters by making them more prominent, which could facilitate their analysis of the financial statements and other relevant disclosures. The communication of critical audit matters in the auditor's report would also help investors and analysts who were interested in doing so engage management with targeted questions about these issues.[120] While not every critical audit matter would be useful for every investor, broadly, the Board believes that having the auditor provide investors and other financial statements users with additional information about especially challenging, subjective, or complex auditor judgments should help reduce the information asymmetry that exists between investors and management by providing a new perspective on the financial statements.

The communication of critical audit matters may also assist investors in assessing the credibility of the financial statements and, in at least some instances, audit quality.[121] For example, the description of how the auditor addressed the critical

---

[119] *See* letter from the CFA Institute (Dec. 30, 2013), at 2.

[120] The FRC observes that, in some instances, investors have begun to use the information provided in the expanded auditor's reports in the U.K. to engage with audit committees. *See* FRC 2016 Report.

[121] An academic study explores the relationship between audit quality and pre-audit financial reporting quality, and notes that, although they are distinct constructs, the two processes are interdependent and jointly determine financial reporting outcomes. *See* Lisa Milici Gaynor, Andrea Seaton Kelton, Molly Mercer, and Teri

audit matter may help investors understand the types of issues that the auditor grappled with in addressing these challenging, subjective, or complex areas of the audit, which may allow a more nuanced understanding of the related financial statement accounts and disclosures. Furthermore, investors have stated that having the auditor, a third-party expert, rather than the company provide this type of information would be of added value to investment decision making.[122] Because the auditor is required to be independent, information provided by the auditor may be viewed by investors as having greater credibility.[123]

Reporting of critical audit matters would add to the mix of information that could be used in investors' capital allocation decisions, for example, by:

- Highlighting the aspects of the financial statement audit that the auditor found to be especially challenging, subjective, or complex;

- Enabling comparison of these aspects of the audit across companies, for example audits of companies within the same industry; and

- Enabling comparison of these aspects of the audit for the same company over time.

b. Mandated Rather than Voluntary Reporting

Auditors have not developed a practice of providing information in the auditor's report beyond what is required, even though investors have consistently requested that the auditor's report become more informative. Current standards provide a framework for auditors to provide limited additional information through emphasis paragraphs,[124] but in general these only point to a disclosure in the company's financial statements without providing any additional description and, as noted below, emphasis paragraphs are infrequent in practice. Auditor reporting about matters significant to the audit is not

---

Lombardi Yohn, *Understanding the Relation Between Financial Reporting Quality and Audit Quality*, Auditing: A Journal of Practice and Theory (Forthcoming).

[122] *See* IAG 2011 survey and CFA survey and poll results.

[123] *See, e.g.*, Brant E. Christensen, Steven M. Glover, and Christopher J. Wolfe, *Do Critical Audit Matter Paragraphs in the Audit Report Change Nonprofessional Investors' Decision to Invest?* 33 Auditing: A Journal of Practice & Theory 71, 71–93 (2014).

[124] *See* AS 3101.19.

prohibited in an emphasis paragraph, but current standards do not encourage auditors to include such information in their report and do not provide a framework for doing so.

There are many other potential reasons why auditors are not providing information voluntarily in the auditor's report, whether about the financial statements or the audit. Auditors may believe that providing additional information could expose them to potential legal liability[125] or that doing so could be interpreted as a disclaimer of opinion or a partial opinion as to the disclosed matters. Furthermore, the historical model of management disclosing information and the auditor attesting to the information may lead companies to resist voluntary additional reporting by the auditor, either through emphasis paragraphs or with respect to information about the audit, which the auditor would be better positioned to communicate than management. Finally, in general, there may be disincentives to voluntary reporting if the disclosing party is not able to fully capture the benefits of the disclosures,[126] and parties may also exhibit a bias toward the *status quo.*[127] All of these factors disincentivize auditors from voluntarily providing further information about the audit, even if investors and other financial statement users would respond favorably to receiving additional information.

---

[125] Section IV.A.4 contains a discussion about potential auditor liability concerns stemming from expanded auditor reporting.

[126] Academic research finds that there are certain situations in which disclosure may be socially optimal but not privately optimal. For example, it is possible that management chooses not to disclose some information that may be useful to investors if that information also benefits a competitor. Auditors and companies may resist voluntary expanded auditor reporting because of similar concerns that these types of spillover effects (or externalities) may create a competitive disadvantage. For a summary of this line of research, *see* Luigi Zingales, *The Future of Securities Regulation*, 47 Journal of Accounting Research 391, 394-395 (2009). Professor Zingales is the founding director of the PCAOB's Center for Economic Analysis. The research cited above was published before he joined the PCAOB.

[127] Research in behavioral economics suggests that when facing a set of decisions, individuals are more likely to stick to the known outcome (*status quo*) than would be expected based on the theory of rational decision making under uncertainty. There are a variety of reasons why individuals may choose the status quo outcome in lieu of an unknown outcome, including aversion to the uncertainty inherent in moving from the status quo to another option. *See* William Samuelson and Richard Zeckhauser, *Status Quo Bias in Decision Making*, 1 Journal of Risk and Uncertainty 7, 7-59 (1988).

Mandatory disclosure helps promote more complete and consistent disclosure of specified categories of information to all users who may be interested in it.[128] Mandatory disclosure can also improve the allocative efficiency of capital markets by decreasing the costs associated with gathering information, or by providing market participants with information that otherwise would have been difficult or impossible for them to gather.[129]

*2. Additional Improvements to the Auditor's Report*

The existing auditor's report does not describe important aspects of the auditor's responsibilities under existing auditing standards, such as the auditor's responsibility to detect material misstatements, whether due to error or fraud; the auditor's responsibility for the notes to the financial statements; and the auditor independence requirement. This may contribute to misperceptions by investors and other financial statement users about the auditor's role and responsibilities, including with respect to these matters. Academic research suggests that there are a number of ways in which investor perceptions of the role and responsibilities of the auditor may diverge from what current professional standards require.[130]

In addition, the existing standards do not require a uniform approach to basic content, such as the addressee of the report and the form of the auditor's report. The reproposed standard contains provisions requiring the basic elements in the auditor's report to be presented more uniformly.

---

[128] Academic research on disclosure explores these types of positive externalities, as well as certain negative externalities. *See, e.g.*, Ronald A. Dye, *Mandatory versus Voluntary Disclosures: The Cases of Financial and Real Externalities,* 65 The Accounting Review 1, 1-24 (1990); or Anat R. Admati and Paul Pfleiderer, *Forcing Firms to Talk: Financial Disclosure Regulation and Externalities*, 13 The Review of Financial Studies 479, 479-519 (2000).

[129] *See, e.g.*, John C. Coffee, Jr., *Market Failure and the Economic Case for a Mandatory Disclosure System*, 70 Virginia Law Review 717, 717–753 (1984).

[130] *See, e.g.,* Bryan K. Church, Shawn M. Davis, and Susan A. McCracken, *The Auditor's Reporting Model: A Literature Overview and Research Synthesis*, 22 Accounting Horizons 69, 70 (2008); Glen L. Gray, Jerry L. Turner, Paul J. Coram, and Theodore J. Mock, *Perceptions and Misperceptions Regarding the Unqualified Auditor's Report by Financial Statement Preparers, Users, and Auditors*, 25 Accounting Horizons 659, 675-676 (2011); or Theodore J. Mock, Jean Bedard, Paul J. Coram, Shawn M. Davis, Reza Espahbodi, and Rick C. Warne, *The Audit Reporting Model: Current Research Synthesis and Implications*, 32 Auditing: A Journal of Practice & Theory 323, 323-351 (2013).

The reproposed standard would also require auditors to disclose the number of years they have served as the auditor for the company. Some commenters have indicated that the length of the relationship between the auditor and the company would be a useful data point, and the growing trend toward voluntary disclosure of this information suggests that increasing numbers of companies believe that the market will find the disclosure useful. Further, there is a line of academic research suggesting that there is an association between auditor tenure and increases or decreases in audit quality.[131]

Although investors can determine auditor tenure information using, for example, past auditor's reports, the information is not always readily available to investors.[132] Furthermore, while some issuers voluntarily provide information about auditor tenure in the proxy statement, many do not. Many issuers are also not subject to the proxy rules (for example, investment companies, foreign private issuers and many companies whose securities are not listed on a national securities exchange). In cases where the information is provided voluntarily, it is not provided in a consistent location. Disclosing information about auditor tenure in the auditor's report would provide a consistent location for this information and would reduce search costs, especially for companies that do not voluntarily provide such information or for which the information is not readily available through the EDGAR system.

## B. Baseline

The auditor's report in the United States today generally consists of three paragraphs that include limited audit-specific information. The existing auditor's report identifies the company's financial statements that were audited, provides a generic description about the nature of an audit, and provides an opinion on whether the company's financial statements are fairly presented, in all material respects, in conformity with the applicable financial reporting framework. The auditor's report is often described as a pass/fail model because the report only conveys the auditor's opinion on whether the financial statements are fairly presented (pass) or not (fail) and typically provides limited information about the nature of the work on which the opinion is based.

The Board's current standards also require that the auditor add explanatory paragraphs to the auditor's report under specific circumstances, such as when there is substantial doubt about the company's ability to continue as a going concern or a restatement of previously issued financial statements. When included, these paragraphs

---

[131] *See* Section VI.D.2.e for a discussion of academic research regarding auditor tenure.

[132] *Supra* note 81.

generally consist of standardized language that provides limited audit-specific information.

The auditor may also, at his or her discretion, include emphasis paragraphs in the auditor's report to emphasize a matter regarding the financial statements. Generally, an emphasis paragraph only points to a disclosure in the company's financial statements without providing any additional description. Under current practice, emphasis paragraphs are infrequent.[133] Auditors may also, at their discretion, include language in the auditor's report indicating that they were not engaged to examine management's assertion about the effectiveness of internal control over financial reporting.[134]

Academic research finds that the current form of the auditor's report conveys little of the audit-specific information obtained and evaluated by the auditor.[135] Academic research also finds that investors and other financial statement users refer to the existing auditor's report only to determine whether the opinion is unqualified because it does not provide much additional informational value about a particular audit.[136] The inclusion of explanatory language may provide investors with additional information. A recent academic study suggests that auditor's reports containing certain types of explanatory paragraphs required under existing standards may provide information about the likelihood that financial statements will be subsequently restated.[137] The authors argue that the inclusion of such an explanatory paragraph in the auditor's report can provide a signal to investors about the risk of misstatement of the company's financial statements.

---

133 In the audit reports of approximately 6,350 issuers with fiscal year 2014 filings, PCAOB staff identified audit reports containing explanatory paragraphs to emphasize matters in the financial statements in approximately 2 percent of the filings.

134 *See* AI 20.10*.*

135 *See* Church et al., *The Auditor's Reporting Model: A Literature Overview and Research Synthesis*.

136 *See* Gray et al., *Perceptions and Misperceptions Regarding the Unqualified Auditor's Report by Financial Statement Preparers, Users, and Auditors*; Mock et al., *The Audit Reporting Model: Current Research Synthesis and Implications*.

137 *See* Keith Czerney, Jaime J. Schmidt, and Anne M. Thompson, *Does Auditor Explanatory Language in Unqualified Audit Reports Indicate Increased Financial Misstatement Risk?* 89 The Accounting Review 2115, 2115–2149 (2014).

The existing auditor's report is not required to have a specified addressee but it may be addressed to the company whose financial statements are being audited, its board of directors, or stockholders.[138] Under current practice, the auditor's report is generally addressed to one or more of the following: (1) the board of directors and stockholders/shareholders, or their equivalent for issuers that are not organized as corporations; (2) the plan administrator or plan participants for benefit plans; and (3) the directors or equity owners for brokers or dealers.[139]

The current auditor's report also includes the report title, the date, and the name and location of the accounting firm’s office issuing the report. Currently, the title of the auditor's report, "Report of Independent Registered Public Accounting Firm," provides the only indication of the auditor's independence. The auditor is not currently required to disclose in the auditor's report the number of years it has served as auditor for the company. However, as noted earlier, some companies have begun voluntarily disclosing auditor tenure in the proxy statement.

## C. Benefits

### *1. Critical Audit Matters*

Economic theory commonly attributes two benefits to mandatory disclosure. First, the disclosure of previously unknown value-relevant information directly benefits the market because it allows market participants to make better-informed decisions. Second, the disclosure of such information may indirectly benefit the market because some parties may change their behavior in positive ways after information is disclosed.

#### a. Direct Benefit: More Informative and Useful Auditor's Report

The Board believes that auditor communication of critical audit matters should reduce the information asymmetry between investors and auditors, which should in turn reduce the information asymmetry between investors and management about the company's financial performance. For example:

- *Informing*: Identification of the matters arising from the audit that the auditor considered especially challenging, subjective, and complex, together with a description of how the audit addressed those matters,

[138] *See* AS 3101.09.

[139] This information is based on a review by PCAOB staff of a random sample of 2014 fiscal year-end auditor's reports for issuers, benefit plans, and brokers and dealers.

which could provide valuable information about, for example, the company's business environment or financial reporting choices;

- *Framing*: Critical audit matters could provide investors with a new perspective on the financial statements and focus their attention on the related financial statement accounts and disclosures, which could facilitate their analysis of the financial statements, and help them assess financial performance, for example, by reducing the costs to process or search for the information; and

- *Monitoring*: The ability to identify and evaluate the matters identified as critical audit matters may also help investors and analysts engage management with targeted questions about these issues and support investor decisions on ratification of the auditor.

Some commenters stated that the communication of critical audit matters would focus users' attention on issues that would be pertinent to understanding the financial statements for purposes of investment decisions or financial analysis. For example, long-term investors, such as asset or pension plan managers that maintain their own analytical models, commented that critical audit matters would be of value to them in identifying areas specific to each company that may require further analysis or discussion with management in order to be properly understood and reflected in analyst models. One commenter also said that additional insights on how a firm has addressed critical audit matters could bear on investors' decisions on ratifying the audit committee's choice of external auditor.

The communication of critical audit matters aims to provide investors and financial statement users with specific information about the audit of a company's financial statements. Some commenters were concerned, however, that the communication of critical audit matters could lead to a reduction in comparability of auditor's reports. Their concerns related primarily to how investors and other financial statement users may interpret differences in critical audit matters between the company's current period and prior periods, or between the company and its competitors. Although differences in critical audit matters from period to period and across companies may make auditor's reports less uniform, to the extent the information provided is useful in evaluating financial performance, highlighting these differences should be informative. Further, some commenters said that investors are interested in information that is specific to the audit of a company's financial statements, and therefore, would expect differences in auditor's reports across companies and reporting periods. Investors also have indicated that they are accustomed to analyzing company-specific information, such as information in financial statements or MD&A that is specific to a company or a reporting period.

A body of academic research regarding the possible effects of expanded auditor reporting is emerging.[140] The Board is monitoring this research with a view towards assessing its potential relevance to the Board's consideration of the reproposal. The Board is mindful, however, of several issues that limit the extent to which this research can inform its decision making. Much of this research is unpublished and at a relatively early stage; the current conclusions may be subject to multiple interpretations and it is possible that results from this research may be revised during the peer review process. Moreover, it may be difficult to generalize results outside the context of specific studies. For example, in considering the implications of academic studies based on data from other jurisdictions, differences between the Board's reproposed rule and the requirements in other jurisdictions must be taken into account. In addition, specific characteristics of the U.S.-issuer audit market may make it difficult to generalize observations made in other markets because of differences in baseline conditions (for example, market efficiency, affected parties, policy choices, legal environment, and regulatory oversight). As to experimental research in particular, it should be noted that the experimental setting may not provide study participants with information that is representative of the information environment in which market participants actually operate; for instance, if new information appeared more salient to study participants than it would to a market participant, the impact of expanded auditor reporting would be overstated in an experimental setting.

One experimental study conducted prior to the 2013 proposal concluded that nonprofessional investors who were provided with an auditor's report with a paragraph similar to a critical audit matter paragraph were more likely to change their investment decision relative to nonprofessional investors who were provided with (1) a standard auditor's report and standard financial statement disclosures or (2) a standard auditor's report and information in the financial statement disclosures that would have been included in a critical audit matter paragraph.[141] Two unpublished academic studies have

---

[140] For a review of relevant academic research, *see* Jean Bédard, Paul Coram, Reza Espahbodi, and Theodore J. Mock, *Does Recent Academic Research Support Changes to Audit Reporting Standards?* Accounting Horizons (Forthcoming).

[141] *See* Christensen et al., *Do Critical Audit Matter Paragraphs in the Audit Report Change Nonprofessional Investors' Decision to Invest?* This study was conducted prior to the PCAOB's 2013 proposal but was published subsequent to it. Although the authors' findings suggest that there is informational value in critical audit matters provided by the auditor, it is unclear whether other potentially relevant results identified in the paper were affected by certain assumptions, such as negative assurance or a separate opinion related to the matters identified as critical audit matters.

also found that the inclusion of critical audit matters in the auditor's report may have an informational effect on investment decision making.[142]

While these studies analyze potential effects of expanded auditor reporting on the perception of financial reporting quality, at least one study analyzes how the IAASB's expanded auditor's report influenced perceptions of audit quality.[143] The authors did not find evidence that key audit matters had an effect on the participants' perception of audit quality.

Several unpublished studies have analyzed how investors reacted to the implementation of expanded auditor reporting in other jurisdictions. One study did not find a financial market reaction to expanded auditor reporting in France, where a form of such reporting has been required since 2003.[144] Other studies have analyzed data from the United Kingdom. Lennox et al. found that expanded auditor reporting did reliably reflect the financial reporting risks of companies listed on the London Stock Exchange,

---

[142] One study found that critical audit matters in the auditor's report regarding management's estimates are value-relevant to users' investment decisions. *See* Marcus Doxey, *The Effects of Auditor Disclosures Regarding Management Estimates on Financial Statement Users' Perceptions and Investments* (June 2014) (working paper, available in Social Science Research Network ("SSRN")). The second study concluded that additional reporting in the auditor's report can increase investors' attention to financial statement disclosures mentioned in the auditor's report, but that the communication of critical audit matters led to a decrease in the perceived level of audit quality and a perception that the level of assurance provided by the audit was not uniformly applicable across all aspects of the financial statements. *See* Louis–Philippe Sirois, Jean Bédard, and Palash Bera, *The Informational Value of Key Audit Matters in the Auditor's Report: Evidence from an Eye–Tracking Study (*Dec. 2015) (working paper, available in SSRN).

[143] *See* Pran Krishansing Boolaky and Reiner Quick, *Bank Directors' Perceptions of Expanded Auditor's Report*, International Journal of Auditing (Forthcoming).

[144] The study did not find evidence that the information provided in the expanded auditors' reports was associated with a significant change in cumulative abnormal returns measured during an event window around the filing of the auditor's report. *See* Jean Bédard, Nathalie Gonthier–Besacier, and Alain Schatt, *Costs and Benefits of Reporting Key Audit Matters in the Audit Report: The French Experience* (Jan. 2014) (working paper, available in Docket 034).

but did not result in an improvement to the information available to investors.[145] Gutierrez et al. analyzed market prices and trading volume, but did not find evidence that investors reacted to the implementation of expanded auditor reporting in the United Kingdom.[146] However, Reid et al. found a significant increase in trading volume particularly for companies about which there is less information available to investors as measured by lower analyst coverage.[147] Although there could be other explanations for the increase in trading volume, the authors argue that, "as the information environment weakens (i.e., analyst following decreases), there is a greater increase in the usefulness of the reports as a result of the additional auditor and audit committee disclosures."[148] That the documented increase in trading volume was particularly salient for less-followed companies may have important implications for the Board's proposed rule because, if adopted, it would apply to a wider range of U.S. public companies than does the FRC's rule, which applies only to companies with a premium listing on the London Stock Exchange. However, it should be noted that the FRC implemented rules requiring both the auditor and the audit committee to disclose additional information in their respective reports. As the auditor's report is issued concurrently with the audit committee's report, it is difficult to separately identify the effects of the two reforms.

Overall, the results from research analyzing whether the information provided in expanded auditor reporting is useful to investors are limited. Collectively the results are ambiguous as to whether the expanded auditors' reports have provided investors with new information beyond what is contained in the financial statements. The Board will continue to monitor academic research in this area during the rulemaking process.

---

[145] The authors concluded that investors were already able to assess the financial reporting risks prior to the auditor's communication. *See* Clive S. Lennox, Jaime J. Schmidt, and Anne Thompson, *Is the Expanded Model of Audit Reporting Informative to Investors? Evidence from the UK* (June 2015) (working paper, available in SSRN).

b. Indirect Benefit: Improved Audit and Financial Reporting Quality

In general, information asymmetry can lead to situations in which an agent (such as an auditor) takes actions that do not coincide with the best interests of the principal (such as an investor), if the agent's incentives are misaligned.[149] This type of problem is the result of the inability of the principal to understand or monitor the agent's behavior, which also inhibits the principal's ability to identify and reward optimal behavior. Economic theory posits that the disclosure of information can have indirect effects that lead to changes in behavior.[150] Academic research suggests that "any additional information about the agent's action, however imperfect, can be used to improve the welfare of both the principal and the agent."[151]

In the context of the audit, providing investors and other financial statement users with information about the audit through the communication of critical audit matters may provide auditors, management, and audit committees with additional incentives to change their respective behavior in ways that may enhance audit quality and ultimately financial reporting quality. For instance, the communication of critical audit matters may lead:

- Auditors to focus more closely on the matters identified as critical audit matters;
- Management to improve the quality of their disclosures because they would know that investors and the auditor will be scrutinizing more closely the matters identified as critical audit matters; and

[149] Economists use principal-agent theory to analyze situations where one party (the principal) hires another party (the agent) to perform certain tasks and decision-making ability is delegated to the agent. For a general discussion of principal-agent theory, *see, e.g.*, Michael C. Jensen and William H. Meckling. *Theory of the Firm: Managerial Behavior, Agency Costs and Ownership Structure*, 3 Journal of Financial Economics 305, 305-360 (1976), or Bengt Holmstrom, *Moral Hazard and Observability*, 10 The Bell Journal of Economics 74, 74-91 (1979).

[150] *See, e.g.*, George Loewenstein, Cass R. Sunstein, and Russell Golman, *Disclosure: Psychology Changes Everything*, 6 Annual Review of Economics 391, 391-419 (2014).

[151] Holmstrom, *Moral Hazard and Observability*, at 75.

- Audit committees to focus on the matters identified as critical audit matters and to engage management about the adequacy of the related disclosures.

The communication of critical audit matters may lead auditors to increase their focus on the matters identified in the auditor's report as critical audit matters. As suggested by commenters, the communication of critical audit matters may further incentivize auditors to demonstrate the level of professional skepticism necessary for high quality audits in the areas of the critical audit matters. In addition, auditors may feel that the potentially heightened scrutiny of the matters identified as critical audit matters may warrant additional effort to satisfy themselves that they have obtained an appropriate amount of audit evidence to support their opinion.

The communication of critical audit matters may also heighten management's attention to the relevant areas of financial statements and related disclosures. Some commenters said that communication of critical audit matters may serve as an incentive for management to provide better disclosure or adopt more widely accepted financial reporting approaches in these areas. This may be especially true if the communication of critical audit matters prompts analysts and others to engage management about the related financial statement accounts and disclosures. Increased management attention on the related aspects of the financial statements described in the critical audit matters in response may lead to an incremental increase in the quality of information presented in the financial statements and related disclosures. Academic research has shown that increased quality of information could result in a reduction in the average cost of capital.[152]

In addition, the communication of critical audit matters may help focus the audit committee's oversight efforts by providing information allowing the audit committee to engage more effectively with the auditor and management about the matters identified as critical audit matters and the adequacy of the company's related disclosures.

To the extent these changes in behavior occur, they may lead to an incremental increase in audit quality and financial reporting quality, which could increase investors' confidence in the reliability of the financial statements. Some commenters stated that a more transparent and informative auditor's report could heighten user confidence in the

---

[152] *See, e.g.*, Richard A. Lambert, Christian Leuz, and Robert E. Verrecchia, *Information Asymmetry, Information Precision, and the Cost of Capital*, 16 Review of Finance 1, 1-29 (2012). Professor Leuz is an economic advisor at the PCAOB. The research cited above was published before he joined the PCAOB.

audit and the audited financial statements. Ultimately, an increase in investor confidence could decrease the average cost of capital.[153]

One academic study analyzed whether expanded auditor reporting in France lead to increased audit quality.[154] The authors did not find evidence that a proxy for audit quality was affected by the introduction of expanded auditor reporting. In addition, two unpublished studies conducted using data from the United Kingdom analyze whether audit quality improved after the implementation of expanded auditor and audit committee reporting. Gutierrez et al. did not find evidence that the absolute value of discretionary accruals changed following the implementation of expanded auditor and audit committee reporting in the United Kingdom, and therefore concluded that the new reports did not have an impact on audit quality.[155] However, Reid et al. found that expanded auditor and audit committee reporting is associated with several commonly used proxies for audit quality.[156] The authors of the study noted that it is difficult to disentangle the effects of the two reports, however their analysis suggests an increase in audit quality following the introduction of the expanded auditor's report in conjunction with the expanded audit committee report.

---

[153] *See* Luigi Guiso, Paola Sapienza, and Luigi Zingales, *Trusting the Stock Market*, 63 The Journal of Finance 2557, 2557–2600 (2008). Professor Zingales is the Founding Director of the PCAOB's Center for Economic Analysis. The research cited here was published before he joined the PCAOB.

[154] *See* Bédard et al., *Costs and Benefits of Reporting Key Audit Matters in the Audit Report: The French Experience*.

[155] *See* Gutierrez et al., *Consequences of Changing the Auditor's Report: Evidence from the U.K*.

[156] Specifically, the authors of this study found that abnormal accruals and the propensity to meet or beat analysts' earnings expectations declined for companies that implemented the new reporting regime. Because the authors observed an increase in proxies for audit quality, but did not observe an associated increase in audit fees or financial reporting delays, the authors argued that the increase in audit quality may have been driven by an incremental increase in the leverage that auditors and audit committees have over management stemming from the enhanced audit reporting requirements. *See* Lauren C. Reid, Joseph V. Carcello, Chan Li, and Terry L. Neal, *Impact of Auditor and Audit Committee Report Changes on Audit Quality and Costs: Evidence from the United Kingdom* (Aug. 2015) (working paper available in SSRN).

c. Indirect Benefit: Differentiation Among Auditor's Reports

If investors and other financial statement users perceive and respond to differences in the quality and usefulness of the information communicated by auditors regarding critical audit matters, expanded auditor reporting may serve as a potential means of greater differentiation among accounting firms and engagement partners.[157]

In the United Kingdom, there is evidence that some investors recognize the progress that auditors are making to improve transparency in their auditor's reports through their implementation of the FRC reporting requirements. The FRC notes that investors greatly value the information provided in expanded auditor reporting.[158] For example, in the two years following the implementation of these requirements, an association of investment managers has recognized in an annual awards ceremony those specific auditor's reports found to be most clear and most innovative in providing insight into the audit of the company's financial statements.[159] In addition, the FRC notes that users of the new auditor's reports identified certain descriptions of risks that they found to be more useful—such as descriptions which are specific to the entity being audited. Further, the FRC report notes that, in the second year of implementation, a much greater proportion of risks were set out in a more meaningful and transparent way.[160]

The FRC report also noted that there are clear differences among accounting firms in the approaches taken to implement the requirements. For example, one firm went beyond the FRC's requirements by including audit findings for the risks of material misstatement in the majority of its auditor's reports in the second year of implementation, which other firms did far less frequently. The FRC's observations may suggest that accounting firms took different approaches to the requirement and could distinguish themselves based on the quality and usefulness of the information provided in the expanded auditor's reports. Motivated in part by differences in the approaches used by accounting firms in the United Kingdom, an academic study analyzed whether investors responded differently to the auditor's reports issued by certain accounting

---

[157] The Board has adopted final rules that, assuming final approval by the SEC, will require identification of the engagement partner on issuer audits on a new PCAOB form. *See* PCAOB Release No. 2015-008 (Dec. 15, 2015).

[158] *See* FRC 2016 Report.

[159] *See* the FRC's *Extended Auditor's Reports, A Review of Experience in the First Year* (Mar. 2015); and FRC 2016 Report.

[160] *Id.*

firms.[161] The authors of the study found that the auditor's reports issued by certain accounting firms were associated with larger differences in abnormal trading volume. The authors argued that the results suggested that investors found the auditor's reports issued by some accounting firms to be more useful than others.

In addition to relying on the audit committee (which, at least for listed companies, is charged with overseeing the external auditor), in the absence of differentiation based on the auditor's report, users of financial statements may rely on proxies such as the reputation of the accounting firm issuing the auditor's report, aggregated measures of auditor expertise (for example, dollar value of issuer market capitalization audited or audit fees charged), or information about the geographic location of the office where the auditor's report was signed as signals for audit quality. Academic research finds, however, that these are imperfect signals of audit quality.[162]

The identification and description of critical audit matters could permit differentiation among auditor's reports based on investor perceptions of their informativeness and usefulness. In some instances it may also provide a signal of audit quality. Because the determination of critical audit matters may reflect a variety of considerations, however, critical audit matters may not bear directly on audit quality. For example, the choice of which critical audit matters to communicate or how to describe them may reflect considerations such as the company's business environment and financial reporting choices, accounting firm methodology, engagement partner characteristics, and legal advice. Thus, a robust description of critical audit matters may not necessarily reflect a higher quality audit than a less detailed description of such matters.

Nevertheless, informative descriptions of how the audit addressed critical audit matters could provide insight into the extent and appropriateness of the auditor's work. Moreover, it is possible that thoughtful, audit-specific and useful critical audit matters (or, conversely, generic and uninformative critical audit matters) could affect investor perceptions of the auditor's work and willingness to provide useful information. As a result, the communication of critical audit matters, potentially in conjunction with disclosures regarding the identity of the engagement partner and other accounting firms

---

[161] *See* Reid et al., *Are Auditor and Audit Committee Report Changes Useful to Investors? Evidence from the United Kingdom*.

[162] *See, e.g.*, J.R. Francis, *A Framework for Understanding and Researching Audit Quality*, 30 Auditing: A Journal of Practice & Theory 125, 125–152 (2011) and Mark DeFond and Jieying Zhang, *A Review of Archival Auditing Research*, 58 Journal of Accounting and Economics 275, 275–326 (2014).

that participated in the audit,[163] and other relevant information could enable differentiation among auditors on that basis.

*2. Additional Improvements to the Auditor's Report*

The reproposed standard contains other changes to the auditor's report intended to improve and clarify the language for certain elements, such as statements related to the auditor’s responsibilities regarding the notes to the financial statements, and promote a uniform presentation of this information across auditor's reports. Additionally, the reproposed standard would introduce new requirements regarding the addressee of the auditor's report and statements in the auditor's report related to auditor independence, auditor tenure, and the auditor's responsibility for reporting on ICFR.[164]

The statement regarding the auditor's existing obligation to be independent of the company is intended to enhance investors' and other financial statement users' understanding about the auditor's obligations related to independence and to serve as a reminder to auditors of these obligations. By requiring the auditor's report to be addressed to certain parties, the Board would be promoting uniformity in the addressees of the auditor's report.

Disclosing information about auditor tenure in the auditor's report would provide a consistent location for this information and decrease the search costs for investors and other financial statement users who are interested in this piece of information.[165] The disclosed information could also prompt investors and other financial statement users to engage management, and ultimately the audit committee, about issues related to auditor tenure.

For most of these changes to the auditor's report, commenters on the 2013 proposal generally agreed that the proposed changes would enhance the description in the auditor's report of the auditor's responsibilities under existing auditing standards and would facilitate comparisons between auditor's reports for different companies. Commenters' views were mixed with respect to the statement regarding auditor tenure.

---

[163] *See* PCAOB Release No. 2015-008.

[164] In circumstances where management is required to report on ICFR but the auditor is not and has not performed an audit of ICFR, the reproposal would require a statement to that effect in the auditor's report.

[165] *See* Section VI.D.2.e for a discussion of academic research regarding auditor tenure.

## D. Costs and Potential Unintended Consequences

### *1. Costs*

Commenters on the 2013 proposal generally did not quantify the cost to implement the proposal. Several commenters indicated that at this point it is hard to quantify the costs that would be incurred to implement the proposal. Even those that conducted limited implementation testing of the proposal were unable to provide a quantified cost estimate. Therefore, based on the comments and the lack of data, the Board is unable to quantify costs, but provides a qualitative cost analysis.

As an additional means of assessing potential cost implications of the reproposed standard, PCAOB staff has reviewed data from the first year of implementation of expanded auditor reporting in the United Kingdom.[166] As discussed below, staff analyzed a variety of data points that may be associated with potential costs, including audit fees, days required to issue the auditor's report and the content of the expanded auditor's report. It should be noted that it may be difficult to generalize observations from the UK experience. For example, the reporting and documentation requirements relating to expanded auditor’s reports in the United Kingdom differ from those in the reproposal, the baseline legal environments are different, and the UK requirements apply only to companies with a premium listing on the London Stock Exchange and not, for example, to smaller companies that list on London's AIM market.

a. Critical Audit Matters

Based on comments to date, the Board anticipates that the reproposed requirement regarding critical audit matters would have potential cost implications for auditors and companies, including their audit committees. Such costs would primarily relate to additional time to prepare and review auditor's reports, including high-level discussions with management and audit committees as well as legal costs for review of the information provided in the critical audit matters. In addition, even though no performance standards are being amended, as discussed earlier in this release, auditors may choose to perform more audit procedures related to areas reported as critical audit matters, with cost implications for both the auditor and management.

For auditors, costs might represent both one-time costs and recurring costs. One-time costs could be incurred as a result of: (1) updating accounting firm audit and quality control methodologies to reflect the new reporting requirements and (2)

---

[166] *See White Paper on the Auditor's Reports of Certain UK Companies that Comply with International Auditing Standard (UK and Ireland) 700*, available on the Board's website in Docket 034.

developing and conducting training of accounting firm personnel on the new reporting requirements. When updating methodologies, some accounting firms would likely also develop new quality control processes related to additional review or consultation on the determination, communication, and documentation of critical audit matters.

Recurring costs would primarily reflect additional effort expended in individual audits. The reproposed standard does not impose new performance requirements other than the determination, communication, and documentation of critical audit matters, which would be based on work the auditor has already performed. However, there would be some additional recurring costs associated with drafting descriptions of critical audit matters and related documentation. It is likely that senior members of the engagement teams, such as partners and senior managers, would be involved in determining the critical audit matters and developing the language to be included in the auditor's report. In addition, reviews by others, such as the engagement quality reviewer and national office, would also result in recurring costs. Additional time might also be incurred by the auditor as a result of discussions with management or the audit committee regarding critical audit matters.

Companies, including audit committees, could also incur both one-time and recurring costs as a result of the reproposed standard. One-time costs could be incurred, for example, in educating audit committee members about the requirements of the new standard and in developing management and audit committee processes for the review of draft descriptions of critical audit matters and the related interaction with auditors. Recurring costs would include the costs associated with carrying out those processes, as well as any increase in audit fees associated with the new reporting requirements or legal fees stemming from a review of critical audit matter communications.

If the drafting and review of critical audit matter reporting takes place towards the end of the audit, there may also be an opportunity cost associated with the time constraints on the parties involved (including, for example, management, the engagement partner, the audit committee, and the auditor's and company's respective legal counsel). The end of the audit is a busy period in which multiple issues may need to be resolved before the auditor's report can be issued. At the same time, companies and management would also be in the process of preparing the annual report. Time spent drafting and reviewing the communication of critical audit matters could occur at the same time as other important work in the financial reporting and audit process, and would involve management that command high annual salaries or auditors and lawyers with high hourly billing rates. In addition, the communication of critical audit matters could lead to changes in management's disclosures, which may result in a longer and more expensive financial reporting process.

Commenters' views varied significantly about the likely magnitude of direct costs associated with auditor reporting of critical audit matters. Some commenters said that there would not be material additional costs for communication of critical audit matters, as these matters would already have been reviewed by the engagement quality reviewer, documented in the engagement completion memo, and communicated to the audit committee. This may suggest that a substantial amount of the work required to communicate critical audit matters would already have been completed earlier in the audit. On the other hand, some companies said that critical audit matters would result in substantial additional costs for auditors and companies. One commenter surveyed accounting executives of 63 publicly-traded manufacturing companies; one-third believed that audit fees would rise by 6 to 10 percent, while another third said that fees could rise by more than 10 percent. Several companies stated that, in their view, the total costs associated with critical audit matters outweigh the perceived benefits that investors may get from the information provided. Other commenters stated that while audit fees would increase as a result of the communication of critical audit matters, investors would support additional fees for additional useful qualitative information.

In its review of the implementation of expanded auditor reporting in the United Kingdom, the PCAOB staff did not find evidence of statistically significant increases in audit fees following the first year of expanded auditor reporting.[167] The median fee change was zero and for the majority of companies, audit fees for the year of implementation remained the same or decreased as compared to the prior year's audit fees. Audit fees increased for the remaining companies. The PCAOB staff found that the average change in audit fees was an increase of approximately 5 percent.[168] It should be noted that the PCAOB staff's review did not analyze whether other factors, such as inflation, corporate acquisitions, or the implementation of other regulatory changes, contributed to the documented increase in audit fees, or whether audit firm profitability was affected. Also, audit fees would not fully reflect the cost of implementing expanded auditor reporting to the extent that accounting firms chose to absorb those additional costs and because audit fees do not reflect the impact of any additional demand on management's time associated with expanded auditor reporting.

---

[167] *Id.*

[168] Academic research also finds an approximately 4 percent increase in audit fees two years after the implementation of expanded auditor's reporting in the United Kingdom. *See* Gutierrez et al., *Consequences of Changing the Auditor's Report: Evidence from the U.K.* The authors of another unpublished academic study that examined only the first year of implementation also found that audit fees increased marginally. They argued that the increase was likely due to the continuation of an upward trend in fees that was unaffected by the new reporting requirements, although they were unable to conclusively state that the enhanced audit reporting requirements had no effect on audit fees. *See* Reid et al., *Impact of Auditor and Audit Committee Report Changes on Audit Quality and Costs: Evidence from the United Kingdom*.

b. Additional Improvements to the Auditor's Report

The reproposed changes to the basic elements of the auditor's report do not represent a significant departure from the 2013 proposal. Some of the enhanced basic elements would have cost implications for auditors. One-time costs would primarily relate to updating methodology and training and the initial determination of the first year the auditor began serving consecutively as the company's auditor. Based on comments received, it does not appear that the reproposed changes to the basic elements would impose significant recurring costs, because they involve standardized language that, once implemented, would be the same or very similar across different auditor's reports every year.

2. *Potential Unintended Consequences*

a. Time Needed to Issue the Auditor's Report

As a result of the additional effort required to determine, communicate, and document critical audit matters, some commenters said that it would take auditors longer to issue their reports. Other commenters were concerned that the quality of the audit may be negatively affected if auditor's reports, including critical audit matters, were issued within the current timeframe.

The PCAOB staff study did not find evidence that compliance with the United Kingdom's recently implemented expanded auditor reporting requirements delayed the issuance of auditor's reports in the first year of implementation. Based on the study, for companies that had three years of financial statements, a new form auditor's report was issued, on average, in 63 days from the company's fiscal year end date in the year of implementation, as compared to 64 days in the prior year and 65 days two years earlier. Academic research conducted using data from the United Kingdom also did not find evidence that the new reporting requirements led to delays in financial reporting.[169]

b. Number and Content of Critical Audit Matters

Some commenters indicated an expectation that the auditor's report would include a long list of critical audit matters. They said that this would occur because the auditor would be motivated to communicate as much as possible in an effort to mitigate any future liability for unidentified critical audit matters. In their view, such a development could make the report more difficult to navigate and less useful and may result in duplicative communications if the auditor provides information already

[169] *See* Reid et al., *Impact of Auditor and Audit Committee Report Changes on Audit Quality and Costs: Evidence from the United Kingdom*.

disclosed by management. Other commenters indicated that expanded auditor reporting could lead to a checklist approach, which could result in standardized language and diminish the expected value of the critical audit matters.[170] At the same time, other commenters thought that, at least for certain types of issuers, the auditor may not identify any critical audit matters to communicate in the auditor's report. If auditors choose to provide only generic information about the audit, the communication of critical audit matters would not decrease information asymmetry about the audit, and may obscure other important information included in the auditor's report and the audited financial statements.

The reproposed requirements aim to provide investors with the auditor's unique perspective on the areas of the audit that involved the auditor’s especially challenging, subjective, or complex judgments. Focusing on auditor judgment should limit the extent to which expanded auditor reporting could become duplicative of management's reporting. Further, limiting critical audit matters to these areas should mitigate the extent to which expanded auditor reporting could become standardized.

The PCAOB staff study did not find evidence that expanded auditor reporting in the United Kingdom resulted in a very large number of risk topics or none at all in the first year of implementation.[171] On average, the auditor's reports in the first year of implementation included descriptions of four risk topics, with total risk topics ranging from one to eight. Additionally, the descriptions of the risks of material misstatement in the auditor's reports in the first year of implementation were not presented in standardized language, but included variations in content length, description, and presentation. The most frequently described risk topics related to revenue recognition, tax, and goodwill and intangible assets. The FRC report finds a similar range and average number of risk topics disclosed in both the first and second year of the implementation of expanded auditor reporting in the United Kingdom.[172] The FRC report also finds disclosure of similar risk topics in the second year of implementation of

---

[170] These commenters generally suggested that the auditor provide the "principal" or "primary" considerations, but not all considerations, that led the auditor to determine that the matter is a critical audit matter. The reproposed requirement for critical audit matters incorporates this suggestion.

[171] *See White Paper on the Auditor's Reports of Certain UK Companies that Comply with International Auditing Standard (UK and Ireland) 700*, available on the Board's website in Docket 034.

[172] *See* FRC 2016 Report.

expanded auditor reporting in the United Kingdom.[173]

Further, the FRC found that, in the second year of expanded auditor reporting in the United Kingdom, the discussion of risks has improved relative to the first year of implementation and that the majority of auditor's reports provided discussion of significant risks that were more tailored to the company under audit, thus avoiding generic or standardized wording.[174] These findings suggest that, thus far, the expanded UK auditor reporting has not become standardized in the United Kingdom.

As described earlier, academic research conducted in other jurisdictions has had inconclusive findings so far regarding the usefulness of information provided in expanded auditor reporting. Although some papers found that the communications may be predictable or redundant,[175] there is some evidence of abnormal trading volume stemming from the disclosed information.[176] However, results from experimental research on the communication of critical audit matters suggested that investors do read and value the communication in the auditor's report, even if management made similar disclosures in the financial statements.[177]

c. Effects of Increased Attention to Critical Audit Matters

The communication of critical audit matters could lead auditors, company management, and the audit committee to spend additional time and resources on reviewing the adequacy of the work performed on the related financial statement accounts and disclosures. While this could lead to an incremental improvement in audit and financial reporting quality for the identified critical audit matters, it is also possible that there may be increased costs for auditors as a result of the reproposed requirements. For example, even though the communication of critical audit matters does not mandate the performance of additional audit procedures, it is possible that

---

[176] *See* Reid et al., *Are Auditor and Audit Committee Report Changes Useful to Investors? Evidence from the United Kingdom*.

[177] *See* Christensen et al., *Do Critical Audit Matter Paragraphs in the Audit Report Change Nonprofessional Investors' Decision to Invest?*

some auditors may perform additional procedures. If that occurs, the associated costs may be passed on—in whole, in part, or not at all—to companies and their investors in the form of higher audit fees. Further, increased procedures may also require additional time from the company's management to deal with such procedures. In addition to increased costs, the increased attention on certain matters could also lead to a related decrease in audit and financial reporting quality of other material aspects of the financial statements and disclosures if they receive less attention.

The communication of critical audit matters could also lead to changes in auditor incentives and behavior that negatively affect audit quality. For example, an unpublished academic study suggests that changes in auditor incentives could cause audit quality to decrease under certain circumstances.[178] However, some commenters suggested that such changes in incentives could improve auditor skepticism and audit quality.

Some commenters indicated that including critical audit matters in the auditor's report could also inhibit communication among the auditor, management, and the audit committee because of concerns about what would be publicly communicated in the auditor's report. A recent academic paper also explored this possibility and found in an experimental study that participants acting as management chose to share less private information about key accounting estimates in a regime in which their auditors were able to disclose information about management's estimates as a critical audit matter.[179]

---

[178] This study developed a theoretical model to analyze how expanded auditor reporting affects auditor effort, audit quality, and investment decisions. In the model, investors use signals of audit quality provided by expanded auditor reporting as a means to assess the likelihood that they could recover damages from the auditor in the event of an audit failure. The authors of the study found that while expanded auditor reporting enhances the decision usefulness of financial reports for investors, it can also adversely affect the auditor's incentives and consequently lower the expected level of audit quality if the underlying level of financial reporting quality is high and investors only use the auditor's report to verify the auditor's pass/fail opinion about the presentation of the financial statements. The authors concluded by noting that arguments in favor of disclosing critical audit matters are weakened if the underlying level of financial reporting quality is high. *See* Qi Chen, Xu Jiang, and Yun Zhang, *Does Audit Transparency Improve Audit Quality and Investment Efficiency?* (Dec. 2014) (working paper, available in SSRN).

[179] The authors argued that managers who sense that they are losing control over the company's disclosures will choose to disclose less information to the auditor in an effort to limit any negative investor reaction to auditor reporting. *See* Nicole Cade and Frank D. Hodge, *The Effect of Expanding the Audit Report on Managers' Communication Openness* (Aug. 2014) (working paper, available in SSRN).

PCAOB standards require the auditor to communicate to the audit committee information about management's estimates, among other matters.[180] Additionally, although management may have an increased incentive to withhold information from the auditor when the auditor is required to communicate critical audit matters, if management actually chose to provide the auditor with less information than requested, under the Board's existing standards[181] the auditor may determine that there is a scope limitation and qualify the auditor's opinion. Under the reproposed standard, critical audit matters are determined from the matters communicated or required to be communicated to the audit committee. With respect to any matters required to be communicated to the audit committee, there should not be a chilling effect or reduced communications to the audit committee. It would seem that any chilling effect would relate to matters that are not explicitly required to be communicated to the audit committee, although, as described above, there should be few communications affected by that possibility.

Although the communication of critical audit matters may lead to changes in the incentives for the auditor, company management, and the audit committee to communicate with each other, initial anecdotal evidence suggests that the implementation of expanded auditor reporting in the United Kingdom has not chilled such communications.

d. Changes in Perceived Assurance on the Auditor's Report, Including Perceptions of Auditor Liability

The communication of critical audit matters could have liability implications for auditors. For a more detailed discussion of liability, *see* Section IV.A.4. In addition, because the communication of critical audit matters requires auditors to discuss aspects of the audit that they found to be especially challenging, subjective, or complex, it is possible that some investors and financial statement users may misconstrue the communications to mean that auditors were unable to obtain reasonable assurance about the matters identified as critical audit matters. Some commenters have said that the communication of critical audit matters could lead to changes in the way investors and financial statements users perceive the level of assurance provided by the audit on matters identified as critical audit matters. This could result in a situation in which investors believe that auditors are providing separate assurance about the presentation

---

[180] AS 1301.12(c).

[181] *See* AS 3101.20-.26.

of the financial statements and may have implications for perceptions of auditor responsibility in the event of an audit failure.[182]

Several academic papers analyze certain risks associated with communicating critical audit matters, including perceptions of auditor responsibility.[183] Each paper relies on an experiment in which participants were presented with information about financial statement misstatements and critical audit matters. Researchers evaluated the impact of expanded auditor reporting on participants' perceptions of auditor responsibility. The results of these studies vary and are sometimes contradictory.[184] While some papers suggest that expanded auditor disclosure could result in a perception of decreased

---

182 Academic research on financial statement users' perceptions of critical audit matters suggests that these unintended consequences may be possible. *See* Christensen et al., *Do Critical Audit Matter Paragraphs in the Audit Report Change Nonprofessional Investors' Decision to Invest?* or Marcus Doxey, *The Effects of Auditor Disclosures Regarding Management Estimates on Financial Statement Users' Perceptions and Investments*.

183 *See* Tim Brown, Tracie M. Majors, and Mark. E. Peecher, *The Impact of a Judgment Rule and Critical Audit Matters on Assessments of Auditor Legal Liability—The Moderating Role of Legal Knowledge* (Dec. 2014) (working paper, available in SSRN); Kelsey R. Brasel, Marcus M. Doxey, Jonathan H. Grenier, and Andrew Reffett, *Risk Disclosure Preceding Negative Outcomes: The Effects of Reporting Critical Audit Matters on Judgments of Auditor Liability*, The Accounting Review (Forthcoming); Ann G. Backof, Kendall Bowlin, and Brian M. Goodson, *The Impact of Proposed Changes to the Content of the Audit Report on Jurors' Assessments of Auditor Negligence* (Feb. 2016) (working paper, available in SSRN); Christine Gimbar, Thomas Bowe Hansen, and Michael E. Ozlanski, *The Effects of Critical Audit Matter Paragraphs and Accounting Standard Precision on Auditor Liability: Can Anything the Auditor Says Be Used Against Them?* The Accounting Review (Forthcoming); and Steven J. Kachelmeier, Jaime J. Schmidt, and Kristen Valentine, *The Disclaimer Effect of Disclosing Critical Audit Matters in the Auditor's Report* (Dec. 2015) (working paper, available in SSRN).

184 For a more detailed description of the methodologies and results of several of the above-referenced studies, see Christine Gimbar, Bowe Hansen, and Michael E. Ozlanski, *Early Evidence on the Effects of Critical Audit Matters on Auditor Liability*, 10 Current Issues in Auditing A24, A24-A33 (2016).

auditor responsibility,[185] other papers suggest the opposite effect.[186] Most of the studies acknowledge that findings may depend on the design of the experiment, the particular hypotheses being tested, the specific facts and circumstances presented to the experiment participants, and the background of the participants themselves.

Therefore, while this type of research can have important implications for how critical audit matters are viewed in relation to the overall level of assurance provided by an audit, it is difficult to draw generalizable conclusions based solely on these papers. If the communication of critical audit matters were to lead to a reduction in perceived auditor responsibility, as is suggested by some of the working papers, and this in turn reduced auditor liability, it is possible that auditors may feel that less audit work is needed on the matters identified as critical audit matters. This could lead to a decrease in audit quality. The Board will continue to monitor emerging research related to expanded auditor reporting in the U.S., as well as research in other jurisdictions in which such reporting is already occurring.

On the point of whether the communication of critical audit matters could result in the perception of separate assurance, the reproposed standard would require the following statement in the auditor’s report that "Critical audit matters do not alter in any way [the auditor’s] opinion on the financial statements, taken as a whole, and [the auditor does not] provide separate opinions on the critical audit matters or on the accounts or disclosures to which they relate." The purpose of this statement is to make clear that the communication of critical audit matters in an auditor's report should not be interpreted as altering the level of assurance on any aspect of the audit report, including the identified critical audit matters.

e. Auditor Tenure

Some commenters stated that information regarding the auditor's tenure included in the auditor's report could result in inappropriate and inconsistent assumptions about

---

185 *See, e.g.*, Brasel et al., *Risk Disclosure Preceding Negative Outcomes: The Effects of Reporting Critical Audit Matters on Judgments of Auditor Liability*; Kachelmeier et al., *The Disclaimer Effect of Disclosing Critical Audit Matters in the Auditor's Report*; or Brown et al., *The Impact of a Judgment Rule and Critical Audit Matters on Assessments of Auditor Legal Liability—The Moderating Role of Legal Knowledge*.

186 *See, e.g.*, Backof et al., *The Impact of Proposed Changes to the Content of the Audit Report on Jurors' Assessments of Auditor Negligence*; or Gimbar et al., *The Effects of Critical Audit Matter Paragraphs and Accounting Standard Precision on Auditor Liability: Can Anything the Auditor Says Be Used Against Them?*

correlations between auditor tenure and audit quality. Academic research on the relationship of tenure to audit quality has varied conclusions. Some academic research indicates that engagements with short-term tenure are relatively riskier or that audit quality is improved when auditors have time to gain expertise in the company under audit and in the related industry.[187] Other academic research indicates that investors are more likely to vote against, or abstain from, auditor ratification as auditor tenure increases, which may suggest that investors view long-term auditor-company relationships as adversely affecting audit quality.[188] Still other academic research suggests that, at least prior to 2001, both short tenure (less than five years) and long tenure (greater than fifteen years) can have detrimental effects on audit quality.[189]

The disclosure of auditor tenure is intended to add to the mix of information that investors can use. However, it is possible that some investors may draw incorrect inferences about auditor tenure that could have an unwarranted effect on cost of capital and could also result in conversations that are an inefficient use of management and audit committee time.

**E. Alternatives Considered, Including Policy Choices Under the Reproposal**

In developing the reproposal the Board considered alternative approaches to the proposed critical audit matters. The Board also considered certain policy decisions in developing critical audit matters and other changes to the auditor's report.

---

*1. Alternative Approaches*

a. No Change to Auditor Reporting Requirements

The Board considered whether changes to the existing auditor reporting requirements were needed. Auditor reporting under the current model has been criticized by many commenters as providing limited information. Auditors have not voluntarily provided more information in the auditor's report in response to investors' requests. A number of factors described above, such as potential costs and uncertainties related to voluntary auditor reporting and the potential for auditor status quo bias, may explain why voluntary reporting would not be expected to become prevalent. These factors suggest that voluntary reporting, with or without guidance to encourage it, could also create uncertainty about the content of auditor's reports because auditors would be able to choose whether to provide information about the audit, what information to provide, and the form in which to provide it. On that basis, the Board believes that standard setting is appropriate.

b. Consideration of Analogous Requirements of Other Regulators and Standard Setters

In developing the reproposal, the Board took into account the requirements for expanded auditor reporting of other regulators and standard setters, such as the IAASB, the FRC, and the EU. Changes to the auditor's report that other regulators and standard setters have adopted include some commonality, such as communicating information about audit-specific matters in the auditor's report. Adopting the expanded auditor reporting requirements of another standard setter could provide more consistent global auditor reporting requirements.

However, the Board recognizes that the regulatory environments in other jurisdictions are different from the United States, requiring the Board to address unique U.S. requirements and characteristics in its standard-setting projects. Because the Board's standards have the force of law, the Board aims to make them as clear and easy to apply as it can. For example, the factors that the auditor would consider in determining whether a matter involved especially challenging, subjective, or complex auditor judgment are included in the standard; by contrast, while the IAASB approach includes similar factors, they appear in the application and other explanatory material.

In addition, there are differences between requirements and terminology of the Board's auditing standards and those of other regulators and standard setters that may cause inconsistent application, even if the Board were to adopt the approach of another standard setter. For example, the Board's requirements for communications to the audit committee are not the same as the analogous requirements of the IAASB. Therefore, although both critical audit matters and the IAASB's key audit matters are derived from such communications, the matters ultimately discussed with the audit committee under each framework would not necessarily be the same, and could result in differences in which matters are reported. Also, terminology used in the rules of other regulators and standard setters to describe matters subject to the expanded auditor reporting, such as IAASB's "areas of higher assessed risks of material misstatement" or EU's "most significant assessed risks of material misstatement," is not used in PCAOB auditing standards. As a result, adopting the same standard as another regulator or standard setter would not necessarily yield the same result.

c. Auditor's Association with Portions of MD&A

Several commenters suggested that the Board should consider auditor association with, or attestation on, portions of MD&A, specifically management's critical accounting policies and estimates, as an alternative to expanded auditor reporting. These commenters have argued that such an association could increase the quality and reliability of the information subject to the procedures. The Board solicited comment on this approach in the 2011 concept release and some commenters raised it again in relation to the 2013 proposal.

Some commenters on the 2011 concept release, including investors, said that they are not supportive of separate assurance by the auditor on information outside of the financial statements as an alternative to expanded auditor reporting, primarily because the related auditor reporting would have appeared in a standardized form and would not provide audit-specific information. Requiring such reporting might necessitate action by the SEC, as well as the PCAOB, to implement, including new SEC rules regarding management reporting and auditor attestation. In addition to reporting requirements, the PCAOB might have to develop new performance requirements and auditors would be required to undertake additional audit work in order to provide attestation in these areas. Based on concerns about the relative benefits and costs and the comments received, the Board determined not to pursue auditor association with portions of MD&A as an alternative to expanded auditor reporting.

d. Auditor Assessment and Descriptions of Certain Financial Statement Areas

As previously discussed, several commenters suggested that investors would be most interested in auditor reporting on the categories of information identified by investor respondents to the 2011 survey conducted by a working group of the IAG: (1) significant management estimates and judgments made in preparing the financial statements and the auditor's assessment of them;[190] (2) areas of high financial

[190] Some commenters suggested that the auditor should grade their assessments.

statement and audit risk; (3) unusual transactions, restatements, and other significant changes in the financial statements; and (4) the quality, not just the acceptability, of the company's accounting practices and policies.[191] This request was reiterated by several commenters on the 2013 proposal, who continued to believe that this approach would provide the information investors want most. In a similar vein, other commenters have requested that the auditor provide a "grade" assessing the quality of the financial statements as a whole.

The reproposed critical audit matter definition would likely cover many of the topic areas requested by investors. For example, the auditor may communicate critical audit matters related to significant management estimates and judgments, highlight areas of high financial statement and audit risk, and discuss significant unusual transactions. However, the auditor would not be required to report on its assessment of management's significant estimates and judgments or on the quality (as opposed to merely the acceptability), of the company's accounting practices and policies or of the financial statements as a whole.

In this standard setting, the Board seeks to strike an appropriate balance between the value of the information being provided and the costs of providing it. Requiring auditors to report their qualitative assessments in a manner that appears very precise (for example, describing an estimate as "conservative" or "aggressive" or assigning the financial statements an "A" or a "B") would likely impose significantly greater costs and unintended consequences than the principles-based reporting of critical audit matters. For example, although the reporting of qualitative assessments would appear to be precise, these qualitative assessments are likely to be applied inconsistently because there is no framework for such assessments and the determinations are inherently subjective. In addition, such assessments may heighten concerns related to the perceived level of assurance provided by the audit or the perception that separate assurance is being provided as to the assessed areas. Also, the reporting of such qualitative assessments would likely subject auditors and issuers to additional litigation risk beyond what may result from the principles-based reporting of critical audit matters because the apparent precision of the reporting may facilitate plaintiffs' claims.

*2. Policy Choices*

a. Definition of Critical Audit Matters

The Board considered a variety of possible approaches to the definition of critical audit matters suggested by commenters. *See* Section IV.A.1 for a discussion of the

---

[191] *See* IAG 2011 survey.

Board's considerations. Under the reproposal, the Board anticipates that the initial population of matters that could potentially be determined to be critical audit matters would be smaller than those under the proposal, which should reduce the auditor's effort in determining which matters may be critical audit matters. With a materiality component, however, matters that are not material to accounts or disclosures in the financial statements but may be important to investors would not be included as critical audit matters in the auditor's report.

b. Communication of Critical Audit Matters

The Board considered a variety of possible approaches to the communication requirements for critical audit matters. *See* Section IV.A.2 for a discussion of the Board's considerations. Under the reproposal, auditors would be required to describe how each critical audit matter was addressed in the audit, but are given flexibility in formulating the description, which should enable them to avoid standardized language and tailor the description to the specific circumstances for a particular audit. In addition, when describing critical audit matters in the auditor's report, the auditor would not be expected to provide information about the company that had not been made publicly available by the company unless such information were necessary to describe the principal considerations that led the auditor to determine that a matter was a critical audit matter or how the matter was addressed in the audit.

c. Documentation of Critical Audit Matters

In response to commenters' concern about the proposed requirement to document matters that appeared to meet the definition of critical audit matters, the documentation requirement in the reproposal was narrowed. *See* Section IV.A.3 for a discussion of the Board's considerations. In general, the reproposed documentation requirement is intended to facilitate review of the auditor's determinations by others, such as the engagement quality reviewer and through the Board's oversight activities. This should foster enhanced compliance and greater consistency in the application of the requirements. However, there would be additional time and effort related to the documentation requirement.

d. Auditor Tenure

The reproposal retains the requirement to include a statement in the auditor's report about auditor tenure. *See* Section IV.B.2 for a discussion of the Board's considerations. The reproposed requirement to disclose auditor tenure in the auditor's report would eliminate search costs stemming from duplicative efforts of investors and other financial statement users to individually gather the information, and would reduce search costs relative to manual review of Form 8-Ks and annual reports filed over time or locating *ad hoc* voluntary disclosure in the proxy statement. Under the reproposal, information about auditor tenure would be consistently available in one location, including with respect to companies that are not subject to the proxy rules.[192] Some commenters noted that the easier it is for investors to locate information about auditor tenure, the more useful such information would be. As a result, although there are varying views about the link between auditor tenure and audit quality, the Board's reproposal retains this requirement as another element in the mix of information used by investors in their decision making.

The Board is also soliciting comment on whether auditor tenure should be disclosed on Form AP rather than in the auditor's report. Relative to mandated disclosure in the auditor's report, disclosure on Form AP could further reduce search costs for market participants in some instances, particularly in aggregating data across audits and over time. However, under the reproposal, the required information would be disclosed in the auditor's report, the primary vehicle by which the auditor communicates with investors and where other information about the audit is already found, and would be available to investors immediately when a company files its audited financial statements and the accompanying auditor's report with the SEC.

e. Additional Improvements to the Auditor's Report

The reproposal includes a number of requirements that would enhance the standardized content of the auditor's report by clarifying the auditor's role and responsibilities related to the audit of the financial statements. These include, for example, statements regarding auditor independence requirements and the addition of the phrase "whether due to error or fraud," when describing the auditor's responsibility under PCAOB standards to obtain reasonable assurance about whether the financial statements are free of material misstatements. In addition, the reproposal includes requirements intended to promote uniformity in the form of the auditor's report. These include requirements as to the addressee, a specific order of certain sections of the auditor's report, and required section headings.

These enhancements should increase the usability of the auditor's report by improving financial statement users' understanding of the auditor's responsibilities, reducing search costs for information in the auditor's report, and facilitating comparisons across auditor's reports.

---

[192] The proxy rules do not apply to all companies required to be audited under PCAOB standards; for example, foreign private issuers, brokers and dealers, and most investment companies are not required to prepare proxy statements.

*Questions:*

27. How would investors use the information communicated in critical audit matters? Would the communication of critical audit matters help reduce information asymmetry between investors and management? Investors and the auditor?

28. How would each of the elements of the communication (i.e., identification, principal considerations, audit response, and financial statement reference) be used by investors?

29. Would critical audit matters be useful in assessing company financial performance? If so, how?

30. Would critical audit matters be useful in assessing audit quality? If so, how?

31. Would the communication of critical audit matters enhance attention by auditors, audit committees, and management to the matters identified as critical audit matters? If not, why not? Would such changes enhance audit quality, improve management's disclosures, or otherwise be beneficial to investors? Why or why not?

32. Would the communication of critical audit matters trigger other changes in behavior? If so, what changes? Would such changes enhance audit quality or otherwise be beneficial to investors? Why or why not?

33. Would the impact of critical audit matters vary depending on the size of the accounting firm? The size of the company? If so, what would the differences be?

34. Would the communication of critical audit matters provide a basis on which auditors could differentiate themselves? Why or why not?

35. Are there additional academic studies or data the Board should consider? The Board is particularly interested in studies or data that could be used to assess potential benefits and costs.

36. Are there additional benefits, costs or unintended consequences, or other economic considerations, such as competitive effects, associated with critical audit matters or the additional improvements to the auditor's report that the Board should consider? If so, what are they?

## VII. Exclusions from Critical Audit Matter Requirements

Under the 2013 proposal, the standard would have applied to all audits conducted under PCAOB standards, although the Board sought comment on the applicability of critical audit matters to the audits of specific types of entities, including brokers and dealers; investment companies; and benefit plans. Some commenters supported applying the communication of critical audit matters to the audits of all types of entities. Others commented that audits of certain entities should be excluded from critical audit matter reporting. The Board has taken into consideration comments received and evaluated benefits and costs to assess the applicability of critical audit matters to the audits of brokers and dealers that are reporting under Exchange Act Rule 17a-5, investment companies and benefit plans. This section describes the Board's rationale, including economic considerations, for reproposing to exclude audits of these entities, other than business development companies, from the critical audit matter requirements.[193] However, auditors of these entities would not be precluded from including critical audit matters in the auditor's report voluntarily.

### A. Brokers and Dealers

Pursuant to Exchange Act Rule 17a-5, brokers and dealers are generally required to file annual reports with the SEC and other regulators. The annual reports include, among other things, a financial report, either a compliance report or exemption report, and reports by the auditor covering the financial report and the compliance report or exemption report. The annual reports are public, except that if the statement of financial condition in the financial report is bound separately from the balance of the annual report, the balance of the annual report is deemed confidential and nonpublic.[194] In this situation, the auditor would generally issue two separate auditor's reports that would have different content: (1) an auditor's report on the statement of financial condition that would be available to the public and (2) an auditor's report on the complete financial report that, except as provided in paragraph (c)(2)(iv) of Exchange Act Rule 17a-5, would be confidential and not available to the public.[195] Research by the

---

[193] The other requirements of the reproposed standard would be applicable to audits of these types of entities.

[194] *See* Exchange Act Rule 17a-5(e), 17 CFR 240.17a-5(e).

[195] *See also* Exchange Act Rule 17a-5(c)(2), 17 CFR 240.17a-5(c)(2), regarding audited statements required to be provided to customers.

PCAOB's Office of Research and Analysis ("ORA")[196] indicates that, for approximately half of brokers and dealers, the complete financial report and the related auditor's report are confidential and not available to the public.

The SEC adopted new rules for brokers and dealers[197] and the Board adopted new standards most recently in 2013, after the issuance of the 2013 proposal. The Board's new standards enhanced the auditor's performance and reporting responsibilities for financial statement audits, as well as engagements on compliance and exemption reports of brokers and dealers.[198]

Research by ORA indicates that currently there are no brokers or dealers that are issuers. Rather, brokers and dealers are often owned by an individual or entity that holds a controlling interest. The owners of brokers and dealers are generally part of the management of the entity and therefore would have direct access to the auditor. Given that there is much less separation of ownership and control in non-issuer brokers and dealers, the communication of critical audit matters would provide little information about the audit that would otherwise be unobtainable by investors. Additionally, other financial statement users, such as counterparties or regulatory agencies, are in a position to obtain needed information from the brokers and dealers, suggesting that the communication of critical audit matters may be less beneficial for them.

However, there may be circumstances in which other financial statement users may benefit from reduced information asymmetry about the audits of brokers and dealers. But certain aspects of broker and dealer financial reporting may limit the benefits of requiring the communication of critical audit matters. For example, while other financial statement users, such as customers of brokers and dealers, may benefit from increased information about the audit, the ability for brokers and dealers to confidentially file certain financial statements and schedules would require the auditor to

[196] ORA's research was conducted on brokers and dealers who filed financial statements through May 15, 2015, for fiscal years ended during 2014 that included audit reports issued by firms registered with the PCAOB.

[197] *See SEC*, *Broker-Dealer Reports,* Exchange Act Release No. 70073 (July 30, 2013), 78 FR 51910 (Aug. 21, 2013).

[198] *See Attestation Standards for Engagements Related to Broker and Dealer Compliance or Exemption Reports Required by the U.S. Securities and Exchange Commission and Related Amendments to PCAOB Standards*, PCAOB Release No. 2013-007 (Oct. 10, 2013) and *Auditing Standard on Auditing Supplemental Information Accompanying Audited Financial Statements and Related Amendments to PCAOB Standards*, PCAOB Release No. 2013-008 (Oct. 10, 2013).

identify and communicate critical audit matters that apply only to the publicly available statement of financial condition. This would impose additional costs on the auditors of brokers and dealers relative to the auditors of other types of companies, as they would have to identify critical audit matters that apply exclusively to the publicly available financial information. Moreover, customers of brokers and dealers may be interested in the overall financial position of the broker or dealer and may not benefit from audit-specific information in the same way as investors in an operating company.

Some commenters on the 2013 proposal asserted that the value of reporting critical audit matters for brokers and dealers would be significantly limited by: (1) the closely held nature of brokers and dealers; (2) the limited number of users of their financial statements; and (3) the fact that, in many cases, only the statement of financial condition is available publicly. Some commenters also recognized that both the SEC and PCAOB recently updated their rules to further enhance reporting by brokers and dealers and their auditors.

After consideration of the ownership and reporting characteristics of brokers and dealers, the comments received, and the Board's recent standard-setting activities related to brokers and dealers, the Board does not believe that reporting of critical audit matters for brokers and dealers would provide meaningful information in the same way as for issuers. Therefore, the communication of critical audit matters would not be required for audits of brokers and dealers reporting under Exchange Act Rule 17a-5. If a broker or dealer were an issuer required to file audited financial statements under Section 13 or 15(d) of the Exchange Act, the requirements would apply.

## B. Investment Companies

The Investment Company Act generally defines an investment company as any issuer that is engaged primarily in the business of investing, reinvesting, or trading in securities.[199] Most investment companies registered under the Investment Company Act are required to file with the SEC annual reports on Form N-CSR containing audited financial statements.[200] The Investment Company Act includes specific requirements for investment companies, intended to reduce investors' risks, in areas such as an investment company's portfolio diversification, liquidity, leverage, and custody of securities.[201]

---

[199] *See* Section 3(a)(1) of the Investment Company Act.

[200] *See* SEC Rules under Section 30(e) of the Investment Company Act.

[201] *See, e.g.,* Sections 12, 13, and 17 of the Investment Company Act.

In an SEC rulemaking, the SEC observed that commenters believed the key information that investors use in deciding to invest in an investment company includes an investment company's investment objectives, strategies, risks, costs, and performance.[202] The disclosure of information about these items appears in the annual prospectus that investment companies provide to current and future investors.[203] Changes to investment objectives and strategies require shareholder approval or disclosure.[204]

Several commenters on the 2013 proposal noted that an investor's decision to invest in an investment company is primarily based on the investment objectives, risks, performance, and fees, and critical audit matters are not expected to provide information about these items and therefore would not be relevant. Several commenters generally stated that investment companies are designed for the sole purpose of trading in and holding investments and auditor judgment would arise primarily with respect to valuation of investments, which would tend to be repeated as a critical audit matter. A commenter noted that, since the strategies of investment companies do not change significantly over time, the critical audit matters identified could become standardized from one reporting period to the next and also across funds with similar objectives.

Business development companies ("BDCs"), which are a type of investment company, differ from other investment companies in several important ways.[205] Other investment companies generally invest at least 85 percent of their assets in liquid investments, such as securities of public companies listed on a national securities exchange. BDCs, by contrast, are required to hold at least 70 percent of their assets in investments such as securities purchased in transactions not involving any public offering and eligible portfolio companies, e.g., private companies or small public companies that have no liquid securities.[206] As a result, BDCs' portfolios primarily

---

[202] *See* SEC, *Enhanced Disclosure and New Prospectus Delivery Option for Registered Open-End Management Investment Companies*, Securities Act Release No. 8998, 74 FR 4546 (Jan. 26, 2009). *See also* Investment Company Institute, *Understanding Investor Preferences for Mutual Fund Information* (Aug. 2006), at 2–3.

[203] *See* SEC Rules under Section 30(e) of the Investment Company Act.

[204] *See* Sections 8(b) and 13(a)(3) of the Investment Company Act and Investment Company Act Rule 8b-16.

[205] BDCs make an election to be regulated under sections 55 through 65 of the Investment Company Act. *See* Section 54 of the Investment Company Act.

[206] *See* Sections 2(a)(46), 2(a)(48), and 55(a) of the Investment Company Act.

consist of securities that are highly illiquid, are often subject to sale restrictions, and are typically valued using unobservable inputs and valuation models.

Also, unlike other investment companies, BDCs are required to offer significant managerial assistance and can offer equity and loan financing to the companies they invest in.[207] BDCs are also able to use more leverage in their operations and issue types of debt and equity securities generally not issued by other investment companies.[208] Finally, BDCs are subject to registration and periodic reporting requirements under the Exchange Act, file their annual reports on Form 10-K,[209] and can qualify as emerging growth companies.[210] The Board did not receive any comments specific to BDCs.

Even though the disclosures required under the Investment Company Act and other federal securities laws provide investors with useful information, they may not fully substitute for the communication of critical audit matters. The required communication of critical audit matters contemplates that auditors would provide investors with audit-specific information, which is unlikely to appear in the disclosures provided by management. In addition, some academic research documented a difference in the perceived usefulness and reliability of information depending on the location of the disclosure and whether it was disclosed by management or by the independent auditor.[211] This academic research suggests that the auditor's communication of information similar to critical audit matters may provide value to investors because it comes from the auditor, even if the same information is disclosed by management in the experimental design of the study.

The benefits of providing critical audit matters, however, may be smaller for investment companies, other than BDCs, relative to other types of companies because

---

[207] *See* Section 2(a)(47) of the Investment Company Act.

[208] *See* Section 61 of the Investment Company Act.

[209] *See* Section 54 of the Investment Company Act.

[210] Under SEC staff interpretation, BDCs can qualify as emerging growth companies. *See* Division of Corporation Finance, *Jumpstart Our Business Startups Act Frequently Asked Questions*, Q. 21. Other investment companies cannot qualify as emerging growth companies. *See* Division of Corporation Finance, *Jumpstart Our Business Startups Act Frequently Asked Questions*, Q. 20.

[211] *See, e.g.*, Christensen et al., *Do Critical Audit Matter Paragraphs in the Audit Report Change Nonprofessional Investors' Decision to Invest?*

of their purpose and structure. Unlike companies whose business models can change over time, investment companies have specific investment mandates that are disclosed in the prospectus and rarely change. This creates the potential for critical audit matters of investment companies to become excessively repetitive, making them uninformative.

There may also be additional costs of applying critical audit matter requirements to audits of investment companies, other than BDCs, as compared to audits of other types of companies. For example, in some cases, annual shareholder reports of affiliated investment companies with the same fiscal year-end might be filed with the SEC in one document, which generally contains a single auditor's report that covers multiple audited investment companies. In these situations, communicating critical audit matters specific to each investment company may require the auditor to prepare separate auditor's reports. This could increase costs for these types of investment companies.

After consideration of the purpose and reporting characteristics of investment companies and the comments received, the communication of critical audit matters would not be required for audits of most investment companies. The requirements would apply, however, to investment companies regulated as BDCs.[212] Unlike the audits of many other investment companies, auditing the valuation of BDCs' investments would generally involve complexity and auditor judgments due to the nature of the BDCs' portfolios. Also, because of the more diverse operations of BDCs, such as providing managerial assistance and involvement with more complex debt and equity instruments than other investment companies, communication of critical audit matters in a BDC audit could be more informative to investors. Additionally, BDCs follow a reporting regime under the Exchange Act that is more closely aligned with that of companies to which the Board is applying the requirements for critical audit matters. For these reasons, the Board believes it would be appropriate for audits of BDCs to be subject to critical audit matter requirements.

## C. Benefit Plans

Benefit plans that purchase and hold securities of the plan sponsor using participants' contributions are generally required to file with the SEC an annual report on Form 11-K[213] that includes the benefit plan's audited financial statements and the

---

[212] *See* Section 54 of the Investment Company Act.

[213] *See* Section 15(d) of the Exchange Act.

related auditor's report.[214] The audit of the financial statements included in a filing on Form 11-K is performed in accordance with the standards of the PCAOB. Benefit plans are also generally subject to the financial reporting requirements of the Employee Retirement Income Security Act of 1974 ("ERISA"), including the U.S. Department of Labor's ("DOL") rules and regulations for disclosure under ERISA.[215]

Participation in a benefit plan is limited to eligible employees of the plan sponsor. Each plan participant in a defined contribution benefit plan is responsible for selecting, from the investment options made available by the plan sponsor, the specific investments in which the participant's funds are invested.

Employee stock benefit plans are generally less complex than other types of companies because they are designed for the sole purpose of holding the plan's investments for the participants' benefit. A plan's financial statements reflect summary information about the plan's assets and liabilities by aggregating the balances of all plan participants. However, only the individual account statements that plan participants receive periodically provide information specific to each participant's investments.

Several commenters suggested excluding audits of benefit plans from the requirement for reporting critical audit matters due to the unique characteristics of these entities and their differences from other types of companies. For example, some commenters indicated that benefit plans are designed for a specific purpose and, as a result, would likely have similar critical audit matters from one reporting period to the next. Other commenters noted that benefit plans are inherently less complex and entail fewer estimates and judgments.

The communication of critical audit matters could provide information about any complex issues that were identified during the audit and how the auditor addressed them. However, since a benefit plan's assets and liabilities aggregate the balances of all plan participants, the financial statements or related critical audit matters would not provide actionable information about a plan participant's specific investment. Further, given the nature of benefit plans, there is a chance that the same critical audit matters

---

[214] A benefit plan's audited financial statements may also be included as part of the annual report of the issuer sponsoring the benefit plan. *See* SEC Rule 15d-21, CFR 240.15d-21.

[215] *See* FASB ASC 960-10-05-6. Benefit plans subject to ERISA also file with the DOL an annual report on Form 5500, including audited financial statements and an auditor's report. Pursuant to DOL requirements, the audit of the financial statements is performed under auditing standards generally accepted in the United States, that is, not under PCAOB standards.

would be communicated each year. For example, the valuation of investments is likely to be the most complex area in the audit of a benefit plan and therefore may be a critical audit matter in each reporting period, making the information less useful.

After consideration of the structure and reporting characteristics of benefit plans and the comments received, the communication of critical audit matters would not be required for audits of benefit plans.

*Requirements of Other Regulators and Standard Setters*

Under the IAASB's standard, the communication of key audit matters applies to listed entities.[216] The EU requirements apply to audits of PIEs, including listed companies, credit institutions, and insurance companies.[217] The FRC 2013 requirements apply to auditor's reports for entities that apply the UK Corporate Governance Code.[218]

*Questions*:

37. Is it appropriate for the communication of critical audit matters not to be required for the audits of brokers and dealers reporting under Exchange Act Rule 17a-5, investment companies other than BDCs, and benefit plans? Why or why not?

38. For these specific types of entities, are there situations in which critical audit matters would be useful to investors? If so, what are these situations?

39. While not requiring communication of critical audit matters in the audits of these specific entities, should the Board encourage voluntary communication? Why or why not?

---

[216] *See* paragraph 5 of ISA 701.

[217] *See* requirements in 1 of Article 2, *Audit Report* of Regulation (EU) No 537/2014.

[218] These include companies with a premium listing of equity shares on the London Stock Exchange regardless of whether they are incorporated in the U.K. or elsewhere.

40. Should the requirements related to critical audit matters not apply to the audits of other types of companies, such as shell companies?[219] Why or why not?

## VIII. Considerations for Audits of Emerging Growth Companies

Section 104 of the Jumpstart Our Business Startups ("JOBS") Act imposes certain limitations with respect to application of the Board's standards to audits of emerging growth companies ("EGCs"), as defined in Section 3(a)(80) of the Exchange Act. Section 104 provides that "[a]ny rules of the Board requiring . . . a supplement to the auditor's report in which the auditor would be required to provide additional information about the audit and the financial statements of the issuer (auditor discussion and analysis) shall not apply to an audit of an emerging growth company . . ."[220] In addition, Section 104 further provides that any other rules adopted by the Board subsequent to April 5, 2012, do not apply to the audits of EGCs unless the SEC "determines that the application of such additional requirements is necessary or appropriate in the public interest, after considering the protection of investors, and whether the action will promote efficiency, competition, and capital formation."[221] As a result of the JOBS Act, the reproposed standard and amendments, if adopted by the Board, would be subject to an evaluation as to whether they could, and if so, should be applicable to the audits of EGCs.

The 2013 proposal solicited comment on the application of the proposed standard to the audits of EGCs. Two commenters suggested that it would violate the JOBS Act provisions regarding AD&A for the Board to apply critical audit matter requirements to the audits of EGCs, on the basis that critical audit matters are

---

[219] A shell company is defined as a company, other than an asset-backed issuer, with no or nominal operations; and either: no or nominal assets; assets consisting of cash and cash equivalents; or assets consisting of any amount of cash and cash equivalents and nominal other assets. *See* Exchange Act Rule 12b-2.

[220] *See* Pub. L. No. 112-106 (Apr. 5, 2012). *See* Section 103(a)(3)(C) of Sarbanes-Oxley, (15 U.S.C. 7213(a)(3)), as added by Section 104 of the JOBS Act. An auditor's discussion and analysis ("AD&A") does not exist in auditing standards but was described as one of several conceptual alternatives for changing the auditor's reporting model in the 2011 concept release. Section IV.A., *Auditor's Discussion and Analysis,* of the 2013 proposal described an AD&A and related comments received on the concept release.

[221] *Id*.

"substantially similar"[222] or "appear substantively similar"[223] to AD&A. One of these commenters further asserted that applying the critical audit matters standard to audits of all issuers, regardless of EGC status, would violate the spirit of the "IPO On-Ramp" embedded in the JOBS Act by applying a one-size-fits all compliance burden, with potentially significant costs, to smaller issuers.

Other commenters, including accounting firms that commented on this issue, asserted that the proposed standard should apply to audits of EGCs. Some of these commenters argued that EGCs exhibit characteristics similar to other public companies and that financial statement users would benefit from similar auditor reporting requirements. Some commenters asserted that the proposed standard should be applicable to EGCs on a deferred basis, after its implementation by larger companies has been evaluated for effectiveness.

Academic research suggests that EGCs may have a higher degree of information asymmetry relative to the broader population of issuers. Although the degree of information asymmetry surrounding a particular issuer is unobservable, researchers have developed a number of proxies that are thought to be correlated with information asymmetry, including small issuer size, lower analyst coverage, larger insider holdings, and higher research and development costs.[224] The extent to which EGCs can be characterized as exhibiting one or more of these properties may suggest that they have a greater degree of information asymmetry relative to the broader population of issuers. As a result, the benefits of reducing the degree of information asymmetry about audit and financial reporting quality may be incrementally larger for EGCs relative to the broader population of operating companies. For example, in a UK study using analyst following as a proxy for a company's information environment, the authors found that

---

[222] *See* letter from the Biotechnology Industry Organization (Dec. 9, 2013), at 2.

[223] *See* letter from the U.S. Chamber of Commerce, Center for Capital Markets Competitiveness (Dec. 9, 2013), at 4.

[224] *See*, *e.g.*, David Aboody, and Baruch Lev, *Information Asymmetry, R&D, and Insider Gains*, 55 The Journal of Finance 2747, 2747-2766 (2000), and Michael J. Brennan and Avanidhar Subrahmanyam, *Investment Analysis and Price Formation in Securities Markets*, 38 Journal of Financial Economics 361, 361-381 (1995), and Varadarajan V. Chari, Ravi Jagannathan, and Aharon R. Ofer, *Seasonalities in Security Returns: The Case of Earnings Announcements*, 21 Journal of Financial Economics 101, 101-121 (1988), and Raymond Chiang, and P. C. Venkatesh, *Insider Holdings and Perceptions of Information Asymmetry: A note*, 43 The Journal of Finance 1041, 1041-1048 (1988).

companies with low analyst following experienced a statistically significant increase in abnormal trading volume following the implementation of the enhanced audit reporting requirements. The authors of the study argued that enhanced audit reporting produced greater benefits for companies with weaker information environments.

The data on EGCs outlined in Appendix 3, *Characteristics of Self-Identified EGCs*, remains generally consistent with the data discussed in the 2013 proposal, although the number of EGCs has more than doubled since 2013. A majority of EGCs continue to be smaller public companies that are generally new to the SEC reporting process. This suggests that there is less information available to investors regarding such companies (a higher degree of information asymmetry) relative to the broader population of public companies because, in general, investors are less informed about companies that are smaller and newer. For example, smaller companies have very little, if any, analyst coverage which reduces the amount of information made available to financial statement users and therefore makes markets less efficient.[225]

If the reproposed standard does not apply to audits of EGCs but is applicable to audits of larger and more established companies, there could be potential disparity between the two groups of companies in the amount and quality of public information available for investment decision making. Excluding EGCs from the reproposed standard could cause investors to perceive additional risk and uncertainty with EGCs, which could put EGCs at a competitive disadvantage compared to non-EGCs in attracting available capital.

The Board must also take into account the potential costs of applying critical audit matter requirements to EGCs. A detailed discussion of the potential costs, including unintended consequences, of critical audit matter requirements appears in Section VI. It should be noted that because EGCs tend to be smaller than the broader population of operating companies, the costs of compliance could affect EGCs disproportionately.

At this time, no determination has been made about the applicability of the reproposed standard and amendments to the audits of EGCs; such a determination would be made at adoption, based on the provisions of the final auditing standard and related amendments. If all or part of the standard and amendments were not to apply to the audits of EGCs, this determination would not preclude auditors of EGCs from applying such provisions voluntarily.

---

[225] *See* SEC, *Final Report of the Advisory Committee on Smaller Public Companies to the U.S. Securities and Exchange Commission*, (Apr. 23, 2006), at 73.

*Questions*:

41. Should the reproposed requirement regarding communication of critical audit matters be applicable for the audits of EGCs? Should the other elements of the reproposed standard and amendments be applicable for the audits of EGCs? Should the reproposed requirements be modified to make their application to EGCs more appropriate? Would excluding audits of EGCs benefit or harm EGCs or their investors? Why or why not?

42. If the Board determines not to apply all or part of the reproposed standard and amendments to the audits of EGCs, would there be any unintended consequences if auditors complied voluntarily? If so, what are they?

43. Are there any other benefits, costs or considerations related to promoting efficiency, competition, and capital formation that the Board should take into account with respect to applying the reproposed standard to audits of EGCs?

## IX. <u>Considerations Related to Effective Date</u>

The 2013 proposal sought comment on whether any special consideration should be given to a delayed compliance date for the proposed standard, such as for the audits of smaller companies. Some commenters stated that the Board should consider delaying effectiveness for audits of smaller companies, including smaller reporting companies and nonaccelerated filers.

The Board continues to seek comment on the effective date related to the reproposed standard and amendments. The Board's final decision on the effective date would take into account the nature and extent of comments received on the reproposal and the timing of Board adoption of any final standard and amendments, subject to approval by the SEC.

*Question*:

44. If the reproposed standard is adopted by the Board and approved by the SEC, how much time would auditors need to implement it? Should the Board consider a delayed compliance date for the reproposed standard, or for certain parts of the reproposed standard, for audits of smaller companies? If so, what criterion should the Board use to classify companies, for example smaller reporting companies? Are there criteria other than the size of the company that the Board should consider for a delayed compliance date?

## X. Opportunity for Public Comment

The Board is seeking comment on all aspects of the reproposed standard and amendments as well as on the specific questions included in this reproposal. Among other things, the Board is seeking comment on economic considerations relating to the reproposed standard and amendments, including potential costs. To assist the Board in evaluating such matters, the Board is requesting relevant information and empirical data, to the extent available to commenters, regarding the reproposed standard and amendments. Commenters providing cost estimates are requested to provide the basis for their estimates.

Studies, memoranda, or other substantive items may be added by the Board or staff to Docket 034 during this rulemaking. A notification of the inclusion in the comment file of any such materials will be made available on the Board's website. To ensure direct electronic receipt of such notifications via email, subscribe to PCAOB updates at http://pcaobus.org/About/Pages/PCAOBUpdates.aspx.

Written comments should be sent to the Office of the Secretary, PCAOB, 1666 K Street, NW, Washington, DC 20006-2803. Comments also may be submitted by email to comments@pcaobus.org or through the Board's website at: www.pcaobus.org. All comments should refer to the PCAOB Rulemaking Docket No. 034 on the subject or reference line and should be received by the Board by August 15, 2016.

The Board will consider all comments received. After the close of the comment period, the Board will determine whether to adopt final rules, with or without changes from the reproposal. Any final rules adopted will be submitted to the SEC for approval. Pursuant to Section 107 of Sarbanes-Oxley, proposed rules of the Board do not take effect unless approved by the SEC. Standards are rules of the Board under Sarbanes-Oxley.

* * *

On the 11th day of May, in the year 2016, the foregoing was, in accordance with the bylaws of the Public Company Accounting Oversight Board,

ADOPTED BY THE BOARD.

/s/ Phoebe W. Brown

Phoebe W. Brown
Secretary

PCAOB
Public Company Accounting Oversight Board

## APPENDIX 1

[Paragraph .10 and paragraphs .20 through .76 of AS 3101 (currently AU sec. 508),[1] *Reports on Audited Financial Statements*, are proposed to be redesignated as AS 3105, *Departures from Unqualified Opinions and Other Reporting Circumstances.* AS 3101 is proposed to be retitled and the remaining paragraphs are amended as follows:]

## Proposed AS 3101*, The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*

## *Introduction*

.01 The auditor's report contains either an expression of opinion on the financial statements,[2] taken as a whole,[3] or an assertion that an opinion cannot be expressed. This standard establishes requirements regarding the content of the auditor's written report when the auditor expresses an unqualified opinion on the financial statements (the "auditor's unqualified report").[4]

.02 The auditor is in a position to express an unqualified opinion on the financial statements when the auditor conducted an audit in accordance with the standards of the Public Company Accounting Oversight Board ("PCAOB") and

---

[1] Parenthetical citations to current auditing standards of the PCAOB are provided for reference purposes and would not appear in the final standard.

[2] This standard uses the term "financial statements" as used by the U.S. Securities and Exchange Commission ("SEC") to include all notes to the statements and all related schedules. *See* SEC Rule 1-01(b) of Regulation S-X, 17 CFR 210.1-01(b). This and other PCAOB standards often refer to the notes as disclosures; *see*, *e.g.*, AS 2110 (currently Auditing Standard No. 12), *Identifying and Assessing Risks of Material Misstatement*.

[3] "Taken as a whole" applies equally to a complete set of financial statements and to an individual financial statement with appropriate disclosures.

[4] Paragraphs .85-.98 and Appendix C, *Special Reporting Situations*, of AS 2201 (currently Auditing Standard No. 5), *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, address the form and content of the auditor's report when the auditor performs an audit of internal control over financial reporting.

concludes that the financial statements, taken as a whole, are presented fairly, in all material respects,[5] in conformity with the applicable financial reporting framework.[6]

.03 When the auditor conducts an audit of financial statements in accordance with the standards of the PCAOB, some circumstances require that the auditor express a qualified opinion, adverse opinion, or disclaimer of opinion on the financial statements and state the reasons for the departure from the unqualified opinion. AS 3105, *Departures from Unqualified Opinions and Other Reporting Circumstances* (currently AU sec. 508, *Reports on Audited Financial Statements*), describes reporting requirements related to departures from unqualified opinions and other reporting circumstances.

## *Objectives*

.04 The objectives of the auditor when the auditor concludes that an unqualified opinion is appropriate are to:

a. Issue a written report that expresses an unqualified opinion on the financial statements and describes the basis for that opinion; and

b. Communicate in the auditor's unqualified report **critical audit matters,**[7] relating to the audit of the financial statements or state that the auditor determined that there are no critical audit matters.

---

[5] AS 2815, *The Meaning of "Present Fairly in Conformity with Generally Accepted Accounting Principles"* (currently AU sec. 411, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles*), describes the basis for an auditor's responsibility for forming an opinion on whether the company's financial statements are presented fairly in conformity with the applicable financial reporting framework.

[6] The auditor should look to the requirements of the SEC for the company under audit with respect to the accounting principles applicable to that company.

[7] This term is defined in Appendix A, *Definitions*, and is set in **boldface type** the first time it appears.

PCAOB
Public Company Accounting Oversight Board

### *The Auditor's Unqualified Report*

.05 The auditor's unqualified report includes:[8]

a. The basic elements,[9] as described in paragraphs .06-.10;

b. Communication regarding critical audit matters relating to the audit of the current period's financial statements, as described in paragraphs .11-.17, unless such requirements do not apply;

Note: Communication of critical audit matters is not required for audits of (1) brokers[10] and dealers[11] reporting under Exchange Act Rule 17a-5; (2) investment companies registered under the Investment Company Act of 1940 ("Investment Company Act");[12] other than companies that have elected to be regulated as business development companies;[13] and (3) employee stock purchase, savings, and similar plans.[14]

c. Other explanatory language (or an explanatory paragraph), as appropriate in the circumstances, as described in paragraphs .18-.19; and

---

8 Appendix B provides an illustrative auditor's unqualified report.

9 Laws, rules, and forms may contain requirements for auditor's reports of different types of companies. *See*, *e.g.,* Sections 30(g) and 32(a)(4) of the Investment Company Act; Rule 2-02 of Regulation S-X, 17 CFR 210.2-02; and Securities Exchange Act of 1934 ("Exchange Act") Rule 17a-5, 17 CFR 240.17a-5. Auditor's reports on financial statements filed with the SEC are subject to all such applicable requirements.

10 *See* PCAOB Rule 1001(b)(iii).

11 *See* PCAOB Rule 1001(d)(iii).

12 *See* Section 8 of the Investment Company Act.

13 *See* Section 54 of the Investment Company Act.

14 *See* Exchange Act Rule 15d-21, 17 CFR 240.15d-21.

d. Information about certain audit participants, if the auditor decides to provide this information in the auditor's report, as described in paragraph .20.

## Basic Elements

*Title*

.06 The auditor's report must include the title, "Report of Independent Registered Public Accounting Firm."

*Addressee*

.07 The auditor's report must be addressed to the shareholders and the board of directors, or equivalents for companies not organized as corporations. The auditor's report may include additional addressees.

*Opinion on the Financial Statements*

.08 The first section of the auditor's report must include the section title "Opinion on the Financial Statements" and the following elements:

a. The name of the company whose financial statements were audited;

b. A statement identifying each financial statement and any related schedule(s) that has been audited;[15]

c. The date of, or period covered by, each financial statement and related schedule, if applicable, identified in the report;

d. A statement indicating that the financial statements, including the related notes and any related schedule(s), identified and

---

[15] Various SEC rules and forms require that companies file schedules of information and that those schedules be audited if the company's financial statements are audited. *See*, *e.g.,* Rules 5-04, 6-10, 6A-05, and 7-05 of Regulation S-X, 17 CFR 210.5-04, 210.6-10, 210.6A-05, 210.7-05. *See generally*, Rule 12-01 of Regulation S-X, 17 CFR 210.12-01, et seq., which address the form and content of certain SEC-required schedules.

PCAOB
Public Company Accounting Oversight Board

collectively referred to in the report as the financial statements, were audited; and

e. An opinion that the financial statements present fairly, in all material respects, the financial position of the company as of the balance sheet date and the results of its operations and its cash flows for the period then ended in conformity with the applicable financial reporting framework.[16] The opinion should also include an identification of the applicable financial reporting framework.

*Basis for Opinion*

.09 The second section of the auditor's report must include the section title "Basis for Opinion" and the following elements:

a. A statement that the financial statements are the responsibility of the company's management;

b. A statement that the auditor's responsibility is to express an opinion on the financial statements based on the audit;

c. A statement that the audit was conducted in accordance with the standards of the PCAOB;

d. A statement that PCAOB standards require that the auditor plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud;

e. A statement that an audit includes:

(1) Performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks;

---

[16] The terms used in the Opinion on the Financial Statements section, such as financial position, results of operations and cash flows, should be modified, as appropriate, depending on the type of company and financial statements being audited.

PCAOB
Public Company Accounting Oversight Board

(2) Examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements;

(3) Evaluating the accounting principles used and significant estimates made by management; and

(4) Evaluating the overall presentation of the financial statements;

f. A statement that the auditor believes that the audit provides a reasonable basis for the auditor's opinion; and

g. A statement that the auditor is a public accounting firm registered with the PCAOB (United States) and is required to be independent with respect to the company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the SEC and the PCAOB.

*Signature, Tenure, Location, and Date*

.10 The auditor's report must include the following elements:

a. The signature of the auditor's firm;[17]

b. A statement containing the year the auditor began serving consecutively as the company's auditor;[18]

Note: For purposes of this subparagraph, references to the auditor include other firms that the auditor's firm has acquired or that have merged with the auditor's firm. If there is uncertainty as to the year the auditor began serving consecutively as the company's auditor, such as due to firm or company mergers, acquisitions, or changes in ownership

---

[17] *See* Rule 2-02(a) of Regulation S-X, 17 CFR 210.2-02(a).

[18] For an investment company that is part of a group of investment companies, the statement contains the year the auditor began serving consecutively as the auditor of any investment company in the group of investment companies. *See* Section 12(d)(1)(G)(ii) of the Investment Company Act.

structure, the auditor should state that the auditor is uncertain as to the year the auditor became the company's auditor and provide the earliest year of which the auditor has knowledge.

c. The city and state (or city and country, in the case of non-U.S. auditors) from which the auditor's report has been issued;[19] and

d. The date of the auditor's report.[20]

## Critical Audit Matters

*Determination of Critical Audit Matters*

.11 The auditor must determine whether there are any critical audit matters in the audit of the current period's financial statements. A critical audit matter is any matter arising from the audit of the financial statements that was communicated or required to be communicated to the audit committee and that: (1) relates to accounts or disclosures that are material to the financial statements and (2) involved especially challenging, subjective, or complex auditor judgment. Critical audit matters are not a substitute for the auditor's departure from an unqualified opinion (i.e., a qualified opinion, adverse opinion, or disclaimer of opinion on the financial statements as described in AS 3105).

.12 In determining whether a matter involved especially challenging, subjective, or complex auditor judgment, the auditor should take into account, alone or in combination, the following factors, as well as other factors specific to the audit:

a. The auditor's assessment of the risks of material misstatement, including significant risks;

b. The degree of auditor subjectivity in determining or applying audit procedures to address the matter or in evaluating the results of those procedures;

---

[19] *See* Regulation S-X Rule 2-02(a).

[20] *See* AS 3110 (currently AU sec. 530), *Dating of the Independent Auditor's Report*.

c. The nature and extent of audit effort required to address the matter, including the extent of specialized skill or knowledge needed or the nature of consultations outside the engagement team regarding the matter;

d. The degree of auditor judgment related to areas in the financial statements that involved the application of significant judgment or estimation by management, including estimates with significant measurement uncertainty;

e. The nature and timing of significant unusual transactions and the extent of audit effort and judgment related to these transactions; and

f. The nature of audit evidence obtained regarding the matter.

Note: It is expected that, in most audits, the auditor would determine that at least one matter involved especially challenging, subjective, or complex auditor judgment.

*Communication of Critical Audit Matters*

.13 The auditor must communicate in the auditor's report critical audit matters[21] relating to the audit of the current period's financial statements or state that the auditor determined that there are no critical audit matters.

Note: When the current period's financial statements are presented on a comparative basis with those of one or more prior periods, the auditor may communicate critical audit matters relating to a prior period when (1) the prior period's financial statements are made public for the first time, such as in an initial public offering, or (2)

---

[21] Critical audit matters are not a substitute for required explanatory language (paragraphs) described in paragraph .18. If a matter that meets the definition of a critical audit matter also requires an explanatory paragraph, such as a matter related to going concern, the auditor may include the information required under paragraph .14 in the explanatory paragraph with a cross-reference in the critical audit matters section of the auditor's report to the explanatory paragraph. Alternatively, the auditor may include the explanatory paragraph and critical audit matter communication separately in the auditor's report and add a cross-reference between the two sections.

issuing an auditor's report on the prior period's financial statements because the previously issued auditor's report could no longer be relied upon.

.14 For each critical audit matter communicated in the auditor's report the auditor must:

a. Identify the critical audit matter;

b. Describe the principal considerations that led the auditor to determine that the matter is a critical audit matter;

c. Describe how the critical audit matter was addressed in the audit; and

d. Refer to the relevant financial statement accounts and disclosures that relate to the critical audit matter.

Note 1: Language that could be viewed as disclaiming, qualifying, restricting, or minimizing the auditor's responsibility for the critical audit matters or the auditor's opinion on the financial statements is not appropriate and may not be used. The language used to communicate a critical audit matter should not imply that the auditor is providing a separate opinion on the critical audit matter or on the accounts or disclosures to which they relate.

Note 2: When describing critical audit matters in the auditor's report the auditor is not expected to provide information about the company that has not been made publicly available by the company unless such information is necessary to describe the principal considerations that led the auditor to determine that a matter is a critical audit matter or how the matter was addressed in the audit.

*Language Preceding Critical Audit Matters in the Auditor's Report*

.15 The following language, including the section title "Critical Audit Matters," should precede critical audit matters communicated in the auditor's report:

Critical Audit Matters

The critical audit matters communicated below are matters arising from the current period audit that were communicated or required to be communicated to the audit committee and that: (1) relate to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. Critical audit matters do not alter in any way our opinion on the financial statements, taken as a whole, and we do not provide separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

Note: If the auditor communicates critical audit matters for prior periods, the language preceding the critical audit matters should be modified to indicate the periods to which the critical audit matters relate.

.16 In situations in which the auditor determines that there are no critical audit matters, the auditor should include the following language, including the section title "Critical Audit Matters," in the auditor's report:

Critical Audit Matters

Critical audit matters are matters arising from the current period audit that were communicated or required to be communicated to the audit committee and that: (1) relate to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. We determined that there are no critical audit matters.

*Documentation of Critical Audit Matters*

.17 The auditor must document the basis for the auditor's determination whether each matter that both:

a. Was communicated or required to be communicated to the audit committee; and

b. Relates to accounts or disclosures that are material to the financial statements

involved especially challenging, subjective, or complex auditor judgment.[22]

---

[22] Consistent with the requirements of AS 1215, the audit documentation should be in sufficient detail to enable an experienced auditor, having no previous connection with the engagement, to understand the determinations made to comply with the provisions of this standard.

## Explanatory Language Added to the Auditor's Report

.18 Other standards of the PCAOB require that, in certain circumstances, the auditor include explanatory language (or an explanatory paragraph) in the auditor's report. These circumstances include when:

a. There is substantial doubt about the company's ability to continue as a going concern;[23]

b. The auditor decides to refer to the report of other auditors as the basis, in part, for the auditor's own report;[24]

c. There has been a change between periods in accounting principles or in the method of their application that has a material effect on the financial statements;[25]

d. There has been a change in a reporting entity, unless the change in the reporting entity results from a transaction or event, such as the creation, cessation, or complete or partial purchase or disposition of a subsidiary or other business unit;[26]

e. A material misstatement in previously issued financial statements has been corrected;[27]

---

[23] *See* AS 2415, *Consideration of an Entity's Ability to Continue as a Going Concern* (currently AU sec. 341, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*).

[24] *See* paragraphs .06-.09 of AS 1205, *Part of the Audit Performed by Other Independent Auditors* (currently AU sec. 543, *Part of Audit Performed by Other Independent Auditors).*

[25] *See* paragraphs .08 and .12-.15 of AS 2820 (currently Auditing Standard No. 6), *Evaluating Consistency of Financial Statements,* (as proposed to be amended).

[26] *See* AS 2820.06.

[27] *See* AS 2820.09 and .16-.17 (as proposed to be amended).

PCAOB
Public Company Accounting Oversight Board

f. The auditor performs an integrated audit and issues separate reports on the company's financial statements and internal control over financial reporting;[28]

g. Management is required to report on the company's internal controls over financial reporting but such report is not required to be audited,[29] and the auditor has not been engaged to perform an audit of management's assessment of the effectiveness of the company's internal control over financial reporting;[30]

h. Certain circumstances relating to reports on comparative financial statements exist;[31]

i. Selected quarterly financial data required by Item 302(a) of Regulation S-K is not appropriately presented, has been omitted, or has not been reviewed;[32]

j. Supplementary information required by the applicable financial reporting framework has been omitted, the presentation of such information departs materially from the requirements of the applicable financial reporting framework, the auditor is unable to complete prescribed procedures with respect to such information, or the auditor is unable to remove substantial doubts about whether

---

[28] *See* AS 2201.88. AS 2201 provides additional circumstances in which the auditor includes an explanatory paragraph. If the combined report is issued, AS 2201 notes that the auditor should consider those circumstances as well.

[29] *See* Item 308 of Regulation S-K.

[30] *See* AS 3105.59-.60 (as proposed to be amended).

[31] *See* AS 3105.52-.53 and .56-.58.

[32] *See* paragraph .50 of AS 4105, *Reviews of Interim Financial Information* (currently AU sec. 722, *Interim Financial Information*).

PCAOB
Public Company Accounting Oversight Board

the supplementary information conforms to the requirements of the applicable financial reporting framework;[33]

k. There has been a change in an investee year end that has a material effect on the company's financial statements; and[34]

l. Other information in a document containing audited financial statements is materially inconsistent with information appearing in the financial statements.[35]

## Emphasis of a Matter

.19 The auditor may emphasize a matter regarding the financial statements in the auditor's report ("emphasis paragraph").[36] The following are examples of matters, among others, that might be emphasized in the auditor's report:[37]

a. Significant transactions, including significant transactions with related parties;

b. Unusually important subsequent events, such as a catastrophe that has had, or continues to have, a significant effect on the company's financial position;

---

[33] *See* paragraphs .03 and .08 of AS 2705 (currently AU sec. 558), *Required Supplementary Information*.

[34] *See* paragraph .32 of AS 2503 (currently AU sec. 332), *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities*.

[35] *See* paragraph .04 of AS 2710 (currently AU sec. 550), *Other Information in Documents Containing Audited Financial Statements*.

[36] Emphasis paragraphs are never required and are not a substitute for required critical audit matters described in paragraphs .11-.17.

[37] It is not appropriate for the auditor to use phrases such as "with the foregoing [following] explanation" in the opinion paragraph when an emphasis paragraph is included in the auditor's report.

c. Accounting matters, other than those involving a change or changes in accounting principles, affecting the comparability of the financial statements with those of the preceding period;

d. An uncertainty relating to the future outcome of significant litigation or regulatory actions; and

e. That the entity is a component of a larger business enterprise.

If the auditor adds an emphasis paragraph in the auditor's report, the auditor should use an appropriate section title.

## Information about Certain Audit Participants

.20 The auditor may include in the auditor's report information regarding the engagement partner and/or other accounting firms participating in the audit that is required to be reported on PCAOB Form AP, *Auditor Reporting of Certain Audit Participants*.[38] If the auditor decides to provide information about the engagement partner, other accounting firms participating in the audit, or both, the auditor must disclose the following:

a. *Engagement partner*—the engagement partner's full name as required on Form AP; or

b. *Other accounting firms participating in the audit*:

   i. A statement that the auditor is responsible for the audits or audit procedures performed by the other public accounting firms and has supervised or performed procedures to assume responsibility for their work in accordance with PCAOB standards;

   ii. *Other accounting firms individually contributing 5% or more of total audit hours*—for each firm, (1) the firm's legal name, (2) the city and state (or, if outside the United States, city and country) of headquarters' office, and (3) percentage of

---

[38] If the auditor decides to include information regarding certain audit participants in the auditor's report, the auditor should use an appropriate section title.

total audit hours as a single number or within an appropriate range, as is required to be reported on Form AP; and

iii. *Other accounting firms individually contributing less than 5% of total audit hours*—(1) the number of other accounting firms individually representing less than 5% of total audit hours and (2) the aggregate percentage of total audit hours of such firms as a single number or within an appropriate range, as is required to be reported on Form AP.

## *APPENDIX A – Definition*

A1. For purposes of this standard, the term listed below is defined as follows:

A2. Critical audit matter – Any matter arising from the audit of the financial statements that was communicated or required to be communicated to the audit committee and that: (1) relates to accounts or disclosures that are material to the financial statements and (2) involved especially challenging, subjective, or complex auditor judgment.

> Note: Required audit committee communications are set forth in PCAOB standards, including AS 1301 (currently Auditing Standard No. 16), *Communications with Audit Committees*, and Appendix B of that standard which refers to other PCAOB standards.

PCAOB
Public Company Accounting Oversight Board

## *APPENDIX B – An Illustrative Auditor's Unqualified Report Including Critical Audit Matters*

**[Changes from the current illustrative report are underlined]**

### Report of Independent Registered Public Accounting Firm

To the shareholders and the board of directors of X Company

Opinion on the Financial Statements

We have audited the accompanying balance sheets of X Company (the "Company") as of December 31, 20X2 and 20X1, the related statements of operations, stockholders' equity, and cash flows, for each of the three years in the period ended December 31, 20X2, and the related notes [*and schedules*] (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company *as of* [*at*] December 31, 20X2 and 20X1, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 20X2, in conformity with [*the applicable financial reporting framework*].

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matters [if applicable]

The critical audit matters communicated below are matters arising from the current period audit that were communicated or required to be communicated to the audit committee and that: (1) relate to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. Critical audit matters do not alter in any way our opinion on the financial statements, taken as a whole, and we do not provide separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

[*Include critical audit matters*]

[*Signature*]

We have served as the Company's auditor since [*year*].

[*City and State or Country*]

[*Date*]

# APPENDIX 2

## *Amendments to Other PCAOB Standards Related to the Proposed Standard*

In connection with the proposed standard, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion* (the "reproposed standard"), the Board is proposing amendments to several of its other auditing standards as set out below.[1] Language that would be deleted by the proposed amendments is struck through. Language that would be added is underlined. Language proposed to be moved without being modified, such as changes to the illustrative auditor's report to conform to the required order in the proposed standard, is double underlined.

## Contents

---

[1] Some of these auditing standards, such as AS 3105, may need further updating, which the Board may consider under separate standard-setting projects. If, prior to the conclusion of this rulemaking, the Board has adopted amendments related to other standard-setting projects that affect the amendments reproposed in this release, the Board may make conforming changes to the reproposed standard and amendments. The reproposed amendments would amend specific auditing standards to reflect changes to the auditor's unqualified report.

## I. Proposed Amendments to AS 3105, *Departures from Unqualified Opinions and Other Reporting Circumstances*

~~**AS 3101: Reports on Audited Financial Statements**~~ **AS 3105, *Departures from Unqualified Opinions and Other Reporting Circumstances (currently AU sec. 508, Reports on Audited Financial Statements)*[2]**

## Introduction

~~.01 This section applies to auditors' reports issued in connection with audits[1] of historical financial statements that are intended to present financial position, results of operations, and cash flows in conformity with generally accepted accounting principles. It distinguishes the types of reports, describes the circumstances in which each is appropriate, and provides example reports.~~

~~Note: When performing an integrated audit of financial statements and internal control over financial reporting, the auditor may choose to issue a combined report or separate reports on the company's financial statements and on internal control over financial reporting. Refer to paragraphs .85-.98 of AS 2201, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, and Appendix C, *Special Reporting Situations*, of AS 2201, for direction on reporting on internal control over financial reporting. In addition, *see* AS 2201.86-.88, which includes an illustrative combined audit report.~~

~~[1] An audit, for purposes of this section, is defined as an examination of historical financial statements performed in accordance with the standards of the PCAOB in effect at the time the audit is performed. In some cases, regulatory authorities may have additional requirements applicable to entities under their jurisdiction and auditors of such entities should consider those requirements.~~

~~.02 This section does not apply to unaudited financial statements as described in AS 3320, *Association with Financial Statements*, nor does it apply to reports on incomplete financial information or other special presentations as described in AS 3305, *Special Reports*.~~

---

[2] Parenthetical citations to current auditing standards of the PCAOB are provided for reference purposes and would not appear in the final amendments.

~~.03 Justification for the expression of the auditor's opinion rests on the conformity of his or her audit with the standards of the PCAOB and on the findings. This section is concerned primarily with the relationship of the requirements in paragraph .04 to the language of the auditor's report.~~

~~.04 The report shall either contain an expression of opinion regarding the financial statements, taken as a whole, or an assertion to the effect that an opinion cannot be expressed. When an overall opinion cannot be expressed, the reasons therefor should be stated. In all cases where an auditor's name is associated with financial statements, the report should contain a clear-cut indication of the character of the auditor's work, if any, and the degree of responsibility the auditor is taking.~~

~~.05 The objective of the requirements in paragraph .04 is to prevent misinterpretation of the degree of responsibility the auditor is assuming when his or her name is associated with financial statements. Reference in paragraph .04 to the financial statements "taken as a whole" applies equally to a complete set of financial statements and to an individual financial statement (for example, to a balance sheet) for one or more periods presented. (Paragraph .65 discusses the requirements in paragraph .04 as it applies to comparative financial statements.) The auditor may express an unqualified opinion on one of the financial statements and express a qualified or adverse opinion or disclaim an opinion on another if the circumstances warrant.~~

~~.06 The auditor's report is customarily issued in connection with an entity's basic financial statements—balance sheet, statement of income, statement of retained earnings and statement of cash flows. Each financial statement audited should be specifically identified in the introductory paragraph of the auditor's report. If the basic financial statements include a separate statement of changes in stockholders' equity accounts, it should be identified in the introductory paragraph of the report but need not be reported on separately in the opinion paragraph since such changes are part of the presentation of financial position, results of operations, and cash flows.~~

## ~~The Auditor's Standard Report~~

~~.07 The auditor's standard report states that the financial statements present fairly, in all material respects, an entity's financial position, results of operations, and cash flows in conformity with generally accepted accounting principles. This conclusion may be expressed only when the auditor has formed such an opinion on the basis of an audit performed in accordance with the standards of the PCAOB.~~

~~.08 The auditor's standard report identifies the financial statements audited in an opening (introductory) paragraph, describes the nature of an audit in a scope~~

~~paragraph, and expresses the auditor's opinion in a separate opinion paragraph. The basic elements of the report are the following:~~

~~*a.* A title that includes the word *independent*[3]~~

~~[3] This section does not require a title for an auditor's report if the auditor is not independent. *See* AS 3320 for guidance on reporting when the auditor is not independent.~~

~~*b.* A statement that the financial statements identified in the report were audited~~

~~*c.* A statement that the financial statements are the responsibility of the Company's management[4] and that the auditor's responsibility is to express an opinion on the financial statements based on his or her audit~~

~~[4] In some instances, a document containing the auditor's report may include a statement by management regarding its responsibility for the presentation of the financial statements. Nevertheless, the auditor's report should state that the financial statements are management's responsibility.~~

~~*d.* A statement that the audit was conducted in accordance with the standards of the PCAOB and an identification of the United States of America as the country of origin of those standards (for example, the standards of the Public Company Accounting Oversight Board (United States))~~

~~*e.* A statement that those standards require that the auditor plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement~~

~~*f.* A statement that an audit includes~~

~~(1) Examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements~~
~~(2) Assessing the accounting principles used and significant estimates made by management~~
~~(3) Evaluating the overall financial statement presentation[5]~~

~~[5] Paragraphs .03 and .04 of AS 2815, *The Meaning of "Present Fairly in Conformity with Generally Accepted Accounting Principles,"* discuss the auditor's evaluation of the overall presentation of the financial statements.~~

~~*g.* A statement that the auditor believes that his or her audit provides a reasonable basis for his or her opinion~~

~~*h.* An opinion as to whether the financial statements present fairly, in all material respects, the financial position of the Company as of the balance sheet date and the results of its operations and its cash flows for the period then ended in conformity with generally accepted accounting principles. The opinion should include an identification of the United States of America as the country of origin of those accounting principles (for example, accounting principles generally accepted in the United States of America or U.S. generally accepted accounting principles)~~

~~*i.* The manual or printed signature of the auditor's firm~~

~~*j.* The city and state (or city and country, in the case of non-U.S. auditors) from which the auditor's report has been issued[6A]~~

~~[6A] *See* SEC Rule 2-02(a) of Regulation S-X, 17 C.F.R. § 210.2-02(a).~~

~~*k.* The date[7] of the audit report~~

~~[7] For guidance on dating the auditor's report, *see* AS 3110, *Dating of the Independent Auditor's Report*.~~

~~The form of the auditor's standard report on financial statements covering a single year is as follows:~~

~~Report of Independent Registered Public Accounting Firm~~

~~We have audited the accompanying balance sheet of X Company as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.~~

~~We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as~~

~~evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.~~

~~In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 20XX, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.~~

~~[*Signature*]~~

~~[*City and State or Country*]~~

~~[*Date*]~~

~~The form of the auditor's standard report on comparative financial statements~~[8] ~~is as follows:~~

~~Report of Independent Registered Public Accounting Firm~~

~~We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.~~

~~We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.~~

~~In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.~~

~~[*Signature*]~~

~~[*City and State or Country*]~~

~~[*Date*]~~

~~[8] If statements of income, retained earnings, and cash flows are presented on a comparative basis for one or more prior periods, but the balance sheet(s) as of the end of one (or more) of the prior period(s) is not presented, the phrase "for the years then ended" should be changed to indicate that the auditor's opinion applies to each period for which statements of income, retained earnings, and cash flows are presented, such as "for each of the three years in the period ended [date of latest balance sheet]."~~

~~*l.* When performing an integrated audit of financial statements and internal control over financial reporting, if the auditor issues separate reports on the company's financial statements and on internal control over financial reporting, the following paragraph should be added to the auditor's report on the company's financial statements:~~

> ~~We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of X Company's internal control over financial reporting as of December 31, 20X3, based on [identify control criteria] and our report dated [date of report, which should be the same as the date of the report on the financial statements] expressed [include nature of opinions].~~

~~.09 The report may be addressed to the company whose financial statements are being audited or to its board of directors or stockholders. A report on the financial statements of an unincorporated entity should be addressed as circumstances dictate, for example, to the partners, to the general partner, or to the proprietor. Occasionally, an auditor is retained to audit the financial statements of a company that is not a client; in such a case, the report is customarily addressed to the client and not to the directors or stockholders of the company whose financial statements are being audited.~~

.01~~0~~ The auditor's report contains either an expression of opinion on the financial statements, taken as a whole,[1] or an assertion that an opinion cannot be expressed. This standard ~~section~~ ~~also~~ discusses the circumstances that may require the auditor to depart from the ~~standard~~ auditor's unqualified report[2] and provides reporting guidance in such circumstances. This section is organized by type of opinion that the auditor may express in each of the various circumstances presented~~; this section describes what is meant by the various audit opinions~~:

- ~~*Unqualified opinion*. An unqualified opinion states that the financial statements present fairly, in all material respects, the financial position, results of operations, and cash flows of the entity in conformity with generally accepted accounting principles. This is the opinion expressed in the standard report discussed in paragraph .08.~~

- ~~*Explanatory language added to the auditor's standard report*. Certain circumstances, while not affecting the auditor's unqualified opinion on the financial statements, may require that the auditor add an explanatory paragraph (or other explanatory language) to his or her report.~~

- *Qualified opinion*. A qualified opinion states that, except for the effects of the matter(s) to which the qualification relates, the financial statements present fairly, in all material respects, the financial position, results of operations, and cash flows of the entity in conformity with generally accepted accounting principles. *See* paragraphs .02 -.39.

- *Adverse opinion*. An adverse opinion states that the financial statements do not present fairly the financial position, results of operations, or cash flows of the entity in conformity with generally accepted accounting principles. *See* paragraphs .40 -.43.

- *Disclaimer of opinion.* A disclaimer of opinion states that the auditor does not express an opinion on the financial statements. *See* paragraphs .44 - .47.

~~These opinions are discussed in greater detail throughout the remainder of this section.~~ This standard also discusses other reporting circumstances, such as reports on comparative financial statements.

[1] "Taken as a whole" applies equally to a complete set of financial statements and to an individual financial statement with appropriate disclosures.

[2] AS 3101, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*, establishes requirements for the auditor regarding the content of the auditor's written report when the auditor expresses an unqualified opinion on the financial statements (the "auditor's unqualified report"). Paragraphs .85–.98 of AS 2201 (currently Auditing Standard No. 5), *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, and

Appendix C, *Special Reporting Situations*, of AS 2201 address the form and content of the auditor's report when the auditor performs an audit of internal control over financial reporting. *See also* AS 2201.86–.88, which includes an illustrative combined audit report.

## ~~Explanatory Language Added to the Auditor's Standard Report~~

~~.11 Certain circumstances, while not affecting the auditor's unqualified opinion, may require that the auditor add an explanatory[9] paragraph (or other explanatory language) to the standard report.[10] These circumstances include:~~

~~[9] Unless otherwise required by the provisions of this section, an explanatory paragraph may precede or follow the opinion paragraph in the auditor's report.~~

~~[10] *See* footnote 3.~~

- ~~*a.* The auditor's opinion is based in part on the report of another auditor (paragraphs .12 and .13).~~
- ~~*b.* There is substantial doubt about the entity's ability to continue as a going concern.[11]~~

~~[11] AS 2415, *Consideration of an Entity's Ability to Continue as a Going Concern*, describes the auditor's responsibility to evaluate whether there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time and, when applicable, to consider the adequacy of financial statement disclosure and to include an explanatory paragraph in the report to reflect his or her conclusions.~~

- ~~*c.* There has been a material change between periods in accounting principles or in the method of their application (paragraphs .17A through .17E).~~
- ~~*d.* A material misstatement in previously issued financial statements has been corrected (paragraphs .18A through .18C).~~
- ~~*e.* Certain circumstances relating to reports on comparative financial statements exist (paragraphs .68, .69, and .72 through .74).~~
- ~~*f.* Selected quarterly financial data required by SEC Regulation S-K has been omitted or has not been reviewed. (*See* paragraph .50 of AS 4105, *Reviews of Interim Financial Information*.)~~

~~*g.* Supplementary information required by the Financial Accounting Standards Board (FASB), the Governmental Accounting Standards Board (GASB), or the Federal Accounting Standards Advisory Board (FASAB) has been omitted, the presentation of such information departs materially from FASB, GASB, or FASAB guidelines, the auditor is unable to complete prescribed procedures with respect to such information, or the auditor is unable to remove substantial doubts about whether the supplementary information conforms to FASB, GASB, or FASAB guidelines. (*See* paragraph .02 of AS 2705, *Required Supplementary Information*.)~~

~~*h.* Other information in a document containing audited financial statements is materially inconsistent with information appearing in the financial statements. (*See* paragraph .04 of AS 2710, *Other Information in Documents Containing Audited Financial Statements*.)~~

~~In addition, the auditor may add an explanatory paragraph to emphasize a matter regarding the financial statements (paragraph .19).~~

**~~Opinion Based in Part on Report of Another Auditor~~**

~~.12 When the auditor decides to make reference to the report of another auditor as a basis, in part, for his or her opinion, he or she should disclose this fact in the introductory paragraph of his or her report and should refer to the report of the other auditor in expressing his or her opinion. These references indicate division of responsibility for performance of the audit. (*See* AS 1205, *Part of the Audit Performed by Other Independent Auditors*.)~~

~~.13 An example of a report indicating a division of responsibility follows:~~

~~Report of Independent Registered Public Accounting Firm~~

~~We have audited the consolidated balance sheets of ABC Company and subsidiaries as of December 31, 20X2 and 20X1, and the related consolidated statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits. We did not audit the financial statements of B Company, a wholly-owned subsidiary, which statements reflect total assets of $_______ and $________ as of December 31, 20X2 and 20X1, respectively, and total revenues of $_______ and $_______ for the years then ended. Those~~

> ~~statements were audited by other auditors whose report has been furnished to us, and our opinion, insofar as it relates to the amounts included for B Company, is based solely on the report of the other auditors.~~
>
> ~~We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits and the report of other auditors provide a reasonable basis for our opinion.~~
>
> ~~In our opinion, based on our audits and the report of other auditors, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of ABC Company and subsidiaries as of December 31, 20X2 and 20X1, and the results of their operations and their cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.~~

~~[.14-.15] [Paragraphs deleted.]~~

**~~Lack of Consistency~~**

~~.16 The auditor should recognize the following matters relating to the consistency of the company's financial statements in the auditor's report if those matters have a material effect on the financial statements:~~

- ~~*a.* A change in accounting principle.~~
- ~~*b.* An adjustment to correct a misstatement in previously issued financial statements.~~

**~~Change in Accounting Principle~~**

~~.17A As discussed in AS 2820, *Evaluating Consistency of Financial Statements*, the auditor should evaluate a change in accounting principle to determine whether (1) the newly adopted accounting principle is a generally accepted accounting principle, (2) the method of accounting for the effect of the change is in conformity with generally accepted accounting principles, (3) the disclosures related to the accounting change are~~

~~adequate, and (4) the company has justified that the alternative accounting principle is preferable.[12] A change in accounting principle that has a material effect on the financial statements should be recognized in the auditor's report on the audited financial statements through the addition of an explanatory paragraph following the opinion paragraph. If the auditor concludes that the criteria in this paragraph have been met, the explanatory paragraph in the auditor's report should include identification of the nature of the change and a reference to the note disclosure describing the change.~~

~~[12] The issuance of an accounting pronouncement that requires use of a new accounting principle, interprets an existing principle, expresses a preference for an accounting principle, or rejects a specific principle is sufficient justification for a change in accounting principle, as long as the change in accounting principle is made in accordance with the hierarchy of generally accepted accounting principles. *See* FASB Statement 154, paragraph 14.~~

~~.17B Following is an example of an explanatory paragraph for a change in accounting principle resulting from the adoption of a new accounting pronouncement:~~

> ~~As discussed in Note X to the financial statements, the company has changed its method of accounting for [*describe accounting method change*] in [*year(s) of financial statements that reflect the accounting method change*] due to the adoption of [*name of accounting pronouncement*].~~

~~.17C Following is an example of an explanatory paragraph when the company has made a change in accounting principle other than a change due to the adoption of a new accounting pronouncement:~~

> ~~As discussed in Note X to the financial statements, the company has elected to change its method of accounting for [*describe accounting method change*] in [*year(s) of financial statements that reflect the accounting method change*].~~

~~.17D The explanatory paragraph relating to a change in accounting principle should be included in reports on financial statements in the year of the change and in subsequent years until the new accounting principle is applied in all periods presented. If the accounting change is accounted for by retrospective application to the financial statements of all prior periods presented, the additional paragraph is needed only in the year of the change.~~

~~.17E If the auditor concludes that the criteria in paragraph .17A for a change in accounting principle are not met, the auditor should consider the matter to be a~~

~~departure from generally accepted accounting principles and, if the effect of the change in accounting principle is material, issue a qualified or adverse opinion.~~

**~~Correction of a Material Misstatement in Previously Issued Financial Statements~~**

~~.18A Correction of a material misstatement in previously issued financial statements should be recognized in the auditor's report through the addition of an explanatory paragraph following the opinion paragraph.[13] The explanatory paragraph should include (1) a statement that the previously issued financial statements have been restated for the correction of a misstatement in the respective period and (2) a reference to the company's disclosure of the correction of the misstatement. Following is an example of an appropriate explanatory paragraph when there has been a correction of a material misstatement in previously issued financial statements.~~

> ~~As discussed in Note X to the financial statements, the 20X2 financial statements have been restated to correct a misstatement.~~

~~[13] The directions in paragraphs .68-.69 apply when comparative financial statements are presented and the opinion on the prior-period financial statements differs from the opinion previously expressed.~~

~~.18B This type of explanatory paragraph in the auditor's report should be included in reports on financial statements when the related financial statements are restated to correct the prior material misstatement. The paragraph need not be repeated in subsequent years.~~

~~.18C The accounting pronouncements generally require certain disclosures relating to restatements to correct a misstatement in previously issued financial statements. If the financial statement disclosures are not adequate, the auditor should address the lack of disclosure as discussed beginning at paragraph .41.~~

**~~Emphasis of a Matter~~**

~~.19 In any report on financial statements, the auditor may emphasize a matter regarding the financial statements. Such explanatory information should be presented in a separate paragraph of the auditor's report. Phrases such as "with the foregoing [following] explanation" should not be used in the opinion paragraph if an emphasis paragraph is included in the auditor's report. Emphasis paragraphs are never required; they may be added solely at the auditor's discretion. Examples of matters the auditor may wish to emphasize are~~

- ~~That the entity is a component of a larger business enterprise.~~

- ~~That the entity has had significant transactions with related parties.~~

- ~~Unusually important subsequent events.~~

- ~~Accounting matters, other than those involving a change or changes in accounting principles, affecting the comparability of the financial statements with those of the preceding period.~~

## ~~Departures From Unqualified Opinions~~

### Qualified Opinions

.02~~0~~ Certain circumstances may require a qualified opinion. A qualified opinion states that, *except for* the effects of the matter to which the qualification relates, the financial statements present fairly, in all material respects, financial position, results of operations, and cash flows in conformity with generally accepted accounting principles. Such an opinion is expressed when—

*a.* There is a lack of sufficient appropriate evidential matter or there are restrictions on the scope of the audit that have led the auditor to conclude that he or she cannot express an unqualified opinion and he or she has concluded not to disclaim an opinion (paragraphs .05~~22~~–.17~~34~~).

*b.* The auditor believes, on the basis of his or her audit, that the financial statements contain a departure from generally accepted accounting principles, the effect of which is material, and he or she has concluded not to express an adverse opinion (paragraphs .18~~35~~–.39~~57~~).

.03 When the auditor expresses a qualified opinion, the auditor's report must include the same basic elements and communication of critical audit matters as would be required in an unqualified auditor's report under AS 3101.

.04~~21~~ When the auditor expresses a qualified opinion, he or she should disclose all of the substantive reasons for the qualified opinion in one or more separate ~~explanatory~~ paragraph(s) ~~preceding~~ immediately following the opinion paragraph of the auditor's report. The auditor should also include, in the opinion paragraph, the appropriate qualifying language and a reference to the ~~explanatory~~ paragraph that discloses all of the substantive reasons for the qualified opinion. A qualified opinion should include the word *except* or *exception* in a phrase such as *except for* or *with the exception of*. Phrases such as *subject to* and *with the foregoing explanation* are not clear or forceful enough and should not be used. Since accompanying notes are part of the financial statements, wording such as *fairly presented, in all material respects, when read in conjunction with Note 1* is likely to be misunderstood and should not be used.

Note: The auditor should refer to AS 3101 to determine if the matter for which the auditor qualified his or her opinion is also a critical audit matter.

**Scope Limitations**

.05~~22~~ The auditor can determine that he or she is able to express an unqualified opinion only if the audit has been conducted in accordance with the standards of the PCAOB and if he or she has therefore been able to apply all the procedures he considers necessary in the circumstances. Restrictions on the scope of the audit, whether imposed by the client or by circumstances, such as the timing of his or her work, the inability to obtain sufficient appropriate evidential matter, or an inadequacy in the accounting records, may require the auditor to qualify his or her opinion or to disclaim an opinion. In such instances, the reasons for the auditor's qualification of opinion or disclaimer of opinion should be described in the report.

.06~~23~~ The auditor's decision to qualify his or her opinion or disclaim an opinion because of a scope limitation depends on his or her assessment of the importance of the omitted procedure(s) to his or her ability to form an opinion on the financial statements being audited. This assessment will be affected by the nature and magnitude of the potential effects of the matters in question and by their significance to the financial statements. If the potential effects relate to many financial statement items, this significance is likely to be greater than if only a limited number of items is involved.

.07~~24~~ Common restrictions on the scope of the audit include those applying to the observation of physical inventories and the confirmation of accounts receivable by direct communication with debtors.[3~~14~~] Another common scope restriction involves accounting for long-term investments when the auditor has not been able to obtain audited financial statements of an investee. Restrictions on the application of these or other audit procedures to important elements of the financial statements require the auditor to decide whether he or she has examined sufficient appropriate evidential matter to permit him or her to express an unqualified or qualified opinion, or whether he or she should disclaim an opinion. When restrictions that significantly limit the scope of the audit are imposed by the client, ordinarily the auditor should disclaim an opinion on the financial statements.

[3~~14~~] Circumstances such as the timing of the work may make it impossible for the auditor to accomplish these procedures. In this case, if the auditor is able to satisfy himself or herself as to inventories or accounts receivable by applying alternative procedures, there is no significant limitation on the scope of the work, and the report need not include a reference to the omission of the procedures or the use of alternative procedures. It is important to understand, however, that AS 2510, *Auditing Inventories*, states that "it will always be necessary for the auditor to make, or observe, some physical counts of the inventory and apply appropriate tests of intervening transactions."

.08~~25~~ When a qualified opinion results from a limitation on the scope of the audit or an insufficiency of evidential matter, the ~~situation~~ auditor's report should ~~be~~ describe~~d~~ the basis for departure from an unqualified opinion in a~~n~~ ~~explanatory~~ separate paragraph ~~preceding~~ immediately following the opinion paragraph and refer~~red~~ to that description in both the ~~scope~~ Basis for Opinion section and opinion paragraph~~s~~ of the auditor's report. It is not appropriate for the scope of the audit to be explained in a note to the financial statements, since the description of the audit scope is the responsibility of the auditor and not that of the client.

.09~~26~~ When an auditor qualifies his or her opinion because of a scope limitation, the wording in the opinion paragraph should indicate that the qualification pertains to the possible effects on the financial statements and not to the scope limitation itself. Wording such as "In our opinion, except for the above-mentioned limitation on the scope of our audit . . ." bases the exception on the restriction itself, rather than on the possible effects on the financial statements and, therefore, is unacceptable. An example of a qualified opinion related to a scope limitation concerning an investment in a foreign affiliate (assuming the effects of the limitation are such that the auditor has concluded that a disclaimer of opinion is not appropriate) follows:

Report of Independent Registered Public Accounting Firm

To the shareholders and the board of directors of X Company

~~[*Same first paragraph as the standard report*]~~

Opinion on the Financial Statements

We have audited the accompanying balance sheets of X Company (the "Company") as of December 31, 20X2 and 20X1, the related statements of operations, stockholders' equity, and cash flows, for each of the years then ended, and the related notes [*and schedules*] (collectively referred to as the "financial statements"). In our opinion, except for the effects of ~~such~~ the adjustments, if any, as might have been determined to be necessary had we been able to examine evidence regarding the foreign affiliate investment and earnings, as described below, the financial statements ~~referred to in the first~~

~~paragraph above~~ present fairly, in all material respects, the financial position of ~~X~~ the Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

We were unable to obtain audited financial statements supporting the Company's investment in a foreign affiliate stated at $_______ and $_______ at December 31, 20X2 and 20X1, respectively, or its equity in earnings of that affiliate of $_______ and $_______, which is included in net income for the years then ended as described in Note X to the financial statements; nor were we able to satisfy ourselves as to the carrying value of the investment in the foreign affiliate or the equity in its earnings by other auditing procedures.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

Except as discussed ~~in the following paragraph~~ above, we conducted our audits in accordance with the standards of the PCAOB ~~Public Company Accounting Oversight Board (United States)~~. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. ~~An audit~~ Such procedures include~~s~~ examining, on a test basis, evidence ~~supporting~~ regarding the amounts and disclosures in the financial statements. ~~An~~ Our audits also include~~s~~d ~~assessing~~ evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements ~~presentation~~. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matters [if applicable]

*[Include critical audit matters]*

[*Signature*]

We have served as the Company's auditor since [*year*].

[*City and State or Country*]

[*Date*]

.10~~27~~ ***Other scope limitations.*** Sometimes, notes to financial statements may contain unaudited information, such as pro forma calculations or other similar disclosures. If the unaudited information (for example, an investor's share, material in amount, of an investee's earnings recognized on the equity method) is such that it should be subjected to auditing procedures in order for the auditor to form an opinion with respect to the financial statements taken as a whole, the auditor should apply the procedures he or she deems necessary to the unaudited information. If the auditor has not been able to apply the procedures he or she considers necessary, the auditor should qualify his or her opinion or disclaim an opinion because of a limitation on the scope of the audit.

.11~~28~~ If, however, these disclosures are not necessary to fairly present the financial position, operating results, or cash flows on which the auditor is reporting, such disclosures may be identified as *unaudited* or as *not covered by the auditor's report*. For example, the pro forma effects of a business combination or of a subsequent event may be labelled unaudited. Therefore, while the event or transaction giving rise to the disclosures in these circumstances should be audited, the pro forma disclosures of that event or transaction would not be. The auditor should be aware, however, that AS 3110 (currently AU sec. 530), *Dating of the Independent Auditor's Report,* states that, if the auditor is aware of a material subsequent event that has occurred after the completion of fieldwork but before issuance of the report that should be disclosed, the auditor's only options are to dual date the report or date the report as of the date of the subsequent event and extend the procedures for review of subsequent events to that date. Labelling the note unaudited is not an acceptable alternative in these circumstances.

.12~~29~~ ***Uncertainties and scope limitations.*** A matter involving an uncertainty is one that is expected to be resolved at a future date, at which time conclusive evidential matter concerning its outcome would be expected to become available. Uncertainties include, but are not limited to, contingencies covered by Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 5, *Accounting for Contingencies*, and matters related to estimates covered by Statement of Position 94-6, *Disclosure of Certain Significant Risks and Uncertainties*.

.13~~30~~ Conclusive evidential matter concerning the ultimate outcome of uncertainties cannot be expected to exist at the time of the audit because the outcome and related evidential matter are prospective. In these circumstances, management is responsible for estimating the effect of future events on the financial statements, or determining that a reasonable estimate cannot be made and making the required disclosures, all in accordance with generally accepted accounting principles, based on management's analysis of existing conditions. An audit includes an assessment of whether the evidential matter is sufficient to support management's analysis. Absence of the existence of information related to the outcome of an uncertainty does not necessarily lead to a conclusion that the evidential matter supporting management's assertion is not sufficient. Rather, the auditor's judgment regarding the sufficiency of the evidential matter is based on the evidential matter that is, or should be, available. If, after considering the existing conditions and available evidence, the auditor concludes that sufficient evidential matter supports management's assertions about the nature of a matter involving an uncertainty and its presentation or disclosure in the financial statements, an unqualified opinion ordinarily is appropriate.

.14~~31~~ If the auditor is unable to obtain sufficient evidential matter to support management's assertions about the nature of a matter involving an uncertainty and its presentation or disclosure in the financial statements, the auditor should consider the need to express a qualified opinion or to disclaim an opinion because of a scope limitation. A qualification or disclaimer of opinion because of a scope limitation is appropriate if sufficient evidential matter related to an uncertainty does or did exist but was not available to the auditor for reasons such as management's record retention policies or a restriction imposed by management.

.15~~32~~ Scope limitations related to uncertainties should be differentiated from situations in which the auditor concludes that the financial statements are materially misstated due to departures from generally accepted accounting principles related to uncertainties. Such departures may be caused by inadequate disclosure concerning the uncertainty, the use of inappropriate accounting principles, or the use of unreasonable accounting estimates. Paragraphs .28~~45~~ to .32~~49~~ provide guidance to the auditor when financial statements contain departures from generally accepted accounting principles related to uncertainties.

.16~~33~~ ***Limited reporting engagements.*** The auditor may be asked to report on one basic financial statement and not on the others. For example, he or she may be asked to report on the balance sheet and not on the statements of income, retained earnings or cash flows. These engagements do not involve scope limitations if the auditor's access to information underlying the basic financial statements is not limited and if the auditor applies all the procedures he considers necessary in the circumstances; rather, such engagements involve limited reporting objectives.

.17~~34~~ An auditor may be asked to report on the balance sheet only. In this case, the auditor may express an opinion on the balance sheet only. An example of an unqualified opinion on a balance-sheet-only audit follows (the report assumes that the auditor has been able to satisfy himself or herself regarding the consistency of application of accounting principles):

Report of Independent Registered Public Accounting Firm

To the shareholders and the board of directors of X Company

Opinion on the Financial Statement

We have audited the accompanying balance sheet of X Company (the "Company") as of December 31, 20XX, and the related notes [*and schedules*] (collectively referred to as the "financial statement"). In our opinion, ~~the balance sheet referred to above~~ the financial statement presents fairly, in all material respects, the financial position of ~~X~~ the Company as of December 31, 20XX, in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

This financial statement is the responsibility of the Company's management. Our responsibility is to express an opinion on this financial statement based on our audit. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB ~~Public Company Accounting Oversight Board (United States)~~. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the ~~balance sheet~~ financial statement is free of material misstatement, whether due to error or fraud. Our audit included performing procedures to assess the risks of material misstatements of the financial statement, whether due to error or fraud, and performing procedures that respond to those risks. ~~An audit~~ Such procedures include~~s~~ examining, on a test basis, evidence ~~supporting~~ regarding the amounts and disclosures in the ~~balance sheet~~ financial statement.

~~An~~ Our audit also ~~includes~~ included assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall ~~balance sheet~~ presentation of the financial statement. We believe that our audit of the ~~balance sheet~~ financial statement provides a reasonable basis for our opinion.

Critical Audit Matters [if applicable]

*[Include critical audit matters]*

[*Signature*]

We have served as the Company's auditor since [*year*].

[*City and State or Country*]

[*Date*]

**Departure From a Generally Accepted Accounting Principle**

.18~~35~~ When financial statements are materially affected by a departure from generally accepted accounting principles and the auditor has audited the statements in accordance with the standards of the PCAOB, he or she should express a qualified (paragraphs .19~~36~~ through .39~~57~~) or an adverse (paragraphs .40~~58~~ through .43~~60~~) opinion. The basis for such opinion should be stated in the report.

.19~~36~~ In deciding whether the effects of a departure from generally accepted accounting principles are sufficiently material to require either a qualified or adverse opinion, one factor to be considered is the dollar magnitude of such effects. However, the concept of materiality does not depend entirely on relative size; it involves qualitative as well as quantitative judgments. The significance of an item to a particular entity (for example, inventories to a manufacturing company), the pervasiveness of the misstatement (such as whether it affects the amounts and presentation of numerous financial statement items), and the effect of the misstatement on the financial statements taken as a whole are all factors to be considered in making a judgment regarding materiality.

.20~~37~~ When the auditor expresses a qualified opinion, he or she should disclose, in a separate ~~explanatory~~ paragraph(s) ~~preceding~~ immediately following the opinion paragraph ~~of the report~~, all of the substantive reasons that have led him or her to conclude that there has been a departure from generally accepted accounting principles. Furthermore, the opinion paragraph ~~of the report~~ should include the appropriate qualifying language and a reference to the ~~explanatory~~ paragraph(s) that describe the substantive reasons for the qualified opinion.

.21~~38~~ The ~~explanatory~~ paragraph(s) immediately following the opinion paragraph that describe the substantive reasons that led the auditor to conclude that there has been a departure from generally accepted accounting principles should also disclose the principal effects of the subject matter of the qualification on financial position, results of operations, and cash flows, if practicable.[4~~15~~] If the effects are not reasonably determinable, the report should so state. If such disclosures are made in a note to the financial statements, the ~~explanatory~~ paragraph(s) that describe the substantive reasons for the qualified opinion may be shortened by referring to it.

[4~~15~~] In this context, practicable means that the information is reasonably obtainable from management's accounts and records and that providing the information in the report does not require the auditor to assume the position of a preparer of financial information. For example, if the information can be obtained from the accounts and records without the auditor substantially increasing the effort that would normally be required to complete the audit, the information should be presented in the report.

.22~~39~~ An example of a report in which the opinion is qualified because of the use of an accounting principle at variance with generally accepted accounting principles follows (assuming the effects are such that the auditor has concluded that an adverse opinion is not appropriate):

Report of Independent Registered Public Accounting Firm

To the shareholders and the board of directors of X Company

Opinion on the Financial Statements

We have audited the accompanying balance sheets of X Company (the "Company") as of December 31, 20X2 and 20X1, the related statements of operations, stockholders' equity, and cash flows, for each of the years then ended, and the related notes [*and schedules*] (collectively referred to as the "financial statements"). In our opinion, except for the effects of not capitalizing certain lease obligations as discussed in the ~~preceding~~ following paragraph, the financial statements referred to above present fairly, in all material respects, the financial position of ~~X~~ the Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

The Company has excluded, from property and debt in the accompanying balance sheets, certain lease obligations that, in our opinion, should be capitalized in order to conform with accounting principles generally accepted in the United States of America. If these lease obligations were capitalized, property would be increased by $_______ and $_______, long-term debt by $_______ and $_______, and retained earnings by $_______ and $_______ as of December 31, 20X2 and 20X1, respectively. Additionally, net income would be increased (decreased) by $_______ and $_______ and earnings per share would be increased (decreased) by $_______ and $_______, respectively, for the years then ended.

Basis for Opinion

[~~*Same first and second paragraphs as the standard report*~~ *Includes the same basic elements as the Basis for Opinion section of the auditor's unqualified report in AS 3101*]

Critical Audit Matters [if applicable]

*[Include critical audit matters]*

[*Signature*]

We have served as the Company's auditor since [*year*].

[*City and State or Country*]

[*Date*]

.23~~40~~ If the pertinent facts are disclosed in a note to the financial statements, a separate paragraph (~~preceding~~ immediately following the opinion paragraph) of the auditor's report in the circumstances illustrated in paragraph .22~~39~~ might read as follows:

As more fully described in Note X to the financial statements, the Company has excluded certain lease obligations from property and debt in the accompanying balance sheets. In our opinion, accounting principles generally accepted in the United States of America require that such obligations be included in the balance sheets.

.24~~41~~ ***Inadequate disclosure.*** Information essential for a fair presentation in conformity with generally accepted accounting principles should be set forth in the financial statements (which include the related notes). When such information is set forth elsewhere in a report to shareholders, or in a prospectus, proxy statement, or other similar report, it should be referred to in the financial statements. If the financial statements, including accompanying notes, fail to disclose information that is required by generally accepted accounting principles, the auditor should express a qualified or adverse opinion because of the departure from those principles and should provide the information in the report, if practicable,[5~~16~~] unless its omission from the auditor's report is recognized as appropriate by a specific PCAOB standard.

[5~~16~~] *See* footnote 4~~15~~.

.25~~42~~ Following is an example of a report qualified for inadequate disclosure (assuming the effects are such that the auditor has concluded an adverse opinion is not appropriate):

Report of Independent Registered Public Accounting Firm

To the shareholders and the board of directors of X Company

Opinion on the Financial Statements

We have audited the accompanying balance sheets of X Company (the "Company") as of December 31, 20X2 and 20X1, the related statements of operations, stockholders' equity, and cash flows, for each of the years then ended, and the related notes [*and schedules*] (collectively referred to as the "financial statements"). In our opinion, except for the omission of the information discussed in the ~~preceding~~ following paragraph, . . .

The Company's financial statements do not disclose [*describe the nature of the omitted disclosures*]. In our opinion, disclosure of this information is required by accounting principles generally accepted in the United States of America.

Basis for Opinion

[~~*Same first and second paragraphs as the standard report*~~ *Includes the same basic elements as the Basis for Opinion section of the auditor's unqualified report in AS 3101*]

Critical Audit Matters [if applicable]

*[Include critical audit matters]*

[*Signature*]

We have served as the Company's auditor since [*year*].

[*City and State or Country*]

[*Date*]

.26~~43~~ If a company issues financial statements that purport to present financial position and results of operations but omits the related statement of cash flows, the auditor will normally conclude that the omission requires qualification of his opinion.

.27~~44~~ ~~The auditor is not required to prepare a basic financial statement (for example, a statement of cash flows for one or more periods) and include it in the report~~ ~~i~~If the company's management declines to present ~~the statement~~ a basic financial statement (for example, a statement of cash flows for one or more periods)~~.~~ ~~Accordingly, in these cases~~, the auditor should ordinarily qualify the report in the following manner:

Report of Independent Registered Public Accounting Firm

To the shareholders and the board of directors of X Company

Opinion on the Financial Statements

We have audited the accompanying balance sheets of X Company (the "Company") as of December 31, 20X2 and 20X1, and the related statements of operations, and stockholders' equity for each of the years then ended, and the related notes [*and schedules*] (collectively referred to as the "financial statements").~~income and retained earnings for the years then ended.~~ In our opinion, except that the omission of a statement of cash flows results in an incomplete presentation as explained in the ~~preceding~~ following paragraph, the financial statements ~~referred to above~~ present fairly, in all material respects, the financial position of ~~X~~ the Company as of December 31, 20X2 and 20X1, and the results of its operations for the years then ended in conformity with accounting principles generally accepted in the United States of America.

The Company declined to present a statement of cash flows for the years ended December 31, 20X2 and 20X1. Presentation of such statement summarizing the Company's operating, investing, and financing activities is required by accounting principles generally accepted in the United States of America.

Basis for Opinion

[~~*Same second paragraph as the standard report*~~ *Includes the same basic elements as the Basis for Opinion section of the auditor's unqualified report in AS 3101*]

Critical Audit Matters [if applicable]

*[Include critical audit matters]*

[*Signature*]

We have served as the Company's auditor since [*year*].

[*City and State or Country*]

[*Date*]

.28~~45~~ ***Departures from generally accepted accounting principles involving risks or uncertainties, and materiality considerations.*** Departures from generally accepted accounting principles involving risks or uncertainties generally fall into one of the following categories:

- Inadequate disclosure (paragraphs .29~~46~~ and .30~~47~~)
- Inappropriate accounting principles (paragraph .31~~48~~)
- Unreasonable accounting estimates (paragraph .32~~49~~)

.29~~46~~ If the auditor concludes that a matter involving a risk or an uncertainty is not adequately disclosed in the financial statements in conformity with generally accepted accounting principles, the auditor should express a qualified or an adverse opinion.

.30~~47~~ The auditor should consider materiality in evaluating the adequacy of disclosure of matters involving risks or uncertainties in the financial statements in the context of the financial statements taken as a whole. The auditor's consideration of materiality is a matter of professional judgment and is influenced by his or her perception of the needs of a reasonable person who will rely on the financial statements. Materiality judgments involving risks or uncertainties are made in light of the surrounding circumstances. The auditor evaluates the materiality of reasonably possible losses that may be incurred upon the resolution of uncertainties both individually and in the aggregate. The auditor performs the evaluation of reasonably possible losses without regard to his or her evaluation of the materiality of known and likely misstatements in the financial statements.

.31~~48~~ In preparing financial statements, management estimates the outcome of certain types of future events. For example, estimates ordinarily are made about the useful lives of depreciable assets, the collectibility of accounts receivable, the realizable value of inventory items, and the provision for product warranties. FASB Statement No. 5, *Accounting for Contingencies*, paragraphs 23 and 25, describes situations in which the inability to make a reasonable estimate may raise questions about the appropriateness of the accounting principles used. If, in those or other situations, the auditor concludes that the accounting principles used cause the financial statements to be materially misstated, he or she should express a qualified or an adverse opinion.

.32~~49~~ Usually, the auditor is able to satisfy himself or herself regarding the reasonableness of management's estimate of the effects of future events by considering various types of evidential matter, including the historical experience of the entity. If the auditor concludes that management's estimate is unreasonable (*see* paragraph .13 of AS 2810, *Evaluating Audit Results*) and that its effect is to cause the financial statements to be materially misstated, he or she should express a qualified or an adverse opinion.

~~[.50]~~

.33~~51~~ ***Departures from generally accepted accounting principles related to changes in accounting principle***. Paragraph .07 ~~.17A~~ of AS 2820 (currently Auditing Standard No. 6), *Evaluating Consistency of Financial Statements*, ~~states~~ includes the criteria for evaluating a change in accounting principle. If the auditor concludes that the criteria have not been met, he or she should consider that circumstance to be a departure from generally accepted accounting principles and, if the effect of the accounting change is material, should issue a qualified or adverse opinion.

.34~~52~~ The accounting standards indicate that a company may make a change in accounting principle only if it justifies that the allowable alternative accounting principle is preferable. If the company does not provide reasonable justification that the alternative accounting principle is preferable, the auditor should consider the accounting change to be a departure from generally accepted accounting principles and, if the effect of the change in accounting principle is material, should issue a qualified or adverse opinion. The following is an example of a report qualified because a company did not provide reasonable justification that an alternative accounting principle is preferable:

Report of Independent Registered Public Accounting Firm

To the shareholders and the board of directors of X Company

Opinion on the Financial Statements

We have audited the accompanying balance sheets of X Company (the "Company") as of December 31, 20X2 and 20X1, the related statements of operations, stockholders' equity, and cash flows, for each of the years then ended, and the related notes [*and schedules*] (collectively referred to as the "financial statements"). In our opinion, except for the change in accounting principle discussed in the ~~preceding~~ following paragraph, the financial statements ~~referred to above~~ present fairly, in all material respects, the financial position of ~~X~~ the Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

As disclosed in Note X to the financial statements, the Company adopted, in 20X2, the first-in, first-out method of accounting for its inventories, whereas it previously used the last-in, first-out method. Although use of the first-in, first-out method is in conformity with accounting principles generally accepted in the United States of America, in our opinion the Company has not provided reasonable justification that this accounting principle is preferable as required by those principles.[6] ~~[17]~~

Basis for Opinion

[~~*Same first and second paragraphs as the standard report*~~ *Includes the same basic elements as the Basis for Opinion section of the auditor's unqualified report in AS 3101*]

Critical Audit Matters [if applicable]

*[Include critical audit matters]*

[*Signature*]

We have served as the Company's auditor since [*year*].

[*City and State or Country*]

[*Date*]

[6~~17~~] Because this paragraph included in the example presented contains all of the information required in a~~n~~ ~~explanatory~~ separate paragraph on consistency, an ~~separate~~ explanatory paragraph (immediately following the opinion paragraph) as required by ~~paragraphs .17A thorough .17E of this section~~ AS 2820.08 and .12-.15 (currently Auditing Standard No. 6) is not necessary in this instance. A separate paragraph that identifies the change in accounting principle would be required if the substance of the disclosure did not fulfill the requirements outlined in these paragraphs.

.35~~53~~ Whenever an accounting change results in an auditor expressing a qualified or adverse opinion on the conformity of financial statements with generally accepted accounting principles for the year of change, the auditor should consider the possible effects of that change when reporting on the entity's financial statements for subsequent years, as discussed in paragraphs .36~~54~~ through .39~~57~~.

.36~~54~~ If the financial statements for the year of such change are presented and reported on with a subsequent year's financial statements, the auditor's report should disclose his or her reservations with respect to the statements for the year of change.

.37~~55~~ If an entity has adopted an accounting principle that is not a generally accepted accounting principle, its continued use might have a material effect on the statements of a subsequent year on which the auditor is reporting. In this situation, the independent auditor should express either a qualified opinion or an adverse opinion, depending on the materiality of the departure in relation to the statements of the subsequent year.

.38~~56~~ If an entity accounts for the effect of a change prospectively when generally accepted accounting principles require restatement or the inclusion of the cumulative effect of the change in the year of change, a subsequent year's financial statements could improperly include a charge or credit that is material to those statements. This situation also requires that the auditor express a qualified or an adverse opinion.

.39~~57~~ If the auditor issues a qualified or adverse opinion because the company has not justified that an allowable accounting principle adopted in an accounting change is preferable, as described in paragraph .34~~52~~, the auditor should continue to express that opinion on the financial statements for the year of change as long as those financial statements are presented and reported on. However, the auditor's qualified or adverse opinion relates only to the accounting change and does not affect the status of a newly adopted principle as a generally accepted accounting principle. Accordingly, while expressing a qualified or adverse opinion for the year of change, the independent auditor's opinion regarding the subsequent years' statements need not express a qualified or adverse opinion on the use of the newly adopted principle in subsequent periods.

**Adverse Opinions**

.40 When the auditor expresses an adverse opinion, the auditor's report must include the opinion as described in paragraph .41 and the same other basic elements as would be required in an unqualified auditor's report under AS 3101, modified appropriately.

> Note: The requirements as to critical audit matters described in AS 3101 do not apply when the auditor expresses an adverse opinion.

.41~~58~~ An adverse opinion states that the financial statements do not present fairly the financial position or the results of operations or cash flows in conformity with generally accepted accounting principles. Such an opinion is expressed when, in the auditor's judgment, the financial statements taken as a whole are not presented fairly in conformity with generally accepted accounting principles.

.42~~59~~ When the auditor expresses an adverse opinion, he or she should disclose in a separate ~~explanatory~~ paragraph(s) ~~preceding~~ immediately following the opinion paragraph of the report (*a*) all the substantive reasons for his or her adverse opinion, and (*b*) the principal effects of the subject matter of the adverse opinion on financial position, results of operations, and cash flows, if practicable.[7]~~[18]~~ If the effects are not reasonably determinable, the report should so state.[8]~~[19]~~

[7]~~[18]~~ *See* footnote 4~~15~~.

[8]~~[19]~~ When the auditor expresses an adverse opinion, he or she should also consider the need for an explanatory paragraph under the circumstances identified in ~~paragraph 11, subsection (*b*), (*c*), (*d*), and (*e*) of~~ AS 3101.18 ~~this section~~.

.43~~60~~ When an adverse opinion is expressed, the opinion paragraph should include a direct reference to a separate paragraph that discloses the basis for the adverse opinion.~~,~~ An example of this is ~~as~~ shown below:

Report of Independent Registered Public Accounting Firm

To the shareholders and the board of directors of X Company

Opinion on the Financial Statements

We have audited the accompanying balance sheets of X Company (the "Company") as of December 31, 20X2 and 20X1, the related statements of operations, stockholders' equity, and cash flows, for each of the years then ended, and the related notes [*and schedules*] (collectively referred to as the "financial statements"). In our opinion, because of the effects of the matters discussed in the ~~preceding~~ following paragraphs, the financial statements ~~referred to above~~ do not present fairly, in conformity with accounting principles generally accepted in the United States of America, the financial position of ~~X~~ the Company as of December 31, 20X2 and 20X1, or the results of its operations or its cash flows for the years then ended.

As discussed in Note X to the financial statements, the Company carries its property, plant and equipment accounts at appraisal values, and provides depreciation on the basis of such values. Further, the Company does not provide for income taxes with respect to differences between financial income and taxable income arising because of the use, for income tax purposes, of the installment method of reporting gross profit from certain types of sales. Accounting principles generally accepted in the United States of America require that property, plant and equipment be stated at an amount not in excess of cost, reduced by depreciation based on such amount, and that deferred income taxes be provided.

Because of the departures from accounting principles generally accepted in the United States of America identified above, as of December 31, 20X2 and 20X1, inventories have been increased $_______ and $_______ by inclusion in manufacturing overhead of depreciation in excess of that based on cost; property, plant and equipment, less accumulated depreciation, is carried at $_______ and $_______ in excess of an amount based on the cost to the Company; and deferred income taxes of $_______ and $_______ have not been recorded; resulting in an increase of $_______ and $_______ in retained earnings and in appraisal surplus of $_______ and $_______, respectively. For the years ended December 31, 20X2 and 20X1, cost of goods sold has been increased $_______ and $_______, respectively, because of the effects of the depreciation accounting referred to above and deferred income taxes of $_______ and $_______ have not been provided, resulting in an increase in net income of $_______ and $_______, respectively.

Basis for Opinion

[~~*Same first and second paragraphs as the standard report*~~ *This section includes the same basic elements as the Basis for Opinion section of the auditor's unqualified report in AS 3101*]

[*Signature*]

We have served as the Company's auditor since [*year*].

[*City and State or Country*]

[*Date*]

**Disclaimer of Opinion**

.44~~61~~ A disclaimer of opinion states that the auditor does not express an opinion on the financial statements. An auditor may decline to express an opinion whenever he or she is unable to form or has not formed an opinion as to the fairness of presentation of the financial statements in conformity with generally accepted accounting principles. If the auditor disclaims an opinion, the auditor's report should give all of the substantive reasons for the disclaimer.

.45~~62~~ A disclaimer is appropriate when the auditor has not performed an audit sufficient in scope to enable him or her to form an opinion on the financial statements.[~~20~~9] A disclaimer of opinion should not be expressed because the auditor believes, on the basis of his or her audit, that there are material departures from generally accepted accounting principles (*see* paragraphs .18~~35~~ through .39~~57~~). When disclaiming an opinion because of a scope limitation, the auditor should state in a separate paragraph or paragraphs all of the substantive reasons for the disclaimer. He or she should state that the scope of the audit was not sufficient to warrant the expression of an opinion. The auditor should not identify the procedures that were performed nor include the paragraph describing the characteristics of an audit (that is, the scope paragraph of the auditor's standard report); to do so may tend to overshadow the disclaimer. In addition, the auditor should also disclose any other reservations he or she has regarding fair presentation in conformity with generally accepted accounting principles.

.46 When the auditor disclaims an opinion, the auditor's report must include the same basic elements as would be required in an unqualified auditor's report under AS 3101, modified appropriately.

Note: The requirements as to critical audit matters described in AS 3101 do not apply when the auditor disclaims an opinion.

.47~~63~~ An example of a report disclaiming an opinion resulting from an inability to obtain sufficient appropriate evidential matter because of the scope limitation follows:

Report of Independent Registered Public Accounting Firm

To the shareholders and the board of directors of X Company

Disclaimer of Opinion on the Financial Statements

We were engaged to audit the accompanying balance sheets of X Company (the "Company") as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended, and the related notes [*and schedules*] (collectively referred to as the "financial statements").[10]~~[21]~~ ~~Since~~ As described in the following paragraph, because the Company did not take physical inventories and we were not able to apply other auditing procedures to satisfy ourselves as to inventory quantities and the cost of property and equipment, the scope of our work was not sufficient to enable us to express, and we do not express, an opinion on these financial statements.

The Company did not make a count of its physical inventory in 20X2 or 20X1, stated in the accompanying financial statements at $_______ as of December 31, 20X2, and at $________ as of December 31, 20X1. Further, evidence supporting the cost of property and equipment acquired prior to December 31, 20X1, is no longer available. The Company's records do not permit the application of other auditing procedures to inventories or property and equipment.

Basis for Opinion

These financial statements are the responsibility of the Company's management. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

[~~*Second paragraph of standard report should be omitted*~~ *The remaining basic elements in the Basis for Opinion section of the auditor's unqualified report*]

[*Signature*]

We have served as the Company's auditor since [ *year* ].

[*City and State or Country*]

[*Date*]

[10~~21~~] The wording in the ~~first paragraph of the auditor's standard report is changed in a disclaimer of opinion because of a scope limitation. The~~ first sentence now states that "we were engaged to audit" rather than "we have audited" since, because of the scope limitation, the auditor was not able to perform an audit in accordance with the standards of the PCAOB. In addition, the ~~last~~ sentence ~~of the first paragraph is also deleted, because of the scope limitation, to eliminate the~~ that references ~~to~~ the auditor's responsibility to express an opinion is deleted.

**Piecemeal Opinions**

.48~~64~~ Piecemeal opinions (expressions of opinion as to certain identified items in financial statements) should not be expressed when the auditor has disclaimed an opinion or has expressed an adverse opinion on the financial statements *taken as a whole* because piecemeal opinions tend to overshadow or contradict a disclaimer of opinion or an adverse opinion.

**Reports on Comparative Financial Statements**

.49~~65~~ The report shall ~~Paragraph .04 requires that an auditor's report contain~~ either contain an expression of opinion regarding the financial statements *taken as a whole* or an assertion to the effect that an opinion cannot be expressed. Reference ~~in paragraph .04~~ to the financial statements *taken as a whole* applies not only to the financial statements of the current period but also to those of one or more prior periods that are presented on a comparative basis with those of the current period. Therefore, a continuing auditor[11~~22~~] should update[12~~23~~] the report on the individual financial statements of the one or more prior periods presented on a comparative basis with those of the current period.[13~~24~~] Ordinarily, the auditor's report on comparative financial statements should be dated as of the date of completion of fieldwork for the most recent audit. (*See* AS 3110.01. (currently AU sec. 530))

[11~~22~~] A *continuing auditor* is one who has audited the financial statements of the current period and of one or more consecutive periods immediately prior to the current period. If one firm of independent auditors merges with another firm and the new firm becomes the auditor of a former client of one of the former firms, the new firm may accept responsibility and express an opinion on the financial statements for the prior period(s), as well as for those of the current period. In such circumstances, the new firm should follow the guidance in paragraphs .49~~65~~ through .53~~69~~ and may indicate in its report or signature that a merger took place and may name the firm of independent auditors that was merged with it. If the new firm decides not to express an opinion on the prior-period financial statements, the guidance in paragraphs .54~~70~~ through .58~~74~~ should be followed.

12~~23~~ An updated report on prior-period financial statements should be distinguished from a reissuance of a previous report (*see* AS 3110.06 through .08), since in issuing an updated report the continuing auditor considers information that he or she has become aware of during his or her audit of the current-period financial statements (*see* paragraph .52~~68~~) and because an updated report is issued in conjunction with the auditor's report on the current-period financial statements.

13~~24~~ A continuing auditor need not report on the prior-period financial statements if only summarized comparative information of the prior period(s) is presented. For example, entities such as state and local governmental units frequently present total-all-funds information for the prior period(s) rather than information by individual funds because of space limitations or to avoid cumbersome or confusing formats. Also, not-for-profit organizations frequently present certain information for the prior period(s) in total rather than by net asset class. In some circumstances, the client may request the auditor to express an opinion on the prior period(s) as well as the current period. In those circumstances, the auditor should consider whether the information included for the prior period(s) contains sufficient detail to constitute a fair presentation in conformity with generally accepted accounting principles. In most cases, this will necessitate including additional columns or separate detail by fund or net asset class, or the auditor would need to modify his or her report.

.50~~66~~ During the audit of the current-period financial statements, the auditor should be alert for circumstances or events that affect the prior-period financial statements presented (*see* paragraph .52~~68~~) or the adequacy of informative disclosures concerning those statements. (*See* AS 2810.31.) In updating his or her report on the prior-period financial statements, the auditor should consider the effects of any such circumstances or events coming to his or her attention.

**Different Reports on Comparative Financial Statements Presented**

.51~~67~~ Since the auditor's report on comparative financial statements applies to the individual financial statements presented, an auditor may express a qualified or adverse opinion, disclaim an opinion, or include an explanatory paragraph with respect to one or more financial statements for one or more periods, while issuing a different report on the other financial statements presented. Following are examples of reports on comparative financial statements ~~(excluding the standard introductory and scope paragraphs, where applicable)~~ with different reports on one or more financial statements presented.

**~~Standard~~ The Auditor's Unqualified Report on the Prior-Year Financial Statements and a Qualified Opinion on the Current-Year Financial Statements**

Report of Independent Registered Public Accounting Firm

To the shareholders and the board of directors of ABC Company

Opinion on the Financial Statements

We have audited the accompanying balance sheets of ABC Company (the "Company") as of December 31, 20X2 and 20X1, the related statements of operations, stockholders' equity, and cash flows, for each of the years then ended, and the related notes [*and schedules*] (collectively referred to as the "financial statements"). In our opinion, except for the effects on the 20X2 financial statements of not capitalizing certain lease obligations as described in the ~~preceding~~ following paragraph, the financial statements ~~referred to above~~ present fairly, in all material respects, the financial position of ~~ABC~~ the Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

The Company has excluded, from property and debt in the accompanying 20X2 balance sheet, certain lease obligations that were entered into in 20X2 which, in our opinion, should be capitalized in order to conform with accounting principles generally accepted in the United States of America. If these lease obligations were capitalized, property would be increased by $_______, long-term debt by $_______, and retained earnings by $_______ as of December 31, 20X2, and net income and earnings per share would be increased (decreased) by $_______ and $_______, respectively, for the year then ended.

Basis for Opinion

[~~*Same first and second paragraphs as the standard report*~~ *Includes the same basic elements as the Basis for Opinion section of the auditor's unqualified report in AS 3101*]

Critical Audit Matters [if applicable]

*[Include critical audit matters]*

[*Signature*]

We have served as the Company's auditor since [*year*].

[*City and State or Country*]

[*Date*]

**~~Standard~~ The Auditor's Unqualified Report on the Current-Year Financial Statements With a Disclaimer of Opinion on the Prior-Year Statements of Income, Retained Earnings, and Cash Flows**

Report of Independent Registered Public Accounting Firm

To the shareholders and the board of directors of ABC Company

Opinion on the Financial Statements

We have audited the accompanying balance sheets of ABC Company (the "Company") as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the year ended December 31, 20X2, and the related notes [*and schedules*] (collectively referred to as the "financial statements"). In our opinion, the balance sheets of ~~ABC~~ the Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the year ended December 31, 20X2, present fairly, in all material respects, the financial position of ~~ABC~~ the Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the year ended December 31, 20X2, in conformity with accounting principles generally accepted in the United States of America. Because of the matter discussed in the ~~preceding~~ following paragraph, the scope of our work was not sufficient to enable us to express, and we do not express, an opinion on the results of operations and cash flows for the year ended December 31, 20X1.

We did not observe the taking of the physical inventory as of December 31, 20X0, since that date was prior to our appointment as auditors for the Company, and we were unable to satisfy ourselves regarding inventory quantities by means of other auditing procedures. Inventory amounts as of December 31, 20X0, enter into the determination of net income and cash flows for the year ended December 31, 20X1.[14]~~[25]~~

Basis for Opinion [~~Same first paragraph as the standard report~~]

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

Except as explained ~~in the following paragraph~~ above, we conducted our audits in accordance with the standards of the PCAOB ~~Public Company Accounting Oversight Board (United States)~~. Those standards require that we plan and perform our audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. ~~An audit~~ Such procedures ~~includes~~ include examining, on a test basis, evidence ~~supporting~~ regarding the amounts and disclosures in the financial statements. ~~An~~ Our audits also ~~includes assessing~~ included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements ~~presentation~~. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matters [if applicable]

*[Include critical audit matters]*

[*Signature*]

We have served as the Company's auditor since [ *year* ].

[*City and State or Country*]

[*Date*]

[14]~~25~~ It is assumed that the independent auditor has been able to satisfy himself or herself as to the consistency of application of generally accepted accounting principles. *See* AS 2820 for a discussion of consistency.

**Opinion on Prior-Period Financial Statements Different From the Opinion Previously Expressed**

.52~~68~~ If, during the current audit, an auditor becomes aware of circumstances or events that affect the financial statements of a prior period, he or she should consider such matters when updating his or her report on the financial statements of the prior period. For example, if an auditor has previously qualified his or her opinion or expressed an adverse opinion on financial statements of a prior period because of a departure from generally accepted accounting principles, and the prior-period financial statements are restated in the current period to conform with generally accepted accounting principles, the auditor's updated report on the financial statements of the prior period should indicate that the statements have been restated and should express an unqualified opinion with respect to the restated financial statements.

.53~~69~~ If, in an updated report, the opinion is different from the opinion previously expressed on the financial statements of a prior period, the auditor should disclose all the substantive reasons for the different opinion in a separate ~~explanatory~~ paragraph(s) ~~preceding~~ immediately following the opinion paragraph of his or her report. The explanatory paragraph(s) should disclose (*a*) the date of the auditor's previous report, (*b*) the type of opinion previously expressed, (*c*) if applicable, a statement that the previously issued financial statements have been restated for the correction of a misstatement in the respective period, (*d*) the circumstances or events that caused the auditor to express a different opinion, and (*e*) if applicable, a reference to the company's disclosure of the correction of the misstatement, and (*f*) the fact that the auditor's updated opinion on the financial statements of the prior period is different from his or her previous opinion on those statements. The following is an example of ~~an explanatory~~ a paragraph that may be appropriate when an auditor issues an updated report on the financial statements of a prior period that contains an opinion different from the opinion previously expressed:

Report of Independent Registered Public Accounting Firm

To the shareholders and the board of directors of X Company

Opinion on the Financial Statements

We have audited the accompanying balance sheets of X Company (the "Company") as of December 31, 20X2 and 20X1, the related statements of operations, stockholders' equity, and cash flows, for each of the years then ended, and the related notes [*and schedules*] (collectively referred to as the "financial statements"). In our opinion, the financial statements ~~referred to above~~

present fairly, in all material respects, the financial position of ~~X~~ the Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

In our report dated March 1, 20X2, we expressed an opinion that the 20X1 financial statements did not fairly present financial position, results of operations, and cash flows in conformity with accounting principles generally accepted in the United States of America because of two departures from such principles: (1) the Company carried its property, plant, and equipment at appraisal values, and provided for depreciation on the basis of such values, and (2) the Company did not provide for deferred income taxes with respect to differences between income for financial reporting purposes and taxable income. As described in Note X, the Company has changed its method of accounting for these items and restated its 20X1 financial statements to conform with accounting principles generally accepted in the United States of America. Accordingly, our present opinion on the 20X1 financial statements, as presented herein, is different from that expressed in our previous report.[15][26]

Basis for Opinion

[~~*Same first and second paragraphs as the standard report*~~ *Includes the same basic elements as the Basis for Opinion section of the auditor's unqualified report in AS 3101*]

Critical Audit Matters [if applicable]

[*Date*]

[15][26] *See* footnote 6~~17~~.

## Report of Predecessor Auditor

.54~~70~~ A predecessor auditor ordinarily would be in a position to reissue his or her report on the financial statements of a prior period at the request of a former client if he or she is able to make satisfactory arrangements with the former client to perform this service and if he or she performs the procedures described in paragraph .55~~71~~.[16~~27~~]

[16~~27~~] It is recognized that there may be reasons why a predecessor auditor's report may not be reissued and this section does not address the various situations that could arise.

### Predecessor Auditor's Report Reissued

.55~~71~~ Before reissuing (or consenting to the reuse of) a report previously issued on the financial statements of a prior period, when those financial statements are to be presented on a comparative basis with audited financial statements of a subsequent period, a predecessor auditor should consider whether his or her previous report on those statements is still appropriate. Either the current form or manner of presentation of the financial statements of the prior period or one or more subsequent events might make a predecessor auditor's previous report inappropriate. Consequently, a predecessor auditor should (*a*) read the financial statements of the current period, (*b*) compare the prior-period financial statements that he or she reported on with the financial statements to be presented for comparative purposes, and (*c*) obtain representation letters from management of the former client and from the successor auditor. The representation letter from management of the former client should state (*a*) whether any information has come to management's attention that would cause them to believe that any of the previous representations should be modified, and (*b*) whether any events have occurred subsequent to the balance-sheet date of the latest prior-period financial statements reported on by the predecessor auditor that would require adjustment to or disclosure in those financial statements.[17~~28~~] The representation letter from the successor auditor should state whether the successor's audit revealed any matters that, in the successor's opinion, might have a material effect on, or require disclosure in, the financial statements reported on by the predecessor auditor. Also, the predecessor auditor may wish to consider the matters described in paragraphs ~~AS 1205~~.10 through .12 of AS 1205 (currently AU sec. 543), *Part of the Audit Performed by Other Independent Auditors*. However, the predecessor auditor should not refer in his or her reissued report to the report or work of the successor auditor.

[17~~28~~] *See* AS 2805, *Management Representations*, appendix C [paragraph .18], "Illustrative Updating Management Representation Letter."

.56~~72~~ A predecessor auditor who has agreed to reissue his or her report may become aware of events or transactions occurring subsequent to the date of his or her previous report on the financial statements of a prior period that may affect his or her previous report (for example, the successor auditor might indicate in the response that certain matters have had a material effect on the prior-period financial statements reported on by the predecessor auditor). In such circumstances, the predecessor auditor should make inquiries and perform other procedures that he or she considers necessary (for example, reviewing the working papers of the successor auditor as they relate to the matters affecting the prior-period financial statements). The auditor should then decide, on the basis of the evidential matter obtained, whether to revise the report. If a predecessor auditor concludes that the report should be revised, he or she should follow the guidance in paragraphs .52~~68~~, .53~~69~~, and .57~~73~~ of this section.

.57~~73~~ A predecessor auditor's knowledge of the current affairs of his former client is obviously limited in the absence of a continuing relationship. Consequently, when reissuing the report on prior-period financial statements, a predecessor auditor should use the date of his or her previous report to avoid any implication that he or she has examined any records, transactions, or events after that date. If the predecessor auditor revises the report or if the financial statements are adjusted, he or she should dual-date the report. (*See* AS 3110.05.)

**Predecessor Auditor's Report Not Presented**

.58~~74~~ If the financial statements of a prior period have been audited by a predecessor auditor whose report is not presented, the successor auditor should indicate in the ~~introductory~~ paragraph immediately following the opinion paragraph of his or her report (a) that the financial statements of the prior period were audited by another auditor,[18]~~[29]~~ (b) the date of his or her report, (c) the type of report issued by the predecessor auditor, and (d) if the report was other than an ~~standard~~ unqualified report, the substantive reasons therefor.[19]~~[30]~~ An example of a successor auditor's report when the predecessor auditor's report is not presented is shown below:

Report of Independent Registered Public Accounting Firm

To the shareholders and the board of directors of ABC Company

Opinion on the Financial Statements

We have audited the accompanying balance sheet of ABC Company (the "Company") as of December 31, 20X2, and the related statements of income, retained earnings, and cash flows for the year then ended, and the related notes [*and schedules*] (collectively referred to as the "financial statements"). ~~These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.~~ In our opinion, the 20X2 financial statements ~~referred to above~~ present fairly, in all material respects, the financial position of ~~ABC~~ the Company as of December 31, 20X2, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

The financial statements of ~~ABC~~ the Company as of December 31, 20X1, were audited by other auditors whose report dated March 31, 20X2, expressed an unqualified opinion on those statements.

Basis for Opinion

[~~*Same second paragraph as the standard report*~~ *Includes the same basic elements as the Basis for Opinion section of the auditor's unqualified report in AS 3101*]

Critical Audit Matters [if applicable]

*[Include critical audit matters]*

[*Signature*]

We have served as the Company's auditor since [*year*].

[*City and State or Country*]

[*Date*]

If the predecessor auditor's report was other than an ~~standard~~ unqualified report, the successor auditor should describe the nature of and reasons for the ~~explanatory~~ paragraph added to the predecessor's report or the opinion qualification. Following is an illustration of the wording that may be included in the successor auditor's report:

. . . were audited by other auditors whose report dated March 1, 20X2, on those statements included an explanatory paragraph that described the change in the Company's method of computing depreciation discussed in Note X to the financial statements.

If the financial statements have been adjusted, the ~~introductory paragraph~~ Opinion on the Financial Statements section should indicate that a predecessor auditor reported on the financial statements of the prior period before the adjustments. In addition, if the successor auditor is engaged to audit and applies sufficient procedures to satisfy himself or herself as to the appropriateness of the adjustments, he or she may also include the following paragraph in the auditor's report:

> We also audited the adjustments described in Note X that were applied to restate the 20X1 financial statements. In our opinion, such adjustments are appropriate and have been properly applied.

[18] ~~[29]~~ The successor auditor should not name the predecessor auditor in his or her report; however, the successor auditor may name the predecessor auditor if the predecessor auditor's practice was acquired by, or merged with, that of the successor auditor.

[19] ~~[30]~~ If the predecessor's report was issued before the effective date of this section and contained an uncertainties explanatory paragraph, a successor auditor's report issued or reissued after the effective date hereof should not make reference to the predecessor's previously required explanatory paragraph.

## Management Reports on Internal Controls Over Financial Reporting

.59 In situations in which management is required to report on the company's internal control over financial reporting but such report is not required to be audited, and the auditor has not been engaged to perform an audit of management's assessment of the effectiveness of internal control over financial reporting, the auditor should refer to the auditor's responsibilities regarding other information in documents containing audited financial statements and the independent auditor's report under AS 2710 (currently AU sec. 550), *Other Information in Documents Containing Audited Financial Statements.*

.60 In situations described in paragraph .59, the auditor must include statements in the auditor's report that:

- The company is not required to have, nor was the auditor engaged to perform, an audit of its internal control over financial reporting;
- As part of the audit, the auditor is required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the company's internal control over financial reporting; and

- The auditor expresses no such opinion.

Following is an example of the Basis for Opinion section in the auditor's report that contains such statements:

> [Basis for Opinion]
>
> These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.
>
> We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion.
>
> Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

## Effective Date and Transition

.61~~75~~ This section is effective for reports issued or reissued on or after February 29, 1996. Earlier application of the provisions of this section is permissible.

.62~~76~~ An auditor who previously included an uncertainties explanatory paragraph in a report should not repeat that paragraph and is not required to include an emphasis paragraph related to the uncertainty in a reissuance of that report or in a report on subsequent periods' financial statements, even if the uncertainty has not been resolved. If the auditor decides to include an emphasis paragraph related to the uncertainty, the paragraph may include an explanation of the change in reporting standards.

## II. Proposed Amendments to Auditing Standards

### AS 1205, *Part of the Audit Performed by Other Independent Auditors* (currently AU sec. 543, *Part of Audit Performed by Other Independent Auditors*)

* * *

.07 When the principal auditor decides that he will make reference to the audit of the other auditor, his report should indicate clearly, in ~~both the introductory, scope and opinion paragraphs~~ the Opinion on the Financial Statements and Basis for Opinion sections, the division of responsibility as between that portion of the financial statements covered by his own audit and that covered by the audit of the other auditor. The report should disclose the magnitude of the portion of the financial statements audited by the other auditor. This may be done by stating the dollar amounts or percentages of one or more of the following: total assets, total revenues, or other appropriate criteria, whichever most clearly reveals the portion of the financial statements audited by the other auditor. The other auditor may be named but only with his express permission and provided his report is presented together with that of the principal auditor.[3]

* * *

.09 An example of appropriate reporting by the principal auditor indicating the division of responsibility when he makes reference to the audit of the other auditor follows:

Report of Independent Registered Public Accounting Firm

To the shareholders and the board of directors of X Company

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheet of X Company (the "Company") and subsidiaries as of December 31, 20...., and the related consolidated statements of income and retained earnings and cash flows for the year then ended, and the related notes [*and schedules*] (collectively referred to as the "financial statements"). In our opinion, based on our audit and the report of the other auditors, the consolidated financial statements ~~referred to above~~ present fairly, in all material respects, the financial position of ~~X~~ the Company as of [at] December 31, 20...., and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

We did not audit the financial statements of B Company, a wholly-owned subsidiary, which statements reflect total assets and revenues constituting 20 percent and 22 percent, respectively, of the related consolidated totals. Those statements were audited by other auditors whose report has been furnished to us, and our opinion, insofar as it relates to the amounts included for B Company, is based solely on the report of the other auditors.

*Basis for Opinion*

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit~~s~~. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB ~~Public Company Accounting Oversight Board (United States)~~. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audit included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. ~~An audit~~ Such procedures ~~includes~~ include examining, on a test basis, evidence ~~supporting~~ regarding the amounts and disclosures in the financial statements. ~~An~~ Our audit also ~~includes~~ ~~assessing~~ included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements ~~presentation~~. We believe that our audit and the report of the other auditors provide a reasonable basis for our opinion.

Critical Audit Matters [if applicable]

*[Include critical audit matters]*

[*Signature*]

We have served as the Company's auditor since [*year*].

[*City and State or Country*]

[*Date*]

When two or more auditors in addition to the principal auditor participate in the audit, the percentages covered by the other auditors may be stated in the aggregate.

* * *

**Other Auditor's Report Departs From ~~Standard~~ the Auditor's Unqualified Report**

.15 If the report of the other auditor is other than ~~a standard~~ an auditor's unqualified report, the principal auditor should decide whether the reason for the departure from the ~~standard~~ auditor's unqualified report is of such nature and significance in relation to the financial statements on which the principal auditor is reporting that it would require recognition in his own report. If the reason for the departure is not material in relation to such financial statements and the other auditor's report is not presented, the principal auditor need not make reference in his report to such departure. If the other auditor's report is presented, the principal auditor may wish to make reference to such departure and its disposition.

**Restated Financial Statements of Prior Years Following a Pooling of Interests**

.16 Following a pooling-of-interests transaction, an auditor may be asked to report on restated financial statements for one or more prior years when other auditors have audited one or more of the entities included in such financial statements. In some of these situations the auditor may decide that he has not audited a sufficient portion of the financial statements for such prior year or years to enable him to serve as principal auditor (*see* paragraph .02). Also, in such cases, it often is not possible or it may not be appropriate or necessary for the auditor to satisfy himself with respect to the restated financial statements. In these circumstances it may be appropriate for him to express his opinion solely with respect to the combining of such statements; however, no opinion should be expressed unless the auditor has audited the statements of at least one of the entities included in the restatement for at least the latest period presented. The following is an illustration of appropriate reporting on such combination that can be presented in an additional paragraph of the auditor's report following the opinion paragraph ~~standard introductory, scope and opinion paragraphs~~ covering the consolidated financial statements for the current year:[*]

* * *

**AS 1210 (currently AU sec. 336), *Using the Work of a Specialist***

* * *

**Effect of the Specialist's Work on the Auditor's Report**

.13 If the auditor determines that the specialist's findings support the related assertions in the financial statements, he or she reasonably may conclude that sufficient appropriate evidential matter has been obtained. If there is a material difference between the specialist's findings and the assertions in the financial statements, he or she should apply additional procedures. If after applying any additional procedures that might be appropriate the auditor is unable to resolve the matter, the auditor should obtain the opinion of another specialist, unless it appears to the auditor that the matter cannot be resolved. A matter that has not been resolved ordinarily will cause the auditor to conclude that he or she should qualify the opinion or disclaim an opinion because the inability to obtain sufficient appropriate evidential matter as to an assertion of material significance in the financial statements constitutes a scope limitation. (*See* paragraphs .05~~22~~ and .06~~23~~ of AS 3105~~1~~, ~~*Reports on Audited Financial Statements*~~ *Departures from Unqualified Opinions and Other Reporting Circumstances*.)

.14 The auditor may conclude after performing additional procedures, including possibly obtaining the opinion of another specialist, that the assertions in the financial statements are not in conformity with GAAP. In that event, the auditor should express a qualified or adverse opinion. (*See* AS 3105~~1~~.18~~35~~, .19~~36~~, and .24~~41~~.)

**Reference to the Specialist in the Auditor's Report**

.15 ~~Except as discussed in paragraph .16 the auditor should not refer to the work or findings of the specialist. Such a reference might be misunderstood to be a qualification of the auditor's opinion or a division of responsibility, neither of which is intended. Further, there may be an inference that the auditor making such reference performed a more thorough audit than an auditor not making such reference.~~ Reference to the use of a specialist may be made in the auditor's report in the following situations:

a. *Critical Audit Matters*—If such a reference will facilitate an understanding of the matter, the principal considerations that led the auditor to determine that the matter was a critical audit matter, or how the critical audit matter was addressed in the audit;[7] or

b. *Explanatory language or departure from an unqualified opinion*—If such a reference will facilitate an understanding of the reason for the explanatory paragraph or departure from an unqualified opinion.

Otherwise the auditor should not refer to the work or findings of the specialist in the auditor's report.

[7] Critical audit matters are described in AS 3101, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*.

~~.16 The auditor may, as a result of the report or findings of the specialist, decide to add explanatory language to his or her standard report or depart from an unqualified opinion. Reference to and identification of the specialist may be made in the auditor's report if the auditor believes such reference will facilitate an understanding of the reason for the explanatory paragraph or the departure from the unqualified opinion.~~

* * *

**AS 1220 (currently Auditing Standard No. 7), *Engagement Quality Review***

* * *

.10 In an audit, the engagement quality reviewer should:

* * *

j. Based on the procedures required by this standard, evaluate the engagement team's determination, communication, and documentation of critical audit matters in accordance with AS 3101, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*.

* * *

**AS 1301 (currently Auditing Standard No. 16), *Communications with Audit Committees***

* * *

**~~Departure from the Auditor's Standard Report~~ The Auditor's Report**

.21 The auditor should ~~communicate~~ provide to and discuss with the audit committee ~~the following matters related to~~ a draft of the auditor's report~~:~~.

~~a. When the auditor expects to modify the opinion in the auditor's report, the reasons for the modification, and the wording of the report; and~~

b. ~~When the auditor expects to include explanatory language or an explanatory paragraph in the auditor's report, the reasons for the explanatory language or paragraph, and the wording of the explanatory language or paragraph.~~

* * *

Note: Difficulties encountered by the auditor during the audit could represent a scope limitation,[39] which may result in the auditor modifying the auditor's opinion or withdrawing from the engagement.

[39] *See* paragraphs .05~~22~~-.15~~32~~ of AS 3105~~1~~, ~~*Reports on Audited Financial Statements*~~ *Departures from Unqualified Opinions and Other Reporting Circumstances,* for a discussion of scope limitations.

* * *

**AS 2201 (currently Auditing Standard No. 5),** ***An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements***

* * *

## Reporting on Internal Control

.85 The auditor's report on the audit of internal control over financial reporting ~~must~~ includes the following elements[18] -

*Title*

.85A The auditor's report must include the title, "Report of Independent Registered Public Accounting Firm."

*Addressee*

.85B The auditor's report must be addressed to the shareholders and the board of directors, or equivalents for companies not organized as corporations. The auditor's report may include additional addressees.

*Opinion on the Internal Control over Financial Reporting*

.85C The first section of the auditor's report on the audit of internal control over financial reporting must include the section title "Opinion on Internal Control over Financial Reporting" and the following elements-

~~a. A title that includes the word *independent*;~~

a. The name of the company whose internal control over financial reporting was audited; and

b. ~~k.~~ The auditor's opinion on whether the company maintained, in all material respects, effective internal control over financial reporting as of the specified date, based on the control criteria.

*Basis for Opinion*

.85D The second section of the auditor's report on the audit of internal control over financial reporting must include the section title "Basis for Opinion" and the following elements:

a~~b~~. A statement that management is responsible for maintaining effective internal control over financial reporting and for assessing the effectiveness of internal control over financial reporting;

b~~c~~. An identification of management's report on internal control;

c~~d~~. A statement that the auditor's responsibility is to express an opinion on the company's internal control over financial reporting based on his or her audit;

d~~e~~. A definition of internal control over financial reporting as stated in paragraph .A5;

e. A statement that the auditor is a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and is required to be independent with respect to the company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB;

f. A statement that the audit was conducted in accordance with the standards of the PCAOB ~~Public Company Accounting Oversight Board (United States)~~;

g. A statement that the standards of the PCAOB ~~Public Company Accounting Oversight Board~~ require that the auditor plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects;

h. A statement that an audit includes obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as the auditor considered necessary in the circumstances;

i. A statement that the auditor believes the audit provides a reasonable basis for his or her opinion; and

j. A paragraph stating that, because of inherent limitations, internal control over financial reporting may not prevent or detect misstatements and that projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

*Signature, Tenure, Location, and Date*

.85E The auditor's report must include the following elements:

a~~l~~. The ~~manual or printed~~ signature of the auditor's firm;[18A]

b. A statement containing the year the auditor began serving consecutively as the company's auditor;

> Note: For purposes of this subparagraph, references to the auditor include other firms that the auditor's firm has acquired or that have merged with the auditor's firm. If there is uncertainty as to the year the auditor began serving consecutively as the company's auditor, such as due to firm or company mergers, acquisitions, or changes in ownership structure, the auditor should state that the auditor is uncertain as to the year the auditor became the company's auditor and provide the earliest year of which the auditor has knowledge.

c~~m~~. The city and state (or city and country, in the case of non-U.S. auditors) from which the auditor's report has been issued; and

d~~n~~. The date of the audit report.

[18A] *See* Regulation S-X Rule 2-02(a).

* * *

.87 The following example combined report expressing an unqualified opinion on financial statements and an unqualified opinion on internal control over financial reporting illustrates the report elements described in this section.

Report of Independent Registered Public Accounting Firm

To the shareholders and the board of directors of W Company

[~~*Introductory paragraph*~~] *Opinions on the Financial Statements and Internal Control over Financial Reporting*

We have audited the accompanying balance sheets of W Company (the "Company") as of December 31, 20X8 and 20X7, and the related statements of income, stockholders' equity and comprehensive income, and cash flows for each of the years in the three-year period ended December 31, 20X8, and the related notes [*and schedules*] (collectively referred to as the "financial statements"). We also have audited ~~W~~ the Company's internal control over financial reporting as of December 31, 20X8, based on [*Identify control criteria, for example, "criteria established in Internal Control - Integrated Framework: (20XX) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO)."*].

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of ~~W~~ the Company as of December 31, 20X8 and 20X7, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 20X8 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, ~~W~~ the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 20X8, based on [*Identify control criteria, for example, "criteria established in Internal Control - Integrated Framework: (20XX) issued by ~~the Committee of Sponsoring Organizations of the Treadway Commission (COSO)~~."*].

Basis for Opinion

~~[*Scope paragraph*]~~

~~W~~ The Company's management is responsible for these financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying [title of management's report]. Our responsibility is to express an opinion on ~~these~~ the Company's financial statements and an opinion on the ~~c~~Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB ~~Public Company Accounting Oversight Board (United States)~~. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the financial statements included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures include examining, on a test basis, evidence ~~supporting~~ regarding the amounts and disclosures in the financial statements.~~,~~ Our audits also included evaluating ~~assessing~~ the accounting principles used and significant estimates made by management, ~~and~~ as well as evaluating the overall ~~financial statement~~ presentation of the financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

[*Definition paragraph*]

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or

timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

[*Inherent limitations paragraph*]

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Critical Audit Matters [if applicable]

*[Include critical audit matters]*

[*Signature*]

We have served as the Company's auditor since [*year*].

[*City and State or Country*]

[*Date*]

.88 If the auditor chooses to issue a separate report on internal control over financial reporting, he or she should add the following paragraph (immediately following the opinion paragraph) to the auditor's report on the financial statements –

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB"), the Company's internal control over financial reporting as of December 31, 20X8, based on [ *identify control criteria* ] and our report dated [ *date of report, which should be the same as the date of the report on the financial statements* ] expressed [ *include nature of opinion* ].

The auditor also should add the following paragraph (immediately following the opinion paragraph) to the report on internal control over financial reporting –

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB"), the [ *identify financial statements* ] of the Company and our report dated [ *date of report, which should be the same as the date of the report on the effectiveness of internal control over financial reporting* ] expressed [ *include nature of opinion* ].

* * *

.B16 In situations in which the SEC allows management to limit its assessment of internal control over financial reporting by excluding certain entities, the auditor may limit the audit in the same manner. In these situations, the auditor's opinion would not be affected by a scope limitation. However, the auditor should include, either in an additional explanatory paragraph or as part of the ~~scope paragraph~~ Basis for Opinion section in his or her report, a disclosure similar to management's regarding the exclusion of an entity from the scope of both management's assessment and the auditor's audit of internal control over financial reporting. Additionally, the auditor should evaluate the reasonableness of management's conclusion that the situation meets the criteria of the SEC's allowed exclusion and the appropriateness of any required disclosure related to such a limitation. If the auditor believes that management's disclosure about the limitation requires modification, the auditor should follow the same communication responsibilities that are described in paragraphs .29 through .32 of AS 4105, *Reviews of Interim Financial Information* (currently AU sec. 722, *Interim Financial Information*). If management and the audit committee do not respond appropriately, in addition to fulfilling those responsibilities, the auditor should modify his or her report on the audit of internal control over financial reporting to include an explanatory paragraph describing the reasons why the auditor believes management's disclosure requires modification.

* * *

.C4 When disclaiming an opinion because of a scope limitation, the auditor should state that the scope of the audit was not sufficient to warrant the expression of an opinion and, in a separate paragraph or paragraphs, the substantive reasons for the disclaimer. The auditor should not identify the procedures that were performed nor include the statements describing the characteristics of an audit of internal control over financial reporting (paragraph .85D g, h, and i); to do so might overshadow the disclaimer.

* * *

**AS 2405 (currently AU sec. 317), *Illegal Acts by Clients***

* * *

.21 The auditor may be unable to determine whether an act is illegal because of limitations imposed by the circumstances rather than by the client or because of uncertainty associated with interpretation of applicable laws or regulations or surrounding facts. In these circumstances, the auditor should consider the effect on his report.[2]

[2] *See* AS 3105~~1~~, ~~*Reports on Audited Financial Statements*~~ *Departures from Unqualified Opinions and Other Reporting Circumstances*.

* * *

**AS 2410 (currently Auditing Standard No. 18), *Related Parties***

* * *

***Assertions That Transactions with Related Parties Were Conducted on Terms Equivalent to Those Prevailing in Arm's-Length Transactions***

.18 If the financial statements include a statement by management that transactions with related parties were conducted on terms equivalent to those prevailing in an arm's-length transaction, the auditor should determine whether the evidence obtained supports or contradicts management's assertion. If the auditor is unable to obtain sufficient appropriate audit evidence to substantiate management's assertion, and if management does not agree to modify the disclosure, the auditor should express a qualified or adverse opinion.[20]

[20] *See* AS 2805.06l, which requires the auditor to obtain written representations from management if the financial statements include such an assertion. Representations from management alone are not sufficient appropriate audit evidence. *See also* paragraphs .18~~35~~–.19~~36~~ of AS 3105~~1~~, ~~*Reports on Audited Financial Statements*~~ *Departures from Unqualified Opinions and Other Reporting Circumstances*.

* * *

**AS 2415, *Consideration of an Entity's Ability to Continue as a Going Concern* (currently AU sec. 341, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*)**

* * *

.03 The auditor should evaluate whether there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time in the following manner:

* * *

*c.* After the auditor has evaluated management's plans, he concludes whether he has substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time. If the auditor concludes there is substantial doubt, he should (1) consider the adequacy of disclosure about the entity's possible inability to continue as a going concern for a reasonable period of time, and (2) include an explanatory paragraph, including an appropriate title (immediately following the opinion paragraph), in his audit report to reflect his conclusion. If the auditor concludes that substantial doubt does not exist, he should consider the need for disclosure.

.12 If, after considering identified conditions and events and management's plans, the auditor concludes that substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time remains, the audit report should include an explanatory paragraph, including an appropriate title (immediately following the opinion paragraph), to reflect that conclusion.[4] The auditor's conclusion about the entity's ability to continue as a going concern should be expressed through the use of the phrase "substantial doubt about its (the entity's) ability to continue as a going concern" [or similar wording that includes the terms substantial doubt *and* going concern] as illustrated in paragraph .13.

[4] The inclusion of an explanatory paragraph (immediately following the opinion paragraph) in the auditor's report contemplated by this section should serve adequately to inform the users of the financial statements. Nothing in this section, however, is intended to preclude an auditor from declining to express an opinion in cases involving uncertainties. If he disclaims an opinion, the uncertainties and their possible effects on the financial statements should be disclosed in an appropriate manner (*see* paragraph .10), and the auditor's report should give all the substantive reasons for his disclaimer of opinion (*see* paragraphs .44-.47 of AS 3105~~1~~, ~~*Reports on Audited Financial Statements*~~ *Departures from Unqualified Opinions and Other Reporting Circumstances*).

.13 An example follows of an explanatory paragraph (immediately following the opinion paragraph) in the auditor's report describing an uncertainty about the entity's ability to continue as a going concern for a reasonable period of time.[5]

[*Appropriate Title*]

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note X to the financial statements, the Company has suffered recurring losses from operations and has a net capital deficiency that raise substantial doubt about its ability to continue as a going concern. Management's plans in regard to these matters are also described in Note X. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

.14 If the auditor concludes that the entity's disclosures with respect to the entity's ability to continue as a going concern for a reasonable period of time are inadequate, a departure from generally accepted accounting principles exists. This may result in either a qualified (except for) or an adverse opinion. Reporting guidance for such situations is provided in AS 3105~~1, *Reports on Audited Financial Statements*~~.

.15 Substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time that arose in the current period does not imply that a basis for such doubt existed in the prior period and, therefore, should not affect the auditor's report on the financial statements of the prior period that are presented on a comparative basis. When financial statements of one or more prior periods are presented on a comparative basis with financial statements of the current period, reporting guidance is provided in AS 3105~~1~~.

* * *

**AS 2503 (currently AU sec. 332), *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities***

* * *

.32 There may be a time lag in reporting between the date of the financial statements of the investor and that of the investee. A time lag in reporting should be consistent from period to period. If a time lag between the date of the entity's financial statements and those of the investee has a material effect on the entity's financial statements, the auditor should determine whether the entity's management has properly considered the lack of comparability. The effect may be material, for example, because the time lag is not consistent with the prior period in comparative statements or because a significant transaction occurred during the time lag. If a change in time lag occurs that has a material effect on the investor's financial statements, an explanatory paragraph, including an appropriate title, should be added to the auditor's report because of the change in reporting period.[15]

[15] ~~*See* paragraphs .16–.18 of AS 3101, *Reports on Audited Financial Statements*~~ AS 2820 (currently Auditing Standard No. 6), *Evaluating Consistency of Financial Statements.*

* * *

**AS 2505 (currently AU sec. 337), *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments***

* * *

.13 A lawyer's refusal to furnish the information requested in an inquiry letter either in writing or orally (*see* paragraphs .09 and .10) would be a limitation on the scope of the audit sufficient to preclude an unqualified opinion (*see* paragraphs .05~~22~~ and .06~~23~~ of AS 3105~~1~~, ~~*Reports on Audited Financial Statements*~~ *Departures from Unqualified Opinions and Other Reporting Circumstances*).[7] A lawyer's response to such an inquiry and the procedures set forth in paragraph .05 provide the auditor with sufficient evidential matter to satisfy himself concerning the accounting for and reporting of pending and threatened litigation, claims and assessments. The auditor obtains sufficient evidential matter to satisfy himself concerning reporting for those unasserted claims and assessments required to be disclosed in financial statements from the foregoing procedures and the lawyer's specific acknowledgement of his responsibility to his client in respect of disclosure obligations (*see* paragraph .09*g*). This approach with respect to unasserted claims and assessments is necessitated by the public interest in protecting the confidentiality of lawyer-client communications.

.14 A lawyer may be unable to respond concerning the likelihood of an unfavorable outcome of litigation, claims, and assessments or the amount or range of potential loss, because of inherent uncertainties. Factors influencing the likelihood of an unfavorable outcome may sometimes not be within a lawyer's competence to judge; historical experience of the entity in similar litigation or the experience of other entities may not be relevant or available; and the amount of the possible loss frequently may vary widely at different stages of litigation. Consequently, a lawyer may not be able to form a conclusion with respect to such matters. In such circumstances, the auditor ordinarily will conclude that the financial statements are affected by an uncertainty concerning the outcome of a future event which is not susceptible of reasonable estimation, and should look to the guidance in AS 3105~~1~~.28~~45~~ through .32~~49~~ to determine the effect, if any, of the lawyer's response on the auditor's report.

* * *

**AS 2510, *Auditing Inventories* (currently AU sec. 331, *Inventories*)**

* * *

.15 For a discussion of the circumstances relating to receivables and inventories affecting the independent auditor's report, see paragraphs .07~~24~~ and .51~~67~~ of AS

* * *

**AS 2705 (currently AU sec. 558), *Required Supplementary Information***

* * *

.03 Some entities may voluntarily include, in documents containing audited financial statements, certain supplementary information that is required of other entities. When an entity voluntarily includes such information as a supplement to the financial statements or in an unaudited note to the financial statements, the provisions of this section are applicable unless either the entity indicates that the auditor has not applied the procedures described in this section or the auditor includes in an explanatory paragraph, including an appropriate title, in his report on the audited financial statements a disclaimer on the information. The following is an example of a disclaimer an auditor might use in these circumstances:

> [*Appropriate Title*]
>
> The [*identify the supplementary information*] on page XX (or in Note XX) is not a required part of the basic financial statements, and we did not audit or apply limited procedures to such information and do not express any assurances on such information.

* * *

.08 Since the supplementary information is not audited and is not a required part of the basic financial statements, the auditor need not add an explanatory paragraph to the report on the audited financial statements to refer to the supplementary information or to his or her limited procedures, except in any of the following circumstances:[7] (*a*) the supplementary information that GAAP requires to be presented in the circumstances is omitted; (*b*) the auditor has concluded that the measurement or presentation of the supplementary information departs materially from prescribed guidelines; (*c*) the auditor is unable to complete the prescribed procedures; (*d*) the auditor is unable to remove substantial doubts about whether the supplementary information conforms to prescribed guidelines. Since the required supplementary information does not change the standards of financial accounting and reporting used for the preparation of the entity's basic financial statements, the circumstances described above do not affect the auditor's opinion on the fairness of presentation of such financial statements in conformity with generally accepted accounting principles. Furthermore, the auditor need not present the supplementary information if it is omitted by the entity. The following are examples of additional explanatory paragraphs, including appropriate titles, an auditor might use in these circumstances.

* * *

**AS 2710 (currently AU sec. 550), *Other Information in Documents Containing Audited Financial Statements***

* * *

.04 Other information in a document may be relevant to an audit performed by an independent auditor or to the continuing propriety of his report. The auditor's responsibility with respect to information in a document does not extend beyond the financial information identified in his report, and the auditor has no obligation to perform any procedures to corroborate other information contained in a document. However, he should read the other information and consider whether such information, or the manner of its presentation, is materially inconsistent with information, or the manner of its presentation, appearing in the financial statements.[2] If the auditor concludes that there is a material inconsistency, he should determine whether the financial statements, his report, or both require revision. If he concludes that they do not require revision, he should request the client to revise the other information. If the other information is not revised to eliminate the material inconsistency, he should communicate the material inconsistency to the audit committee and consider other actions, such as revising his report to include an explanatory paragraph, including an appropriate title, describing the material inconsistency, withholding the use of his report in the document, and withdrawing from the engagement. The action he takes will depend on the particular circumstances and the significance of the inconsistency in the other information.

* * *

**AS 2801 (currently AU sec. 560), *Subsequent Events***

* * *

.09 Occasionally, a subsequent event of the second type has such a material impact on the entity that the auditor may wish to include in his report an ~~explanatory~~ emphasis paragraph directing the reader's attention to the event and its effects. (*See* paragraph .19 of AS 3101, ~~*Reports on Audited Financial Statements*,~~ *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*)

* * *

**AS 2805 (currently AU sec. 333), *Management Representations***

* * *

[7] If the financial statements contain material misstatements, AS 3105~~1~~, ~~*Reports on Audited Financial Statements*~~ *Departures from Unqualified Opinions and Other Reporting Circumstances*, indicates that the auditor should issue a qualified or an adverse opinion on the financial statements. AS 3105~~1~~.18~~35~~ discusses situations in which the financial statements are materially affected by a departure from the applicable financial reporting framework.

* * *

.31

* * *

Note: According to AS 3105~~1~~, if the financial statements, including the accompanying notes, fail to disclose information that is required by the applicable financial reporting framework, the auditor should express a qualified or adverse opinion and should provide the information in the report, if practicable, unless its omission from the report is recognized as appropriate by a specific auditing standard.[18]

[18] AS 3105~~1~~.24~~41~~–.27~~44~~.

* * *

.35 If the auditor has not obtained sufficient appropriate audit evidence about a relevant assertion or has substantial doubt about a relevant assertion, the auditor should perform procedures to obtain further audit evidence to address the matter. If the auditor is unable to obtain sufficient appropriate audit evidence to have a reasonable basis to conclude about whether the financial statements as a whole are free of material misstatement, AS 3105~~1~~ indicates that the auditor should express a qualified opinion or a disclaimer of opinion.[21]

[21] AS 3105~~1~~.05~~22~~–.17~~34~~ contains requirements regarding audit scope limitations.

* * *

**Appendix B**

[1] If the financial statements contain material misstatements, AS 3105~~1~~, ~~*Reports on Audited Financial Statements*~~ *Departures from Unqualified Opinions and Other Reporting Circumstances*, indicates that the auditor should issue a qualified or an adverse opinion on the financial statements. AS 3105~~1~~.18~~35~~ discusses situations in which the financial statements are materially affected by a departure from the applicable financial reporting framework.

* * *

**Appendix C**

[2] Denial of access to information might constitute a limitation on the scope of the audit that requires the auditor to qualify or disclaim an opinion. (*See* AS 2201, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements,* and AS 3105~~1~~, ~~*Reports on Audited Financial Statements*~~ *Departures from Unqualified Opinions and Other Reporting Circumstances*.)

* * *

**AS 2815, *The Meaning of "Present Fairly in Conformity with Generally Accepted Accounting Principles"* (currently AU sec. 411, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles*)**

.01 An independent auditor's report contains an opinion as to whether the financial statements present fairly, in all material respects, an entity's financial position, results of operations, and cash flows in conformity with generally accepted accounting principles. An identification of the applicable financial reporting framework ~~country of origin of those generally accepted accounting principles also~~ is required (*see* ~~paragraph .08*h* of AS 3101~~paragraph .08e of the AS 3101, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*).

The purpose of this section is to explain the meaning of "present fairly" as used in the phrase "present fairly . . . in conformity with generally accepted accounting principles." In applying this section, the auditor should look to the requirements of the Securities and Exchange Commission for the company under audit with respect to the accounting principles applicable to that company.

* * *

[1] The concept of materiality is inherent in the auditor's judgments. That concept involves qualitative as well as quantitative judgments (*see* AS 2105 (currently Auditing Standard No. 11), *Consideration of Materiality in Planning and Performing an Audit*, and AS 3105~~1~~.19~~36~~).

* * *

**AS 2820 (currently Auditing Standard No. 6), *Evaluating Consistency of Financial Statements***

* * *

.06 The auditor should evaluate and report on a change in accounting estimate effected by a change in accounting principle like other changes in accounting principle.[5] In addition, the auditor should recognize a change in the reporting entity[6] by including an explanatory paragraph, including an appropriate title, in the auditor's report, unless the change in reporting entity results from a transaction or event. A change in reporting entity that results from a transaction or event, such as the creation, cessation, or complete or partial purchase or disposition of a subsidiary or other business unit does not require recognition in the auditor's report.

* * *

.08 A change in accounting principle that has a material effect on the financial statements should be recognized in the auditor's report on the audited financial statements. If the auditor concludes that the criteria in paragraph .07 have been met, the auditor should add an explanatory paragraph, including an appropriate title, to the auditor's report, as described in ~~AS 3101, *Reports on Audited Financial Statements*~~ paragraphs .12-.15 of this standard. If those criteria are not met, the auditor should treat this accounting change as a departure from generally accepted accounting principles and, if the effect of the change in accounting principle is material, issue a qualified or an adverse opinion ~~address the matter as described in AS 3101~~.[8A]

> Note: If a company's financial statements contain an investment accounted for by the equity method, the auditor's evaluation of consistency should include consideration of the investee. If the investee makes a change in accounting principle that is material to the investing company's financial statements, the auditor should add an explanatory paragraph, including an appropriate title (immediately following the opinion paragraph), to the auditor's report, as described in ~~AS 3101~~ paragraphs .12-.15.

[8A] AS 3105, *Departures from Unqualified Opinions and Other Reporting Circumstances*, describes reporting requirements related to a qualified or an adverse opinion.

**Correction of a Material Misstatement in Previously Issued Financial Statements**

.09 The correction of a material misstatement in previously issued financial statements should be recognized in the auditor's report on the audited financial statements through the addition of an explanatory paragraph, including an appropriate title, as described in ~~AS 3101~~ paragraphs .16 and.17 of this standard.

.10 The accounting pronouncements generally require certain disclosures relating to restatements to correct misstatements in previously issued financial statements. If the financial statement disclosures are not adequate, the auditor should address the inadequacy of disclosure as described in paragraph .31 of AS 2810, *Evaluating Audit Results,* and AS 3105~~1~~, *Departures from Unqualified Opinions and Other Reporting Circumstances*.

**Change in Classification**

.11 Changes in classification in previously issued financial statements do not require recognition in the auditor's report, unless the change represents the correction of a material misstatement or a change in accounting principle. Accordingly, the auditor should evaluate a material change in financial statement classification and the related disclosure to determine whether such a change also is a change in accounting principle or a correction of a material misstatement. For example, certain reclassifications in previously issued financial statements, such as reclassifications of debt from long-term to short-term or reclassifications of cash flows from the operating activities category to the financing activities category, might occur because those items were incorrectly classified in the previously issued financial statements. In such situations, the reclassification also is the correction of a misstatement. If the auditor determines that the reclassification is a change in accounting principle, he or she should address the matter as described in paragraphs .07,~~ and~~ .08, and ~~AS 3101~~ .12-.15. If the auditor determines that the reclassification is a correction of a material misstatement in previously issued financial statements, he or she should address the matter as described in paragraphs .09,~~ and~~ .10, ~~and~~ ~~AS 3101~~ .16 and.17.

**Reporting on Consistency of Financial Statements**

**Change in Accounting Principle**

.12 A change in accounting principle that has a material effect on the financial statements should be recognized in the auditor's report on the audited financial statements through the addition of an explanatory paragraph, including an appropriate title (immediately following the opinion paragraph). The explanatory paragraph should include identification of the nature of the change and a reference to the note disclosure describing the change.

.13 The following is an example of an explanatory paragraph for a change in accounting principle resulting from the adoption of a new accounting pronouncement:

> [*Appropriate Title*]
>
> As discussed in Note X to the financial statements, the Company has changed its method of accounting for [*describe accounting method changes*] in [*year(s) of financial statements that reflect the accounting method change*] due to the adoption of [*name of accounting pronouncement*].

.14 The following is an example of an explanatory paragraph for a change in accounting principle other than a change due to the adoption of a new accounting pronouncement:

> [*Appropriate Title*]
>
> As discussed in Note X to the financial statements, the Company has elected to change its method of accounting for [*describe accounting method changes*] in [*year(s) of financial statements that reflect the accounting method change*].

.15 The explanatory paragraph relating to a change in accounting principle should be included in reports on financial statements in the year of the change and in subsequent years until the new accounting principle is applied in all periods presented. If the new accounting change is accounted for by retrospective application to the financial statements of all prior periods presented, the additional paragraph is needed only in the year of the change.

**Correction of a Material Misstatement in Previously Issued Financial Statements**

.16 Correction of a material misstatement in previously issued financial statements should be recognized in the auditor's report through the addition of an explanatory paragraph, including an appropriate title (immediately following the opinion paragraph).[10] The explanatory paragraph should include (1) a statement that the previously issued financial statements have been restated for the correction of a misstatement in the respective period and (2) a reference to the note disclosure describing the correction of the misstatement. The following is an example of an appropriate explanatory paragraph when there has been a correction of a material misstatement in previously issued financial statements:

> [*Appropriate Title*]
>
> As discussed in Note X to the financial statements, the 20X2 financial statements have been restated to correct a misstatement.

[10] AS 3105.52-53 apply when comparative financial statements are presented and the opinion on the prior-period financial statements differs from the opinion previously expressed.

.17 This type of explanatory paragraph in the auditor's report should be included in reports on financial statements when the related financial statements are restated to correct the prior material misstatement. The paragraph need not be repeated in subsequent years.

*** * ***

**AS 3110 (currently AU sec. 530), *Dating of the Independent Auditor's Report***

.06 An independent auditor may reissue his report on financial statements contained in annual reports filed with the Securities and Exchange Commission or other regulatory agencies or in a document he submits to his client or to others that contains information in addition to the client's basic financial statements subsequent to the date of his original report on the basic financial statements. An independent auditor may also be requested by his client to furnish additional copies of a previously issued report. Use of the original report date in a reissued report removes any implication that records, transactions, or events after that date have been examined or reviewed. In such cases, the independent auditor has no responsibility to make further investigation or inquiry as to events which may have occurred during the period between the original report date and the date of the release of additional reports. However, *see* AS 4101 as to an auditor's responsibility when his report is included in a registration statement filed under the Securities Act of 1933 and *see* paragraphs .<u>54</u>~~70–~~.<u>57</u>~~73~~ of AS 310<u>5</u>~~1~~, ~~*Reports on Audited Financial Statements*~~ <u>*Departures from Unqualified Opinions and Other Reporting Circumstances*</u>, for the predecessor auditor's responsibility when reissuing or consenting to the reuse of a report previously issued on the financial statements of a prior period.

*** * ***

**AS 3305 (currently AU sec. 623), *Special Reports***

.01 This section applies to auditors' reports issued in connection with the following:

*** * ***

*e.* Financial information presented in prescribed forms or schedules that require a prescribed form of auditor's reports (paragraphs .32 and .33)

<u>Note: In situations in which the auditor's reports described in this section are filed with the U.S. Securities and Exchange Commission, the auditor's report is required to include the basic elements and communication of critical audit matters, if applicable, as would be required in an unqualified auditor's reporting under AS 3101, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*. For qualified, adverse, and disclaimer of opinion reports, see requirements of AS 3105, *Departures from Unqualified Opinions and Other Reporting Circumstances*.</u>

* * *

[2] In some instances, a document containing the auditor's report may include a statement by management regarding its responsibility for the presentation of the financial statements. Nevertheless, the auditor's report should state that the financial statements are management's responsibility. However, the statement about management's responsibility should not be further elaborated upon in the auditor's ~~standard~~ report or referenced to management's report.

* * *

.06 Unless the financial statements meet the conditions for presentation in conformity with a "comprehensive basis of accounting other than generally accepted accounting principles" as defined in paragraph .04, the auditor should modify his or her report ~~use the standard form of report (*see* paragraph .08 of AS 3101, Reports on Audited Financial Statements) modified as appropriate~~ because of the departures from generally accepted accounting principles (*see* AS 3105).

* * *

.12 When expressing an opinion on one or more specified elements, accounts, or items of a financial statement, the auditor should plan and perform the audit and prepare his or her report with a view to the purpose of the engagement. ~~With the exception of the requirement in AS 3101.08*h*, t~~The standards of the PCAOB are applicable to any engagement to express an opinion on one or more specified elements, accounts, or items of a financial statement. ~~AS 3101.08*h*, which requires that the auditor's report state whether the financial statements are presented in conformity with generally accepted accounting principles, is applicable only when~~ If the specified elements, accounts, or items of a financial statement are intended to be presented in conformity with generally accepted accounting principles, the auditor's opinions, as described in AS 3101 and AS 3105, are applicable.

* * *

.14 The auditor should not express an opinion on specified elements, accounts, or items included in financial statements on which he or she has expressed an adverse opinion or disclaimed an opinion based on an audit, if such reporting would be tantamount to expressing a piecemeal opinion on the financial statements (*see* AS 3105~~1~~.48~~64~~). However, an auditor would be able to express an opinion on one or more specified elements, accounts, or items of a financial statement provided that the matters to be reported on and the related scope of the audit were not intended to and did not encompass so many elements, accounts, or items as to constitute a major portion of the financial statements. For example, it may be appropriate for an auditor to express an opinion on an entity's accounts receivable balance even if the auditor has disclaimed an opinion on the financial statements taken as a whole. However, the report on the specified element, account, or item should be presented separately from the report on the financial statements of the entity.

**Reports on One or More Specified Elements, Accounts, or Items of a Financial Statement**

.15 When an independent auditor is engaged to express an opinion on one or more specified elements, accounts, or items of a financial statement, the report should include—

* * *

b. A paragraph that—

(1) States that the specified elements, accounts, or items identified in the report were audited. If the audit was made in conjunction with an audit of the company's financial statements, the paragraph should so state and indicate the date of the auditor's report on those financial statements. Furthermore, any departure from the ~~standard~~ auditor's unqualified report on those statements should also be disclosed if considered relevant to the presentation of the specified element, account or item.

(2) States that the specified elements, accounts, or items are the responsibility of the Company's management and that the auditor is responsible for expressing an opinion on the specified elements, accounts or items based on the audit.

* * *

.17 The auditor should consider the effect that any departure, including additional explanatory language because of the circumstances discussed in AS 3101.18~~1~~, from the ~~standard~~ auditor's unqualified report on the audited financial statements might have on the report on a specified element, account, or item thereof.

* * *

.21 When an auditor's report on compliance with contractual agreements or regulatory provisions is included in the report that expresses the auditor's opinion on the financial statements, the auditor should include a paragraph, ~~after the opinion paragraph~~ in the Opinion on the Financial Statements section, that provides negative assurance relative to compliance with the applicable covenants of the agreement, insofar as they relate to accounting matters, and that specifies the negative assurance is being given in connection with the audit of the financial statements. The auditor should also ordinarily state that the audit was not directed primarily toward obtaining knowledge regarding compliance. In addition, the report should include a paragraph that includes a description and source of any significant interpretations made by the entity's management as discussed in paragraph .20d as well as a paragraph that restricts the use of the report to the specified parties as discussed in paragraph .20e. Following are examples of reports that might be issued:

* * *

.31 Certain circumstances, while not affecting the auditor's unqualified opinion, may require that the auditor add additional explanatory language to the special report. These circumstances include the following:

- *a.* *Lack of Consistency in Accounting Principles.* If there has been a change in accounting principles or in the method of their application,[35] the auditor should add an explanatory paragraph, including an appropriate title, to the report (immediately following the opinion paragraph) that describes the change and refers to the note to the financial presentation (or specified elements, accounts, or items thereof) that discusses the change and its effect thereon [36] if the accounting change is considered relevant to the presentation. Guidance on reporting in this situation is contained in ~~AS 3101.16 through .18~~ AS 2820 (currently Auditing Standard No. 6), *Evaluating Consistency of Financial Statements*.

- *b.* *Going Concern* Uncertainties. If the auditor has substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time not to exceed one year beyond the date of the financial statement, the auditor should add an explanatory paragraph, including an appropriate title, after the opinion paragraph of the report only if the auditor's substantial doubt is relevant to the presentation.[39]

- *c.* *Other Auditors.* When the auditor decides to make reference to the report of another auditor as a basis, in part, for his or her opinion, the auditor should disclose that fact in the introductory paragraph of the report and should refer to the report of the other auditors in expressing his or her opinion. Guidance on reporting in this situation is contained in ~~section AS 3101.12 and .13~~ AS 1205, *Part of the Audit Performed by Other Independent Auditors* (currently AU sec, 543, *Part of Audit Performed by Other Independent Auditors*).

*d. Comparative Financial Statements (or Specified Elements, Accounts, or Items Thereof).* If the auditor expresses an opinion on prior-period financial statements (or specified elements, accounts, or items thereof) that is different from the opinion he or she previously expressed on that same information, the auditor should disclose all of the substantive reasons for the different opinion in a separate ~~explanatory~~ paragraph

~~preceding~~ immediately following the opinion paragraph of the report. Guidance on reporting in this situation is contained in AS 3105~~1~~.52~~68~~ and .53~~69~~.

* * *

**AS 3310, *Special Reports on Regulated Companies* (currently AU sec. 544, *Lack of Conformity With Generally Accepted Accounting Principles*)**

* * *

.02 The basic postulates and broad principles of accounting comprehended in the term "generally accepted accounting principles" which pertain to business enterprises in general apply also to companies whose accounting practices are prescribed by governmental regulatory authorities or commissions. (For example, public utilities and insurance companies.) Accordingly, the requirement in paragraph .08e~~*h*~~ of AS 3101, ~~*Reports on Audited Financial Statements*~~ *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*, is equally applicable to opinions on financial statements of such regulated companies presented for purposes other than filings with their respective supervisory agencies; and material variances from generally accepted accounting principles, and their effects, should be dealt with in the independent auditor's report in the same manner followed for companies which are not regulated.[1] Ordinarily, this will require either a qualified or an adverse opinion on such statements. An adverse opinion may be accompanied by an opinion on supplementary data which are presented in conformity with generally accepted accounting principles.

* * *

.04 When financial statements of a regulated entity are prepared in accordance with a basis of accounting prescribed by one or more regulatory agencies or the financial reporting provisions of another agency, the independent auditor may also be requested to report on their fair presentation in conformity with such prescribed basis of accounting in presentations for distribution in other than filings with the entity's regulatory agency. In those circumstances, the auditor should ~~use the standard form of report (*see* AS 3101.08),~~ ~~modified~~ modify the auditor's report as appropriate (*see* paragraphs .18-.43 of AS 3105~~1.35–.60~~, *Departures from Unqualified Opinions and Other Reporting Circumstances*) because of the departures from generally accepted accounting principles, and then, in an additional paragraph to the report, express an opinion on whether the financial statements are presented in conformity with the prescribed basis of accounting.

* * *

**AS 3315 (currently AU sec. 552), *Reporting on Condensed Financial Statement and Selected Financial Data***

* * *

.02 In reporting on condensed financial statements or selected financial data in circumstances other than those described in paragraph .01, the auditor should follow the guidance in paragraphs .24~~41~~ through .27~~44~~ of AS 3105~~1~~, ~~*Reports on Audited Financial Statements*~~ *Departures from Unqualified Opinions and Other Reporting Circumstances*, AS 3305, *Special Reports*, or other applicable PCAOB standards.[2]

* * *

.06 The following is an example of wording that an auditor may use in the circumstances described in paragraph .01(*a*) to report on condensed financial statements that are derived from financial statements that he or she has audited and on which he or she has issued ~~a standard~~ an auditor's unqualified report:

Report of Independent Registered Public Accounting Firm

> We have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB"), the consolidated balance sheet of X Company and subsidiaries as of December 31, 20X0, and the related consolidated statements of income, retained earnings, and cash flows for the year then ended (not presented herein); and in our report dated February 15, 20X1, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated financial statements is fairly stated, in all material respects, in relation to the consolidated financial statements from which it has been derived.

.07 A client might make a statement in a client-prepared document that names the auditor and also states that condensed financial statements have been derived from audited financial statements. Such a statement does not, in itself, require the auditor to report on the condensed financial statements, provided that they are included in a document that contains audited financial statements (or that incorporates such statements by reference to information filed with a regulatory agency). However, if such a statement is made in a client-prepared document of a public entity that is required to file, at least annually, complete audited financial statements with a regulatory agency and that document does not include audited financial statements (or does not incorporate such statements by reference to information filed with a regulatory agency), ~~[6]~~ the auditor should request that the client either (*a*) not include the auditor's name in the document or (*b*), include the auditor's report on the condensed financial statements, as described in paragraph .05. If the client will neither delete the reference to the auditor nor allow the appropriate report to be included, the auditor should advise the client that he does not consent to either the use of his name or the reference to him, and he should consider what other actions might be appropriate.[7]

~~[6] If such a statement is made in a client-prepared document that does not include audited financial statements and the client is not a public entity that is required to file complete audited financial statements with a regulatory agency (at least annually), the auditor would ordinarily express an adverse opinion on the condensed financial statements because of inadequate disclosure. (*See* AS 3101.41 through .44) The auditor would not be expected to provide the disclosure in his report. The following is an example of an auditor's report on condensed financial statements in such circumstances when the auditor had previously audited and reported on the complete financial statements:~~

~~Report of Independent Registered Public Accounting Firm.~~

> ~~We have audited the consolidated balance sheet of X Company and subsidiaries as of December 31, 20X0, and the related earnings, and cash flows for the year then ended (not presented herein). These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion. The condensed consolidated balance sheet as of December 31, 20X0, and the related condensed statements of income, retained earnings, and cash flows for the year then ended, presented on pages xx-xx, are presented as a summary and therefore do not include all of the disclosures required by accounting principles generally accepted in the United States of America. In our opinion, because of the significance of the omission of the information referred to in the preceding paragraph, the condensed consolidated financial statements referred to above do not present fairly, in conformity with~~

~~accounting principles generally accepted in the United States of America, the financial position of X Company and subsidiaries as of December 31, 20X0, or the results of its operations or its cash flows for the year then ended. [Footnote revised, October 2000, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 93.]~~

* * *

.10 The following is an example of an additional paragraph included in the Opinion on the Financial Statements section of the auditor's report ~~that includes an additional paragraph~~ because ~~he~~ the auditor is also engaged to report on selected financial data for a five-year period ended December 31, ~~19~~20X5, in a client-prepared document that includes audited financial statements:

~~Report of Independent Registered Public Accounting Firm~~

~~We have audited the consolidated balance sheets of ABC Company and subsidiaries as of December 31, 19X5 and 19X4, and the related consolidated statements of income, retained earnings, and cash flows for each of the three years in the period ended December 31, 19X5. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.~~

~~We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provided a reasonable basis for our opinion.~~

Opinion on the Financial Statements

*[Includes the same basic elements in the Opinion on the Financial Statements section as the auditor's unqualified report in AS 3101]*

In our opinion, the consolidated financial statements ~~referred to above~~ present fairly, in all material respects, the financial position of the ~~ABC~~ the Company and subsidiaries as of December 31, 20X5 and 20X4, and the results of their operations and their cash flows for each of the three years in the period ended

December 31, 20X5, in conformity with accounting principles generally accepted in the United States of America.

We have also previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB"), the consolidated balance sheets as of December 31, 20X3, 20X2, and 20X1, and the related statements of income, retained earnings, and cash flows for the years ended December 31, 20X2, and 20X1, and the related notes [*and schedules*] (collectively referred to as the "financial statements") (none of which are presented herein); and we expressed unqualified opinions on those consolidated financial statements. In our opinion, the information set forth in the selected financial data for each of the five years in the period ended December 31, 20X5, appearing on page xx, is fairly stated, in all material respects, in relation to the consolidated financial statements from which it has been derived.

* * *

**AS 3320 (currently AU sec. 504), *Association with Financial Statements***

* * *

.04 An accountant may be associated with audited or unaudited financial statements. Financial statements are audited if the accountant has applied auditing procedures sufficient to permit him to report on them as described in AS 3101, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion,* and AS 3105~~1~~,~~ *Reports on Audited Financial Statements* ~~*Departures from Unqualified Opinions and Other Reporting Circumstances*. The unaudited interim financial statements (or financial information) of a public entity are reviewed when the accountant has applied procedures sufficient to permit him to report on them as described in AS 4105, *Reviews of Interim Financial Information*.

* * *

**AS 4101, *Responsibilities Regarding Filings Under Federal Securities Statutes* (currently AU sec. 711, *Filings Under Federal Securities Statutes*)**

* * *

.11 A registration statement filed with the Securities and Exchange Commission may contain the reports of two or more independent auditors on their audits of the financial statements for different periods. An auditor who has audited the financial statements for prior periods but has not audited the financial statements for the most recent audited period included in the registration statement has a responsibility relating to events subsequent to the date of the prior-period financial statements, and extending to the effective date, that bear materially on the prior-period financial statements on which he reported. Generally, he should

*a.* Read pertinent portions of the prospectus and of the registration statement.

*b.* Obtain a letter of representation from the successor independent auditor regarding whether his audit (including his procedures with respect to subsequent events) revealed any matters that, in his opinion, might have a material effect on the financial statements reported on by the predecessor auditor or would require disclosure in the notes thereto.

The auditor should make inquiries and perform other procedures that he considers necessary to satisfy himself regarding the appropriateness of any adjustment or disclosure affecting the prior-period financial statements covered by his report (*see* AS 3105~~1~~, ~~Reports on Audited Financial Statements~~ *Departures from Unqualified Opinions and Other Reporting Circumstances*).

* * *

**AS 4105, *Reviews of Interim Financial Information* (currently AU sec. 722, *Interim Financial Information*)**

* * *

**Form of Accountant's Review Report**

* * *

.37 The accountant's review report accompanying interim financial information ~~should consist of~~ must include the title, "Report of Independent Registered Public Accounting Firm."

.37A The accountant's review report must be addressed to the shareholders and the board of directors, or equivalents for companies not organized as corporations. The accountant's review report may include additional addressees.

.37B The first section of the accountant's review report must include the section title "Results of Review of [Financial Information or Statements]" and the following elements:

~~a. A title that includes the word independent.~~

a. The name of the company whose interim financial information was reviewed.

b. A statement that the interim financial information identified in the report was reviewed.

c~~g~~. A statement about whether the accountant is aware of any material modifications that should be made to the accompanying interim financial information for it to conform with generally accepted accounting principles. The statement should include an identification of the country of origin of those accounting principles (for example, accounting principles generally accepted in the United States of America or U.S. generally accepted accounting principles).

.37C The second section of the accountant's review report must include the section title "Basis for Review Results" and the following elements:

a~~c~~. A statement that the interim financial information is the responsibility of the entity's management.

b~~d~~. A statement that the review of interim financial information was conducted in accordance with the standards of the PCAOB.

c~~e~~. A description of the procedures for a review of interim financial information.

d~~f~~. A statement that a review of interim financial information is substantially less in scope than an audit conducted in accordance with the standards of the PCAOB, the objective of which is an expression of an opinion regarding the financial statements taken as a whole, and accordingly, no such opinion is expressed.

.37D The accountant's review report must include the following elements:

a~~h~~. The ~~manual or printed~~ signature of the accountant's firm.[24A]

b~~i~~. The city and state (or city and country, in the case of non-U.S. auditors) from which the accountant's review report has been issued.[24A~~B~~]

c~~j~~. The date of the review report. (Generally, the report should be dated as of the date of completion of the review procedures.[25])

In addition, each page of the interim financial information should be clearly marked as unaudited.

[24A] *See* SEC Rule 2-02(a) of Regulation S-X, 17 C.F.R. § 210.2-02(a).

[24~~A~~B] *Id.*~~*See* SEC Rule 2-02(a) of Regulation S-X, 17 C.F.R. § 210.2-02(a).~~

.38 The following is an example of a review report:[26]

Report of Independent Registered Public Accounting Firm

To the shareholders and the board of directors of ABC Company

Results of Review of [*Financial Information or Statements*]

We have reviewed the accompanying [*describe the interim financial information or statements reviewed*] of ABC Company (the "Company") and consolidated subsidiaries as of September 30, 20X1, and for the three-month and nine-month periods then ended. Based on our review, we are not aware of any material modifications that should be made to the accompanying interim financial information (statements) for it (them) to be in conformity with accounting principles generally accepted in the United States of America.

Basis for Review Results

This (These) interim financial information (statements) is (are) the responsibility of the Company's management. We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB"). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the PCAOB ~~Public Company Accounting Oversight Board~~, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

[*Signature*]

[*City and State or Country*]

[*Date*]

.39 An accountant may be engaged to report on a review of comparative interim financial information. The following is an example of a review report on a condensed balance sheet as of March 31, 20X1, the related condensed statements of income and cash flows for the three-month periods ended March 31, 20X1 and 20X0, and a condensed balance sheet derived from audited financial statements as of December 31, 20X0, that were included in Form 10-Q. [27]

Report of Independent Registered Public Accounting Firm

To the shareholders and the board of directors of ABC Company

Results of Review of [*Financial Information or Statements*]

We have reviewed the condensed consolidated balance sheet of ABC Company (the "Company") and subsidiaries as of March 31, 20X1, and the related condensed consolidated statements of income and cash flows for the three-month periods ended March 31, 20X1 and 20X0. Based on our reviews, we are not aware of any material modifications that should be made to the condensed financial statements referred to above for them to be in conformity with accounting principles generally accepted in the United States of America.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB"), the consolidated balance sheet of ~~ABC~~ the Company and subsidiaries as of December 31, 20X0, and the related consolidated statements of income, retained earnings, and cash flows for the year then ended (not presented herein); and in our report dated February 15, 20X1, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 20X0, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.[28]

Basis for Review Results

These financial statements are the responsibility of the Company's management. We conducted our review in accordance with the standards of the PCAOB ~~Public Company Accounting Oversight Board (United States)~~. A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the PCAOB ~~Public Company Accounting Oversight Board~~, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

[*Signature*]

[*City and State or Country*]

[*Date*]

[28] If the auditor's report on the preceding year-end financial statements was other than unqualified, referred to other auditors, or included an explanatory paragraph because of a going-concern matter or an inconsistency in the application of accounting principles, the ~~last~~ <u>second</u> paragraph of the illustrative report in paragraph .39 should be appropriately modified.

.40 The accountant may use and make reference to another accountant's review report on the interim financial information of a significant component of a reporting entity. This reference indicates a division of responsibility for performing the review.[29] The following is an example of report including such a reference:

Report of Independent Registered Public Accounting Firm

<u>To the shareholders and the board of directors of ABC Company</u>

<u>Results of Review of [*Financial Information or Statements*]</u>

We have reviewed the accompanying [*describe the interim financial information or statements reviewed*] of ABC Company <u>(the "Company")</u> and consolidated subsidiaries as of September 30, 20X1, and for the three-month and nine-month periods then ended. <u>Based on our review and the report of other accountants, we are not aware of any material modifications that should be made to the accompanying interim financial information (statements) for it (them) to be in conformity with accounting principles generally accepted in the United States of America.</u>

We were furnished with the report of other accountants on their review of the interim financial information of DEF subsidiary, whose total assets as of September 30, 20X1, and whose revenues for the three-month and nine-month periods then ended, constituted 15 percent, 20 percent, and 22 percent, respectively, of the related consolidated totals.

<u>Basis for Review Results</u>

This (These) interim financial information (statements) is (are) the responsibility of the Company's management. We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB"). A review of interim financial information (statements) consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the PCAOB ~~Public Company Accounting Oversight Board~~, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

[*Signature*]

[*City and State or Country*]

[*Date*]

.41 The accountant's report on a review of interim financial information should be modified for departures from generally accepted accounting principles,~~[30]~~ which include inadequate disclosure and changes in accounting principle that are not in conformity with generally accepted accounting principles. The existence of substantial doubt about the entity's ability to continue as a going concern or a lack of consistency in the application of accounting principles affecting the interim financial information would not require the accountant to add an additional paragraph to the report, provided that the interim financial information appropriately discloses such matters. Although not required, the accountant may wish to emphasize such matters in a separate explanatory paragraph of the report. *See* paragraphs .44 and .45 of this section for examples of paragraphs that address matters related to an entity's ability to continue as a going concern.

~~[30] If the circumstances contemplated by Rule 203, *Accounting Principles*, are present, the accountant should refer to the guidance in paragraph .15 of AS 3101, Reports on Audited Financial Statements.~~

.42 *Departure from generally accepted accounting principles.* If the accountant becomes aware that the interim financial information is materially affected by a departure from generally accepted accounting principles, he or she should modify the report. The modification should describe the nature of the departure and, if practicable, should state the effects on the interim financial information. Following is an example of such a modification of the accountant's report.

> ~~[*Concluding paragraph*]~~
>
> Based on our review, with the exception of the matter(s) described in the ~~preceding~~ following paragraph(s), we are not aware of any material modifications that should be made to the accompanying interim financial information (statements) for it (them) to be in conformity with accounting principles generally accepted in the United States of America.
>
> ~~[*Explanatory third paragraph*]~~
>
> Based on information furnished to us by management, we believe that the company has excluded from property and debt in the accompanying balance sheet certain lease obligations that we believe should be capitalized to conform with accounting principles generally accepted in the United States of America. This information indicates that if these lease obligations were capitalized at September 30, 20X1, property would be increased by $______, long-term debt by $______, and net income and earnings per share would be increased (decreased) by $________, $_________, $________, and $________, respectively, for the three-month and nine-month periods then ended.

* * *

.43 *Inadequate disclosure*. The information necessary for adequate disclosure is influenced by the form and context in which the interim financial information is presented. For example, the disclosures considered necessary for interim financial information presented in accordance with the minimum disclosure requirements of APB Opinion No. 28, paragraph 30, which is applicable to summarized financial statements of public companies, are considerably less extensive than those necessary for annual financial statements that present financial position, results of operations, and cash flows in conformity with generally accepted accounting principles.[31] If information that the accountant believes is necessary for adequate disclosure in conformity with generally accepted accounting principles[32] is not included in the interim financial information, the accountant should modify the report and, if practicable, include the necessary information in the report. The following is an example of such a modification of the accountant's report:

~~[*Concluding paragraph*]~~

Based on our review, with the exception of the matter(s) described in the ~~preceding~~ following paragraph(s), we are not aware of any material modifications that should be made to the accompanying interim financial information (statements) for it (them) to be in conformity with accounting principles generally accepted in the United States of America.

~~[*Explanatory third paragraph*]~~

Management has informed us that the company is presently contesting deficiencies in federal income taxes proposed by the Internal Revenue Service for the years 20X1 through 20X3 in the aggregate amount of approximately $_____, and that the extent of the company's liability, if any, and the effect on the accompanying information (statements) is not determinable at this time. The information (statements) fail(s) to disclose these matters, which we believe are required to be disclosed in conformity with accounting principles generally accepted in the United States of America.

.44 *Going-concern paragraph was included in the prior year's audit report; conditions giving rise to the paragraph continue to exist.* If (*a*) the auditor's report for the prior year end contained an explanatory paragraph indicating the existence of substantial doubt about the entity's ability to continue as a going concern, (*b*) the conditions that raised such doubt continued to exist as of the interim reporting date covered by the review, and (*c*) there is adequate and appropriate disclosure about these conditions in the interim financial information, the accountant is not required to modify his or her report. However, the accountant may add an explanatory paragraph to the review report~~, after the concluding paragraph,~~ emphasizing the matter disclosed in the audited financial statements and the interim financial information. The following is an example of such a paragraph.

[Appropriate Title]

Note 4 of the Company's audited financial statements as of December 31, 20X1, and for the year then ended discloses that the Company was unable to renew its line of credit or obtain alternative financing at December 31, 20X1. Our auditor's report on those financial statements includes an explanatory paragraph referring to the matters in Note 4 of those financial statements and indicating that these matters raised substantial doubt about the Company's ability to continue as a going concern. As indicated in Note 3 of the Company's unaudited interim financial statements as of March 31, 20X2, and for the three months then ended, the Company was still unable to renew its line of credit or obtain alternative financing as of March 31, 20X2. The accompanying interim financial information does not include any adjustments that might result from the outcome of this uncertainty.

.45 *Going-concern paragraph was not included in the prior year's audit report; conditions or events exist as of the interim reporting date covered by the review that might be indicative of the entity's possible inability to continue as a going concern.* If (*a*) conditions or events exist as of the interim reporting date covered by the review that might be indicative of the entity's possible inability to continue as a going concern, and (*b*) there is adequate and appropriate disclosure about these conditions or events in the interim financial information, the accountant is not required to modify his or her report. However, the accountant may add an explanatory paragraph to the review report~~, after the concluding paragraph,~~ emphasizing the matter disclosed in the interim financial information. The following is an example of such a paragraph.

[Appropriate Title]

As indicated in Note 3, certain conditions indicate that the Company may be unable to continue as a going concern. The accompanying interim financial information does not include any adjustments that might result from the outcome of this uncertainty.

* * *

.50 The auditor ordinarily need not modify his or her report on the audited financial statements to refer to his or her having performed a review in accordance with this section or to refer to the interim financial information accompanying the audited financial statements because the interim financial information has not been audited and is not required for the audited financial statements to be fairly stated in conformity with generally accepted accounting principles. The auditor's report on the audited financial statements should, however, be modified in the following circumstances:

* * *

c. The selected quarterly financial data required by item 302(a) of Regulation S-K is omitted. The auditor should add an explanatory paragraph, including an appropriate title, to the report, immediately following the opinion paragraph, ~~The following is an~~

~~example of a paragraph that should be added to the auditor's report~~ if the selected quarterly financial data required by item 302(a) is omitted. <u>The following is an example of such a paragraph.</u>

> <u>[Appropriate Title]</u>
>
> The company has not presented the selected quarterly financial data specified in item 302(a) of Regulation S-K that the Securities and Exchange Commission requires as supplementary information to the basic financial statements.

d. The selected quarterly financial data required by item 302(a) of Regulation S-K has not been reviewed. <u>The auditor should add an explanatory paragraph, including an appropriate title, to the report immediately following the opinion paragraph,</u> ~~The following is an example of a paragraph that should be added to the auditor's report~~ if the selected quarterly financial data required by item 302(a) has not been reviewed. <u>The following is an example of such a paragraph.</u>

> <u>[Appropriate Title]</u>
>
> The selected quarterly financial data on page xx contains information that we did not audit, and, accordingly, we do not express an opinion on that data. We attempted but were unable to review the quarterly data in accordance with the standards of the Public Company Accounting Oversight Board because we believe that the company's internal control for the preparation of interim financial information does not provide an adequate basis to enable us to complete such a review.

* * *

**AS 6101 (currently AU sec. 634), *Letters for Underwriters and Certain Other Requesting Parties***

* * *

.27 When the report on the audited financial statements and financial statement schedules included (incorporated by reference) in the registration statement ~~departs from the standard report~~ <u>includes one or more explanatory paragraphs or a paragraph to emphasize a matter regarding the financial statements</u>, ~~for instance, where one or more explanatory paragraphs or a paragraph to emphasize a matter regarding the financial statements have been added to the report,~~ the accountants should refer[18] to that fact in the comfort letter and discuss the subject matter of the paragraph.[19] In those rare instances in which the SEC accepts a qualified opinion on historical financial statements, the accountants should refer to the qualification in the opening paragraph of the comfort letter and discuss the subject matter of the qualification. (*See also* paragraph .35*f*.)

* * *

.30 An underwriter may also request that the accountants comment in their comfort letter on (*a*) unaudited interim financial information required by item 302(a) of Regulation S-K, to which AS 4105 pertains or (*b*) required supplementary information, to which AS 2705 pertains. AS 4105 and AS 2705 provide that the accountants should expand the ~~standard~~ <u>auditor's unqualified</u> report on the audited financial statements to refer to such information when the scope of their procedures with regard to the information was restricted or when the information appears not to be presented in conformity with generally accepted accounting principles or, for required supplementary information, applicable guidelines. Such expansions of the ~~accountants' standard~~ <u>auditor's unqualified</u> report in the registration statement would ordinarily be referred to in the opening paragraph of the comfort letter (*see also* paragraph .35*f*). Additional comments on such unaudited information are therefore unnecessary. However, if the underwriter requests that the accountants perform procedures with regard to such information in addition to those performed in connection with their review or audit as prescribed by AS 4105 and AS 2705, the accountants may do so and report their findings.

* * *

.35

* * *

> *f.* When the report on the audited financial statements and financial statement schedules in the registration statement departs from the auditor's ~~standard~~ <u>unqualified</u> report, and the comfort letter includes negative assurance with respect to subsequent unaudited condensed interim financial information included (incorporated by reference) in the registration statement or with respect to an absence of specified subsequent changes, increases, or decreases, the accountant should consider the effect thereon of the subject matter of the qualification, explanatory paragraph(s), or paragraph(s) emphasizing a matter regarding the financial statements. The accountant should also follow the guidance in paragraph .27. An illustration of how this type of situation may be dealt with is shown in example I [paragraph .64].

* * *

## III. Proposed Amendments to Auditing Interpretations

**AI 11, *Using the Work of a Specialist: Auditing Interpretations of AS 1210* (currently AU sec. 9336, *Using the Work of a Specialist: Auditing Interpretations of Section 336)***

* * *

.21 *Interpretation*—When other relevant evidential matter exists, the auditor should consider it before reaching a conclusion about the appropriateness of management's accounting for a transfer.[14] However, since the isolation aspect of surrender of control is assessed primarily from a legal perspective, the auditor usually will not be able to obtain persuasive evidence in a form other than a legal opinion. In the absence of persuasive evidence that a transfer has met the isolation criterion, derecognition of the transferred assets is not in conformity with generally accepted accounting principles and the auditor should consider the need to express a qualified or adverse opinion in accordance with paragraphs .18~~35~~ through .43~~60~~ of AS 3105~~1~~, ~~*Reports on Audited Financial Statements*~~ *Departures from Unqualified Opinions and Other Reporting Circumstances*. However, if permission for the auditor to use a legal opinion that he or she deems otherwise adequate is not granted, this would be a scope limitation and the auditor should consider the need to express a qualified opinion or to disclaim an opinion in accordance with AS 3105~~1~~.05~~22~~–.09~~26~~ and AS 3105~~1~~.44~~61~~–.47~~63~~.

* * *

**AI 16, *Auditing Accounting Estimates: Auditing Interpretations of AS 2501* (currently AU sec. 9342, *Auditing Accounting Estimates: Auditing Interpretations of Section 342*)**

* * *

.03 *Required Information Presented*—When an entity discloses in its basic financial statements only information required by FASB Statement No. 107, the auditor may issue an ~~standard~~ unqualified opinion (assuming no other report modifications are necessary). The auditor may add an emphasis-of-matter paragraph describing the nature and possible range of such fair value information especially when management's best estimate of value is used in the absence of quoted market values (FASB Statement No. 107, paragraph 11 [AC section F25.115D]) and the range of possible values is significant (*see* paragraph .19 of AS 3101, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*). If the entity has not disclosed required fair value information, the auditor should evaluate whether the financial statements are materially affected by the departure from generally accepted accounting principles.

* * *

**AI 17, Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments: Auditing Interpretations of AS 2505 (currently AU sec. 9337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments: Auditing Interpretations of Section 337*)**

* * *

.23 If the auditor is uncertain as to the meaning of the lawyer's evaluation, he should request clarification either in a follow-up letter or a conference with the lawyer and client, appropriately documented. If the lawyer is still unable to give an unequivocal evaluation of the likelihood of an unfavorable outcome in writing or orally, the auditor should look to the guidance in paragraphs .28~~45~~ through .32~~49~~ of AS 3105~~1~~, ~~*Reports on Audited Financial Statements*~~ *Departures from Unqualified Opinions and Other Reporting Circumstances*, to determine the effect, if any, of the lawyer's response on the auditor's report.

* * *

**AI 23, ~~Reports on Audited Financial Statements: Auditing Interpretations of AS 3101~~ Departures from Unqualified Opinions and Other Reporting Circumstances: Auditing Interpretations of AS 3105~~1~~ (currently AU sec. 9508, *Reports on Audited Financial Statements: Auditing Interpretations of Section 508*)**

* * *

.01 *Question*— Paragraph .07~~24~~ of AS 3105~~1~~, ~~*Reports on Audited Financial Statements*~~ *Departures from Unqualified Opinions and Other Reporting Circumstances*, states that "Common restrictions on the scope of the audit include those applying to the observation of physical inventories and the confirmation of accounts receivable by direct communication with debtors. . . ." A footnote to that paragraph states: "Circumstances such as the timing of the work may make it impossible for the auditor to accomplish these procedures. In this case, if the auditor is able to satisfy himself or herself as to inventories or accounts receivable by applying alternative procedures, there is no significant limitation on the scope of the work, and the report need not include reference to the omission of the procedures or to the use of alternative procedures." Outside firms of nonaccountants specializing in the taking of physical inventories are used at times by some companies, such as retail stores, hospitals, and automobile dealers, to count, list, price and subsequently compute the total dollar amount of inventory on hand at the date of the physical count. Would obtaining the report of an outside inventory-taking firm be an acceptable alternative procedure to the independent auditor's own observation of physical inventories?

* * *

.36 ~~Examples of~~ An example of the Opinion on the Financial Statements and the Basis for Opinion sections of an auditor's report~~s~~ on single year financial statements in the year of adoption of liquidation basis follows:[1A] ~~with such an explanatory paragraph follow.~~

> ~~*Report on Single Year Financial Statements in Year of Adoption of Liquidation Basis*~~
>
> Opinion on the Financial Statements
>
> ~~"~~We have audited the statement of net assets in liquidation of XYZ Company (the "Company") as of December 31, 20X2, and the related statement of changes in net assets in liquidation for the period from April 26, 20X2 to December 31, 20X2~~.~~, ~~In addition, we have~~ and audited the statements of income, retained earnings, and cash flows for the period from January 1, 20X2 to April 25, 20X2, and the related notes [*and schedules*] (collectively referred to as the "financial statements"). ~~"~~In our opinion, the financial statements ~~referred to above~~ present fairly, in all material respects, the net assets in liquidation of ~~XYZ~~ the Company as of December 31, 20X2, the changes in its net assets in liquidation for the period from April 26, 20X2 to December 31, 20X2, and the results of its operations and its cash flows for the period from January 1, 20X2 to April 25, 20X2, in conformity with accounting principles generally accepted in the United States of America applied on the bases described below. ~~in the preceding paragraph."~~
>
> ~~"~~As described in Note X to the financial statements, the stockholders of ~~XYZ~~ the Company approved a plan of liquidation on April 25, 20X2, and the Company commenced liquidation shortly thereafter. As a result, the Company has changed its basis of accounting for periods subsequent to April 25, 20X2 from the going-concern basis to a liquidation basis.
>
> Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

~~"~~We conducted our audit in accordance with the standards of the PCAOB ~~Public Company Accounting Oversight Board (United States)~~. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our ~~An~~ audit included~~s~~ performing procedures to assess the risk of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures include examining, on a test basis, evidence ~~supporting~~ regarding the amounts and disclosures in the financial statements. ~~An~~ Our audit also included~~s~~ ~~assessing~~ evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements ~~presentation~~. We believe that our audit provides a reasonable basis for our opinion.

[1A] The auditor's report must include the same basic elements and communication of critical audit matters as would be required in an unqualified auditor's report under AS 3101, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*.

~~*Report on Comparative Financial Statements in Year of Adoption of Liquidation Basis*~~ An example of the Opinion on the Financial Statements and the Basis for Opinion sections of an auditor's report on comparative financial statements in the year of adoption of liquidation basis follows:[1B]

Opinion on the Financial Statements

~~"~~We have audited the balance sheet of XYZ Company (the "Company") as of December 31, 20X1, the related statements of income, retained earnings, and cash flows for the year then ended, and the statements of income, retained earnings, and cash flows for the period from January 1, 20X2 to April 25, 20X2, and~~. In addition, we have~~ audited the statement of net assets in liquidation as of December 31, 20X2, and the related statement of changes in net assets in liquidation for the period from April 26, 20X2 to December 31, 20X2, and the related notes [*and schedules*] (collectively referred to as the "financial statements"). ~~"~~In our opinion, the financial statements ~~referred to above~~ present fairly, in all material respects, the financial position of ~~XYZ~~ the Company as of December 31, 20X1, the results of its operations and its cash flows for the year then ended and for the period from January 1, 20X2 to April 25, 20X2, its net assets in liquidation as of December 31, 20X2, and the changes in its net assets in liquidation for the period from April 26, 20X2 to December 31, 20X2, in conformity with accounting principles generally accepted in the United States of America applied on the bases described below.~~ in the preceding paragraph."~~

~~"~~As described in Note X to the financial statements, the stockholders of ~~XYZ~~ the Company approved a plan of liquidation on April 25, 20X2, and the Company commenced liquidation shortly thereafter. As a result, the Company has changed its basis of accounting for periods subsequent to April 25, 20X2 from the going-concern basis to a liquidation basis.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

~~"~~We conducted our audits in accordance with the standards of the PCAOB ~~Public Company Accounting Oversight Board (United States)~~. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our ~~An~~ audits include~~s~~ performing procedures to assess the risk of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures include examining, on a test basis, evidence ~~supporting~~ regarding the amounts and disclosures in the financial statements. ~~An~~ Our audits also include~~s~~ ~~assessing~~ evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements ~~presentation~~. We believe that our audits provide a reasonable basis for our opinion.

[1B] *Id.*

* * *

**12. Reference in Auditor's ~~Standard~~ Unqualified Report to Management's Report**

.51 *Question*—One of the basic elements of the auditor's ~~standard~~ unqualified report is a statement that the financial statements are the responsibility of the Company's management. That statement is required in the auditor's report even when a document containing the auditor's report includes a statement by management regarding its responsibility for the presentation of the financial statements. When an annual shareholders' report (or other client-prepared document that includes audited financial statements) contains a management report that states the financial statements are the responsibility of management, is it permissible for the auditor's report to include a reference to the management report?

.52 *Interpretation*—No. The statement about management's responsibilities for the financial statements required by AS 3101, ~~*Reports on Audited Financial Statements*~~ *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*, should not be further elaborated upon in the auditor's ~~standard~~ unqualified report or referenced to management's report. Such modifications to the ~~standard~~ auditor's unqualified report may lead users to erroneously believe that the auditor is providing assurances about representations made by management about their responsibility for financial reporting, internal controls and other matters that might be discussed in the management report.

* * *

**14. Reporting on Audits Conducted in Accordance with the Standards of the PCAOB and in Accordance with International Standards on Auditing**

* * *

.56 *Question*—AS 3101 requires ~~states that a basic element of the auditor's report is~~ a statement that the audit was conducted in accordance with the standards of the PCAOB ~~and an identification of the United States of America as the country of origin of those standards~~. If the auditor conducts the audit in accordance with the standards of the PCAOB and in accordance with the International Standards on Auditing promulgated by the International Auditing and Assurance Standards Board ~~Practices Committee~~ of the International Federation of Accountants, may the auditor so indicate in the auditor's report?

.57 *Interpretation*—Yes. AS 3101 requires that the auditor indicate in the auditor's report that the audit was conducted in accordance with the standards of the PCAOB ~~and an~~

~~identification of the United States of America as the country of origin of those standards~~; however, AS 3101 does not prohibit the auditor from indicating that the audit also was conducted in accordance with another set of auditing standards. If the audit also was conducted in accordance with the International Standards on Auditing, in their entirety, the auditor may so indicate in the auditor's report. To determine whether an audit was conducted in accordance with the International Standards on Auditing, it is necessary to consider the text of the International Standards on Auditing in their entirety, including the basic principles and essential procedures together with the related guidance included in the International Standards on Auditing.

* * *

.59 An example of reporting on an audit conducted in accordance with the standards of the PCAOB and in accordance with International Standards on Auditing follows:

> Basis for Opinion
>
> These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audit. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.
>
> We conducted our audit in accordance with the standards of the PCAOB ~~Public Company Accounting Oversight Board (United States)~~ and in accordance with International Standards on Auditing. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. ~~An~~ Our audit included~~s~~ performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures include examining, on a test basis, evidence regarding ~~supporting~~ the amounts and disclosures in the financial statements. ~~An~~ Our audit also included~~s~~ evaluating ~~assessing~~ the accounting principles used and significant estimates made by management, as well as evaluating the overall ~~financial statement~~ presentation of the financial statements. We believe that our audit provides a reasonable basis for our opinion.

* * *

.61 *Interpretation*—If the prior-period audited financial statements are *unchanged*, pursuant to AS 3105~~1~~.58~~74~~ the successor auditor should indicate in the ~~introductory paragraph~~ Opinion on the Financial Statements section of his or her report (*a*) that the financial statements of the prior period were audited by another auditor, (*b*) the date of the predecessor auditor's report, (*c*) the type of report issued by the predecessor auditor, and (*d*) if the report was other than ~~a standard~~ an auditor's unqualified report, the substantive reasons therefor. The successor auditor ordinarily also should indicate that the other auditor has ceased operations. Footnote 18~~29~~ of AS 3105~~1~~ indicates that the successor auditor should not name the predecessor auditor in the report. An example of the reference that would be added to the ~~introductory paragraph~~ Opinion on the Financial Statements section of the successor auditor's report is presented as follows:

> The financial statements of ABC Company as of December 31, 20X1, and for the year then ended were audited by other auditors who have ceased operations. Those auditors expressed an unqualified opinion on those financial statements in their report dated March 31, 20X2.

A reference to the predecessor auditor's report should be included even if the predecessor auditor's report on the prior-period financial statements is reprinted and accompanies the successor auditor's report, because reprinting does not constitute reissuance of the predecessor auditor's report.

* * *

.63 When the prior-period financial statements have been restated, the successor auditor may be engaged either to reaudit the prior-period financial statements or to audit only the restatement adjustments. If the successor auditor is engaged to audit only the restatement adjustments and applies sufficient procedures to satisfy himself or herself as to the appropriateness of the restatement adjustments, the successor auditor may report on the restatement adjustments using the guidance in AS 3105~~1~~.58~~74~~. (The auditor also may use the guidance on alternative language contained in paragraph .71, below.) In determining the nature, timing and extent of procedures, the successor auditor should consider that a predecessor auditor who has ceased operations cannot perform the procedures to evaluate the appropriateness of the restatement adjustments as described in AS 2905, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*.

* * *

.71 If the successor auditor is engaged to audit only the restatement adjustments and applies sufficient procedures to satisfy himself or herself as to the appropriateness of the restatement adjustments, the successor auditor may report on the restatement adjustments using the guidance in AS 3105~~1~~.58~~74~~. Alternatively, the successor auditor may wish to make it clear that he or she did not audit, review, or apply other procedures to the prior-period financial statements beyond the procedures applied to the restatement adjustments. Accordingly, he or she may include the following paragraph in his or her report:

* * *

.74 *Question*—If the prior-period financial statements audited by a predecessor auditor who has ceased operations have been subsequently restated, but the successor auditor has not yet completed an audit of current-period financial statements, can the successor auditor report on the restatement adjustments pursuant to 3105~~1~~.58~~74~~?

.75 *Interpretation*—No. AS 3105~~1~~.58~~74~~ is only applicable when the prior-period financial statements are presented for comparative purposes with current-period audited financial statements. If the prior-period financial statements have been restated, and the successor auditor is requested to report on those financial statements without also reporting on current-period audited financial statements, the successor auditor would need to reaudit the prior-period financial statements in order to report on them.

* * *

**AI 20: *Other Information in Documents Containing Audited Financial Statements: Auditing Interpretations of AS 2710* (currently AU sec. 9550, *Other Information in Documents Containing Audited Financial Statements: Auditing Interpretations of Section 550*)**

* * *

.08 *Interpretation*—If the auditor has been engaged to ~~examine and report on management's assertion, the guidance in AT section 501, *Reporting on an Entity's Internal Control Over Financial Reporting*, should be followed~~ perform an audit of management's assessment of the effectiveness of internal control over financial reporting, the auditor should follow the requirement of AS 2201 (currently Auditing Standard No. 5), *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

.09 If the auditor has not been engaged to perform an audit of management's assessment of the effectiveness of internal control over financial reporting ~~examine and~~

~~report on management's assertion~~, the auditor should follow the requirements in AS 3105.59-60. ~~guidance in AS 2710, which states that "the auditor has no obligation to perform any procedures to corroborate other information contained in [such] a document." Under AS 2710, the auditor is required to read the report by management and consider whether it is materially inconsistent with information appearing in the financial statements and, as a result, he or she may become aware of a material misstatement of fact.[5]~~

~~[5] Unless information on internal control over financial reporting appears in the financial statements, which is not common, a management assertion on the effectiveness of internal control over financial reporting could not be inconsistent with information appearing in financial statements.~~

~~.10 Although not required, the auditor may consider adding the following paragraph to the standard auditor's report: "We were not engaged to examine management's assertion about the effectiveness of [*name of entity's*] internal control over financial reporting as of [*date*] included in the accompanying [*title of management's report*] and, accordingly, we do not express an opinion thereon."~~

~~.11 Because an auditor is required to consider internal control in an audit of the financial statements, he or she would often be familiar with matters covered in a management report on internal control over financial reporting. As a result, the auditor may become aware of information that causes him or her to believe that management's assertion on the effectiveness of internal control over financial reporting contains a material misstatement of fact as described in AS 2710.[6] If the auditor becomes aware of information in the report by management that conflicts with his or her knowledge or understanding of such matters, he or she should discuss the information with the client. If, after discussions with the client, the auditor concludes that a material misstatement of fact exists, the auditor should follow the guidance in AS 2710.06.~~

~~[6] For example, the auditor has communicated to management a material weakness in internal control over financial reporting and management states or implies there are no material weaknesses.~~

* * *

**AI 24, *Special Reports: Auditing Interpretations of AS 3305* (currently AU sec. 9623, *Special Reports: Auditing Interpretations of Section 623*)**

* * *

**10** Generally accepted accounting principles require the use of current-value accounting for financial statements of certain types of entities (for example, investment companies, employee benefit plans, personal financial statements, and mutual and common trust funds). This interpretation does not apply to reports on current-value financial statements of such entities. The auditor engaged to report on current-value financial statements of such entities should follow the guidance in AS 3105~~1~~, ~~*Reports on Audited Financial Statements*~~ *Departures from Unqualified Opinions and Other Reporting Circumstances*.

* * *

.83 *Interpretation*—No. An offering memorandum generally is a document providing information as the basis for negotiating an offer to sell certain assets or businesses or to raise funds. Normally, parties to an agreement or other specified parties for whom the special-purpose financial presentation is intended have not been identified. Accordingly, the auditor should follow the reporting guidance in AS 3105~~1~~.18~~35~~–.27~~44~~ and .40~~58~~–.43~~60~~.

* * *

.86 If there is no such agreement, the auditor should follow the guidance in AS 3105~~1~~.18~~35~~–.27~~44~~ and .40~~58~~–.43~~60~~.

* * *

***AI 25, Association with Financial Statements: Auditing Interpretations of AS 3320* (currently AU sec. 9504, *Association With Financial Statements: Auditing Interpretations of Section 504*)**

* * *

.15 *Question*—Paragraph .01~~.04~~ of ~~AS 3101, *Reports on Audited Financial Statements*,~~ AS 3320, *Association with Financial Statements*, states in part: "In all cases where an auditor's name is associated with financial statements, the report should contain a clear-cut indication of the character of the auditor's work, if any, and the degree of responsibility the auditor is taking." ~~Paragraph .03 of~~ AS 3320.03~~, Association with Financial Statements,~~ states that "An accountant is associated with financial statements when he has consented to the use of his name in a report, document, or written communication containing the statements." Is the auditor "associated" with condensed financial data when he is identified by a financial reporting service as being a company's independent auditor or when his report is reproduced and presented with such data?

* * *

**AI 28, *Evidential Matter Relating to Income Tax Accruals: Auditing Interpretations* (currently AU sec. 9326, *Evidential Matter: Auditing Interpretations of Section 326*)**

* * *

.10 Auditing standards require the auditor to obtain sufficient appropriate evidential matter through, among other things, inspection and inquiries to afford a reasonable basis for an opinion on the financial statements. Paragraph .35 of AS 2810, *Evaluating Audit Results*, requires the auditor to obtain sufficient appropriate evidential matter about assertions in the financial statements of material significance or else to qualify or disclaim his or her opinion on the statements. Paragraph .07~~24~~ of AS 3105~~1~~, ~~*Reports on Audited Financial Statements*~~ *Departures from Unqualified Opinions and Other Reporting Circumstances*, states that, "When restrictions that significantly limit the scope of the audit are imposed by the client, ordinarily the auditor should disclaim an opinion on the financial statements." Also, AS 2805, *Management Representations,* requires the auditor to obtain written representations from management. AS 2805.06 states that specific representations should relate to the following matters, "availability of all financial records and related data," and AS 2805.08 states that a materiality limit does not apply to that representation. AS 2805.13 states that "management's refusal to furnish a written representation" constitutes a limitation on the scope of the audit sufficient to preclude an unqualified opinion.

* * *

PCAOB
Public Company Accounting Oversight Board

## APPENDIX 3

### *Characteristics of Self-Identified EGCs*

The PCAOB has been monitoring implementation of the Jumpstart Our Business Startups Act ("JOBS Act") in order to understand the characteristics of EGCs[1] and inform the Board's consideration of whether it should request that the SEC apply the reproposed standards and related amendments to audits of EGCs. To assist commenters, the Board is providing the following information regarding EGCs that it has compiled from public sources.[2]

As of November 15, 2015, based on the PCAOB's research, there were 2,229 companies that had filed audited financial statements and identified

---

[1] Pursuant to the JOBS Act, an EGC is defined in Section 3(a)(80) of the Exchange Act. In general terms, an issuer qualifies as an EGC if it has total annual gross revenue of less than $1 billion during its most recently completed fiscal year and its first sale of common equity securities pursuant to an effective registration statement under the Securities Act of 1933 ("Securities Act") did not occur on or before December 8, 2011. *See* JOBS Act Section 101(a), (b), and (d). An issuer retains its EGC status until the earliest of: (i) the first year after it has total annual gross revenue of $1 billion or more (as indexed for inflation every five years by the SEC); (ii) the end of the fiscal year after the fifth anniversary of its first sale of common equity securities under an effective Securities Act registration statement; (iii) the date on which the company issues more than $1 billion in non-convertible debt during the prior three year period; or (iv) the date on which it is deemed to be a "large accelerated filer" under the Exchange Act (generally, an entity that has been public for at least one year and has an equity float of at least $700 million).

[2] The staff of the PCAOB's Office of Research and Analysis identified the population of EGCs using Audit Analytics data on companies that, as of the calculation date, self-identified as EGCs in SEC filings. The data excludes companies that, as of the calculation date, had (i) terminated their Exchange Act registration, (ii) had their Exchange Act registration revoked, or (iii) withdrawn their registration statement before effectiveness and, in each case, did not subsequently file audited financial statements with the SEC. It also excludes companies that reported more than $1 billion in annual revenues or self-identified as a large accelerated filer. PCAOB staff has not otherwise attempted to validate these companies' self-identification as EGCs.

themselves as EGCs in at least one SEC filing. Among the 2,229 EGCs, there were 259 that did not file audited financial statements within the 18 months preceding November 15, 2015.[3] Because of lack of current data regarding these 259 companies, the information below focuses on the remaining 1,970 companies that filed audited financial statements with the SEC in the 18 months preceding November 15, 2015.

**General Characteristics**

These companies operate in diverse industries. The five most common Standard Industrial Classification ("SIC") codes applicable to these companies are: (i) pharmaceutical preparations; (ii) blank check companies; (iii) real estate investment trusts; (iv) prepackaged software services; and (v) computer processing and data preparation.

The five SIC codes with the highest total assets as a percentage of the total assets of the population of EGCs are codes for: (i) real estate investment trusts; (ii) state commercial banks; (iii) crude petroleum or natural gas; (iv) national commercial banks; and (v) pharmaceutical preparations. Total assets of EGCs in these five SIC codes represent approximately 45 percent of the total assets of the population of EGCs. EGCs in two of these five SIC codes (state commercial banks and national commercial banks) represent financial institutions, and the total assets for these two SIC codes represent approximately 17 percent of the total assets of the population of EGCs.

[3] Approximately 24 percent of these 259 companies are blank check companies according to the Standard Industrial Classification (“SIC”) code. This is the most common SIC code among the 259 companies; the next most common SIC code (6 percent) is that for metal mining. The remaining SIC codes each represent less than 5 percent. Approximately 80 percent of these 259 companies had an explanatory paragraph included in the last auditor's report filed with the SEC stating that there is substantial doubt about the company's ability to continue as a going concern. Approximately 10 percent of these 259 companies were audited by firms that were annually inspected firms in 2015 and 90 percent of these 259 companies were audited by firms that are subject to inspection at least every three years by the PCAOB, containing U.S. firms (85 percent), firms that are non-U.S. affiliates of annually inspected firms in 2015 (3 percent), and other non-U.S. firms (2 percent).

PCAOB
Public Company Accounting Oversight Board

Approximately 14 percent of the EGCs had identified themselves in Securities Act registration statements and had not reported under the Exchange Act as of November 15, 2015. Approximately 74 percent of EGCs began reporting under the Exchange Act in 2012 or later. The remaining 12 percent of these companies have been reporting under the Exchange Act since 2011 or earlier.

Approximately 56 percent of EGCs that filed an Exchange Act filing indicated that they were smaller reporting companies.[4]

Approximately 41 percent (802) of the 1,970 EGCs have common equity securities listed on a U.S. national securities exchange ("publicly listed EGCs").[5] These EGCs represent approximately 16 percent of all publicly listed companies and approximately 1 percent of the total market capitalization of publicly listed companies.

---

[4] The SEC adopted its current smaller reporting company rules in *Smaller Reporting Company Regulatory Relief and Simplification*, Securities Act Release No. 33-8876 (December 19, 2007). Generally, companies qualify to be smaller reporting companies and, therefore, have scaled disclosure requirements if they have less than $75 million in public equity float. Companies without a calculable public equity float will qualify if their annual revenues were less than $50 million during the most recently completed fiscal year for which audited financial statements are available. Scaled disclosure requirements generally reduce the compliance burden of smaller reporting companies compared to other issuers.

[5] To compare the publicly-listed EGC population with the broader public equity market, the PCAOB compared the data compiled with respect to the population of companies that identified themselves as EGCs with a benchmark derived from data from Standard & Poor's on companies that have at least one class of common equity securities (common-ordinaries, units with a common share component, and depository receipts) listed on a U.S. national securities exchange. The benchmark population is limited to companies that are not investment companies and that, according to Audit Analytics data, have filed audited financial statements with the SEC in the 18 months preceding the calculation date. From a total population of 5,119 such companies, the 802 publicly listed EGCs are excluded to avoid double counting. Using this methodology, PCAOB staff identified 4,317 companies in the benchmark population (referred to as "other publicly listed companies") as of November 15, 2015.

**Financial Data**

The information in this section is derived from the most recent audited financial statements filed as of November 15, 2015 for the 1,970 EGCs. The descriptions in this section also include tabular information for all EGCs, EGCs that are not publicly listed ("non-listed EGCs"), and publicly listed EGCs. To enable comparison of publicly listed EGCs with the broader public equity market, the information also includes data about the other publicly listed companies.

***Assets***. The reported assets of all EGCs ranged from zero to approximately $12.9 billion. The average and median reported assets were approximately $223 million and $3.4 million, respectively. Publicly listed EGCs had significantly higher average and median assets (approximately $468 million and $141 million, respectively) as compared to non-listed EGCs (approximately $55 million and $100,000, respectively). Other publicly listed companies had even higher average and median assets (approximately $ 18.5 billion and $1.3 billion, respectively).

| **Reported Assets ($ millions)** | **All EGCs** | **Non-listed EGCs** | **Publicly Listed EGCs** | **Other Publicly Listed Companies** |
|---|---|---|---|---|
| Minimum | 0.0 | 0.0 | 0.0 | 0.0 |
| Maximum | 12,859.4 | 12,859.4 | 9,798.7 | 2,634,139.0 |
| Average | 223.0 | 54.6 | 468.3 | 18,486.8 |
| Median | 3.4 | 0.1 | 141.4 | 1,299.2 |

***Revenues***. The reported revenues ranged from zero to approximately $926 million. The average and median reported revenue were approximately $55 million and $81,000, respectively. Publicly listed EGCs had significantly higher average and median revenues (approximately $118 million and $33 million, respectively) as compared to non-listed EGCs (approximately $12 million and $0, respectively). Other publicly listed companies had even higher average and median revenues (approximately $5.1 billion and $580 million, respectively).

| **Reported Revenues ($ millions)** | **All EGCs** | **Non-listed EGCs** | **Publicly Listed EGCs** | **Other Publicly Listed Companies** |
|---|---|---|---|---|
| Minimum | 0.0 | 0.0 | 0.0 | 0.0 |
| Maximum | 926.4 | 910.2 | 926.4 | 485,651.0 |
| Average | 54.9 | 11.5 | 118.2 | 5,124.2 |
| Median | 0.081 | 0.0 | 33.2 | 579.6 |

PCAOB
Public Company Accounting Oversight Board

***Companies Reporting Zero Revenues***. The table below provides information about the percentage of all EGCs and the other categories of companies that reported zero revenues.

| | All EGCs | Non-listed EGCs | Publicly Listed EGCs | Other Publicly Listed Companies |
|---|---|---|---|---|
| Companies Reporting Zero Revenues | 42% | 56% | 21% | 2% |

***Companies Reporting Revenues Greater than Zero***. The table below provides information about the percentage of all EGCs and the other categories of companies that reported revenues greater than zero.

| | All EGCs | Non-listed EGCs | Publicly Listed EGCs | Other Publicly Listed Companies |
|---|---|---|---|---|
| Companies Reporting Revenues Greater than Zero | 58% | 44% | 79% | 98% |

The average reported assets and revenues of EGCs that reported revenues greater than zero were approximately $371 million and $94 million, respectively. Publicly listed EGCs had significantly higher average assets and revenues (approximately $573 million and $149 million, respectively) as compared to non-listed EGCs (approximately $121 million and $26 million, respectively). Other publicly listed companies had even higher average assets and revenues (approximately $18.9 billion and $5.2 billion, respectively).

| Reported Assets and Revenues ($ millions) | All EGCs | Non-listed EGCs | Publicly Listed EGCs | Other Publicly Listed Companies |
|---|---|---|---|---|
| **Assets** | | | | |
| Minimum | 0 | 0 | 0 | 0 |
| Maximum | 12,859.4 | 12,859.4 | 9,798.7 | 2,634,139.0 |
| Average | 370.8 | 121.4 | 573.3 | 18,889.6 |
| Median | 71.0 | 1.1 | 200.8 | 1,371.7 |

| | | | | |
|---|---|---|---|---|
| **Revenues** | | | | |
| Minimum | 0.00002 | 0.00002 | 0.00391 | 0.002 |
| Maximum | 926.4 | 910.2 | 926.4 | 485,651.0 |
| Average | 93.9 | 25.9 | 149.0 | 5,237.0 |
| Median | 12.7 | 0.5 | 67.2 | 602.9 |

**Going Concern Reporting**

The table below provides information about the percentage of all EGCs and the other categories of companies that had an explanatory paragraph included in the auditor's report on their most recent audited financial statements stating that there is substantial doubt about the company's ability to continue as a going concern.

| | **All EGCs** | **Non-listed EGCs** | **Publicly Listed EGCs** | **Other Publicly Listed Companies** |
|---|---|---|---|---|
| Companies With Going Concern Paragraph | 49% | 76% | 9% | 3% |

**Management Reporting on ICFR**

Generally, EGC management is required to report on the effectiveness of internal control over financial reporting ("ICFR"), although auditor attestation is not required.[6] Approximately 50 percent of the 1,970 EGC companies provided a management report on ICFR. Of those companies that provided a management report, approximately 53 percent stated in the report that the company's ICFR was not effective. Publicly listed EGCs reported material weaknesses at a significantly lower rate (14 percent) as compared to non-listed EGCs (71

[6] The management report on ICFR is required in annual reports, starting with the second annual report filed by the company. *See* Instruction 1 to Item 308(a) of Regulation S-K. EGCs that have not yet filed at least one annual report are therefore not required to provide it. EGCs are exempt from the requirement for auditor attestation of ICFR. *See* Section 404(b) of the Sarbanes-Oxley Act.

percent). Other publicly listed companies reported material weaknesses at an even lower rate (7 percent).

| **ICFR Reporting** | **All EGCs** | **Non-listed EGCs** | **Publicly Listed EGCs** | **Other Publicly Listed Companies** |
|---|---|---|---|---|
| Number of Companies | 1,970 | 1,168 | 802 | 4,317 |
| Companies with Management ICFR Report | 993 (50%) | 680 (58%) | 313 (39%) | 4,157 (96%) |
| Material Weakness in ICFR Noted by Management | 525 (53%) | 480 (71%) | 45 (14%) | 284 (7%) |

**Auditors**

Approximately 39 percent of EGCs were audited by firms that were annually inspected in 2015 and 61 percent of EGCs were audited by firms that are subject to inspection at least every three years by the PCAOB, containing U.S. firms (48 percent), firms that are non-U.S. affiliates of annually inspected firms in 2015 (9 percent), other non-U.S. firms (4 percent).

# White Paper on the Auditor's Reports of Certain UK Companies that Comply with International Auditing Standard (UK and Ireland) 700 (Revised June 2013)

Patrick Kastein, CFA[1]
Associate Director
Office of Research and Analysis
Public Company Accounting Oversight Board

Saad Siddiqui, PhD, CPA
Senior Economic Analyst
Center for Economic Analysis
Public Company Accounting Oversight Board

[1] This white paper was prepared by PCAOB staff and provides summary data and factual information for one of the Board's current standard-setting projects. The views expressed herein are those of the authors and do not necessarily reflect the views of the Board, individual Board members or PCAOB staff.

## SUMMARY

This white paper provides information about the auditor's reports of certain UK companies for the first year of implementation of expanded auditor reporting in the UK. The UK Financial Reporting Council ("FRC") revised International Standard on Auditing (UK and Ireland) 700, *The Independent Auditor's Report on Financial Statement*, (Revised June 2013) ("UK ISA 700 (Revised)") to require that auditor's reports for a select group of companies[2] include a description of the risks of material misstatement identified by the auditor, and how the audit scope addresses each risk.

Our observations about the expanded auditor's reports of these UK companies are intended to inform the PCAOB's standard-setting project on the auditor's reporting model. On August 13, 2013, the Public Company Accounting Oversight Board ("PCAOB" or "Board") issued for public comment a proposed auditing standard and related amendments on the auditor's report. The proposed auditor reporting standard was intended to increase the informational value of the auditor's report to promote the usefulness and relevance of the audit and the related auditor's report. For example, the proposed auditing standard, among other things, required auditors to communicate "critical audit matters" ("CAMs") that are specific to each audit. At the same time, the Board sought a balanced approach that would not unduly burden the financial reporting process. The approach to CAMs, as described in the Board's 2013 proposal, is different from the approach to expanded auditor reporting in the UK. Our observations related to UK auditor's reports reflect only the approach taken to comply with UK ISA 700 (Revised).[3]

We reviewed 225 annual reports published by FTSE 350 companies with a fiscal year end date from September 27, 2013 to December 31, 2013. Among the auditor's reports contained in these annual reports obtained from corporate websites, 218 included the expanded reporting required under UK ISA 700 (Revised) (the "observable group").[4] The analysis presented in this report is limited to our factual observations of the expanded auditor's reports and does not make causal inferences about the requirements of UK ISA 700 (Revised). Based on our review of the expanded auditor's reports required under UK ISA 700 (Revised) and the auditor's reports issued in the prior fiscal year, we addressed the following questions:

[2] The expanded auditor reporting requirements of UK ISA 700 (Revised) apply to entities that report on the application of the UK Corporate Governance Code (see Paragraph 19A of UK ISA 700 (Revised)). In the UK, these are companies with a Premium listing of equity shares on the London Stock Exchange. This population includes FTSE 350 companies.

[3] The FRC also released its own reports covering a review of the first and second year of extended auditor's reports. See FRC, March 2015- Extended Auditor's Reports, A Review of Experience in the First Year, and January 2016- Extended Auditor's Reports, A Further Review of Experience.

[4] We observed that seven of the 225 annual reports did not include the additional information related to audit risk and scope in the auditor's reports. The auditor's reports for all seven companies where issued in jurisdictions outside the UK and Ireland.

- *What new information did the expanded auditor's reports provide to users of the financial statements about the risks of material misstatement and audit scope compared to the prior year's auditor's report?*

  The new information in expanded auditor's reports included the descriptions of assessed risks of material misstatement identified by the principal auditor as having the greatest effect on overall audit strategy. Auditor descriptions of how the audit scope addressed each assessed risk also represented new information in the expanded auditor's reports. These descriptions provided users of the financial statements with information on how the audit scope addressed each risk topic, and in some instances, what audit procedures were performed.

- *What was the presentation and style of the expanded auditor's reports with respect to the descriptions of the assessed risks of material misstatement and how the scope of the audit addressed each risk?*

  Risk descriptions were presented in one of three formats: in single sentences, in paragraphs, or in a summary table format. Descriptions of how scope of the audit addressed each risk were either presented next to the risk description or in a separate section of the auditor's report.

- *What were the most frequently mentioned risk topics in the expanded auditor's reports?*

  The five most frequently mentioned risk topics were related to: revenue recognition (59% of the companies), tax (43% of the companies), goodwill and intangible assets – valuation and impairment (42% of the companies), accounts receivable and investments (35% of the companies), and management override of internal controls (30% of the companies).

- *How many risk topics were included in the expanded auditor's reports?*

  The average number of risk topics included in an auditor's report was four. Companies with lower market capitalizations (under £2 billion) included three risk topics on average, and auditor's reports for companies with larger market capitalizations (£5 billion and over) included five risk topics on average.

- *Was there a significant difference in the amount of time auditors took to issue the expanded auditor's reports compared to the auditor's reports issued for the prior fiscal year?*

  The expanded auditor's reports were issued on average in 63 days as compared to an average of 64 days for prior year's reports which we found not to be a statistically significant difference.

- *Was there a significant difference in audit fees for the year expanded auditor's reports took effect compared to the prior fiscal year?*

  We did not find a statistically significant difference in audit fees. The average audit fee increased 4.6%; however, the median change was 0.0% with a majority of the companies (53%) reporting no change or a decrease in audit fees.[5]

[5] We caution readers not to interpret the measures of audit fees change as an assessment of the impact of the revised UK ISA 700 (Revised) on audit fees. While the UK ISA 700 (Revised) may have been a consideration during the negotiation of audit fees, it would not have been the only factor to account for the fee changes measured for this paper.

## BACKGROUND

In 2013, the UK's FRC adopted new requirements for annual reports published by Premium listed companies[6] on the London Stock Exchange. The new requirements reflect changes to the UK Corporate Governance Code[7] and UK auditing standards[8], and impact the audit committee report and the independent auditor's report, respectively, both of which are contained in UK companies' annual reports. The new requirements apply to FTSE 350 companies, among others, and became effective for financial statement fiscal years beginning on or after October 1, 2012 (i.e., September 30, 2013 fiscal year end).

The UK Corporate Governance Code (the "Code") requires a company's board of directors to "explain in the annual report their responsibility for preparing the annual report and accounts, and state that they consider the annual report and accounts, taken as a whole, is fair, balanced and understandable and provides the information necessary for shareholders to assess the company's performance, business model and strategy."[9] In addition, the Code requires audit committee reports to include a description of "the significant issues that the committee considered in relation to the financial statements, and how these issues were addressed."[10]

Paragraph 19A of the UK ISA 700 (Revised)[11] requires the auditor's reports, among other things, to:

- "Describe those assessed risks of material misstatement that were identified by the auditor and which had the greatest effect on: the overall audit strategy; the allocation of resources in the audit; and directing the efforts of the engagement team;" and

- "Provide an overview of the scope of the audit, including an explanation of how such scope addressed the assessed risks of material misstatement disclosed"

In order to be useful to users of the financial statements, paragraph 19B of UK ISA 700 (Revised) requires, in part, the assessed risk of material misstatement and explanation of the audit scope presented in the auditor's report to be:

"[I]n a manner that complements the descriptions of significant issues relating to the financial statements, required to be set out in the separate section of the annual report describing the work of the audit committee in discharging its responsibilities. The auditor seeks to coordinate descriptions of overlapping topics addressed in these communications, to avoid duplication of reporting about them, whilst having appropriate regard to the separate responsibilities of the auditor and the board for directly communicating information primarily in their respective domains." (See Appendix A)

---

[6] According to the London Stock Exchange website, "A Premium Listing means the company is expected to meet the UK's highest standards of regulation and corporate governance."
[7] See FRC, September 2012 - UK Corporate Governance Code
[8] See FRC, June 2013 - International Standard on Auditing (UK and Ireland) 700 – June 2013
[9] See Code Provision C.1.1 of the UK Corporate Governance Code
[10] See Code Provision C.3.8 of the UK Corporate Governance Code
[11] See Paragraph 19A of UK ISA 700 (Revised)

In reviewing the initial period of implementation of UK ISA 700 (Revised), the focus of our analysis was limited to observations based on public sources of data related to the reporting process. The UK company annual reports provide information that allows us to identify features of the auditor's risk topics descriptions such as, how the risk topics were presented, how many topics were mentioned by auditors, and the extent of new information provided in the auditor's reports for users of the financial statements. We were also able to observe the amount of time it took auditors to issue the expanded auditor's reports and any changes in audit fees compared to the prior year. These observations are intended to inform the PCAOB's standard-setting project on the auditor's reporting model.

## COMPANY CHARACTERISTICS

*Market Capitalization*

Among the FTSE 350 companies, we identified 218 companies that published annual reports with a fiscal year end date from September 27, 2013 to December 31, 2013 that included expanded auditor's reports with the new risk topic descriptions required under UK ISA 700 (Revised).[12] Market capitalizations of the companies range from £81.6 million to £137.3 billion.[13] Table 1 provides additional summary measures for the companies.

**Table 1: 218 FTSE 350 companies**

| | Low | High | Mean | Median |
|---|---|---|---|---|
| Market Capitalization - millions | £ 82 | £ 137,258 | £ 7,534 | £ 1,704 |
| Sales FYE 2013 - millions(a) | £ 0 | £ 272,546 | £ 6,641 | £ 921 |
| Total Assets FYE 2013 - millions(a) | £ 39 | £ 1,613,476 | £ 37,444 | £ 1,797 |
| Audit Fees FY 2013 | £ 19,000 | £ 41,000,000 | £ 2,694,516 | £ 702,948 |

| | |
|---|---|
| # of companies audited by a Big Four firm: | 210 |
| # of companies audited by a Non-Big Four firm: | 8 |
| # of Companies that Changed Auditors from FY2012 to FY 2013: | 7 |

(a) The reporting currency for the 218 companies was one of four currencies: British Pound, Euro, US Dollar, or Georgian Lari. Sales and total assets reported in Euros, US Dollar, or Georgian Lari were converted into British Pounds at their closing December 31, 2013 exchange rates, respectively 0.831, 0.604, and 0.349.

For this analysis, we reviewed the observable group in its entirety, and in four sub-groups based on the company's market capitalization. This approach allowed for analysis of whether our observations were consistent for companies of different sizes. We identified natural thresholds for market capitalization that allowed us to divide the 218 companies into four similarly-sized groups. The four groups have the following market capitalization thresholds:

**Group A** – market capitalization under £1 billion (63 companies),
**Group B** – market capitalization equal to or greater than £1 billion and under £2 billion (52 companies),
**Group C** – market capitalization equal to or greater than £2 billion and under £5 billion (59 companies), and
**Group D** – market capitalization £5 billion and over (44 companies)

[12] September 30, 2013 fell on a Monday. We identified four companies with 2013 fiscal year end dates of September 27th, 28th or 29th, and included these companies in our study due to their immediate proximity to the effective date.
[13] Market capitalization for each company is as of January 7, 2014, and was obtained from Capital IQ using London Stock Exchange ticker symbols.

*Industry Breakdown*

For the companies in the observable group, the industry sector weightings are similar to the sector weightings for the overall FTSE 350 (see Table 2). Among the 75 financial sector companies, 32 are from the Asset Manager and Custody Bank industry (see Appendix B for a primary industry breakdown of the 218 companies).

**Table 2: Industry Sector Breakdown - 218 FTSE 350 Companies**

| | Observable Group | | All FTSE 350 Companies | |
|---|---|---|---|---|
| Industry Sector | Count | % of Total | Count | % of Total |
| Consumer Discretionary | 35 | 16% | 62 | 18% |
| Consumer Staples | 7 | 3% | 20 | 6% |
| Energy | 15 | 7% | 16 | 5% |
| Financials | 75 | 34% | 116 | 33% |
| Healthcare | 8 | 4% | 12 | 3% |
| Industrials | 37 | 17% | 60 | 17% |
| Information Technology | 14 | 6% | 22 | 6% |
| Materials | 24 | 11% | 30 | 8% |
| Telecommunications | 1 | 0% | 7 | 2% |
| Utilities | 2 | 1% | 8 | 2% |
| Total | 218 | 100% | 353 | 100% |

*Source: Capital IQ*

A large majority of the industry sector weightings for the companies within each market capitalization group are within two percentage points of the weightings for all FTSE 350 companies. Only a few notable variances in the industry sector weightings were observed. These include consumer discretionary and energy in Group B, and consumer staples and financials in Group D (see Appendix C).

*Auditors*

The auditor's reports included in annual reports published by the 218 companies were issued by affiliates of the Big Four global networks, BDO International, and Grant Thornton International Limited (see Table 3). Member firms of Deloitte Touche Tohmatsu Limited issued the most auditor's reports (63).

**Table 3: Auditors of 218 Companies in the FTSE 350**

| **Auditor** | **Number of Companies** | **% of Total** |
|---|---|---|
| BDO International | 7 | 3% |
| Deloitte Touche Tohmatsu Limited | 63 | 29% |
| EY Global Limited | 39 | 18% |
| Grant Thornton International Limited | 1 | 0% |
| KPMG International Cooperative | 52 | 24% |
| PricewaterhouseCoopers International Limited | 56 | 26% |
| | 218 | 100% |

*Source: Company Annual Reports*

AUDITOR'S REPORT OBSERVATIONS

We collected public information about the auditor's reports from the companies' annual reports to address the following questions:

***What new information did the expanded auditor's reports provide to users of the financial statements about the risks of material misstatement and audit scope compared to the prior year's auditor's report?***

The new information in the expanded auditor's reports, as required under UK ISA 700 (Revised), included descriptions of the assessed risks of material misstatement identified by the auditor as having the greatest effect on overall audit strategy. In many, but not all instances, the annual reports also included discussions by management and the audit committee related to the risk topic identified by the auditor as an assessed risk of material misstatement. Several of the auditor's reports refer readers to the page(s) of the annual report where the location of the management and audit committee discussions can be found. (see Appendix E, Examples 2 and 3)

The new information in the expanded auditor's reports, as required under UK ISA 700 (Revised), also included descriptions of how the audit scope addressed each assessed risk. These descriptions provided users of the financial statements with information on how the audit scope addressed each risk topic, and in some instances, what audit procedures were performed. Information on audit scope was not provided elsewhere in the annual report.

***What was the presentation and style of the new auditor's reports with respect to the descriptions of risks of material misstatement and how the audit scope addressed each risk?***

We observed variation in how the auditors presented the risk topic descriptions. For example, risk descriptions were presented in one of three formats: in single sentences, in paragraphs, or in a summary table format (see Appendix E for examples of each format). The number of risk descriptions in an auditor's report ranged from one to ten.[14] While most auditor's reports included the word "risk" in the label of this section of the auditor's report, some auditors referred to this description as an "area of focus" instead (see Appendix E, Example 3).

The required descriptions of how audit scope addressed a risk (or area of focus) were presented either next to the risk topics or in another section of the auditor's report.

[14] This count is based on an auditor's discrete presentation of a risk as opposed to our count of risk topics.

### *What were the most frequently discussed risk topics in the new auditor's reports?*

Table 4 provides a list of the ten most frequently mentioned risk topics.[15] These topics represent 690 of the 836 risks descriptions in the auditor's reports of the observable group. The percentages in the far right column show that the auditor's reports did not consistently list the same risk descriptions.

**Table 4: Ten Risk Topics Mentioned Most Frequently**

| Risk Topic | Number of Auditor's Reports with Risk Topic | % of Auditor's Reports with Risk Topic |
|---|---|---|
| Revenue Recognition | 129 | 59% |
| Tax | 93 | 43% |
| Goodwill and Intangible Assets - Valuation and Impairment | 92 | 42% |
| Accounts Receivables and Investments Valuation | 77 | 35% |
| Management Override of Internal Controls[(a)] | 66 | 30% |
| Fixed Assets - Valuation and Impairment | 58 | 27% |
| Off-balance Sheet Liabilities | 47 | 22% |
| Pension and Other Post-Retirement | 36 | 17% |
| Liabilities and Reserves | 33 | 15% |
| Mergers & Acquisitions | 31 | 14% |

(a) All 56 auditor's reports issued by one firm included this risk topic.

We observed that the ten risk topics in Table 4 were also common to each of the four market capitalization sub-groups. In additional to the topics in Table 4, there were three additional risk topics that were among the top ten topics for the sub-groups: Asset Disposals (see Appendix F, Table 4C), Capitalization of Expenditures Issues (see Appendix F, Table 4A), and Financial Derivatives/Hedging Issues (see Appendix F, Table 4D). These risk topics were ranked 11, 12, and 13 respectively for the overall observable group.

[15] The number of risk descriptions in the auditor's reports (where there is a discrete description for each risk) ranged from one to ten. The descriptions were not presented with a consistent level of granularity. As a result, it was necessary for us to map these risk descriptions into risk topics to facilitate a summary analysis. For example, when describing impairment of goodwill and intangible assets, some auditors combined them into a single topic, while others separated them into two discrete topics, one for goodwill impairment and one for intangible assets impairment. In our analysis, we grouped all these descriptions into one topic – Goodwill and Intangible Assets – Valuation and Impairment.

***How many risk topics were included in the new auditor's reports?***

Among the observable group, auditors identified one to eight risk topics per company. Most auditor's reports contained three to five risk topics, and the average was four. A breakdown of the number of risks described in each of the 218 auditor's reports, based on the risk topics we identified, is provided in Table 5.

**Table 5: Number of Auditor Risk Topics Per Auditor's report**

| Number of Risk Topics in an Auditor's Report | Number of Auditor's Reports |
|---|---|
| 1 | 12 |
| 2 | 23 |
| 3 | 54 |
| 4 | 62 |
| 5 | 44 |
| 6 | 15 |
| 7 | 6 |

|---|---|
| Mean Number of Risk Topics per Auditor's report: | 4 |
| Median Number of Risk Topics per Auditor's report: | 4 |

Among the four market capitalization groups, companies with market capitalizations under £2 billion have an average of three risk topics in their auditor's reports (see Appendix G, Tables 5A and 5B). Companies with market capitalizations of £5 billion or more have an average of five risk topics (see Appendix G, Table 5D).

***Was there a significant difference in the amount of time auditors took to issue the expanded auditor's reports compared to the auditor's reports issued for the prior fiscal year?***

Using the auditor's report date, we measured the number of days it took auditors to issue a financial statement auditor's report.[16] We found that on average auditors took 63 days to issue the new expanded auditor's reports, one day less than the average of 64 days for the prior year's reports. There are 210 companies in the observable group with auditor's reports for the past three years ("adjusted observable group").[17]

Table 6 provides summary measures for the 210 companies. We found no statistically significant[18] difference in the average time to issue an auditor's report after implementation of the new rules.

**Table 6: Number of Days from a Company's Fiscal Year End Date to Auditor's Report Date - 210 Companies in the FTSE 350**

| | Days to Issue Auditor's report | | |
|---|---|---|---|
| | Fiscal Year 2013 | Fiscal Year 2012 | Fiscal Year 2011 |
| Mean | 63 | 64 | 65 |
| Median | 60 | 63 | 62 |
| Range - low | 28 | 29 | 25 |
| Range - high | 119 | 120 | 121 |

*Source: Company Annual Reports*

We also found that, for each market capitalization group, the new expanded auditor's reports were issued in fewer days than it took for the prior year's auditor's report (see Appendix H, Tables 6A to 6D), but these changes were not statistically significant.

[16] Days to Issue Auditor's report is calculated as the number of days between the company's fiscal year-end date and the auditor's report date.
[17] Among the observable group, eight companies completed their initial public offerings in calendar years 2012 or 2013. As a result, annual reports for prior years are not available for these eight companies, so they were excluded from the analysis.
[18] A statistical tool, Student's t-test, shows that fiscal year 2013 and prior years' data are not statistically different from each other (see Appendix J).

***Was there a significant difference in audit fees for the year expanded auditor's reports took effect compared to the prior fiscal year?***

Among the 210 companies in the adjusted observable group, the average audit fees increased by 4.6%,[19] but the median change was 0.0% as fewer than half (99 companies) reported an increase in audit fees.[20] The remaining companies reported no change in audit fees (59 companies) or a decrease in audit fees (52 companies).

Table 7 provides a summary of changes in audit fees for the adjusted observable group. We found no statistically significant[21] difference in audit fees reported for fiscal year 2013 and audit fees reported for the prior fiscal year.

**Table 7: Changes in Audit Fees - 210 Companies in the FTSE 350**

| | % Change in Audit Fees |
|---|---|
| Mean | 4.6% |
| Median | 0.0% |
| Range – low | -46.6% |
| Range – high | 91.0% |

|---|---|
| Number of Companies with an Increase in Audit Fees: | 99 |
| Number of Companies with No Change in Audit Fees: | 59 |
| Number of Companies with a Decrease in Audit Fees: | 52 |

*Source: Company Annual Reports, Capital IQ*

For the four market capitalization groups, we found in Group C (market capitalization greater than or equal to £2 billion and under £5 billion) that 64% of the companies reported an increase in audit fees. As a result, the mean and median changes for this group were higher than those observed for Groups A, B, and D (see Appendix I). For

[19] Two companies with the largest increases in audit fees in the adjusted observable group also reported events during the fiscal year 2013 that may have contributed to the change in their audit fees. One of these companies made a large acquisition and changed auditors (the reported audit fees increased by 91.1%); and the other company completed a large acquisition in 2013, which contributed to an increase in total assets by approximately 50% (the reported audit fees increased by 82.4%). When the audit fees increases of the above two companies are removed from the analysis, the adjusted average increase in audit fees for the remaining companies in the adjusted observable group was 3.8%.

[20] The percent change in audit fees needs to be interpreted with caution. We found many instances in which audit fees were not reported to the single-unit value. For example, a company with £515,245 in actual audit fees alternatively could report £0.5 million or £515 thousand in its annual report. Audit fee changes in this report are based solely on the as-reported amounts. .

[21] A statistical tool, Student's t-test, shows that fiscal year 2013 and prior year's data are not statistically different from each other (see Appendix K).

the other three groups – A, B, and D – a majority of the companies reported no change or a decrease in audit fees. We did not find statistically significant differences in audit fees for these three groups. (See Appendix K)

The adjusted observable group includes 18 investment trusts, most of which have market capitalizations under £1 billion. Since audits of investment trusts may differ from audits of operating companies in the index, Tables 7A to 7D in Appendix I provide a breakdown of changes in audit fees for the 18 investment trusts versus the operating companies.

We caution readers not to interpret the measures in Table 7 as an assessment of the impact of the revised UK ISA 700 (Revised) on audit fees. Academic research has shown that many factors affect the amount of fees paid by listed companies for a financial statement audit. For example, Hay, Knechel, and Wong (2006) [22] evaluated and summarized 147 research studies on audit fees conducted over a 27-year period and published in more than 20 countries and used meta-analysis to test the combined effect of the most commonly used independent variables, including attributes related to the auditor, audit client and audit engagement. The meta-analysis found mixed results on how independent variables affect audit fees, including conflicting results on the relationship between corporate governance and audit fees.[23] In addition, the FRC simultaneously implemented new requirements in the UK that resulted in changes to the audit committee report which may also impact audit fees. Also, we are aware that the UK experienced an inflation rate of 2.0% for calendar year 2013.[24] Therefore, the measures in Table 7 should not be viewed as an observation of the change in audit fees solely due to the implementation of UK ISA 700 (Revised).

[22] Hay, David C., Knechel, W. Robert, Wong, Norman, *Audit Fees: Meta-analysis of the effect of Supply and Demand Attributes*, Contemporary Accounting Research Vol. 23 No. 1 (Spring 2006) pp.141-91. Meta-Analysis is a quantitative analysis of several separate but similar experiments or studies in order to test the pooled data for statistical significance.

[23] In a subsequent research paper published in 2013, Hay used meta-analysis to examine the accumulated effect of the drivers of audit fees identified in the 2006 study and found, among other things, that corporate governance variables are positively associated with audit fees. *See* Hay, David, *Further Evidence from Meta-Analysis of Audit Fee Research*, International Journal of Auditing 17: 162-176 (2013).

**Appendix A:** International Standard on Auditing (UK and Ireland) 700 – June 2013, paragraphs 19A and 19B

*Entities that Report on Application of the UK Corporate Governance Code*

19A. In the case of entities[6] that are required, and those that choose voluntarily, to report on how they have applied the UK Corporate Governance Code, or to explain why they have not, the auditor's report shall:

(a) Describe those assessed risks of material misstatement that were identified by the auditor and which had the greatest effect on: the overall audit strategy; the allocation of resources in the audit; and directing the efforts of the engagement team;

(b) Provide an explanation of how the auditor applied the concept of materiality in planning and performing the audit. Such explanation shall specify the threshold used by the auditor as being materiality for the financial statements as a whole; and

(c) Provide an overview of the scope of the audit, including an explanation of how such scope addressed the assessed risks of material misstatement disclosed in accordance with (a) and was influenced by the auditor's application of materiality disclosed in accordance with (b). (Ref. Para A13A – A13C)

19B. In order to be useful to users of the financial statements, the explanations of the matters required to be set out in the auditor's report by paragraph 19A shall be described:

- So as to enable a user to understand their significance in the context of the audit of the financial statements as a whole and not as discrete opinions on separate elements of the financial statements.
- In a way that enables them to be related directly to the specific circumstances of the audited entity and are not, therefore, generic or abstract matters expressed in standardised language.
- In a manner that complements the description of significant issues relating to the financial statements, required to be set out in the separate section of the annual report describing the work of the audit committee in discharging its responsibilities. The auditor seeks to coordinate descriptions of overlapping topics addressed in these communications, to avoid duplication of reporting about them, whilst having appropriate regard to the separate responsibilities of the auditor and the board for directly communicating information primarily in their respective domains.

[6] In the UK, these include companies with a Premium listing of equity shares regardless of whether they are incorporated in the UK or elsewhere. In Ireland, these include Irish incorporated companies with a primary or secondary listing of equity shares on the Irish Stock Exchange.

**Appendix E:** Examples of Auditor's Report Risk Description Presentations

1. Single sentence

## Our assessment of risks of material misstatement

The assessed risks of material misstatement described below are those that had the greatest effect on our audit strategy, the allocation of resources in the audit and directing the efforts of the engagement team:

- the assessment of the carrying value of goodwill and intangible assets;
- the valuation of inventory including appropriateness of judgements applied within the obsolescence provision; and
- the recoverability of trade receivables.

2. Paragraph

**2. Our assessment of risks of material misstatement**

The risks of material misstatement detailed in this section of this report are those risks that we have deemed, in our professional judgement, to have had the greatest effect on: the overall audit strategy; the allocation of resources in our audit; and directing the efforts of the engagement team. Our audit procedures relating to these risks were designed in the context of our audit of the financial statements as a whole. Our opinion on the financial statements is not modified with respect to any of these risks, and we do not express an opinion on these individual risks.

In arriving at our audit opinion above on the Group financial statements, the risks of material misstatement that had the greatest effect on our Group audit were as follows:

Assessment of goodwill for impairment (€317.2m)

*Refer to page 35 (Audit Committee Report), page 75 (accounting policy) and pages 88 and 89 (financial disclosures)*

*The risk*

There is a risk that the carrying value of the Group's goodwill balance may not be recovered from future cash flows. As detailed in the summary of significant accounting policies on page 75, an impairment review of goodwill is performed at each reporting date by the Group. There is inherent uncertainty involved in preparing forecasts and discounted future cash flow reports for this purpose and significant judgement is involved in relation to the assumptions used in the Group's goodwill impairment model.

*Our response*

In this area, our audit procedures included, among others, interrogating the Group's goodwill impairment model, evaluating the assumptions and methodologies used by the Group, in particular those relating to revenue growth, operating profit and the discount rate and terminal growth rate applied to the forecasted cash flows in the model. We compared the Group's assumptions with externally derived data as well as our own assessment in relation to key inputs into the model. We examined the sensitivity analysis performed by Group Finance management and performed our own sensitivity analysis around the key assumptions. We also assessed whether the disclosures in note 10 presented the Group's assumptions in relation to goodwill impairment and the sensitivities of the outcome of the impairment assessment appropriately.

3. Summary table

*Areas of particular audit focus*

In preparing the financial statements, the directors made a number of subjective judgements, for example in respect of significant accounting estimates that involved making assumptions and considering future events that are inherently uncertain. We primarily focused our work in these areas by assessing the directors' judgements against available evidence, forming our own judgements, and evaluating the disclosures in the financial statements.

In our audit, we tested and examined information, using sampling and other auditing techniques, to the extent we considered necessary to provide a reasonable basis for us to draw conclusions. We obtained audit evidence through testing the effectiveness of controls, substantive procedures or a combination of both.

We considered the following areas to be those that required particular focus in the current year. This is not a complete list of all risks or areas of focus identified by our audit. We discussed these areas of focus with the Audit Committee. Their report on those matters that they considered to be significant issues in relation to the financial statements is set out on page 65.

| Area of focus | How the scope of our audit addressed the area of focus |
|---|---|
| **Impairment assessment**<br>We focused on this area due to the size of the goodwill balance, and because the directors' assessment of the carrying value of the Group's cash generating units ("CGUs") involves judgements about the future results of the business and the discount rate to apply to the future cash flow forecasts. | We tested the directors' future cash flow forecasts, including comparing them to the latest Board approved budgets and comparing the current year results with the equivalent figures included in the prior year forecast. We challenged the directors' key assumptions for discount and long-term growth rates by comparing rates used to available external data. We also performed sensitivity analysis around the key drivers of the cash flow forecasts, being the discount rates, revenue growth rates and operating margins. |
| **Exceptional items**<br>Exceptional items relating to the disposal of non-core products were considered to be an area of focus due to the magnitude of the charge in the income statement. | We tested the component parts of the loss on disposal calculation to source documentation including the proceeds received, the net assets disposed of and the costs associated with the disposal, including goodwill allocation. We held detailed discussions with management regarding the methodology applied to allocate goodwill to the loss on disposal calculation and tested the supporting calculations, checking compliance with IAS 36 "Impairment of Assets". |
| **Archer Capital litigation**<br>A compensation claim against the Group by a third party for a material sum is currently the subject of legal proceedings. We focused on this issue as there is uncertainty as to the likely outcome. | We discussed this issue with internal and external legal counsel in order to understand the latest position of the proceedings and assess the directors' views as to the strength of the claim against the Group and their conclusion that no provision is required. |
| **Revenue recognition**<br>We focused on this area because the timing of revenue recognition and its presentation in the income statement has inherent complexities. These complexities mainly involve accounting for "bundled" transactions where software and maintenance and support elements are purchased together, with a portion of the fee being recognised immediately and the remainder of the revenue deferred and recognised over the contractual period.<br><br>In addition, ISAs (UK & Ireland) presume there is a risk of fraud in revenue recognition for every audit conducted under these auditing standards. | We tested the timing of the recognition of revenue, which included testing the allocation of revenue in sales transactions including both software and maintenance and support elements and that the maintenance and support element was appropriately deferred and recognised over the contractual period.<br><br>Additionally, in response to the presumptive risk of fraud, where revenue was recorded through journal entries we performed testing to establish whether a service had been provided or a sale had occurred in the financial year to support this recognition. |
| **Risk of management override of internal controls**<br>ISAs (UK & Ireland) require that we consider this and hence it is an area that receives heightened focus on every audit conducted under these auditing standards. | We assessed the overall control environment of the Group, including the arrangements for staff to "whistle-blow" inappropriate actions, and interviewed senior management and the Group's internal audit function.<br><br>We examined the significant accounting estimates and judgments relevant to the financial statements for evidence of bias by the directors that may represent a risk of material misstatement due to fraud.<br><br>We also tested manual journal entries to determine the rationale for manual adjustments. |

## Appendix F: Most Frequent Risk Topics by Market Capitalization

**Table 4A: Ten Risk Topics Mentioned Most Frequently – 63 Companies with Market Capitalization Under £1 billion**

| Risk Topic | Number of Auditor's reports with Risk Topic | % of Auditor's reports with Risk Topic |
|---|---|---|
| Revenue Recognition | 38 | 60% |
